

Summary Prospectus

December 29, 2025

GOLDMAN SACHS JUST U.S. LARGE CAP EQUITY ETF

Ticker: JUST Stock Exchange: NYSE Arca, Inc.

Before you invest, you may want to review the Goldman Sachs JUST U.S. Large Cap Equity ETF (the “Fund”) Prospectus, which contains more information about the Fund and its risks. You can find the Fund’s Prospectus, reports to shareholders and other information about the Fund online at dfinview.com/GoldmanSachs. You can also get this information at no cost by calling 800-621-2550 or by sending an e-mail request to gs-funds-document-requests@gs.com. The Fund’s Prospectus and Statement of Additional Information (“SAI”), both dated December 29, 2025, are incorporated by reference into this Summary Prospectus.

INVESTMENT OBJECTIVE

The Goldman Sachs JUST U.S. Large Cap Equity ETF (the “Fund”) seeks to provide investment results that closely correspond, before fees and expenses, to the performance of the JUST US Large Cap Diversified Index (the “Index”).

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy, hold and sell Shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

Management Fee	0.20%
Distribution and Service (12b-1) Fee	0.00%
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.20%

EXPENSE EXAMPLE

This Example is intended to help you compare the cost of owning Shares of the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same (except that the Example incorporates any applicable fee waiver and/or expense limitation arrangements for only the first year). Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$20	\$64	\$113	\$255

PORTFOLIO TURNOVER

The Fund may pay transaction costs when it buys and sells securities or instruments (*i.e.*, “turns over” its portfolio). A high rate of portfolio turnover may result in increased transaction costs, including brokerage

commissions, which must be borne by the Fund and its shareholders, and is also likely to result in higher short-term capital gains for taxable shareholders. These costs are not reflected in total annual fund operating expenses or in the expense example above, but are reflected in the Fund’s performance. The Fund’s portfolio turnover rate for the fiscal year ended August 31, 2025 was 14% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund seeks to achieve its investment objective by investing at least 80% of its assets (exclusive of collateral held from securities lending) in securities included in its underlying index.

The Index is designed to deliver exposure to equity securities of large capitalization U.S. issuers that engage in “just business behavior” based on rankings produced by JUST Capital Foundation, Inc. (the “Index Provider”). The Index Provider publishes an annual ranking of issuers in the Russell 1000[®] Index (the “Reference Index”) based on their quantitative performance assessment of certain issue areas which, for the rankings published in 2025, were: how they treat their workers, their customers, the communities they interact with, the environment, and their shareholders.

The Index Provider seeks to encourage greater accountability in the business community and drive positive change among large publicly-traded U.S. corporations by (a) defining business behaviors that the American public cares most about (through extensive qualitative and quantitative survey research), (b) developing metrics that correspond to these issues in accordance with a robust, transparent methodology, (c) ranking the largest publicly traded U.S. companies on the basis of these metrics, and (d) developing tools and products that allow investors to direct capital towards more “just” companies.

The Index is a market capitalization-weighted index that consists of the top-ranked 50% of companies in the Reference Index by industry, based on the most recent rankings by the Index Provider. On the annual Index reconstitution date, Index constituent weights are adjusted such that the Index is industry neutral and matches the Reference Index’s industry weights, based on the Industry Classification Benchmark (“ICB”) industry classification.

As of December 1, 2025, the Index consisted of 449 securities with a market capitalization range of between approximately \$1.5 billion and \$4.3 trillion, and an average market capitalization of approximately \$125.7 billion. The Index is normally rebalanced on a quarterly basis in

accordance with the published schedule of the Reference Index. The components of the Index may change over time. The Index Provider determines whether an issuer is a U.S. issuer by reference to the index methodology of the Reference Index. FTSE Russell, which constructs the Reference Index, will deem an issuer to be a U.S. issuer if it is incorporated in, has a stated headquarters in, and trades in the U.S.; if any of these do not match, the Reference Index methodology provides for consideration of certain additional factors.

Given the Fund’s investment objective of attempting to track the Index, the Fund does not follow traditional methods of active investment management, which may involve buying and selling securities based upon analysis of economic and market factors.

The Fund seeks to invest in the Index components in approximately the same weighting that such components have within the Index at the applicable time. However, under various circumstances, it may not be possible or practicable to purchase all of the securities in the Index in the approximate Index weight. In these circumstances, the Fund may purchase a sample of securities in the Index. There may also be instances in which the Investment Adviser may choose to underweight or overweight a security in the Fund’s Index, purchase securities not in the Fund’s Index that the Investment Adviser believes are appropriate to substitute for certain securities in such Index or utilize various combinations of other available investment techniques.

The Index is calculated by Frank Russell Company (“Russell” or the “Calculation Agent”) in accordance with the methodology and constituent list developed and provided by the Index Provider.

The Fund is classified as “diversified” under the Investment Company Act of 1940, as amended (the “Investment Company Act”). However, the Fund may become “non-diversified” solely as a result of a change in the relative market capitalization or index weighting of one or more constituents of the Index. A non-diversified fund may invest a larger percentage of its assets in fewer issuers than diversified funds.

The Fund may concentrate its investments (*i.e.*, hold more than 25% of its total assets) in a particular industry or group of industries to the extent that the Index is concentrated. The degree to which components of the Index represent certain sectors or industries may change over time.

PRINCIPAL RISKS OF THE FUND

Loss of money is a risk of investing in the Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation (“FDIC”) or any government agency. The Fund should not be relied upon as a complete investment program. There can be no assurance that the Fund will achieve its investment objective. Investments in the Fund involve substantial risks which prospective investors should consider carefully before investing. The Fund’s principal risks are presented below in alphabetical order, and not in the order of importance or potential exposure.

Calculation Methodology Risk. The Index relies on various sources of information to assess the criteria of issuers included in the Index (or the Reference Index), including fundamental information that may be based on assumptions and estimates. Neither the Fund, the Investment Adviser nor the Index Provider can offer assurances that the Index’s calculation methodology or sources of information will provide a correct valuation of securities, nor can they guarantee the availability or timeliness of the production of the Index.

Index Risk. The Fund will be negatively affected by general declines in the securities and asset classes represented in the Index. In addition, because the Fund is not “actively” managed, unless a specific security is removed from the Index, the Fund generally would not sell a security because the security’s issuer was in financial trouble, and the Fund does not take defensive positions in declining markets. Market disruptions and regulatory restrictions could have an adverse effect on the Fund’s ability to adjust its exposure to the required levels in order to track the Index. The Index Provider relies on third party data it believes to be reliable in constructing the Index, but it does not guarantee the accuracy or availability of any such third party data, and there is also no guarantee with respect to the accuracy, availability or timeliness of the production of the Index.

Industry Concentration Risk. In following its methodology, the Index from time to time may be concentrated to a significant degree in securities of issuers located in a single industry or group of industries. To the extent that the Index concentrates in the securities of issuers in a particular industry or group of industries, the Fund also may concentrate its investments to approximately the same extent. By concentrating its investments in an industry or group of industries, the Fund may face more risks than if it were diversified broadly over numerous industries or groups of industries. If the Index is not concentrated in a particular industry or group of industries, the Fund will not concentrate in a particular industry or group of industries.

Information Technology Sector Risk. The stock prices of technology and technology-related companies and therefore the value of the Fund may experience significant price movements as a result of intense market volatility, worldwide competition, consumer preferences, product compatibility, product obsolescence, government regulation, excessive investor optimism or pessimism, or other factors.

“Just” Investing Risk. The Index is intended to provide exposure to the large cap U.S. equity markets on the basis of “just business behavior,” which limits the issuers included in the Index. As a result, the Index may be more volatile than a more conventional index. The Fund may outperform or underperform other funds that invest in similar asset classes but employ different investment styles. In construction of the Index, the methodology may weigh certain characteristics of “just business behavior” of an issuer more heavily than the issuer’s performance or returns, which may result in underperformance. There is no guarantee that the construction methodology of the Index will accurately provide exposure to companies that engage in “just business behavior.”

Large Shareholder Risk. Certain shareholders, including other funds advised by the Investment Adviser, may from time to time own a substantial amount of the Fund’s Shares. In addition, a third party investor, the Investment Adviser or an affiliate of the Investment Adviser, an authorized participant, a lead market maker, or another entity (*i.e.*, a seed investor) may invest in the Fund and hold its investment solely to facilitate commencement of the Fund or to facilitate the Fund’s achieving a specified size or scale. Any such investment may be held for a limited period of time. There can be no assurance that any large shareholder would not redeem its investment, that the size of the Fund would be maintained at such levels or that the Fund would continue to meet applicable listing requirements. Redemptions by large shareholders could have a significant negative impact on the Fund, including on the Fund’s liquidity. In addition, transactions by large shareholders may account for a large percentage of the trading volume on NYSE Arca, Inc. (“NYSE Arca”) and may, therefore, have a material upward or downward effect on the market price of the Shares.

Market Risk. The value of the securities in which the Fund invests may go up or down in response to the prospects of individual companies, particular sectors, governments or countries and/or general economic conditions throughout the world due to increasingly interconnected global economies and financial markets. Events such as war, military conflict, geopolitical disputes, acts of terrorism, social or political unrest, natural disasters, recessions, inflation, rapid interest rate changes, supply chain disruptions, tariffs and other restrictions on trade, sanctions or the spread of infectious illness or other public health threats, or the threat or potential of one or more such events and developments, could also significantly impact the Fund and its investments.

Market Trading Risk. The net asset value (“NAV”) of the Fund and the value of your investment may fluctuate. Market prices of Shares may fluctuate, in some cases significantly, in response to the Fund’s NAV, the intraday value of the Fund’s holdings and supply and demand for Shares. The Fund faces numerous market trading risks, including disruptions to creations and redemptions, the existence of extreme market volatility or potential lack of an active trading market for Shares. Any of these factors, among others, may result in Shares trading at a significant premium or discount to NAV, which will be reflected in the intraday bid/ask spreads and/or the closing price of Shares as compared to NAV. In addition, because liquidity in certain underlying securities may fluctuate, Shares may trade at a larger premium or discount to NAV than shares of other kinds of ETFs. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may pay more for, or receive less than, the underlying value of the Shares, respectively. Additionally, in stressed market conditions, the market for Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund’s underlying portfolio holdings.

Stock Risk. Stock prices have historically risen and fallen in periodic cycles. U.S. and foreign stock markets have experienced periods of substantial price volatility in the past and may do so again in the future.

Tracking Error Risk. Tracking error is the divergence of the Fund’s performance from that of the Index. The performance of the Fund may diverge from that of the Index for a number of reasons. Tracking error may occur because of transaction costs, the Fund’s holding of cash, differences in accrual of dividends, changes to the Index or the need to meet new or existing regulatory requirements. Unlike the Fund, the returns of the Index are not reduced by investment and other operating expenses, including the trading costs associated with implementing changes to its portfolio of investments. Tracking error risk may be heightened during times of market volatility or other unusual market conditions. The Fund may be required to deviate its investments from the securities and relative weightings of the Index to comply with the Investment Company Act of 1940, as amended (the “Investment Company Act”), to meet the issuer diversification requirements of the Internal Revenue Code of 1986, as amended (the “Code”), applicable to regulated investment companies, or as a result of

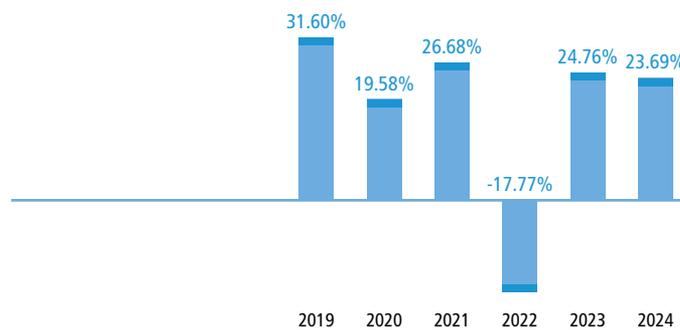

local market restrictions or other legal reasons, including regulatory limits or other restrictions on securities that may be purchased by the Investment Adviser and its affiliates. As the Index may consist of relatively few securities or issuers, tracking error may be heightened at times that the Fund is limited by restrictions on potential investments.

Valuation Risk. The sale price the Fund could receive for a security may differ from the Fund’s valuation of the security and may differ from the value used by the Index, particularly for securities that trade in low volume or volatile markets or that are valued using a fair value methodology. Because non-U.S. exchanges may be open on days when a Fund does not price its Shares, the value of foreign securities or assets in the Fund’s portfolio may change on days when investors will not be able to purchase or sell the Fund’s Shares. The Fund relies on various sources to calculate its NAV. The information may be provided by third parties that are believed to be reliable, but the information may not be accurate due to errors by such pricing sources, technological issues or otherwise. NAV calculation may also be impacted by operational risks arising from factors such as failures in systems and technology.

PERFORMANCE

The bar chart and table below provide an indication of the risks of investing in the Fund by showing: (a) changes in the performance of the Fund’s Shares from year to year; and (b) how the average annual total returns of the Fund’s Shares compare to those of the Fund’s Index and a broad-based securities market index. The Fund’s past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available at no cost at am.gs.com or by calling the appropriate phone number on the back cover of the Prospectus.

CALENDAR YEAR

	Returns	Quarter ended
Year-to-Date Return	13.68%	September 30, 2025
During the periods shown in the chart above:		
Best Quarter Return	21.63%	June 30, 2020
Worst Quarter Return	-19.49%	March 31, 2020

AVERAGE ANNUAL TOTAL RETURN

For the period ended December 31, 2024	1 Year	5 Years	Since Inception	Inception Date
Goldman Sachs JUST U.S. Large Cap Equity ETF				6/7/2018
Returns Before Taxes	23.69%	13.97%	13.47%	
Returns After Taxes on Distributions	23.36%	13.59%	13.43%	
Returns After Taxes on Distributions and Sale of Fund Shares	14.25%	11.14%	11.19%	
JUST U.S. Large Cap Diversified Index	24.03%	14.24%	13.72%	
Russell 1000 [®] Index	24.44%	14.26%	13.72%	

Benchmark returns do not reflect any deductions for fees or expenses.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. In addition, the after-tax returns shown are not relevant to investors who hold Fund Shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

PORTFOLIO MANAGEMENT

Goldman Sachs Asset Management, L.P. is the investment adviser for the Fund (the "Investment Adviser" or "GSAM").

Portfolio Manager: Raj Garigipati, Managing Director, has managed the Fund since June 2018.

BUYING AND SELLING FUND SHARES

Individual Shares of the Fund may only be purchased and sold in secondary market transactions through a broker or dealer at market price. Because Shares trade at market prices, rather than NAV, Shares of the Fund may trade at a price greater than NAV (*i.e.*, a premium) or less than NAV (*i.e.*, a discount).

You may incur costs attributable to the difference between the highest price a buyer is willing to pay for Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) (the "bid-ask spread") when buying or selling Shares in the secondary market.

Recent information, including information about the Fund's NAV, market price, premiums and discounts, and bid-ask spreads, is included on the Fund's website at am.gs.com.

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. Investments made through tax-deferred arrangements may become taxable upon withdrawal from such arrangements.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), GSAM or other related companies may pay the intermediary for the sale of Fund Shares or related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
