* As of 1 March 2024, the Sub-fund uses the MSCI AC World (NR) as the formal index against which the relative performance of the Sub-fund is measured. This provides investors with additional transparency and insight into the relative investment performance of the Sub-fund. The change does not lead to an adjustment in the way the Sub-fund is managed. The performance of the index in the table is pro forma and reflects the period 1 January 2024 through 30 June 2024. For the period 1 March 2024 through 30 June 2024 the performance of the index is 7,13%.

2.2 Notes to the key figures

2.2.1 Reporting period

The key figures for 2024 relate to the positions at 30 June and the period from 1 January through 30 June. The key figures for the other years relate to the positions at 31 December and the period from 1 January through 31 December, unless stated otherwise.

2.2.2 Net asset value per share

The net asset value of each Share Class of the Sub-fund will be determined by the manager. The manager calculates the net asset value per Share Class each business day. The net asset value per share of each Share Class is determined by dividing the net asset value of a Share Class by the number of outstanding shares of that Share Class at the calculation date.

2.2.3 Transaction price

The transaction price of each Share Class of the Sub-fund is determined by the manager on each business day and is based on the net asset value per share of each Share Class with an upcharge (subscription fee) or discount (redemption fee) to cover the costs of purchase and sale of 'physical' investments. The subscription and redemption fee is for the protection of existing shareholders of the Sub-fund and is beneficial to the Sub-fund. When no transaction has taken place on a business day, the transaction price is equal to the net asset value per share.

2.2.4 Net performance

The net performance of each Share Class of the Sub-fund is based on the net asset value per share, taking into account any dividend distributions. The relative performance is the difference between the net performance of each Share Class of the Sub-fund and the performance of the index.

2.3 General information

Goldman Sachs Global Sustainable Opportunities Equity Fund (NL) ('the Sub-fund') is part of Goldman Sachs Paraplufonds 1 N.V. (refer to paragraph 2.9 Structure for more information). The semi-annual report of Goldman Sachs Paraplufonds 1 N.V. (hereinafter referred to as the 'Fund') is available on the website of the manager.

The Sub-fund does not have any employees. Goldman Sachs Asset Management B.V. ('GSAM BV'), located in The Hague, is the manager of the Sub-fund and is licensed by the Dutch Authority for the Financial Markets ('Stichting Autoriteit Financiële Markten', also referred to as 'AFM') under the Dutch Financial Supervision Act ('Wet op het financieel toezicht', also referred to as 'Wft'). The Executive Board of the Fund is formed by GSAM BV. All shares in GSAM BV are held by Goldman Sachs Asset Management International Holdings B.V. Both entities are part of The Goldman Sachs Group, Inc. (hereinafter referred to as 'Goldman Sachs').

Goldman Sachs is listed on the New York Stock Exchange and qualifies as a bank holding company under US law. Goldman Sachs is a globally operating financial institution which – by means of a substantial variety of leading companies and subsidiaries – offers (integrated) financial services to private individuals, companies and institutions.

The AFM and the central bank of the Netherlands ('De Nederlandsche Bank N.V.', also referred to as 'DNB') act as supervisors. The AFM is charged with conduct supervision on the grounds of the Wft. Prudential supervision is performed by DNB.

2.4 Objective

The Sub-fund aims to achieve a positive impact and a better overall long-term returns compared to the index through active management.

2.5 Investment policy

The Sub-fund is actively managed and primarily invests in (certificates of) shares (including claims, convertible bonds, profit-sharing and founder's certificates, options, warrants for acquisition or disposal of such securities, and other similar instruments) of established, listed, or traded companies across developed and emerging markets. The portfolio is diversified across various countries and sectors.

The Sub-fund has the flexibility to hold investments both directly and indirectly—such as through exposure to financial instruments via derivatives or investments in other investment funds. Derivatives such as options, futures, warrants, swaps, and forward currency contracts may be utilized for risk management and efficient portfolio management. This may involve leveraging, increasing the sensitivity of the Sub-fund to market movements. Care is taken to ensure that the overall portfolio remains within the investment restrictions. The risk profile associated with the type of investor targeted by the Sub-fund does not change due to the use of these instruments.

In addition to the above, the following applies to the investment policy of the Sub-fund:

- the Sub-fund may invest in both euros and foreign currencies;
- where the manager deems it appropriate, risks such as foreign exchange risks may be hedged; to the extent that the assets are not invested in the aforementioned financial instruments, the assets may be invested in certain money market instruments (such as certificates of deposit and commercial paper), money market investment funds, or held in the form of cash;
- additional income can be generated through "repurchase agreements" ("repos") and "lending transactions" (lending securities from the investment portfolio);
- the 'global exposure' of this Sub-fund is determined according to the 'commitment' method;
- deviation from what is stated in the prospectus concerning the leverage financing used by this Sub-fund is not accounted for in the annual report;
- the manager of Goldman Sachs Paraplufonds 1 N.V. has the authority to enter into short-term loans as a debtor on behalf of the Sub-fund;
- transactions with related parties will take place on market terms;

- the Sub-fund invests globally in financial instruments in line with its investment policy. The major stock markets are located worldwide. Possible examples include New York, London, and Tokyo;
- the Sub-fund may invest up to 20% of its assets via Stock Connect in Chinese A-shares issued by companies established in the People's Republic of China (PRC). China A-shares are renminbi-denominated 'A' shares of companies listed on stock exchanges in mainland China. Stock Connect is a program designed to facilitate investments in Chinese stock markets. At the time of the prospectus publication, the Stock Connect program between Shanghai/Shenzhen and Hong Kong is active. Stock Connect consists of a Northbound Trading Link, through which investors in Hong Kong and abroad can buy and hold Chinese A-shares listed on the Shanghai Stock Exchange (SSE) and the Shenzhen Stock Exchange (SZSE), and a Southbound Trading Link, through which investors in mainland China can buy and hold shares listed on the Stock Exchange of Hong Kong Limited (SEHK). Therefore, the Sub-fund may be exposed to risks specific to the PRC, including but not limited to geographic concentration risk, risks associated with changes in political, social, or economic policies of the PRC, marketability and volatility risks, RMB currency risks, and tax risks related to the PRC. The Sub-fund is also subject to specific risks associated with investing via Stock Connect, such as quota restrictions, trading restrictions, restrictions on foreign shareholding interests, trading suspension, withdrawal of participating shares, clearing and settlement risks, custody risks, uncertainty regarding recognition of ownership rights or interests in shares, price fluctuations of Chinese A-shares—especially when Stock Connect is not trading but the PRC market is open—regulatory risks, and operational risks. Stock Connect is a relatively new trading program, which means that some rules are untested and subject to change. This could have negative consequences for the Sub-fund;
- the Sub-fund will not invest more than ten percent of the managed assets in rights of participation in other investment institutions.

2.6 Dividend policy

The Sub-fund pursues an active dividend policy aimed at distributing the profit for each financial year no later than 8 months after the end of the financial year. Management may consider paying interim dividends or distributing more than the annual profit. The amount and frequency of distributions may vary from year to year and may be zero. Distributions may vary per Share Class as well as the payment method of the distribution.

2.8 Outsourcing

Outsourcing of fund accounting

The manager of the Fund has outsourced the accounting function to The Bank of New York Mellon SA/NV. This outsourcing relates to, among others, the calculation of the net asset value, maintaining accounting records and processing of and executing payments. The manager remains ultimately responsible for the quality and continuity of these services.

Outsourcing of financial reporting

The manager of the Fund, has outsourced the preparation of multiple financial reports, including the (semi-)annual reports of the Dutch GSAM BV funds, to DM Financial Netherlands B.V. The manager remains ultimately responsible for the quality and continuity of all financial reports.

Outsourcing of management activities

The manager has outsourced on reporting date all or part of its management activities for the Sub-fund to an affiliated external asset manager which, as such, is part of Goldman Sachs as a group. This concerns Goldman Sachs Asset Management International (GSAMI), established in the United Kingdom.

The affiliated external asset manager is responsible for taking investment decisions within the framework of the investment policy as determined by the Manager and as described in the prospectus of the Sub-fund, collecting and conducting research on the basis of which these decisions can be taken and giving instructions for the purchase and sale of financial instruments as well as the settlement of such transactions, when the occasion arises.

GSAMI is allowed to outsource the portfolio management for the Fund to one or more group companies as a sub-delegated asset manager. GSAMI has entered into a sub-delegation agreement with Goldman Sachs Asset Management, L.P. Goldman Sachs Asset Management (Hong Kong) Ltd. and Goldman Sachs Asset Management (Singapore) Pte. Ltd.

2.9 Structure

The Fund is an open-end investment company with variable capital as described in Article 76a of Book 2 of the Dutch Civil Code. Except in special circumstances, the Fund may in principle issue or redeem shares on any business day.

The Fund is an undertaking for collective investment in transferable securities ('UCITS') within the meaning of the Dutch Financial Supervision Act ('Wet op het financieel toezicht', also referred to as 'Wft'). GSAM BV acts as manager of the Fund as defined in Section 1:1 of the Wft and in that capacity holds a license as defined in Section 2:69b(1), preamble and part (a) of the Wft from the AFM.

The Fund has an umbrella structure, which means that the ordinary shares are divided into various series of shares, with each series of shares corresponding to a separate Sub-fund. Goldman Sachs Paraplufonds 1 N.V. is the legal owner of the assets held by the individual Sub-funds.

A Sub-fund is a segregated part of the capital of the Fund for which a separate investment policy is pursued. The Wft states that all standards directed in whole or in part towards the Fund are also applicable to the Sub-funds. The part of the assets of the Sub-fund to be paid into, or allocated to, each Fund is invested separately in accordance with a specific investment policy. Both gains and losses in the investment portfolio of a Sub-fund are credited or charged to the relevant Sub-fund.

The capital of a Sub-fund is segregated and subject to a statutory priority arrangement. Consequently, the assets of a Sub-fund may only be used to pay liabilities connected to the management and safe-keeping of the Sub-fund and the shares in that Sub-fund.

A Sub-fund is divided into one or more Share Classes. The Share Classes within the Sub-fund may differ in terms of cost and fee structure, the minimum amount of initial investment, demands on the quality of the investors, the currency in which the net asset value is expressed, etc.

Fees

Management fee

An annual management fee is charged to the Share Class, which is calculated pro-rata on a daily basis by using the total net asset value of the Share Class at the end of every day.

Fixed Miscellaneous Fee

In addition to the management fee, other costs are charged to the Share Class. These costs are charged through a fixed annual fee, the Fixed Miscellaneous Fee ('Vaste Overige Kostenvergoeding'), which is calculated pro-rata on a daily basis on the total assets of the Share Class at the end of each day.

Other costs

Other costs may be charged to the Share Class. These costs, if applicable, are further explained in the notes to the respective Share Class as included in the financial statements.

Subscription and redemption fee

This concerns the fee charged to shareholders upon the purchase or sale of shares in the Sub-fund. The fee is calculated as a percentage markup or markdown on the net asset value per share, serves to protect the existing shareholders of the Sub-fund and is beneficial to the Sub-fund.

The actual percentage of the subscription and redemption fee can fluctuate and is published on the manager's website. This percentage may be changed without prior notice if the manager deems it necessary to protect the existing shareholders of the Sub-fund.

Maximum subscription and redemption fee

For transparency reasons, the manager has set a maximum percentage of the net asset value of the shares for the subscription and redemption fee. In exceptional market conditions, at the discretion of the manager, the manager may, in the interest of the existing investors of the Sub-fund, apply a higher percentage than the maximum percentage applicable to the Sub-fund at that time. In addition, the manager may, in the interest of the existing shareholders, apply a higher percentage than the maximum percentage applicable to the Sub-fund at that time in the event of exceptionally large orders to buy and sell shares in the Sub-fund, to compensate for the related additional transaction costs.

2.10 Tax aspects

The Sub-fund is part of Goldman Sachs Paraplufonds 1 N.V., which has the status of a fiscal investment institution (FBI) as defined in Article 28 of the Corporate Income Tax Act 1969. The Fund is established to meet the conditions of a fiscal investment institution as referred to in Article 28 of the Corporate Income Tax Act 1969. A fiscal investment institution is subject to the special corporate income tax rate of 0%. If the Fund does not meet the conditions, the status of fiscal investment institution will generally be revoked retroactively to the beginning of the year, and the Fund will become subject to normal corporate income tax. The manager ensures, to the extent possible, that the Fund continues to comply with the conditions set forth in the law and in the Investment Institution Decree.

One of the key conditions is that the Sub-fund must distribute the distributable profit to the shareholders within eight months after the end of the financial year (distribution obligation). A positive balance of capital gains on securities and a positive balance related to the disposal of other investments (both realized and unrealized), after deducting a proportional share of the costs associated with the management of the investments, is added to the so-called reinvestment reserve and does not fall under the distribution obligation. Additionally, under certain conditions, the Sub-fund can form a rounding reserve of up to 1% of the paid-up capital, which can partially suspend the distribution obligation.

The Fund generally withholds 15% dividend tax on profit distributions. Under certain circumstances, a distribution from the reinvestment reserve may take place without withholding dividend tax. It may also occur that the Fund needs to subject share repurchases to dividend tax. Additionally, under certain circumstances, the Fund may elect to withhold dividend tax on the repurchase of shares from its shareholders.

When the Fund is required to withhold dividend tax, it may, under certain circumstances, apply a reduction to the portion that actually needs to be remitted to the tax authorities (reduction of remittance). The amount of the reduction of remittance is determined by the Dutch dividend tax and foreign withholding tax withheld from the Fund (up to a maximum of 15%). Regarding the applicable reduction of remittance related to the withheld foreign withholding tax, there is a limitation for Dutch legal entities exempt from corporate income tax participating in the Fund, and for foreign entities participating in the Fund that are entitled to a refund of Dutch dividend tax under Dutch law or a treaty or agreement for the avoidance of double taxation.

2.11 Fund Agent

The Fund has agreed with ING Bank N.V. that the latter company will act as Fund Agent. The Fund Agent is responsible for the evaluation and the acceptance of the buy and sell orders as entered in the exchange order book with regard to Share Class P of each Sub-fund, subject to the conditions as stated in the prospectus.

The Fund Agent will only accept orders which fulfil the following conditions:

- 1) Orders must be entered on the basis of a standard market settlement deadline.
- 2) Orders must be entered by another party affiliated with Euroclear Nederland.

Once the order book has been closed, the Fund Agent will transmit all buy and sell orders relating to Share Class P of each Sub-fund to the Fund via the Transfer Agent. The transaction price at which these buy and sell orders are executed on the following business day is supplied to Euronext Amsterdam by NYSE Euronext by the manager, via the Fund Agent.

2.12 Depositary of Goldman Sachs Paraplufonds 1 N.V.

The assets of the Fund are in the safe-keeping of The Bank of New York Mellon SA/NV, Amsterdam branch, as the depositary of the Fund (the 'depositary').

The shareholders' equity of the depositary amounts to at least EUR 730,000.

The manager and depositary of the Fund have entered into a written agreement relating to management and depositary services. The main elements of this agreement are the following:

- The depositary ensures that the cash flows of the Fund are properly controlled and in particular that all payments by or on behalf of investors during the subscription for shares have been received and that all cash of the Fund has been recorded in cash accounts in the name of the Fund or in the name of the depositary acting on behalf of the Fund, opened with (in principle) an entity as described in Article 18(1)(a), (b) and (c) of European Directive 2006/73/EC (a credit institution or a bank authorized in a third country).
- The assets of the Fund consisting of financial instruments are entrusted to the depositary. The depositary holds in safe-keeping all financial instruments that can be registered on a financial instruments account in the books of the depositary, on separate accounts in the name of the Fund. In addition, the depositary holds in safe-keeping all financial instruments that can be physically delivered to the depositary.
- For the other assets of the Fund, the depositary determines whether the Fund is the owner of these assets based on information or documents provided by the manager or based on other external evidence. The depositary keeps a register for these other assets.
- The depositary ensures that the sale, issue, repurchase, redemption and cancellation of shares in the Fund take place in accordance with Dutch law, the Articles of Association of the Fund and the relevant procedures.
- The depositary ensures that the value of the shares in the Fund is calculated in accordance with Dutch law, the Articles of Association of the Fund and the relevant procedures.
- The depositary carries out the instructions of the manager, unless they conflict with Dutch law or the Articles of Association of the Fund.
- The depositary ensures that the equivalent value of the transactions involving the assets of the Fund is transferred to the Fund by the usual deadlines.
- The depositary ensures that the income of the Fund is allocated in accordance with Dutch law and the Articles of Association of the Fund.

In the context of depositary services, the depositary acts in the interests of the Fund as well as the investors in the Fund.

2.13 Principal risks and uncertainties

Investing in the Sub-fund entails financial opportunities as well as financial risks. The value of investments can both rise and fall, and shareholders of the Sub-fund may receive less than they invested. Diversification of investments is expected to have a mitigating effect on these risks.

A comprehensive overview of the risks, categorized as 'high, medium, and low' risks, associated with the Sub-fund is provided in the prospectus. In the event of new regulations regarding risk management, additional information will be included. The main risks faced by the Sub-fund are:

Market risk

The Sub-fund is sensitive to changes in the value of investments due to fluctuations in prices in financial markets such as equities or fixed-income markets (market risk). Additionally, prices of individual instruments in which the Sub-fund invests may also fluctuate. If the Sub-fund utilizes derivatives as described under "Investment Policy," these may be employed for both hedging risks and efficient portfolio management. This may involve leveraging, thereby increasing the Sub-fund's sensitivity to market movements.

To mitigate market risks, investments are diversified across various countries, sectors, and/or companies. An overview of the portfolio composition at balance sheet date is provided in the section Composition of investments.

Currency risk

If investments can be made in securities denominated in currencies other than the currency in which the Sub-fund is denominated, currency fluctuations can have both positive and negative effects on the investment result.

Liquidity risk

Liquidity risks may arise when a particular underlying investment is difficult to sell. Since the Sub-fund may invest in illiquid securities, there is a risk that the Sub-fund may not have the ability to release financial resources that may be needed to meet certain obligations.

During the reporting period, there were no issues regarding liquidity. The available cash of the Sub-fund was sufficient to manage the inflow and outflow of capital during the reporting period. It is expected that this will also be the case in the upcoming reporting period.

Fraud risks and corruption

Fraud is any intentional act or omission to mislead others, causing loss to the victim and/or profit to the perpetrator. Corruption is the misuse of entrusted power for personal gain, including bribery. The lack of controls in the payment process increases the likelihood and therefore creates the opportunity for fraud.

The asset management industry is characterized by the management of third party assets, which is quite extensive in its entirety. Having access to these assets increases GSAM BV's inherent fraud and corruption risk profile. To manage this risk, GSAM BV conducts an annual fraud and corruption risk assessment to determine the identification, exposure to and management of these risks. GSAM BV concludes in its annual risk assessment that there are no high residual risks in the context of fraud and corruption. The main inherent risks identified by GSAM BV in the annual risk assessment are the following:

- Cyber risks;
- Unauthorized withdrawal of funds;
- Fraudulent invoices;
- Insider trading risk;
- Bribery.

The following measures have been taken to mitigate these inherent risks:

Cyber risks, cyber risk is recognized as a collective term which, knowingly (e.g. ransomware) or unknowingly (e.g. hack), can lead to a withdrawal of assets. The range of techniques that a malicious person can use is extensive. That is why it is important for GSAM BV to be aware of these techniques and to test its own environment accordingly. The measures taken are inspired by the NIST cyber security framework of protect, detect, respond, recover and identify and are evaluated annually on the basis of the Cyber Security Risk Assessment.

Unauthorized withdrawal of funds, is prevented by having authorization limits and a four (or more) eyes principles, whereby modern techniques such as 2 factor authentication are required.

Fraudulent invoices, the payment of invoices at the expense of an investment fund is only permitted if this corresponds with the prospectus. The beneficiary as well as the correctness of the amounts charged are often verifiable, through a link with the assets. Invoices must be assessed and approved in advance by budget holders, in accordance with the procurement policy. Within this process, a separation of functions has been made between ordering, entering and approval.

Insider trading risk, involves misusing information for personal gain, or having orders executed in such a way that self-enrichment can be achieved at the expense of the fund. The measures taken to prevent this are diverse, including best execution review, mandatory periodic reporting on personal investment portfolios, education in the form of mandatory training and pre-employment screening.

Bribery involves having a tender being influenced by, for example, bribes, dinners, travel and gifts. To mitigate this, GSAM BV has a strict policy, whereby anything with a value of more than fifty euros may not be accepted. Furthermore, in the context of broker execution, price and quality assessments are carried out periodically, the outcome of which is indicative of the extent to which orders are allocated to these brokers.

The residual risk, following from the risks described above, are determined by GSAM BV as 'medium' and are accepted through a formal risk acceptance, or at the level of the foreign GSAM BV entities.

Furthermore, there is a clear legal and operational separation between the asset manager, the external administrator, the fund and the custodian. This segregation of duties has an important preventive effect on the risk of fraud and corruption.

The beforementioned control measures are part of a larger control framework, of which various parts are periodically assessed by an external auditor via the GSAM BV ISAE 3402 report. Furthermore, GSAM BV applies the 3-lines of defense mechanism, in which risk management and internal audit continuously test and monitor the effectiveness of the administrative organization and internal control. GSAM BV also applies various soft controls, such as tone at the top, e-learning, code of ethics and a whistleblower policy.

Sustainability risks

Sustainability risks can represent their own risk or influence other risks and contribute to general risks, such as market risks, liquidity risks, credit risks or operational risks. Sustainability risks may have a negative impact on the Sub-fund's return.

The sustainability risks to which the Sub-fund may be exposed include, for example:

- Climate change
- Health & safety
- Business conduct

The assessment of sustainability risks, as defined in Article 2(22) of Regulation (EU) 2019/2088 (on sustainability disclosures in the financial services sector, which Regulation may be amended or supplemented from time to time), is integrated into the investment decision process by application of Sub-fund-specific criteria for responsible investing and, where applicable, integration of relevant environmental, social and governance (ESG) factors.

The Sub-fund primarily invests in liquid assets, which means that the mentioned sustainability risks are incorporated into the valuation of the investments.

Issuer default risk

In addition to general trends in the financial markets, specific developments related to the issuer can also impact the value of an investment. Even careful security selection, for example, cannot eliminate the risk of loss due to a decline in value of the issuer's assets. The use of credit derivatives, if mentioned in the investment policy of the Fund, may entail credit risk.

2.14 Developments during the reporting period

2.14.1 General financial and economic developments in 2024

Economic Context

Recession fears continued to moderate at the start of 2024, as the US economy showed resilience despite significant rate hikes in 2022 and 1H 2023. A tight labor market, positive real wage growth, and strong equity markets supported consumer cash flows and balance sheets in the first quarter of 2024, leading to strong consumption. While US inflation prints were higher than expected in January and February, the US Federal Open Market Committee (FOMC) signaled confidence in March that disinflation would restart and recent elevated releases would prove temporary. In 2Q 2024, continued signs of improvement in global manufacturing indicators, strong earnings growth, and expectations of policy easing by major central banks supported positive momentum in risk assets. The disinflationary process also restarted, following higher than expected prints in 1Q 2024. US Core PCE (Personal Consumption Expenditures Price Index, Excluding Food and Energy) averaged 0.17% in April and May versus average reading of 0.37% in 1Q 2024.

While a slowdown in private consumption was notable in 2Q 2024, some moderation was arguably welcomed to achieve the US Federal Reserve's 2% inflation target. Any further moderation in consumption, however, could be a concern for policymakers and market participants, and renew fears of a recession. The rebalancing of the US labor market is somewhat similar. After strong data at the start of the year, the number of non-farm jobs added in April moderated to 175k versus an average of 235k in 1Q 2024. This was the lowest print in six months, and slower job growth helped allay fears that the economy was overheating, boosting expectations that interest rate cuts would still occur this year. The job openings rate for May rose to 4.9% from 4.8% in April. At its post pandemic peak, the job openings rate was at 7.4%. Like the consumption slowdown, further moderation in the US jobs opening rate could be reaching an inflection point where further rebalancing may not be encouraging news.

Outside of the US, growth momentum continued to improve albeit from weak levels, especially in Europe. Euro area 1Q 2024 GDP came in at 1.3% q/q annualized following 0.25% q/q annualized in 4Q 2023. Similarly, the UK economy expanded at a pace of 2.9% q/q annualized in 1Q 2024 after contracting at -0.9% annualized pace in 2H 2023. Chinese 1Q GDP surprised to the upside, with a reading of 5.3% y/y versus consensus expectation of 4.8% y/y.

Monetary Policy

The Federal Reserve tilted hawkish at the start of 2024 as inflation surprised to the upside and the strong economy gave US policymakers the option to be patient with the onset of the easing cycle. In May, the risk of renewed rate hikes was reduced due to moderation in US core services inflation and a downward revision of 1Q GDP, which came in at 1.2% q/q annualized versus 1.6% initially reported. In June, the Fed revised its median dot plot projection, which now suggests one 25bps rate cut this year, reduced from three projected in March. There's still a possibility that the Fed may implement two rate cuts in the second half of 2024. Fed Chair Jerome Powell noted during the June press conference that cuts totaling 25bps vs 50bps in 2024 was a close call for many participants.

The FOMC's dual mandate of inflation and labor market looks more two-sided now compared with a year ago when it was squarely focused on inflation. Going forward, the FOMC aims to stabilize the unemployment rate around the current level of 4% and bring inflation down to 2%. Therefore, the timing and magnitude of further policy rate calibration becomes crucial. Easing too soon could reignite inflationary pressures; waiting too long could break the labor market. The potential uncertainty from the upcoming US presidential election further complicates the overall economic outlook.

Elsewhere, the Swiss National Bank surprised markets in March and cut policy rates by 25bps, becoming the first G10 central bank to start its easing cycle. The European Central Bank and the Bank of Canada started their respective easing cycles in June, both cutting by 25bps. In terms of forward guidance, both central banks have suggested that further rate cuts are likely if the data evolves in line with expectations. In the UK, Bank of England leaned dovish, but did not ease policy in June. It noted that the decision to leave rates unchanged was finely balanced and recent strength in services inflation were largely driven by volatile components. The market interpretation was that the bank may be ready to begin easing in August.

On the geopolitical front, markets encountered increased uncertainty in Europe as French President Emmanuel Macron dissolved parliament and called snap parliamentary elections, scheduled for June 30 and July 7, after his party's defeat in the EU parliamentary elections. As a result, the market priced in a higher geopolitical risk premium in European assets leading to underperformance of European assets versus peers. In Asia, the Bank of Japan (BoJ) decided to end its negative interest rate policy at its March meeting.

Equity Markets

Equities started 2024 on a strong footing with significant gains in 1Q 2024 following a strong end to 2023, with several equity indices reaching all-time highs. Continued signs of improvement in global manufacturing indicators, a resilient US economy, and expectations of policy easing by major central banks supported risk appetite. In 2Q global developed market equities (MSCI World) and emerging market equities (MSCI EM) were up by 3.2% and 6.4%, respectively, following gains of 10% and 4.5% in 1Q. Within developed market equities, US equities outperformed their peers with a gain of 4.5% in 2Q, whereas Japanese equities (TOPIX) were up by 1.7%. Euro area equities (EURO STOXX 50) were down by 1.3% following increased uncertainty in June due to the defeat of President Macron's party in the EU parliamentary election and subsequent call for a snap parliamentary election in France.

Among US sectors, the technology sector outperformed as it rallied 8.8%, followed by utilities, up 4.6%. Materials, industrials, and energy underperformed noticeably with a sell-off of 4.5%, 2.9%, and 2.7%, respectively. Ongoing divergence between mega-cap stocks and the rest remained visible over 2Q 2024. For example, the Magnificent 7 was up by another 16.9% in 2Q, which helped the S&P 500 post a third consecutive quarterly gain of 4.5%. There was weakness elsewhere, as the equal-weighted S&P 500 fell by -2.6%, and the small-cap Russell 2000 was down by 3.3%.

Elsewhere, China equities rallied at the start of 2024, outperforming most DM and EM equity markets, but retreated in June. Widely cited reasons for the pullback include profit-taking after a strong tail-risk compression rally, less-forceful-than-expected property policy announcements against an improved policy expectation backdrop post the April Politburo meeting, resurfacing geopolitical risks regarding cross-strait relations, and sluggish earnings revision trends.

Goldman Sachs Asset Management B.V.

4. OTHER INFORMATION

4.1 Statutory provisions regarding appropriation of results

According to Article 23 of the Articles of Association of Goldman Sachs Paraplufonds 1 N.V. the Executive Board decides for each type of shares what part of the balance will be allocated to the additional reserve maintained for the relevant type. After the aforementioned addition, a dividend, in so far as possible, is paid on the priority shares equal to six per cent (6%) of the nominal value of these shares. There is no further distribution of profit on the priority shares. The remainder is distributed to the holders of ordinary shares of the relevant type, unless the general meeting decides otherwise.

If the aforementioned balance of income and expenses is negative, the amount is deducted from the additional reserve that is maintained for the relevant type of shares.

4.2 Management interest

At 30 June 2024 and 1 January 2024, the Board members had no personal interest in (an investment of) the Sub-fund.
