The percentage shown for each investment category reflects the value of investments in that category as a percentage of net assets.

- (a) Security with "Call" features with resetting interest rates. Maturity dates disclosed are the final maturity dates.
- (b) Exempt from registration under Rule 144A of the Securities Act of
- (c) Variable rate security. Except for floating rate notes (for which final maturity is disclosed), maturity date disclosed is the next interest reset date. Interest rate disclosed is that which is in effect on September 30, 2024
- (d) Coupon changes periodically based upon a predetermined schedule. Interest rate disclosed is that which is in effect on September 30, 2024.
- (e) All or a portion of security is segregated as collateral for initial margin requirement on futures transactions.
- (f) Issued with a zero coupon. Income is recognized through the accretion of discount
- (g) Represents an affiliated issuer.

#### ADDITIONAL INVESTMENT INFORMATION

FORWARD FOREIGN CURRENCY EXCHANGE CONTRACTS — At September 30, 2024, the Fund had the following forward foreign currency exchange contracts:

#### FORWARD FOREIGN CURRENCY EXCHANGE CONTRACTS WITH UNREALIZED LOSS

Counterparty	Currency	Currency	Settlement	Unrealized
	Purchased	Sold	Date	Loss
BNP Paribas SA	USD 4,425,506	EUR 4,058,657	10/24/24	\$(97,297)

#### FUTURES CONTRACTS — At September 30, 2024, the Fund had the following futures contracts:

Description	Number of Contracts	Expiration Date	Notional Amount	Unrealized Appreciation/ (Depreciation)
Long position contracts: 2 Year U.S. Treasury Notes	466	12/31/24	\$ 97,040,860	\$179,786
Short position contracts: 5 Year U.S. Treasury Notes	(235)	12/31/24	(25,822,461)	(3,064)
TOTAL FUTURES CONTRACTS				\$176,722

SWAP CONTRACTS — At September 30, 2024, the Fund had the following swap contracts:

#### CENTRALLY CLEARED INTEREST RATE SWAP CONTRACTS

The percentage shown for each investment category reflects the value of investments in that category as a percentage of net assets.

- (a) Security with "Call" features with resetting interest rates. Maturity dates disclosed are the final maturity dates.
- (b) Exempt from registration under Rule 144A of the Securities Act of 1933.
- (c) Coupon changes periodically based upon a predetermined schedule. Interest rate disclosed is that which is in effect on September 30, 2024.
- (d) Variable rate security. Except for floating rate notes (for which final maturity is disclosed), maturity date disclosed is the next interest reset date. Interest rate disclosed is that which is in effect on September 30, 2024.

(Cost \$2,915,103)

\$ 2,830,701

- (e) TBA (To Be Announced) Securities are purchased on a forward commitment basis with an approximate principal amount and no defined maturity date. The actual principal and maturity date will be determined upon settlement when the specific mortgage pools are assigned. Total market value of TBA securities (excluding forward sales contracts, if any) amounts to \$22,948,833 which represents approximately 18.4% of net assets as of September 30, 2024.
- (f) All or a portion of security is segregated as collateral for initial margin requirement on futures transactions.
- (g) Issued with a zero coupon. Income is recognized through the accretion of discount.

#### ADDITIONAL INVESTMENT INFORMATION

FORWARD SALES CONTRACTS — At September 30, 2024, the Fund had the following forward sales contracts:

Description	Interest Rate	Maturity Date <sup>(a)</sup>	Settlement Date	Principal Amount	Value

The percentage shown for each investment category reflects the value of investments in that category as a percentage of net assets.

September 30, 2024 (Unaudited)

- (a) Security with "Call" features with resetting interest rates. Maturity dates disclosed are the final maturity dates.
- (b) Exempt from registration under Rule 144A of the Securities Act of 1933.
- (c) Variable rate security. Except for floating rate notes (for which final maturity is disclosed), maturity date disclosed is the next interest reset date. Interest rate disclosed is that which is in effect on September 30, 2024.
- (d) Pay-in-kind securities.
- (e) Coupon changes periodically based upon a predetermined schedule. Interest rate disclosed is that which is in effect on September 30, 2024.
- (f) Security with a notional or nominal principal amount. The actual effective yield of this security is different than the stated interest rate.
- (g) TBA (To Be Announced) Securities are purchased on a forward commitment basis with an approximate principal amount and no defined maturity date. The actual principal and maturity date will be determined upon settlement when the specific mortgage pools are assigned. Total market value of TBA securities (excluding forward sales contracts, if any) amounts to \$48,370,104 which represents approximately 3.8% of net assets as of September 30, 2024.
- (h) Security is currently in default and/or non-income producing.
- All or a portion of security is segregated as collateral for initial margin requirement on futures transactions.

<sup>(</sup>b) Credit spread on the referenced obligation, together with the term of the swap contract, are indicators of payment/performance risk. The likelihood of a credit event occurring which would require a fund or its counterparty to make a payment or otherwise be required to perform under the swap contract is generally greater as the credit spread and the term of the swap contract increase.

<sup>(</sup>b) Credit spread on the referenced obligation, together with the term of the swap contract, are indicators of payment/performance risk. The likelihood of a credit event occurring which would require a fund or its counterparty to make a payment or otherwise be required to perform under the swap contract is generally greater as the credit spread and the term of the swap contract increase.

- (a) Security with "Call" features with resetting interest rates. Maturity dates disclosed are the final maturity dates.
- (b) Variable rate security. Except for floating rate notes (for which final maturity is disclosed), maturity date disclosed is the next interest reset date. Interest rate disclosed is that which is in effect on September 30, 2024.
- (c) TBA (To Be Announced) Securities are purchased on a forward commitment basis with an approximate principal amount and no defined maturity date. The actual principal and maturity date will be determined upon settlement when the specific mortgage pools are assigned. Total market value of TBA securities (excluding forward sales contracts, if any) amounts to \$84,905,293 which represents approximately 18.1% of net assets as of September 30, 2024.
- (d) All or a portion of security is segregated as collateral for initial margin requirement on futures transactions.
- (e) Represents an affiliated issuer.

September 30, 2024 (Unaudited)

#### ADDITIONAL INVESTMENT INFORMATION

FORWARD SALES CONTRACTS — At September 30, 2024, the Fund had the following forward sales contracts:

Description	Interest Rate	Maturity Date <sup>(a)</sup>	Settlement Date	Principal Amount	Value
Government National Mortgage					
Association	3.000%	TBA - 30yr	10/21/24	\$ (9,000,000)	\$ (8,207,749)
Government National Mortgage		•

The percentage shown for each investment category reflects the value of investments in that category as a percentage of net assets.

- (a) Security with a notional or nominal principal amount. The actual effective yield of this security is different than the stated interest rate.
- (b) Variable rate security. Except for floating rate notes (for which final maturity is disclosed), maturity date disclosed is the next interest reset date. Interest rate disclosed is that which is in effect on September 30, 2024.
- (c) Security with "Call" features with resetting interest rates. Maturity dates disclosed are the final maturity dates.
- (d) Coupon changes periodically based upon a predetermined schedule. Interest rate disclosed is that which is in effect on September 30, 2024.
- (e) Exempt from registration under Rule 144A of the Securities Act of 1933.
- (f) TBA (To Be Announced) Securities are purchased on a forward commitment basis with an approximate principal amount and no defined maturity date. The actual principal and maturity date will be determined upon settlement when the specific mortgage pools are assigned. Total market value of TBA securities (excluding forward sales contracts, if any) amounts to \$95,265,838 which represents approximately 51.5% of net assets as of September 30, 2024.
- (g) Issued with a zero coupon. Income is recognized through the accretion of discount
- (h) All or a portion of security is segregated as collateral for initial margin requirement on futures transactions.

#### **Currency Abbreviations:**

CAD -Canadian Dollar

USD -U.S. Dollar

#### **Investment Abbreviations:**

CLO -Collateralized Loan Obligation

CMT---Constant Maturity Treasury Indexes LLC -Limited Liability Company

-Monthly Treasury Average MTA

—Private Investment PΙ

REMICS —Real Estate Mortgage Investment Conduits
RFUCC —Refinitive USD IBOR Consumer Cash Fallbacks 1 year

SOFR —Secured Overnight Financing Rate

STACR —Structured Agency Credit Risk

<sup>(</sup>b) Credit spread on the referenced obligation, together with the term of the swap contract, are indicators of payment/performance risk. The likelihood of a credit event occurring which would require a fund or its counterparty to make a payment or otherwise be required to perform under the swap contract is generally greater as the credit spread and the term of the swap contract increase.

Portfolio turnover rate <sup>(d)</sup>	551%	6		782%		655%	,	466%	)	566%		479%

<sup>(</sup>a) Calculated based on the average shares outstanding methodology.

<sup>(</sup>b) Assumes investment at the NAV at the beginning of the period, reinvestment of all dividends and distributions, a complete redemption of the investment at the NAV at the end of the period and no sales or redemption charges (if any). Total returns would be reduced if a sales or redemption charge was taken into account. Returns do not reflect the impact of taxes to shareholders relating to Fund distributions or the redemption of Fund shares. Total returns for periods less than one full year are not annualized.

<sup>(</sup>c) Annualized.

<sup>(</sup>d) The Fund's portfolio turnover rate is calculated in accordance with regulatory requirements, without regard to transactions involving short term investments and certain derivatives. If such transactions were included, the Fund's portfolio turnover rate may be higher.

Ratio of net expenses to average net assets	0.44% <sup>(c)</sup>	0.45%	0.44%	0.43%	0.44%	0.44%
Ratio of total expenses to average net assets	0.58% <sup>(c)</sup>	0.57%	0.55%	0.50%	0.46%	0.49%
Ratio of net investment income to average net assets	4.06% <sup>(c)</sup>	3.69%	2.78%	0.17%	1.30%	2.17%
Portfolio turnover rate <sup>(d)</sup>	1,046%	1,369%	1,386%	1,242%	1,027%	1,233%

<sup>(</sup>a) Calculated based on the average shares outstanding methodology.

<sup>(</sup>b) Assumes investment at the NAV at the beginning of the period, reinvestment of all dividends and distributions, a complete redemption of the investment at the NAV at the end of the period and no sales or redemption charges (if any). Total returns would be reduced if a sales or redemption charge was taken into account. Returns do not reflect the impact of taxes to shareholders relating to Fund distributions or the redemption of Fund shares. Total returns for periods less than one full year are not annualized.

<sup>(</sup>c) Annualized.

<sup>(</sup>d) The Fund's portfolio turnover rate is calculated in accordance with regulatory requirements, without regard to transactions involving short term investments and certain derivatives. If such transactions were included, the Fund's portfolio turnover rate may be higher.

### Notes to Financial Statements

September 30, 2024 (Unaudited)

#### 1. ORGANIZATION

Goldman Sachs Trust (the "Trust") is a Delaware statutory trust registered under the Investment Company Act of 1940, as amended (the "Act"), as an open-end management investment company. The following table lists those series of the Trust that are included in this report (collectively, the "Funds" or individually a "Fund"), along with their corresponding share classes and respective diversification status under the Act:

Fund	Share Classes Offered	Diversified/ Non-diversified
Goldman Sachs Enhanced Income Fund	A, Administration, Institutional, Service, Investor, R6 and P	Diversified
Goldman Sachs Government Income Fund	A, C, Institutional, Service, Investor, R6, R and P	Diversified
Goldman Sachs Inflation Protected Securities Fund	A, C, Institutional, Investor, R6, R and P	Diversified
Goldman Sachs Short Duration Bond Fund	A, C, Institutional, Investor, R6, R and P	Diversified
Goldman Sachs Short Duration Government Fund	A, C, Institutional, Service, Investor, R6 and P	Diversified
Goldman Sachs Short-Term Conservative Income Fund	A, Institutional, Investor, R6 and P	Diversified
Goldman Sachs U.S. Mortgages Fund	A, Institutional, Separate Account Institutional, Investor, R6 and P	Diversified

Class A Shares of the Government Income, Inflation Protected Securities, Short Duration Bond, Short Duration Government and U.S. Mortgages Funds are sold with a front-end sales charge of up to 3.75%, 3.75%, 1.50%, 1.50% and 3.75%, respectively. Class C Shares are generally sold with a contingent deferred sales charge ("CDSC") of 1.00% (0.65% for Short Duration Bond and Short Duration Government Funds), which is imposed on redemptions made within 12 months of purchase. Class A Shares of the Enhanced Income and Short-Term Conservative Income Funds are not subject to a sales charge. Similarly, Administration, Institutional, Service, Separate Account Institutional, Investor, Class R6, Class R and Class P Shares are not subject to a sales charge.

Goldman Sachs Asset Management, L.P. ("GSAM"), an affiliate of Goldman Sachs & Co. LLC ("Goldman Sachs"), serves as investment adviser to the Funds pursuant to management agreements (the "Agreements") with the Trust.

#### 2. SIGNIFICANT ACCOUNTING POLICIES

The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") and require management to make estimates and assumptions that may affect the reported amounts and disclosures. Actual results may differ from those estimates and assumptions. Each Fund is an investment company under GAAP and follows the accounting and reporting guidance applicable to investment companies.

- A. Investment Valuation The Funds' valuation policy is to value investments at fair value.
- B. Investment Income and Investments Investment income includes interest income, dividend income, and securities lending income, if any. Interest income is accrued daily and adjusted for amortization of premiums and accretion of discounts. Dividend income is recognized on ex-dividend date or, for certain foreign securities, as soon as such information is obtained subsequent to the ex-dividend date. Non-cash dividends, if any, are recorded at the fair market value of the securities received. Investment transactions are reflected on trade date. Realized gains and losses are calculated using identified cost. Investment transactions are recorded on the following business day for daily net asset value ("NAV") calculations. Investment income is recorded net of any foreign withholding taxes, less any amounts reclaimable. The Funds may file withholding tax reclaims in certain jurisdictions to recover a portion of amounts previously withheld. Any foreign capital gains tax is accrued daily based upon net unrealized gains, and is payable upon sale of such investments.

### 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

For derivative contracts, unrealized gains and losses are recorded daily and become realized gains and losses upon disposition or termination of the contract. Upfront payments, if any, are made or received upon entering into a swap agreement and are reflected in the Statements of Assets and Liabilities. Upfront payments are recognized over the contract's term/event as realized gains or losses, with the exception of forward starting swap contracts whose realized gains or losses are recognized from the effective start date. For securities with paydown provisions, principal payments received are treated as a proportionate reduction to the cost basis of the securities, and excess or shortfall amounts are recorded as income. For treasury inflation protected securities ("TIPS"), adjustments to principal due to inflation/deflation are reflected as increases/decreases to interest income with a corresponding adjustment to cost.

- C. Class Allocations and Expenses Investment income, realized and unrealized gain (loss), if any, and non-class specific expenses of each Fund are allocated daily based upon the proportion of net assets of each class. Non-class specific expenses directly incurred by a Fund are charged to that Fund, while such expenses incurred by the Trust are allocated across the applicable Funds on a straight-line and/or pro-rata basis depending upon the nature of the expenses. Class specific expenses, where applicable, are borne by the respective share classes and include Distribution and Service, Transfer Agency and Service and Shareholder Administration fees.
- D. Federal Taxes and Distributions to Shareholders It is each Fund's policy to comply with the requirements of the Internal Revenue Code of 1986, as amended (the "Code"), applicable to regulated investment companies and to distribute each year substantially all of its investment company taxable income and capital gains to its shareholders. Accordingly, each Fund is not required to make any provisions for the payment of federal income tax. Distributions to shareholders are recorded on the ex-dividend date. Income and capital gains distributions, if any, are declared and paid according to the following schedule:

	Investment Income Dividends	Capital Gains Distributions
Fund	Declared/Paid	Declared/Paid
Enhanced Income Fund	Daily/Monthly	Annually
Government Income Fund	Daily/Monthly	Annually
Inflation Protected Securities Fund	Quarterly/Quarterly	Annually
Short Duration Bond Fund	Daily/Monthly	Annually
Short Duration Government Fund	Daily/Monthly	Annually
Short-Term Conservative Income Fund	Daily/Monthly	Annually
U.S. Mortgages Fund	Daily/Monthly	Annually

Net capital losses, if any, are carried forward to future fiscal years and may be used to the extent allowed by the Code to offset any future capital gains. Losses that are carried forward will retain their character as either short-term or long-term capital losses. Utilization of capital loss carryforwards will reduce the requirement of future capital gains distributions.

The characterization of distributions to shareholders for financial reporting purposes is determined in accordance with federal income tax rules, which may differ from GAAP. The source of each Fund's distributions may be shown in the accompanying financial statements as either from distributable earnings or capital. Certain components of the Funds' net assets on the Statements of Assets and Liabilities reflect permanent GAAP/tax differences based on the appropriate tax character.

E. Foreign Currency Translation — The accounting records and reporting currency of a Fund are maintained in U.S. dollars. Assets and liabilities denominated in foreign currencies are translated into U.S. dollars using the current exchange rates at the close of each business day. The effect of changes in foreign currency exchange rates on investments is included within net realized and unrealized gain (loss) on investments. Changes in the value of other assets and liabilities as a result of fluctuations in foreign

September 30, 2024 (Unaudited)

### 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

exchange rates are included in the Statements of Operations within net change in unrealized gain (loss) on foreign currency translation. Transactions denominated in foreign currencies are translated into U.S. dollars on the date the transaction occurred, the effects of which are included within net realized gain (loss) on foreign currency transactions.

#### 3. INVESTMENTS AND FAIR VALUE MEASUREMENTS

U.S. GAAP defines the fair value of a financial instrument as the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price); the Funds' policy is to use the market approach. GAAP establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The level in the fair value hierarchy within which the fair value measurement in its entirety falls shall be determined based on the lowest level input that is significant to the fair value measurement in its entirety. The levels used for classifying investments are not necessarily an indication of the risk associated with investing in these investments. The three levels of the fair value hierarchy are described below:

Level 1 — Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2 — Quoted prices in markets that are not active or financial instruments for which significant inputs are observable (including, but not limited to, quoted prices for similar investments, interest rates, foreign exchange rates, volatility and credit spreads), either directly or indirectly;

Level 3 — Prices or valuations that require significant unobservable inputs (including GSAM's assumptions in determining fair value measurement).

The Board of Trustees ("Trustees") has approved Valuation Procedures that govern the valuation of the portfolio investments held by the Funds, including investments for which market quotations are not readily available. With respect to the Funds' investments that do not have readily available market quotations, the Trustees have designated GSAM as the valuation designee to perform fair valuations pursuant to Rule 2a-5 under the Act (the "Valuation Designee"). GSAM has day-to-day responsibility for implementing and maintaining internal controls and procedures related to the valuation of the Funds' investments. To assess the continuing appropriateness of pricing sources and methodologies, GSAM regularly performs price verification procedures and issues challenges as necessary to third party pricing vendors or brokers, and any differences are reviewed in accordance with the Valuation Procedures.

A. Level 1 and Level 2 Fair Value Investments — The valuation techniques and significant inputs used in determining the fair values for investments classified as Level 1 and Level 2 are as follows:

Money Market Funds — Investments in the Goldman Sachs Financial Square Government Fund ("Underlying Money Market Fund") are valued at the NAV per share of the Institutional Shares class on the day of valuation. These investments are generally classified as Level 1 of the fair value hierarchy. For information regarding the Underlying Money Market Fund's accounting policies and investment holdings, please see the Underlying Money Market Fund's shareholder report.

Debt Securities — Debt securities for which market quotations are readily available are valued daily on the basis of quotations supplied by dealers or an independent pricing service. The pricing services may use valuation models or matrix pricing, which consider: (i) yield or price with respect to bonds that are considered comparable in characteristics such as rating, interest rate and maturity date or (ii) quotations from securities dealers to determine current value. With the exception of treasury securities of G7 countries, which are generally classified as Level 1, these investments are generally classified as Level 2 of the fair value hierarchy.

### 3. INVESTMENTS AND FAIR VALUE MEASUREMENTS (continued)

- i. Commercial Paper Commercial paper normally represents short-term unsecured promissory notes issued in bearer form by banks or bank holding companies, corporations, finance companies and other issuers. Commercial paper consists of direct U.S. dollar-denominated obligations of domestic or foreign issuers. Asset-backed commercial paper is issued by a special purpose entity that is organized to issue the commercial paper and to purchase trade receivables or other financial assets.
- ii. Inverse Floaters The interest rate on inverse floating rate securities ("inverse floaters") resets in the opposite direction from the market rate of interest to which the inverse floaters are indexed. An inverse floater may be considered to be leveraged to the extent that its interest rate varies by a magnitude that exceeds the magnitude of the change in the index rate of interest. The higher the degree of leverage of an inverse floater, the greater the volatility of its market value.
- iii. Mortgage-Backed and Asset-Backed Securities Mortgage-backed securities represent direct or indirect participations in, or are collateralized by and payable from, mortgage loans secured by residential and/or commercial real estate property. Asset-backed securities include securities whose principal and interest payments are collateralized by pools of other assets or receivables. The value of certain mortgage-backed and asset-backed securities (including adjustable rate mortgage loans) may be particularly sensitive to changes in prevailing interest rates. The value of these securities may also fluctuate in response to the market's perception of the creditworthiness of the issuers.

Asset-backed securities may present credit risks that are not presented by mortgage-backed securities because they generally do not have the benefit of a security interest in collateral that is comparable to mortgage assets. Some asset-backed securities may only have a subordinated claim on collateral.

Stripped mortgage-backed securities are usually structured with two different classes: one that receives substantially all interest payments (interest-only, or "IO" and/or high coupon rate with relatively low principal amount, or "IOette"), and the other that receives substantially all principal payments (principal-only, or "PO") from a pool of mortgage loans. Little to no principal will be received at the maturity of an IO; as a result, periodic adjustments are recorded to reduce the cost of the security until maturity. These adjustments are included in interest income.

- iv. Treasury Inflation Protected Securities TIPS are treasury securities in which the principal amount is adjusted daily to keep pace with inflation, as measured by the U.S. Consumer Pricing Index for Urban Consumers. The repayment of the original bond principal upon maturity is guaranteed by the full faith and credit of the U.S. Government.
- v. When-Issued Securities and Forward Commitments When-issued securities, including TBA ("To Be Announced") securities, are securities that are authorized but not yet issued in the market and purchased in order to secure what is considered to be an advantageous price or yield to a Fund. A forward commitment involves entering into a contract to purchase or sell securities, typically on an extended settlement basis, for a fixed price at a future date. The purchase of securities on a when-issued or forward commitment basis involves a risk of loss if the value of the security to be purchased declines before the settlement date. Conversely, the sale of securities on a forward commitment basis involves the risk that the value of the securities sold may increase before the settlement date. Although a Fund will generally purchase securities on a when-issued or forward commitment basis with the intention of acquiring the securities for its portfolio, the Fund may dispose of when-issued securities or forward commitments prior to settlement, which may result in a realized gain or loss. For financial reporting purposes, cash collateral that has been pledged to cover obligations of a Fund and cash collateral received, if any, is reported separately on the Statements of Assets and Liabilities as receivables/payables for collateral on other investments. Non-cash collateral pledged by a Fund, if any, is noted in the Schedules of Investments.

Derivative Contracts — A derivative is an instrument whose value is derived from underlying assets, indices, reference rates or a combination of these factors. A Fund enters into derivative transactions to hedge against changes in interest rates, securities prices, and/or currency exchange rates, to increase total return, or to gain access to certain markets or attain exposure to other underliers. For financial reporting purposes, cash collateral that has been pledged to cover obligations of a Fund and cash collateral received, if any, is reported separately on the Statements of Assets and Liabilities as either due to broker/receivable for collateral on certain derivative contracts. Non-cash collateral pledged by a Fund, if any, is noted in the Schedules of Investments.

September 30, 2024 (Unaudited)

#### 3. INVESTMENTS AND FAIR VALUE MEASUREMENTS (continued)

Exchange-traded derivatives, including futures and options contracts, are generally valued at the last sale or settlement price on the exchange where they are principally traded. Exchange-traded options without settlement prices are generally valued at the midpoint of the bid and ask prices on the exchange where they are principally traded (or, in the absence of two-way trading, at the last bid price for long positions and the last ask price for short positions). Exchange-traded derivatives typically fall within Level 1 of the fair value hierarchy. Over-the-counter ("OTC") and centrally cleared derivatives are valued using market transactions and other market evidence, including market-based inputs to models, calibration to market-clearing transactions, broker or dealer quotations, or other alternative pricing sources. Where models are used, the selection of a particular model to value OTC and centrally cleared derivatives depends upon the contractual terms of, and specific risks inherent in, the instrument, as well as the availability of pricing information in the market. Valuation models require a variety of inputs, including contractual terms, market prices, yield curves, credit curves, measures of volatility, voluntary and involuntary prepayment rates, loss severity rates and correlations of such inputs. For OTC and centrally cleared derivatives that trade in liquid markets, model inputs can generally be verified and model selection does not involve significant management judgment. OTC and centrally cleared derivatives are classified within Level 2 of the fair value hierarchy when significant inputs are corroborated by market evidence.

i. Forward Contracts — A forward contract is a contract between two parties to buy or sell an asset at a specified price on a future date. A forward contract settlement can occur on a cash or delivery basis. Forward contracts are marked-to-market daily using independent vendor prices, and the change in value, if any, is recorded as an unrealized gain or loss. Cash and certain investments may be used to collateralize forward contracts.

A forward foreign currency exchange contract is a forward contract in which a Fund agrees to receive or deliver a fixed quantity of one currency for another, at a pre-determined price at a future date. All forward foreign currency exchange contracts are marked to market daily by using the outright forward rates or interpolating based upon maturity dates, where available. Non-deliverable forward foreign currency exchange contracts are settled with the counterparty in cash without the delivery of foreign currency.

- ii. Futures Contracts Futures contracts are contracts to buy or sell a standardized quantity of a specified commodity or security. Upon entering into a futures contract, a Fund deposits cash or securities in an account on behalf of the broker in an amount sufficient to meet the initial margin requirement. Subsequent payments are made or received by a Fund equal to the daily change in the contract value and are recorded as variation margin receivable or payable with a corresponding offset to unrealized gains or losses.
- iii. Options When a Fund writes call or put options, an amount equal to the premium received is recorded as a liability and is subsequently marked-to-market to reflect the current value of the option written. Swaptions are options on swap contracts.

Upon the purchase of a call option or a put option by a Fund, the premium paid is recorded as an investment and subsequently marked-to-market to reflect the current value of the option. Certain options may be purchased with premiums to be determined on a future date. The premiums for these options are based upon implied volatility parameters at specified terms.

iv. Swap Contracts — Bilateral swap contracts are agreements in which a Fund and a counterparty agree to exchange periodic payments on a specified notional amount or make a net payment upon termination. Bilateral swap transactions are privately negotiated in the OTC market and payments are settled through direct payments between a Fund and the counterparty. By contrast, certain swap transactions are subject to mandatory central clearing. These swaps are executed through a derivatives clearing member ("DCM"), acting in an agency capacity, and submitted to a central counterparty ("CCP") ("centrally cleared swaps"), in which case all payments are settled with the CCP through the DCM. Swaps are marked-to-market daily using pricing vendor quotations, counterparty or clearinghouse prices or model prices, and the change in value, if any, is recorded as an unrealized gain or loss. Upon entering into a swap contract, a Fund is required to satisfy an initial margin requirement by delivering cash or securities to the counterparty (or in some cases, segregated in a triparty

### 3. INVESTMENTS AND FAIR VALUE MEASUREMENTS (continued)

account on behalf of the counterparty), which can be adjusted by any mark-to-market gains or losses pursuant to bilateral or centrally cleared arrangements. For centrally cleared swaps the daily change in valuation, if any, is recorded as a receivable or payable for variation margin.

An *interest rate swap* is an agreement that obligates two parties to exchange a series of cash flows at specified intervals, based upon or calculated by reference to changes in interest rates on a specified notional principal amount. The payment flows are usually netted against each other, with the difference being paid by one party to the other.

A *credit default swap* is an agreement that involves one party (the buyer of protection) making a stream of payments to another party (the seller of protection) in exchange for the right to receive protection on a reference security or obligation, including a group of assets or exposure to the performance of an index. A Fund's investment in credit default swaps may involve greater risks than if the Fund had invested in the referenced obligation directly. Credit events are contract specific but may include bankruptcy, failure to pay, restructuring and obligation acceleration. If a Fund buys protection through a credit default swap and no credit event occurs, its payments are limited to the periodic payments previously made to the counterparty. Upon the occurrence of a specified credit event, a Fund, as a buyer of credit protection, is entitled to receive an amount equal to the notional amount of the swap and deliver to the seller the defaulted reference obligation in a physically settled trade. A Fund may also receive a net settlement amount in the form of cash or securities equal to the notional amount of the swap reduced by the recovery value of the reference obligation in a cash settled trade.

As a seller of protection, a Fund generally receives a payment stream throughout the term of the swap, provided that there is no credit event. In addition, if a Fund sells protection through a credit default swap, a Fund could suffer a loss because the value of the referenced obligation and the premium payments received may be less than the notional amount of the swap paid to the buyer of protection. Upon the occurrence of a specified credit event, a Fund, as a seller of credit protection, may be required to take possession of the defaulted reference obligation and pay the buyer an amount equal to the notional amount of the swap in a physically settled trade. A Fund may also pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap reduced by the recovery value of the reference obligation in a cash settled trade. Recovery values are at times established through the credit event auction process in which market participants are ensured that a transparent price has been set for the defaulted security or obligation. In addition, a Fund is entitled to a return of any assets, which have been pledged as collateral to the counterparty upon settlement.

The maximum potential amount of future payments (undiscounted) that a Fund as seller of protection could be required to make under a credit default swap would be an amount equal to the notional amount of the agreement. These potential amounts would be partially offset by any recovery values of the respective referenced obligations or net amounts received from a settlement of a credit default swap for the same reference security or obligation where a Fund bought credit protection.

B. Level 3 Fair Value Investments — To the extent that significant inputs to valuation models and other alternative pricing sources are unobservable, or if quotations are not readily available, or if GSAM believes that such quotations do not accurately reflect fair value, the fair value of a Funds' investments may be determined under the Valuation Procedures. GSAM, consistent with its procedures and applicable regulatory guidance, may make an adjustment to the most recent valuation prices of either domestic or foreign securities in light of significant events to reflect what it believes to be the fair value of the securities at the time of determining a Funds' NAV. To the extent investments are valued using single source broker quotations obtained directly from the broker or passed through from third party pricing vendors, such investments are classified as Level 3 investments.

Futures Contracts <sup>(a)</sup>	\$ (7,451)	\$ _	\$	_
Interest Rate Swap Contracts <sup>(a)</sup>	_	(42,148)		_
Written Option Contracts	_	(33,278)		_
Total	\$ (7,451)	\$ (75,426)	\$	

- (a) Amount shown represents unrealized gain (loss) at period end.
- (b) Amounts are disclosed by continent to highlight the impact of time zone differences between local market close and the calculation of net asset value. Security valuations are based on the principal exchange or system on which they are traded, which may differ from country of domicile. The Fund utilizes fair value model prices provided by an independent fair value service for international equities, resulting in a Level 2 classification.

For further information regarding security characteristics, see the Schedules of Investments.

#### 4. INVESTMENTS IN DERIVATIVES

The following tables set forth, by certain risk types, the gross value of derivative contracts (not considered to be hedging instruments for accounting disclosure purposes) as of September 30, 2024. These instruments were used as part of the Funds' investment strategies and to obtain and/or manage exposure related to the risks below. The values in the tables below exclude the effects of cash collateral received or posted pursuant to these derivative contracts, and therefore are not representative of the Funds' net exposure.

The following tables set forth, by certain risk types, the Funds' gains (losses) related to these derivatives and their indicative volumes for the six months ended September 30, 2024. These gains (losses) should be considered in the context that these derivative contracts may have been executed to create investment opportunities and/or economically hedge certain investments, and accordingly, certain gains (losses) on such derivative contracts may offset certain (losses) gains attributable to investments.

(82.877)

<sup>(</sup>a) Includes unrealized gain (loss) on futures contracts and centrally cleared swaps described in the Additional Investment Information sections of the Schedules of Investments. Only current day's variation margin is reported within the Statements of Assets and Liabilities.

U.S. Mortgages Fund	178	_	46,372,633	_	13,540,000

<sup>(</sup>a) Amounts disclosed represent average number of contracts for futures contracts, notional amounts for forward contracts, swap agreements, purchased and written swaptions, based on absolute values, which is indicative of volume for this derivative type, for the months that each Fund held such derivatives for the six months ended September 30, 2024.

### 5. AGREEMENTS AND AFFILIATED TRANSACTIONS

A. Management Agreement — Under the Agreement, GSAM manages the Funds, subject to the general supervision of the Trustees.

As compensation for the services rendered pursuant to the Agreement, the assumption of the expenses related thereto and administration of the Funds' business affairs, including providing facilities, GSAM is entitled to a management fee, accrued daily and paid monthly, equal to an annual percentage rate of each Fund's average daily net assets.

September 30, 2024 (Unaudited)

U.S. Mortgages Fund

### 5. AGREEMENTS AND AFFILIATED TRANSACTIONS (continued)

For the six months ended September 30, 2024, contractual and effective net management fees with GSAM were at the following rates:

	Contractual Management Rate								
Fund	First \$1 billion	Next \$1 billion	Next \$3 billion	Next \$3 billion	Over \$8 billion	Effective Rate	Effective Net Management Rate^		
Enhanced Income Fund	0.25%	0.23%	0.22%	0.22%	0.22%	0.25%	0.25%		
Government Income Fund	0.53	0.48	0.45	0.44	0.44	0.53	0.46+		
Inflation Protected Securities Fund	0.26	0.23	0.22	0.22	0.21	0.26	0.26		
Short Duration Bond Fund	0.40	0.36	0.34	0.33	0.32	0.39	0.39		
Short Duration Government Fund	0.44	0.40	0.38	0.37	0.36	0.44	0.44		
Short-Term Conservative Income Fund	0.25	0.25	0.25	0.25	0.25	0.25	0.19*		

Effective Net Management Rate includes the impact of management fee waivers of affiliated underlying funds, if any.

0.34

<sup>+</sup> The Investment Adviser has agreed to waive a portion of its management fee in order to achieve an effective net management fee rate of 0.46% as an annual percentage of the Fund's average daily net assets of the Government Income Fund. This arrangement will remain in effect through at least July 29, 2025.

0.31

\* The Investment Adviser agreed to waive a portion of its management fee in order to achieve an effective net management fee rate of 0.20% as an annual percentage rate of the Fund's average daily net assets. This arrangement will remain in effect through at least July 29, 2025.

0.29

0.34

The Funds invest in Institutional Shares of the Goldman Sachs Financial Square Government Fund, which is an affiliated Underlying Fund. GSAM has agreed to waive a portion of its management fee payable by the Funds in an amount equal to the management fee it earns as an investment adviser to the affiliated Underlying Fund in which the Funds invest. For the six months ended September 30, 2024, the management fee waived by GSAM for each Fund was as follows:

Fund	Management Fee Waived
Enhanced Income Fund	\$ 5,773
Government Income Fund	818
Inflation Protected Securities Fund	1,116
Short Duration Bond Fund	7,481
Short Duration Government Fund	3,772
Short-Term Conservative Income Fund	132,908
U.S. Mortgages Fund	1,011

B. Distribution and/or Service (12b-1) Plans — The Trust, on behalf of Class A and Class R Shares of each applicable Fund, has adopted Distribution and Service Plans subject to Rule 12b-1 under the Act. Under the Distribution and Service Plans, Goldman Sachs, which serves as distributor (the "Distributor"), is entitled to a fee accrued daily and paid monthly for distribution services and personal and account maintenance services, which may then be paid by Goldman Sachs to authorized dealers. These fees are equal to an annual percentage rate of the average daily net assets attributable to Class A or Class R Shares of the Funds, as applicable, as set forth below.

### 5. AGREEMENTS AND AFFILIATED TRANSACTIONS (continued)

The Trust, on behalf of Class C Shares of each applicable Fund, has adopted a Distribution Plan subject to Rule 12b-1 under the Act. Under the Distribution Plan, Goldman Sachs as Distributor is entitled to a fee accrued daily and paid monthly for distribution services, which may then be paid by Goldman Sachs to authorized dealers. These fees are equal to an annual percentage rate of the average daily net assets attributable to Class C Shares of the Funds, as set forth below.

The Trust, on behalf of Service Shares of each applicable Fund, has adopted a Service Plan subject to Rule 12b-1 under the Act to allow Service Shares to compensate service organizations (including Goldman Sachs) for providing personal and account maintenance services to their customers who are beneficial owners of such shares. The Service Plan provides for compensation to the service organizations equal to an annual percentage rate of the average daily net assets attributable to Service Shares of the Funds, as set forth below.

	Dis	tribution and/or	d/or Service Plan Rates		
Fund	Class A*	Class C	Service	Class R*	
Enhanced Income Fund	0.15%	%	0.25%	%	
Government Income Fund	0.25	0.75	0.25	0.50	
Inflation Protected Securities Fund	0.25	0.75	_	0.50	
Short Duration Bond Fund	0.25	0.75	_	0.50	
Short Duration Government Fund	0.25	0.75	0.25	_	
Short-Term Conservative Income Fund	0.15	_	_	_	
U.S. Mortgages Fund	0.25	_	_	_	

<sup>\*</sup> With respect to Class A and Class R Shares, the Distributor at its discretion may use compensation for distribution services paid under the Distribution and/or Service Plan to compensate service organizations for personal and account maintenance services and expenses as long as such total compensation does not exceed the maximum cap on "service fees" imposed by the Financial Industry Regulatory Authority.

Goldman Sachs has agreed to waive a portion of the distribution (12b-1) and service fees applicable to the Short Duration Government Fund's and Short Duration Bond Fund's Class C Shares in an amount equal to 0.35% of the average daily net assets. These arrangements will remain in place through at least July 29, 2025, and prior to such date Goldman Sachs may not terminate the arrangements without the approval of the Board of Trustees. These fee waivers may be modified or terminated by Goldman Sachs at its discretion and without shareholder approval after such date, although Goldman Sachs does not presently intend to do so.

September 30, 2024 (Unaudited)

#### 5. AGREEMENTS AND AFFILIATED TRANSACTIONS (continued)

C. Distribution Agreement — Goldman Sachs, as Distributor of the shares of the Funds pursuant to a Distribution Agreement, may retain a portion of the Class A Shares' front end sales charge and Class C Shares' CDSC. During the six months ended September 30, 2024, Goldman Sachs retained the following amounts:

Front End

	Sales Charge
Fund	Class A
Government Income Fund	\$ 363
Inflation Protected Securities Fund	628
Short Duration Bond Fund	1,205
Short Duration Government Fund	583
U.S. Mortgages Fund	1,100

During the six months ended September 30, 2024, Goldman Sachs did not retain any portion of Class C Shares' CDSC.

- D. Administration, Service and/or Shareholder Administration Plans The Trust, on behalf of each applicable Fund, has adopted Administration, Service and/or Shareholder Administration Plans to allow Administration, Class C and Service Shares, as applicable, to compensate service organizations (including Goldman Sachs) for providing varying levels of account administration and/or personal and account maintenance services to their customers who are beneficial owners of such shares. The Administration, Service and Shareholder Administration Plans each provide for compensation to the service organizations equal to an annual percentage rate of 0.25%, 0.25% and 0.25% of the average daily net assets attributable to Administration, Class C and Service Shares of the Funds, as applicable.
- E. Transfer Agency Agreement Goldman Sachs also serves as the transfer agent of the Funds for a fee pursuant to the Transfer Agency Agreement. The fees charged for such transfer agency services are accrued daily and paid monthly at annual rates as follows: 0.12% of the average daily net assets of Class A, Class C, Investor and Class R Shares; 0.03% of the average daily net assets of Class R6 and Class P Shares; and 0.04% of the average daily net assets of Administration, Institutional, Service Shares and 0.03% of the average daily net assets with respect to the U.S. Mortgages Fund's Separate Account Institutional Shares.

Goldman Sachs has agreed to waive a portion of its transfer agency fee (a component of "Other Expenses") equal to 0.02% as an annual percentage rate of the average daily net assets attributable to Class A, Class C, Investor, and Class R Shares of the Government Income Fund and Short Duration Bond Fund through at least July 29, 2025, and prior to such date, Goldman Sachs may not terminate the arrangement without the approval of the Board of Trustees.

F. Other Expense Agreements and Affiliated Transactions — GSAM has agreed to reduce or limit certain "Other Expenses" of the Funds (excluding acquired fund fees and expenses, transfer agency fees and expenses, service fees and shareholder administration fees (as applicable), taxes, interest, brokerage fees, expenses of shareholder meetings, litigation and indemnification, and extraordinary expenses) to the extent such expenses exceed, on an annual basis, a percentage rate of the average daily net assets of each Fund. Such Other Expense reimbursements, if any, are accrued daily and paid monthly. In addition, the Funds are not obligated to reimburse GSAM for prior fiscal year expense reimbursements, if any. The Other Expense limitations as an annual percentage rate of average daily net assets for the Enhanced Income, Government Income, Inflation Protected Securities, Short Duration Bond, Short Duration Government, Short-Term Conservative Income and U.S. Mortgages Funds are 0.064%, 0.004%, 0.044%, 0.014%, 0.004%, 0.004% and 0.074%, respectively. These Other Expense limitations will remain in place through at least July 29, 2025, and prior to such date GSAM may not terminate the arrangements without the approval of the Trustees. In addition, the Funds have entered into certain offset arrangements with the transfer agent, which may result in a reduction of the Funds' expenses and are received irrespective of the application of the "Other Expense" limitations described above.

### 5. AGREEMENTS AND AFFILIATED TRANSACTIONS (continued)

For the six months ended September 30, 2024, these expense reductions, including any fee waivers and Other Expense reimbursements, were as follows:

Fund	Management Fee Waiver	Class C Distributions and Service Fees	Transfer Agency Waivers/Credits	Other Expense Reimbursements	Total Expense Reductions
Enhanced Income Fund	\$ 5,773	\$ —	\$ 132	\$ 56,170	\$ 62,075
Government Income Fund	44,191	_	5,736	232,521	282,448
Inflation Protected Securities Fund	1,116	_	377	177,869	179,362
Short Duration Bond Fund	7,481	3,301	9,574	236,410	256,766
Short Duration Government Fund	3,772	5,997	475	236,589	246,833
Short-Term Conservative Income Fund	627,531	_	1,578	297,722	926,831
U.S. Mortgages Fund	1,011	_	186	122,094	123,291

- G. Line of Credit Facility As of September 30, 2024, the Funds participated in a \$1,150,000,000 committed, unsecured revolving line of credit facility (the "facility") together with other funds of the Trust and certain registered investment companies having management agreements with GSAM or its affiliates. This facility is to be used for temporary emergency purposes, or to allow for an orderly liquidation of securities to meet redemption requests. The interest rate on borrowings is based on the federal funds rate. The facility also requires a fee to be paid by the Funds based on the amount of the commitment that has not been utilized. For the six months ended September 30, 2024, the Funds did not have any borrowings under the facility. Prior to April 16, 2024, the facility was \$1,110,000,000.
- H. Other Transactions with Affiliates For the six months ended September 30, 2024, Goldman Sachs earned \$8,127, \$6,486, \$16,078, \$57,764, \$26,764 and \$7,182 in brokerage commissions from portfolio transactions, including futures transactions executed with Goldman Sachs as the Futures Commission Merchant, on behalf of the Enhanced Income, Government Income, Inflation Protected Securities, Short Duration Bond, Short Duration Government and U.S. Mortgages Funds, respectively.

The table below shows the transactions in and earnings from investments in the Underlying Funds for the six months ended September 30, 2024:

Fund	Underlying Fund	Beginning Value as of March 31, 2024	Purchases at Cost	Proceeds from Sales	Ending Value as of September 30, 2024	Shares as of September 30, 2024	Dividend Income

#### 7. TAX INFORMATION

As of the Funds' most recent fiscal year end, March 31, 2024, the Funds' capital loss carryforwards and certain timing differences on a tax basis were as follows:

	Enhanced Income	Government Income	Inflation Protected Securities	Short Duration Bond	Short Duration Government	Short-Term Conservative Income	U.S. Mortgages
Capital loss carryforwards <sup>1</sup> :							
Perpetual Short-Term	\$ (8,978,807)	\$(16,690,564)	\$(22,815,464)	\$(32,684,423)	\$(26,629,934)	\$(15,619,404)	\$(21,292,769)
Perpetual Long-Term	(8,968,851)	(15,818,055)	(35,563,301)	(55,420,669)	(33,994,245)	(6,394,357)	(13,653,963)
Total capital loss carryforwards	(17,947,658)	(32,508,619)	(58,378,765)	(88,105,092)	(60,624,179)	(22,013,761)	(34,946,732)
Timing differences (Dividends Payable, Post October Loss Deferral and Straddle Loss Deferrals)	\$ (4,631,890)	\$ (2,916,584)	\$(12,459,722)	\$(21,184,902)	\$ (8,119,716)	\$ (148,431)	\$ (2,643,212)

A portion of the capital loss carryforwards for Goldman Sachs Enhanced Income Fund were acquired in a tax-free reorganization and may be subject to limitation.

As of September 30, 2024, the Funds' aggregate security unrealized gains and losses based on cost for U.S. federal income tax purposes were as follows:

		Enhanced Income	Government Income		Inflation Protected Securities	9	Short Duration Bond	Short Duration Government		Short-Term Conservative Income	U.S. Mortgages
Tax Cost	\$5	12,357,614	\$153,278,019	\$2	242,311,566	\$1	,271,102,470	\$548,811,836	\$1	,962,189,933	\$286,706,144
Gross unrealized gain Gross unrealized loss		3,755,215 (2,801,962)	1,377,999 (7,014,682)		4,137,582 (2,271,518)		15,200,839 (14,120,403)	4,349,986 (7,912,041)		10,302,207 (140,329)	2,336,913 (7,124,765)
Net unrealized gain (loss)	\$	953,253	\$ (5,636,683)	\$	1,866,064	\$	1,080,436	\$ (3,562,055)	\$	10,161,878	\$ (4,787,852)

The difference between GAAP- basis and tax basis unrealized gains (losses) is attributable primarily to wash sales, net mark to market gains/(losses) on regulated futures contracts and net mark to market gains (losses) on foreign currency contracts, and differences in the tax treatment of market discount accretion and premium amortization and swap transactions.

GSAM has reviewed the Funds' tax positions for all open tax years (the current and prior three years, as applicable) and has concluded that no provision for income tax is required in the Funds' financial statements. Such open tax years remain subject to examination and adjustment by tax authorities.

### 8. OTHER RISKS

The Funds' risks include, but are not limited to, the following:

Asset-Backed Securities Risk — Asset-backed securities are subject to credit/default, interest rate and certain additional risks, including "extension risk" (i.e., in periods of rising interest rates, issuers may pay principal later than expected) and "prepayment risk" (i.e., in periods of declining interest rates, issuers may pay principal more quickly than expected, causing the Funds to reinvest proceeds at lower prevailing interest rates). Due to these risks, asset-backed securities may become more volatile in certain interest rate environments. Asset-backed securities are subject to risks similar to those associated with mortgage-backed securities, as well as risks associated with the nature and servicing of the assets backing the securities. Asset-backed securities may not have the benefit of a security interest in collateral comparable to that of mortgage assets, resulting in additional credit risk.

Collateralized Loan Obligations Risk — The Funds may invest in collateralized loan obligations ("CLOs") and other similarly structured investments. A CLO is an asset-backed security whose underlying collateral is a pool of loans, which may include, among others, floating rate and fixed rate senior secured loans, senior unsecured loans, and subordinate corporate loans, including

September 30, 2024 (Unaudited)

#### 8. OTHER RISKS (continued)

loans that may be rated below investment grade or equivalent unrated loans. In addition to the normal risks associated with loan-and credit-related securities discussed elsewhere in the Prospectus (e.g., loan-related investments risk, interest rate risk and default risk), investments in CLOs carry additional risks including, but not limited to, the risk that: (i) distributions from the collateral may not be adequate to make interest or other payments; (ii) the quality of the collateral may decline in value or default; (iii) the Funds may invest in tranches of CLOs that are subordinate to other tranches; (iv) the structure and complexity of the transaction and the legal documents could lead to disputes among investors regarding the characterization of proceeds; and (v) the CLO's manager may perform poorly.

Derivatives Risk — The Funds' use of derivatives and other similar instruments (collectively referred to in this paragraph as "derivatives") may result in loss, including due to adverse market movements. Derivatives, which may pose risks in addition to and greater than those associated with investing directly in securities, currencies or other assets and instruments, may increase market exposure and be illiquid or less liquid, volatile, difficult to price and leveraged so that small changes in the value of the underlying assets or instruments may produce disproportionate losses to the Funds. Certain derivatives are also subject to counterparty risk, which is the risk that the other party in the transaction will not, or lacks the capacity or authority to, fulfill its contractual obligations, liquidity risk, which includes the risk that the Funds will not be able to exit the derivative when it is advantageous to do so, and risks arising from margin requirements, which include the risk that the Funds will be required to pay additional margin or set aside additional collateral to maintain open derivative positions. The use of derivatives is a highly specialized activity that involves investment techniques and risks different from those associated with investments in more traditional securities and instruments. Losses from derivatives can also result from a lack of correlation between changes in the value of derivative instruments and the portfolio assets (if any) being hedged.

Floating and Variable Rate Obligations Risk — Floating rate and variable rate obligations are debt instruments issued by companies or other entities with interest rates that reset periodically (typically, daily, monthly, quarterly, or semi-annually) in response to changes in the market rate of interest on which the interest rate is based. Such market rates are generally the Secured Overnight Financing Rate ("SOFR"), a term SOFR rate published by CME Group Benchmark Administration Limited (CBA) calculated using certain derivatives markets ("Term SOFR"), the Prime Rate of a designated U.S. bank, the Federal Funds Rate, or another base lending rate used by commercial lenders. For floating and variable rate obligations, there may be a lag between an actual change in the underlying interest rate benchmark and the reset time for an interest payment of such an obligation, which could harm or benefit a Fund, depending on the interest rate environment or other circumstances. In a rising interest rate environment, for example, a floating or variable rate obligation that does not reset immediately would prevent a Fund from taking full advantage of rising interest rates in a timely manner. However, in a declining interest rate environment, a Fund may benefit from a lag due to an obligation's interest rate payment not being immediately impacted by a decline in interest rates.

Foreign and Emerging Countries Risk — Investing in foreign markets may involve special risks and considerations not typically associated with investing in the U.S. Foreign securities may be subject to risk of loss because of more or less foreign government regulation; less public information; less stringent investor protections; less stringent accounting, corporate governance, financial reporting and disclosure standards; and less economic, political and social stability in the countries in which a Fund invests. The imposition of sanctions, exchange controls (including repatriation restrictions), confiscation of assets and property, trade restrictions (including tariffs) and other government restrictions by the U.S. or other governments, or from problems in registration, settlement or custody, may also result in losses. The type and severity of sanctions and other similar measures, including counter sanctions and other retaliatory actions, that may be imposed could vary broadly in scope, and their impact is impossible to predict. For example, the imposition of sanctions and other similar measures could, among other things, cause a decline in the value and/or liquidity of securities issued by the sanctioned country or companies located in or economically tied to the sanctioned country and increase market volatility and disruption in the sanctioned country and throughout the world. Sanctions and other similar measures could limit or prevent a Fund from buying and selling securities (in the sanctioned country and other markets), significantly delay or prevent the settlement of securities transactions, and significantly impact a Fund's liquidity and performance. Foreign risk also involves the risk of negative foreign currency exchange rate fluctuations, which may cause the value of securities denominated in such foreign currency (or other instruments through which a Fund has exposure to foreign

#### 8. OTHER RISKS (continued)

currencies) to decline in value. Currency exchange rates may fluctuate significantly over short periods of time. To the extent that a Fund also invests in securities of issuers located in, or economically tied to, emerging markets, these risks may be more pronounced.

Interest Rate Risk — When interest rates increase, fixed income securities or instruments held by a Fund will generally decline in value. Long-term fixed income securities or instruments will normally have more price volatility because of this risk than short-term fixed income securities or instruments. A wide variety of market factors can cause interest rates to rise, including central bank monetary policy, rising inflation and changes in general economic conditions. Changing interest rates may have unpredictable effects on the markets, may result in heightened market volatility and may detract from Fund performance. In addition, changes in monetary policy may exacerbate the risks associated with changing interest rates. Funds with longer average portfolio durations will generally be more sensitive to changes in interest rates than funds with a shorter average portfolio duration. Fluctuations in interest rates may also affect the liquidity of fixed income securities and instruments held by the Funds. A sudden or unpredictable increase in interest rates may cause volatility in the market and may decrease the liquidity of a Fund's investments, which would make it harder for the Fund to sell its investments at an advantageous time.

Large Shareholder Transactions Risk — A Fund may experience adverse effects when certain large shareholders, such as other funds, institutional investors (including those trading by use of non-discretionary mathematical formulas), financial intermediaries (who may make investment decisions on behalf of underlying clients and/or include a Fund in their investment model), individuals, accounts and Goldman Sachs affiliates, purchase or redeem large amounts of shares of a Fund. Such large shareholder redemptions, which may occur rapidly or unexpectedly, may cause a Fund to sell portfolio securities at times when it would not otherwise do so, which may negatively impact a Fund's NAV and liquidity. These transactions may also accelerate the realization of taxable income to shareholders if such sales of investments resulted in gains, and may also increase transaction costs. In addition, a large redemption could result in a Fund's current expenses being allocated over a smaller asset base, leading to an increase in a Fund's expense ratio. Similarly, large Fund share purchases may adversely affect a Fund's performance to the extent that the Fund is delayed in investing new cash or otherwise maintains a larger cash position than it ordinarily would.

Liquidity Risk — A Fund may make investments that are illiquid or that may become less liquid in response to market developments or adverse investor perceptions. Illiquid investments may be more difficult to value. Liquidity risk may also refer to the risk that a Fund will not be able to pay redemption proceeds within the allowable time period or without significant dilution to remaining investors' interests because of unusual market conditions, declining prices of the securities sold, an unusually high volume of redemption requests, or other reasons. To meet redemption requests, a Fund may be forced to sell investments at an unfavorable time and/or under unfavorable conditions. If a Fund is forced to sell securities at an unfavorable time and/or under unfavorable conditions, such sales may adversely affect a Fund's NAV and dilute remaining investors' interests. Liquidity risk may be the result of, among other things, the reduced number and capacity of traditional market participants to make a market in fixed income securities or the lack of an active market. The potential for liquidity risk may be magnified by a rising interest rate environment or other circumstances where investor redemptions from fixed income funds may be higher than normal, potentially causing increased supply in the market due to selling activity. These risks may be more pronounced in connection with the Funds' investments in securities of issuers located in emerging market countries. Redemptions by large shareholders may have a negative impact on a Fund's liquidity.

Market and Credit Risks — In the normal course of business, a Fund trades financial instruments and enters into financial transactions where risk of potential loss exists due to changes in the market (market risk). The value of the securities in which a Fund invests may go up or down in response to the prospects of individual companies, particular sectors or governments and/or general economic conditions throughout the world due to increasingly interconnected global economies and financial markets. Events such as war, military conflict, acts of terrorism, social unrest, natural disasters, recessions, inflation, rapid interest rate changes, supply chain disruptions, sanctions, the spread of infectious illness or other public health threats could also significantly impact a Fund and its investments. Additionally, a Fund may also be exposed to credit risk in the event that an issuer or guarantor fails to perform or that an institution or entity with which the Fund has unsettled or open transactions defaults.

September 30, 2024 (Unaudited)

#### 8. OTHER RISKS (continued)

Mortgage-Backed and Other Asset-Backed Securities Risk — Mortgage-related and other asset-backed securities are subject to credit/ default, interest rate and certain additional risks, including "extension risk" (i.e., in periods of rising interest rates, issuers may pay principal later than expected) and "prepayment risk" (i.e., in periods of declining interest rates, issuers may pay principal more quickly than expected, causing the Funds to reinvest proceeds at lower prevailing interest rates). Due to these risks, asset-backed securities may become more volatile in certain interest rate environments. Mortgage-backed securities offered by non-governmental issuers are subject to other risks as well, including failures of private insurers to meet their obligations and unexpectedly high rates of default on the mortgages backing the securities, particularly during periods of rising interest rates. Other asset-backed securities are subject to risks similar to those associated with mortgage-backed securities, as well as risks associated with the nature and servicing of the assets backing the securities. Asset-backed securities may not have the benefit of a security interest in collateral comparable to that of mortgage assets, resulting in additional credit risk.

**Portfolio Turnover Rate Risk** — A high rate of portfolio turnover may involve correspondingly greater expenses which must be borne by the Funds and their shareholders, and is also likely to result in short-term capital gains taxable to shareholders.

### 9. INDEMNIFICATIONS

Under the Trust's organizational documents, its Trustees, officers, employees and agents are indemnified, to the extent permitted by the Act and state law, against certain liabilities that may arise out of performance of their duties to the Funds. Additionally, in the course of business, the Funds enter into contracts that contain a variety of indemnification clauses. The Funds' maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Funds that have not yet occurred. However, GSAM believes the risk of loss under these arrangements to be remote.

### 10. SUBSEQUENT EVENTS

Subsequent events have been evaluated through the date of issuance, and GSAM has concluded that there is no impact requiring adjustment or disclosure in the financial statements.

#### **Background**

The Goldman Sachs Enhanced Income Fund, Goldman Sachs Government Income Fund, Goldman Sachs Inflation Protected Securities Fund, Goldman Sachs Short Duration Bond Fund, Goldman Sachs Short Duration Government Fund, Goldman Sachs Short-Term Conservative Income Fund, and Goldman Sachs U.S. Mortgages Fund (the "Funds") are investment portfolios of Goldman Sachs Trust (the "Trust"). The Board of Trustees oversees the management of the Trust and reviews the investment performance and expenses of the Funds at regularly scheduled meetings held throughout the year. In addition, the Board of Trustees determines annually whether to approve the continuance of the Trust's investment management agreements (the "Management Agreements") with Goldman Sachs Asset Management, L.P. (the "Investment Adviser") on behalf of the Funds.

The Management Agreements were most recently approved for continuation until June 30, 2025 by the Board of Trustees, including those Trustees who are not parties to the Management Agreements or "interested persons" (as defined in the Investment Company Act of 1940, as amended) of any party thereto (the "Independent Trustees"), at a meeting held on June 11-12, 2024 (the "Annual Meeting").

The review process undertaken by the Trustees spans the course of the year and culminates with the Annual Meeting. To assist the Trustees in their deliberations, the Trustees have established a Contract Review Committee (the "Committee"), comprised of the Independent Trustees. The Committee held two meetings over the course of the year since the Management Agreements were last approved. At those Committee meetings, regularly scheduled Board or other committee meetings, and/or the Annual Meeting, matters relevant to the renewal of the Management Agreements were considered by the Board, or the Independent Trustees, as applicable. With respect to each Fund, such matters included:

- (a) the nature and quality of the advisory, administrative, and other services provided to the Fund by the Investment Adviser and its affiliates, including information about:
  - (i) the structure, staff, and capabilities of the Investment Adviser and its portfolio management teams;
  - (ii) the groups within the Investment Adviser and its affiliates that support the portfolio management teams or provide other types of necessary services, including fund services groups (e.g., accounting and financial reporting, tax, shareholder services, and operations); controls and risk management groups (e.g., legal, compliance, valuation oversight, credit risk management, internal audit, compliance testing, market risk analysis, finance, and central funding); sales and distribution support groups, and others (e.g., information technology and training);
  - (iii) trends in employee headcount;
  - (iv) the Investment Adviser's financial resources and ability to hire and retain talented personnel and strengthen its operations; and
  - (v) the parent company's support of the Investment Adviser and its mutual fund business, as expressed by the firm's senior management;
- (b) information on the investment performance of the Fund, including comparisons to the performance of similar mutual funds, as provided by a third-party mutual fund data provider engaged as part of the contract review process (the "Outside Data Provider"), a benchmark performance index, and (in the case of the Enhanced Income Fund, Short Duration Bond Fund and Short Duration Government Fund) a composite of accounts with comparable investment strategies managed by the Investment Adviser; and information on general investment outlooks in the markets in which the Fund invests;
- (c) information provided by the Investment Adviser indicating the Investment Adviser's views on whether the Fund's peer group and/or benchmark index had high, medium, or low relevance given the Fund's particular investment strategy;
- (d) the terms of the Management Agreement and other agreements with affiliated service providers entered into by the Trust on behalf of the Fund;
- (e) fee and expense information for the Fund, including:
  - the relative management fee and expense levels of the Fund as compared to those of comparable funds managed by other advisers, as provided by the Outside Data Provider;
  - (ii) the Fund's expense trends over time; and
  - (iii) to the extent the Investment Adviser manages other types of accounts (such as bank collective trusts, private wealth management accounts, institutional separate accounts, sub-advised mutual funds, and non-U.S. funds) having investment objectives and policies similar to those of the Fund, comparative information on the advisory fees charged and services provided to those accounts by the Investment Adviser;
- (f) with respect to the extensive investment performance and expense comparison data provided by the Outside Data Provider, its processes in producing that data for the Fund;
- (g) the undertakings of the Investment Adviser and its affiliates to implement fee waivers and/or expense limitations;
- (h) information relating to the profitability of the Management Agreement and the transfer agency and distribution and service arrangements of the Fund to the Investment Adviser and its affiliates;
- (i) whether the Fund's existing management fee schedule adequately addressed any economies of scale;

- (j) a summary of the "fall-out" benefits derived by the Investment Adviser and its affiliates from their relationships with the
  Fund, including the fees received by the Investment Adviser's affiliates from the Fund for transfer agency, portfolio
  trading, distribution and other services;
- (k) a summary of potential benefits derived by the Fund as a result of its relationship with the Investment Adviser;
- (1) information regarding portfolio trading and how the Investment Adviser carries out its duty to seek best execution;
- (m) portfolio manager ownership of Fund shares; the manner in which portfolio manager compensation is determined; and the number and types of accounts managed by the portfolio managers;
- (n) the nature and quality of the services provided to the Fund by its unaffiliated service providers, and the Investment Adviser's general oversight and evaluation (including reports on due diligence) of those service providers as part of the administrative services provided under the Management Agreement; and
- (o) the Investment Adviser's processes and policies addressing various types of potential conflicts of interest; its approach to risk management; the annual review of the effectiveness of the Fund's compliance program; and periodic compliance reports.

the Investment Adviser's processes and policies addressing various types of potential conflicts of interest; its approach to risk management; the annual review of the effectiveness of the Fund's compliance program; and periodic compliance reports.

The presentations made at the Board and Committee meetings and at the Annual Meeting encompassed the Funds and other mutual funds for which the Board of Trustees has responsibility. In evaluating the Management Agreements at the Annual Meeting, the Trustees relied upon their knowledge, resulting from their meetings and other interactions throughout the year, of the Investment Adviser and its affiliates, their services, and the Funds. In conjunction with these meetings, the Trustees received written materials and oral presentations on the topics covered, and the Investment Adviser addressed the questions and concerns of the Trustees, including concerns regarding the investment performance of certain of the funds they oversee. The Independent Trustees were advised by their independent legal counsel regarding their responsibilities and other regulatory requirements related to the approval and continuation of mutual fund investment management agreements under applicable law. In addition, the Investment Adviser and its affiliates provided the Independent Trustees with a written response to a formal request for information sent on behalf of the Independent Trustees by their independent legal counsel. During the course of their deliberations, the Independent Trustees met in executive sessions with their independent legal counsel, without representatives of the Investment Adviser or its affiliates present.

### Nature, Extent, and Quality of the Services Provided Under the Management Agreements

As part of their review, the Trustees considered the nature, extent, and quality of the services provided to the Funds by the Investment Adviser. In this regard, the Trustees considered both the investment advisory services and non-advisory services that are provided by the Investment Adviser and its affiliates. The Trustees noted the Investment Adviser's commitment to maintaining high quality systems and expending substantial resources to respond to ongoing changes to the market, regulatory and control environment in which the Funds and their service providers operate, including developments associated with geopolitical events and economic sanctions, as well as the efforts of the Investment Adviser and its affiliates to combat cyber security risks. They also noted the transition in the leadership and changes in personnel of various of the Investment Adviser's portfolio management teams that had occurred in recent periods, and the ongoing recruitment efforts aimed at bringing high quality investment talent to the Investment Adviser. The Trustees also considered information regarding the Investment Adviser's efforts relating to business continuity planning. The Trustees concluded that the Investment Adviser continued to commit substantial financial and operational resources to the Funds and expressed confidence that the Investment Adviser would continue to do so in the future. The Trustees also recognized that the Investment Adviser had made significant commitments to address regulatory compliance requirements applicable to the Funds and the Investment Adviser and its affiliates.

#### **Investment Performance**

The Trustees also considered the investment performance of the Funds. In this regard, they compared the investment performance of each Fund to its peers using rankings and ratings compiled by the Outside Data Provider as of December 31, 2023, and updated performance information prepared by the Investment Adviser using the peer group identified by the Outside Data Provider as of March 31, 2024. The information on each Fund's investment performance was provided for the one-, three-, five-, and ten-year periods ending on the applicable dates, to the extent that each Fund had been in existence for those periods. The Trustees also reviewed each Fund's investment performance relative to its performance benchmark. As part of this review, they considered the investment performance trends of the Funds over time, and reviewed the investment performance of each Fund in light of its investment objective and policies and market conditions. The Trustees also received information comparing the

Enhanced Income Fund, Short Duration Bond Fund and Short Duration Government Fund's performance to that of composites of accounts with comparable investment strategies managed by the Investment Adviser.

In addition, the Trustees considered materials prepared and presentations made by the Investment Adviser's senior management and portfolio management personnel in which Fund performance was assessed. The Trustees also considered the Investment Adviser's periodic reports with respect to the Funds' risk profiles, and how the Investment Adviser's approach to risk monitoring and management influences portfolio management.

The Trustees noted that the Enhanced Income Fund's Institutional Shares had placed in the third quartile of the Fund's peer group for the one-, five-, and ten-year periods, and in the fourth quartile for the three-year period, and had outperformed the Fund's benchmark index for the one-, three-, five-, and ten-year periods ended March 31, 2024. They also considered that the Enhanced Income Fund had experienced certain principal investment strategy changes and a benchmark change in 2021 and had experienced certain portfolio management changes in 2022. The Trustees observed that the Government Income Fund's Institutional Shares had placed in the top half of the Fund's peer group for the one-year period, and in the third quartile for the three-, five-, and ten-year periods, and had outperformed the Fund's benchmark index for the one-year period and underperformed for the three-, five-, and ten-year periods ended March 31, 2024. They noted that the Government Income Fund had experienced certain portfolio management changes in 2021, 2022, and 2023. The Trustees considered that the Inflation Protected Securities Fund's Institutional Shares had placed in the top half of the Fund's peer group for the ten-year period and in the third quartile for the one-, three-, and five-year periods, and had underperformed the Fund's benchmark index for the one-, three-, five-, and ten-year periods ended March 31, 2024. They observed that the Inflation Protected Securities Fund had experienced certain portfolio management changes in 2022 and 2023. The Trustees noted that the Short Duration Bond Fund's Institutional Shares had placed in the top half of the Fund's peer group for the one-, three-, five-, and ten-year periods, and had outperformed the Fund's benchmark index for the one-, five-, and ten-year periods and performed in line with the Fund's benchmark index for the three-year period ended March 31, 2024. They also considered that in July 2021, the Short Duration Bond Fund had been repositioned from the Short Duration Income Fund, which involved changes to the Fund's name, principal investment strategy and benchmark. The Trustees further observed that the Short Duration Bond Fund had experienced certain portfolio management changes in 2022. They noted that the Short Duration Government Fund's Institutional Shares had placed in the third quartile of the Fund's peer group for the one-, five-, and ten-year periods and in the fourth quartile for the three-year period, and had outperformed the Fund's benchmark index for the one-year period and underperformed for the three-, five-, and ten-year periods ended March 31, 2024. The Trustees considered that the Short Duration Government Fund had experienced certain portfolio management changes in 2022. They also observed that the Short-Term Conservative Income Fund's Institutional Shares had placed in the top half of the Fund's peer group and had outperformed the Fund's benchmark index for the one-, three-, five-, and ten-year periods ended March 31, 2024. The Trustees noted that the Short-Term Conservative Income Fund had experienced certain portfolio management changes in 2022. They considered that the U.S. Mortgages Fund's Institutional Shares had placed in the in the third quartile of the Fund's peer group for the one-year period and in the fourth quartile for the three-, five-, and ten-year periods, and had outperformed the Fund's benchmark index for the five-year period and underperformed for the one-, three-, and ten-year periods ended March 31, 2024. The Trustees considered that the U.S. Mortgages Fund had experienced certain portfolio management changes in 2022 and 2023.

### **Costs of Services Provided and Competitive Information**

The Trustees considered the contractual terms of the Management Agreements and the fee rates payable by each Fund thereunder. In this regard, the Trustees considered information on the services rendered by the Investment Adviser to the Funds, which included both advisory and administrative services that were directed to the needs and operations of the Funds as registered mutual funds.

In particular, the Trustees reviewed analyses prepared by the Outside Data Provider regarding the expense rankings of the Funds. The analyses provided a comparison of each Fund's management fee and breakpoints (with the exception of the Short-Term Conservative Income Fund, which does not have breakpoints) to those of a relevant peer group and category universe; an expense analysis which compared each Fund's overall net and gross expenses to a peer group and a category universe; and data comparing each Fund's net expenses to the peer and category medians. The analyses also compared each Fund's other expenses and fee waivers/reimbursements to those of the peer group and category medians. The Trustees concluded that the comparisons provided by the Outside Data Provider were useful in evaluating the reasonableness of the management fees and total expenses paid by the Funds.

In addition, the Trustees considered the Investment Adviser's undertakings to implement fee waivers and/or expense limitations. They also considered, to the extent that the Investment Adviser manages other types of accounts having investment objectives and policies similar to those of the Funds, comparative fee information for services provided by the Investment Adviser to those accounts, and information that indicated that services provided to the Funds differed in various significant respects from

the services provided to other types of accounts which, in many cases, operated under less stringent legal and regulatory structures, required fewer services from the Investment Adviser to a smaller number of client contact points, and were less time-intensive.

In addition, the Trustees noted that shareholders are able to redeem their shares at any time if shareholders believe that the Fund fees and expenses are too high or if they are dissatisfied with the performance of the Fund.

#### **Profitability**

The Trustees reviewed each Fund's contribution to the Investment Adviser's revenues and pre-tax profit margins. In this regard the Trustees noted that they had received, among other things, profitability analyses and summaries, revenue and expense schedules by Fund and by function (i.e., investment management, transfer agency and distribution and service), and information on the Investment Adviser's expense allocation methodology. They observed that the profitability and expense figures are substantially similar to those used by the Investment Adviser for many internal purposes, including compensation decisions among various business groups, and are thus subject to a vigorous internal debate about how certain revenue and expenses should be allocated. The Trustees also noted that the internal audit group within the Goldman Sachs organization periodically audits the expense allocation methodology and that the internal audit group was satisfied with the reasonableness, consistency, and accuracy of the Investment Adviser's expense allocation methodology. Profitability data for each Fund was provided for 2023 and 2022, and the Trustees considered this information in relation to the Investment Adviser's overall profitability.

#### **Economies of Scale**

The Trustees considered the information that had been provided regarding whether there have been economies of scale with respect to the management of the Funds. The Trustees also considered the breakpoints in the fee rate payable under the Management Agreement for each of the Funds (other than the Short-Term Conservative Income Fund) at the following annual percentage rates of the average daily net assets of the Funds:

The Trustees noted that the breakpoints were designed to share potential economies of scale, if any, with the Funds and their shareholders as assets under management reach those asset levels. The Trustees considered the amounts of assets in the Funds; the Funds' recent share purchase and redemption activity; the information provided by the Investment Adviser relating to the costs of the services provided by the Investment Adviser and its affiliates and their realized profits; information comparing fee rates charged by the Investment Adviser with fee rates charged to other funds in the peer groups; and the Investment Adviser's undertakings to waive a portion of its management fee (with respect to the Government Income Fund and Short-Term Conservative Income Fund) and to limit certain expenses of the Funds that exceed specified levels, as well as Goldman Sachs & Co. LLC's ("Goldman Sachs") undertaking to waive a portion of the distribution and service fees paid by the Short Duration Bond Fund's and Short Duration Government Fund's Class C shares and a portion of the transfer agency fees paid by the Government Income Fund's and the Short Duration Bond Fund's Class A, Class C, Investor and Class R Shares. Upon reviewing these matters at the Annual Meeting, the Trustees concluded that the fee breakpoints represented a means of assuring that benefits of scalability, if any, would be passed along to shareholders at the specified asset levels. They also noted that the Investment Adviser had passed along savings to shareholders of the Short Duration Bond Fund and Short-Term Conservative Income Fund, which had asset levels above at least the first breakpoint during the prior fiscal year.

The Trustees noted that the Short-Term Conservative Income Fund does not have management fee breakpoints. They considered the asset levels in the Fund; the Fund's recent purchase and redemption activity; the information provided by the Investment Adviser relating to the costs of the services provided by the Investment Adviser and its affiliates and their realized profits; information comparing the contractual fee rates charged by the Investment Adviser with fee rates charged to other funds in the peer group; and the Investment Adviser's undertakings to waive a portion of its management fee and to limit certain expenses of the Fund that exceed a specified level.

Average Daily Net Assets	Enhanced Income Fund	Government Income Fund	Inflation Protected Securities Fund	Short Duration Bond Fund	Short Duration Government Fund	U.S. Mortgages Fund

#### Other Benefits to the Investment Adviser and Its Affiliates

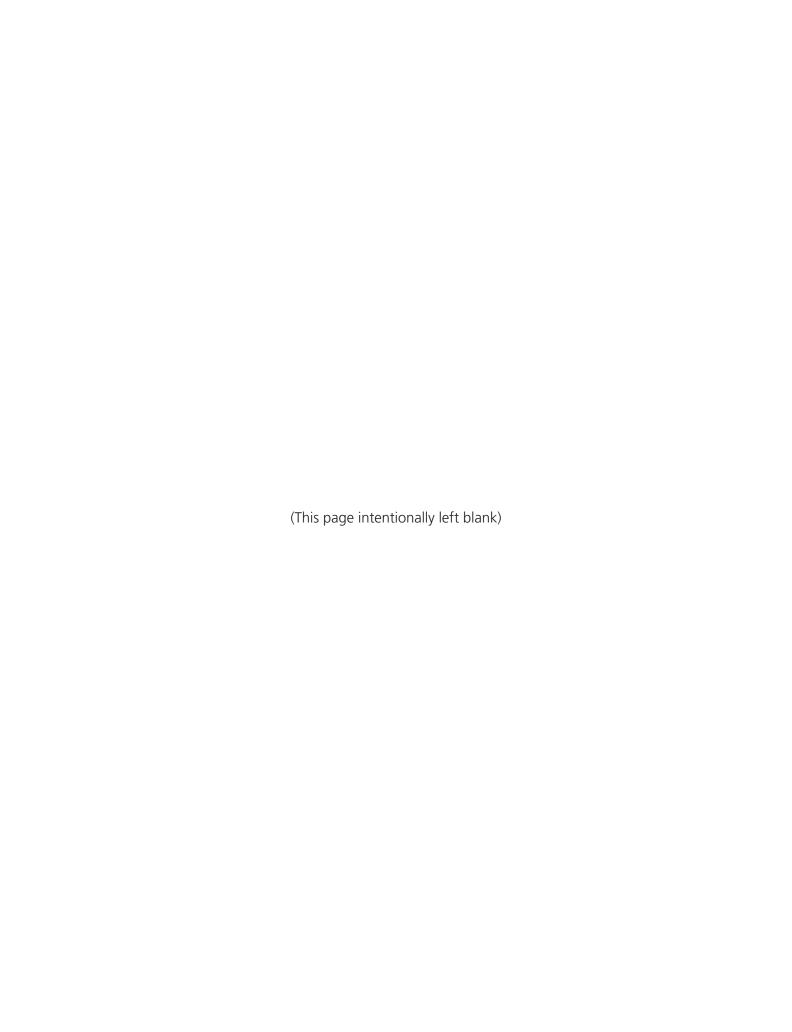

The Trustees also considered the other benefits derived by the Investment Adviser and its affiliates from their relationships with the Funds as stated above, including: (a) transfer agency fees received by Goldman Sachs; (b) futures commissions earned by Goldman Sachs for executing futures transactions on behalf of the Funds; (c) trading efficiencies resulting from aggregation of orders of the Funds with those for other funds or accounts managed by the Investment Adviser; (d) the Investment Adviser's ability to leverage the infrastructure designed to service the Funds on behalf of its other clients; (e) the Investment Adviser's ability to cross-market other products and services to Fund shareholders; (f) Goldman Sachs' retention of certain fees as Fund Distributor; (g) the Investment Adviser's ability to negotiate better pricing with custodians on behalf of its other clients, as a result of the relationship with the Funds; (h) the investment of cash and cash collateral in money market funds managed by the Investment Adviser that will result in increased assets under management for those money market funds; (i) the investment in exchange-traded funds ("ETFs") managed by the Investment Adviser that will result in increased assets under management for those ETFs and may facilitate the development of the Investment Adviser's ETF advisory business; and (j) the possibility that the working relationship between the Investment Adviser and the Funds' third-party service providers may cause those service providers to be more likely to do business with other areas of Goldman Sachs. In the course of considering the foregoing, the Independent Trustees requested and received further information quantifying certain of these fall-out benefits.

#### Other Benefits to the Funds and Their Shareholders

The Trustees also noted that the Funds receive certain other potential benefits as a result of their relationship with the Investment Adviser, including: (a) trading efficiencies resulting from aggregation of orders of the Funds with those of other funds or accounts managed by the Investment Adviser; (b) enhanced servicing from vendors due to the volume of business generated by the Investment Adviser and its affiliates; (c) enhanced servicing from broker-dealers due to the volume of business generated by the Investment Adviser and its affiliates; (d) the Investment Adviser's ability to negotiate favorable terms with derivatives counterparties on behalf of the Funds as a result of the size and reputation of the Goldman Sachs organization; (e) the advantages received from the Investment Adviser's knowledge and experience gained from managing other accounts and products; (f) the Investment Adviser's ability to hire and retain qualified personnel to provide services to the Funds because of the reputation of the Goldman Sachs organization; (g) the Funds' access, through the Investment Adviser, to certain firm-wide resources (e.g., proprietary risk management systems and databases), subject to certain restrictions; and (h) the Funds' access to certain affiliated distribution channels. In addition, the Trustees noted the competitive nature of the mutual fund marketplace, and considered that many of the Funds' shareholders invested in the Funds in part because of the Funds' relationship with the Investment Adviser and that those shareholders have a general expectation that the relationship will continue.

#### Conclusion

In connection with their consideration of the Management Agreements, the Trustees gave weight to each of the factors described above, but did not identify any particular factor as controlling their decision. After deliberation and consideration of all of the information provided, including the factors described above, the Trustees concluded, in the exercise of their business judgment, that the management fees paid by each of the Funds were reasonable in light of the services provided to it by the Investment Adviser, the Investment Adviser's costs and each Fund's current and reasonably foreseeable asset levels. The Trustees unanimously concluded that the Investment Adviser's continued management likely would benefit each Fund and its shareholders and that the Management Agreements should be approved and continued with respect to each Fund until June 30, 2025.
