

Goldman Sachs Fixed Income Tax Aware Separately Managed Account

A Holistic Approach to Fixed Income Investing

Seeks to maximize after-tax income by blending two core Goldman Sachs Asset Management offerings, municipal and corporate fixed income. Provides broad investment grade market exposure with prudent risk oversight.

After-Tax Income

Seeks to maximize individual tax efficiency by limiting taxable consequences, tax loss harvesting when appropriate, and accounting for state and federal tax rates.

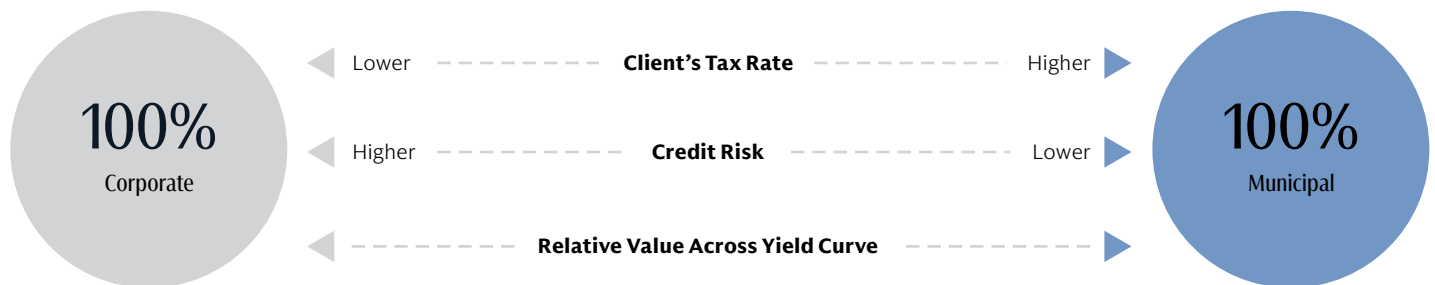

Shifting Relative Value

Flexibility to take advantage of relative value opportunities within the tax-exempt and taxable municipal bond market in addition to corporate bonds and treasuries to enhance after-tax yield.

Experienced Management

Access to a tenured portfolio management team with the flexibility and expertise to navigate today's complex fixed income market.

1. Composite inception date: May 1, 2021. Returns for periods of less than or equal to one year are not annualized. Returns for periods longer than one year are annualized, unless otherwise specified. Currency used to express Composite and Total Firm Assets, and composite and benchmark performance: USD. 2. Gross returns are provided as supplemental information. The composite net of fee returns are calculated by adjusting each monthly gross of fee composite return by the highest model fee applicable to any prospective client type, including institutional, private wealth, and wrap fee prospective clients. Actual fees and expenses may differ from those reflected in this composite presentation which would cause performance to differ. Where performance fees exist, the calculation was based on assumptions as to how the rate was applied which could differ from how it was actually charged. The model fee includes all charges, transaction costs, investment management fees, custody fees, and other administrative fees. 3. Dispersion represents an asset weighted standard deviation of annual portfolio returns. Dispersion is not considered meaningful where less than five portfolios have been in the composite for the entire year and therefore has not been presented in years where an N/A appears. 4. Total Firm Assets are presented on an annual basis. For periods through December 31, 2019, Total Firm Assets represent Composite Assets as a percentage of Total Firm Assets. For periods thereafter, Total Firm Assets are presented in millions. The presentation of historical Firm assets reflects Goldman Sachs Asset Management assets and does not include Goldman Sachs Asset Management B.V. assets through December 2022. Additional information regarding these assets is available upon request. 5. The Total Firm Asset figures above are preliminary for December 2024. 6. Benchmark Source: Custom benchmark calculated by Goldman Sachs Asset Management; Component returns are sourced from index providers. The 50% Bloomberg Managed Money Short/Intermediate (1–10 Year) / 50% Bloomberg US Intermediate Credit Bond is a custom blend of Bloomberg US Intermediate Credit Index that measures the investment grade, US dollar-denominated, fixed-rate, taxable corporate and government-related bond markets with a maturity greater than 1 year and less than 10 years. This index is Total Return, Unhedged, and expressed in USD. This benchmark is rebalanced monthly. Effective November 3, 2008, all Lehman Brothers indices have been rebranded to Barclays Capital indices. Bloomberg Municipal Managed Money Short/Intermediate Index (1–10 Year) is the 1–1–0 year component of the Bloomberg Managed Money Index. Effective March 19, 2012, all Barclays Capital indices have been rebranded to Barclays indices. Effective August 24, 2016, all Barclays indices have been rebranded to Bloomberg Barclays indices. Effective August 24th, 2021, all Bloomberg Barclays indices have been rebranded to Bloomberg indices. 7. For annual and YTD periods, the three year annualized ex-post standard deviation using monthly gross-of-fee returns is presented as of the date shown. For each period for which an annualized return is presented, the corresponding annualized ex-post standard deviation of the composite and benchmark is also provided. N/A is presented for periods where the composite does not have 36 consecutive monthly returns as of the date shown or for the full time period presented as standard deviation is not considered meaningful in these cases. 8. This information is presented as supplemental information.

GLOSSARY

Credit Quality Rating assesses the financial ability of a debt issuer to make timely payments of principal and interest. Ratings of AAA (the highest), AA, A, and BBB are investment-grade quality. Ratings of BB, B, CCC, CC, C and D (the lowest) are considered below investment grade, speculative grade, or junk bonds.

Duration is the method of determining a bond's price sensitivity given a change in interest rates. The duration for fixed income securities is calculated by determining the price movement due to a 100 basis point change in market interest rates. This calculation incorporates the change in value of any embedded options that exist.

RISK CONSIDERATIONS

GS Fixed Income Tax Aware SMA Risk Considerations: Investments in fixed-income securities are subject to credit and interest rate risks. Bond prices fluctuate inversely to changes in interest rates. Therefore, a general rise in interest rates can result in the decline in the bond's price. Credit risk is the risk that an issuer will default on payments of interest and principal. This risk is higher when investing in high yield bonds, also known as junk bonds, which have lower ratings and are subject to greater volatility. All fixed income investments may be worth less than their original cost upon redemption or maturity.

Municipal securities are subject to credit/default risk and interest rate risk and may be more sensitive to adverse economic, business, political, environmental, or other developments if it invests a substantial portion of its assets in the bonds of similar projects or in particular types of municipal securities. While interest earned on municipal securities is generally not subject to federal tax, any interest earned on taxable municipal securities is fully taxable at the federal level and may be subject to tax at the state level.

Income from municipal securities is generally free from federal taxes and state taxes for residents of the issuing state. While the interest income is tax-free, capital gains, if any, will be subject to taxes. Income for some investors may be subject to the federal Alternative Minimum Tax (AMT).

GENERAL DISCLOSURES

THIS MATERIAL DOES NOT CONSTITUTE AN OFFER OR SOLICITATION IN ANY JURISDICTION WHERE OR TO ANY PERSON TO WHOM IT WOULD BE UNAUTHORIZED OR UNLAWFUL TO DO SO.

Prospective investors should inform themselves as to any applicable legal requirements and taxation and exchange control regulations in the countries of their citizenship, residence or domicile which might be relevant.

Firmwide AUM includes assets managed by Goldman Sachs Asset Management and its investment advisory affiliates.

Views and opinions expressed are for informational purposes only and do not constitute a recommendation by Goldman Sachs Asset Management to buy, sell, or hold any security.
