

# Goldman Sachs International Equity Insights Fund

2Q 2024

Class A: GCIAX | Class C: GCICX | Class I: GCIIX | Class S: GCISX | Class IR: GCITX | Class R6: GCIUX | Class R: GCIRX

## Market Review

The MSCI EAFE Index remained flat throughout the second quarter of 2024. In terms of specific regional performance, Japanese stocks saw relatively weak performance compared to other regions, with historic low levels of Yen starting to weigh on consumer and investor sentiment. European markets were buoyed by the prospect of potential rate cuts appearing on the near horizon. Despite the European Central Bank's (ECB) interest rate cut in June, further rate cuts remain uncertain due to more than expected services inflation.

## Performance Review

In the second quarter of 2024, the GS International Equity Insights Fund returned -0.07%, outperforming its benchmark by 35 basis points (net, I-share). Consequently after a strong first quarter, the Fund has returned 8.59% for the year, outperforming its benchmark by 325 basis points.

Overall, all four of our investment pillars performed had modestly positive contributions to performance, as did the country tilts portion of our portfolio.

Our **High-Quality Business Models** pillar was the largest contributor to returns, albeit still at a modest magnitude. In particular, the components of this pillar which seek to evaluate and identify companies with durable profitability and a strong financial position drove much of the performance.

Our **Sentiment Analysis** pillar also contributed modestly. Notably, the components of this pillar that drove performance were where we identify short-positioning amongst institutional investors in the market and seek to identify stocks that will be most negatively impacted by these short sellers.

Our **Fundamental Mispricings** and **High-Quality Business Models** both only modestly contributed over the quarter.

One particularly strong area for the Fund over the quarter was our strong stock selection within the Financials sector. As we have seen the interest rate cycle shift to be more dovish within Europe than anticipated, our underweights to traditional banks, which benefit from higher rates, was beneficial.

On the other hand, our stock selection within Japan was challenging, particularly within their real estate management and development industry that has been negatively impacted by the depreciating Yen.

**Country Tilts** also contributed during the quarter. In particular, our overweight to Denmark and the Netherlands was beneficial during the quarter. Additionally, our underweight to France also contributed, as their stock market experienced challenges in light of the surprise election result in June.

## Summary Statistics

AUM (All Share Classes, \$M)	\$1,736

Inception Date	Aug 15, 1997
Number of Holdings	295
Benchmark	MSCI EAFE Index
<b>Expense Ratios (Inst'l Share Class), Net/Gross</b>	<b>0.82% / 0.87%</b>

## INSTITUTIONAL CLASS PERFORMANCE

## PILLAR CONTRIBUTIONS TO EXCESS RETURNS (GROSS)

The returns represent past performance. Past performance does not guarantee future results. The Fund's investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted above. Please visit [www.gsamfunds.com](http://www.gsamfunds.com) to obtain the most recent month-end returns. Performance reflects cumulative total returns for periods of less than one year and average annual total returns for periods of greater than one year. All Fund performance data reflect the reinvestment of distributions. Standardized Total Returns can be found on the following page. The expense ratios of the Fund, both current (net of any fee waivers or expense limitations) and before waivers (gross of any fee waivers or expense limitations) are as set forth above. Pursuant to a contractual arrangement, the Fund's waivers and/or expense limitations will remain in place through at least 2/28/25, and prior to such date the investment adviser may not terminate the arrangements without the approval of the Fund's Board of Trustees. Source: MSCI, Goldman Sachs Asset Management. Please refer to the Fund's prospectus for the most recent expenses.

Standardized Total Returns (% annualized) as of 6.30.2024

	Inception Date	1-Year	5-Years	10-Years
I-Share Class	15Aug1997	16.10	7.33	5.48

The returns represent past performance. Past performance does not guarantee future results. The Fund's investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted above. Please visit [www.GSAMFUNDS.com](http://www.GSAMFUNDS.com) to obtain the most recent month-end returns. The standardized total returns are average annual total returns or cumulative total returns (only if the performance period is one year or less) as of the most recent calendar quarter-end. They assume reinvestment of all distributions at net asset value. Because Institutional shares do not involve a sales charge, such a charge is not applied to their standardized total returns.

Past performance does not guarantee future results, which may vary. The attribution returns presented herein are gross and do not reflect the deduction of investment advisory and other fees, which will reduce returns. Fund holdings and allocations shown are unaudited, and may not be representative of current or future investments. Fund holdings and allocations may not include the Fund's entire investment portfolio, which may change at any time. Fund holdings should not be relied on in making investment decisions and should not be construed as research or investment advice regarding particular securities. Current and future holdings are subject to risk. Contribution to gross excess return refers to the impact of the factors listed above on the fund's gross performance. Attribution is relative to the MSCI EAFE Index. Source: MSCI

The **Goldman Sachs International Equity Insights Fund** invests primarily in a broadly diversified portfolio of equity investments in non-U.S. issuers. The Fund's investments are subject to **market risk**, which means that the value of the securities in which it invests may go up or down in response to the prospects of individual companies, particular sectors or governments and/or general economic conditions. **Foreign and emerging markets investments** may be more volatile and less liquid than investments in U.S. securities and are subject to the risks of currency fluctuations and adverse economic, social or political developments. The securities of **mid- and small-capitalization companies** involve greater risks than those associated with larger, more established companies and may be subject to more abrupt or erratic price movements. The Investment Adviser's use of **quantitative models** to execute the Fund's investment strategy may fail to produce the intended result. **Different investment styles** (e.g., "quantitative") tend to shift in and out of favor, and at times the Fund may underperform other funds that invest in similar asset classes. The Fund may have a **high rate of portfolio turnover**, which involves correspondingly greater expenses which must be borne by the Fund, and is also likely to result in short-term capital gains taxable to shareholders.

**Fundamental Mispricings:** We believe that buying high-quality businesses at a fair price leads to strong performance in the long-run

**High Quality Business Models:** We believe in companies generating high-quality revenues with sustainable business models and aligned management incentives

**Market Themes and Trends:** Global markets are increasingly theme and trend-driven. We believe that alternative data sources can provide us a lens into trends affecting companies globally, trends that other investors may not be seeing.

**Sentiment Analysis:** We believe that other market participants can provide valuable information to supplement our own analysis. By analyzing broader market sentiment, we believe we can gain insight into future stock performance.

The MSCI EAFE Index is designed to represent the performance of large and mid-cap securities across 21 developed markets, including countries in Europe, Australasia and the Far East, excluding the U.S. and Canada. The Index is unmanaged and the figures for the Index do not include any deduction for fees, expenses, or taxes. It is not possible to invest directly in an unmanaged index.

Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates or any third party involved in or related to compiling, computing or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

In an effort to distinguish funds by what they own, as well as by their prospectus objectives and styles, Morningstar developed the Morningstar Categories. While the prospectus objective identifies a fund's investment goals based on the wording in the fund prospectus, the Morningstar Category identifies funds based on their actual investment styles as measured by their underlying portfolio holdings (portfolio and other statistics over the past three years).
