February 28, 2026

GOLDMAN SACHS RISING DIVIDEND GROWTH FUND

Class A: GSRAX Class C: GSRGX Institutional: GSRLX Investor: GSRIX Class R: GSRRX Class R6: GSRFX

Before you invest, you may want to review the Goldman Sachs Rising Dividend Growth Fund (the “Fund”) Prospectus, which contains more information about the Fund and its risks. You can find the Fund’s Prospectus, reports to shareholders and other information about the Fund online at dfinview.com/GoldmanSachs. You can also get this information at no cost by calling 800-621-2550 for Institutional and Class R6 shareholders, 800-526-7384 for all other shareholders or by sending an e-mail request to gs-funds-document-requests@gs.com. The Fund’s Prospectus and Statement of Additional Information (“SAI”), both dated February 28, 2026, are incorporated by reference into this Summary Prospectus.

INVESTMENT OBJECTIVE

The Goldman Sachs Rising Dividend Growth Fund (the “Fund”) seeks long-term growth of capital and current income.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.** You may

qualify for sales charge discounts on purchases of Class A Shares if you invest at least \$50,000, in Goldman Sachs Funds. More information about these and other discounts is available from your financial professional and in “Shareholder Guide—Common Questions Applicable to the Purchase of Class A Shares” beginning on page 47 and in Appendix C—Additional Information About Sales Charge Variations, Waivers and Discounts on page 89 of the Prospectus and “Other Information Regarding Maximum Sales Charge, Purchases, Redemptions, Exchanges and Dividends” beginning on page B-133 of the Fund’s Statement of Additional Information (“SAI”).

Shareholder Fees

(fees paid directly from your investment)

	Class A	Class C	Institutional	Investor	Class R	Class R6
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	5.50%	None	None	None	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of the lower of original purchase price or sale proceeds) ¹	None	1.00%	None	None	None	None

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Institutional	Investor	Class R	Class R6
Management Fees	0.75%	0.75%	0.75%	0.75%	0.75%	0.75%
Distribution and/or Service (12b-1) Fees	0.25%	0.75%	None	None	0.50%	None
Other Expenses	0.29%	0.54%	0.18%	0.29%	0.29%	0.17%
Service Fees	None	0.25%	None	None	None	None
All Other Expenses	0.29%	0.29%	0.18%	0.29%	0.29%	0.17%
Total Annual Fund Operating Expenses	1.29%	2.04%	0.93%	1.04%	1.54%	0.92%
Fee Waivers and Expense Limitation ²	(0.28%)	(0.28%)	(0.24%)	(0.28%)	(0.28%)	(0.24%)
Total Annual Fund Operating Expenses After Fee Waivers and Expense Limitation	1.01%	1.76%	0.69%	0.76%	1.26%	0.68%

¹ A contingent deferred sales charge (“CDSC”) of 1.00% is imposed on Class C Shares redeemed within 12 months of purchase.

² The Investment Adviser has agreed to (i) waive a portion of its management fee in order to achieve an effective net management fee rate of 0.65% as an annual percentage of the Fund’s average daily net assets; and (ii) reduce or limit “Other Expenses” (excluding acquired fund fees and expenses, transfer agency fees and expenses, service fees, taxes, interest, brokerage fees, expenses of shareholder meetings, litigation and indemnification, and extraordinary expenses) to 0.004% of the Fund’s average daily net assets. Additionally, Goldman Sachs & Co. LLC (“Goldman Sachs”), the Fund’s transfer agent, has agreed to waive a portion of its transfer agency fee (a component of “Other Expenses”) equal to 0.04% as an annual percentage rate of the average daily net assets attributable to Class A, Class C, Investor, and Class R Shares of the Fund. These arrangements will remain in effect through at least February 28, 2027, and prior to such date the Investment Adviser may not terminate the arrangements without the approval of the Board of Trustees.

EXPENSE EXAMPLE

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in Class A, Class C, Institutional, Investor, Class R and/or Class R6 Shares of the Fund for the time periods indicated and then redeem all of your Class A, Class C, Institutional, Investor, Class R and/or Class R6 Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same (except that the Example incorporates any applicable fee waiver and/or expense limitation arrangements for only the first year). Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$647	\$910	\$1,193	\$1,998
Class C Shares	\$279	\$613	\$1,072	\$2,347
Institutional Shares	\$70	\$272	\$491	\$1,121
Investor Shares	\$78	\$303	\$547	\$1,246
Class R Shares	\$128	\$459	\$813	\$1,811
Class R6 Shares	\$69	\$269	\$486	\$1,109
Class C Shares – Assuming no redemption	\$179	\$613	\$1,072	\$2,347

PORTFOLIO TURNOVER

The Fund pays transaction costs when it buys and sells securities or instruments (*i.e.*, “turns over” its portfolio). A high rate of portfolio turnover may result in increased transaction costs, including brokerage commissions, which must be borne by the Fund and its shareholders, and is also likely to result in higher short-term capital gains for taxable shareholders. These costs are not reflected in the annual fund operating expenses or in the expense example above, but are reflected in the Fund's performance. The Fund's portfolio turnover rate for the fiscal year ended October 31, 2025 was 35% of the average value of its portfolio.

PRINCIPAL STRATEGY

The Fund invests, under normal circumstances, at least 80% of its net assets plus any borrowings for investment purposes (measured at the time of purchase) (“Net Assets”) in equity investments of dividend-paying U.S. and foreign companies with market capitalizations of at least \$500 million.

10/10 Equity Investments

The Investment Adviser's Quantitative Investment Strategies (“QIS”) team manages the Fund's equity investments, including investments that meet the 10/10 Test described below (the “10/10 Sleeve”). The Fund will generally invest in common and preferred stocks as well as real estate investment trusts (“REITs”) that have paid dividends over the previous 10 years or more and have increased their dividends per share by approximately 10% or more per year, on average, over a 10-year trailing period (the “10/10 Test”). For purposes of this determination, issuers must have increased dividends by 5% or more on a year-over-year basis for at least 5 distinct calendar years over the 10-year trailing period. Once a company's stock is purchased by the Fund, if the stock's average annual dividend growth rate declines below approximately 10% per year over a 10-year trailing period, or the company has more than one year-over-year decrease in dividends per

share over a 10-year trailing period, the position will generally be sold. The QIS team uses a systematic, rules-based approach, in combination with a qualitative overlay, to select the stocks in which the Fund invests. The Fund may invest in stocks other than those generated by the QIS team's proprietary models, at the discretion of the portfolio managers.

MLP & Energy Infrastructure Investments

The Investment Adviser's Energy Infrastructure & Renewables team manages the Fund's investments in master limited partnerships (“MLPs”) and energy infrastructure companies (the “MLP & Energy Infrastructure Sleeve”). The Fund may invest in MLPs and energy infrastructure companies irrespective of the 10/10 Test. The MLP & Energy Infrastructure Sleeve will generally consist of 15% of the Fund's Net Assets but will not exceed 20% of Net Assets measured at the time of purchase.

The MLP & Energy Infrastructure Sleeve will generally invest in traditional or alternative midstream (energy infrastructure) businesses, which include businesses that are engaged in the treatment, gathering, compression, processing, transportation, transmission, fractionation, storage, terminalling, wholesale marketing, liquefaction/regasification of natural gas, natural gas liquids, crude oil, refined products or other energy sources as well as businesses engaged in owning, storing and transporting alternative energy sources, such as renewables (wind, solar, hydrogen, geothermal, biomass) and alternative fuels (ethanol, hydrogen, biodiesel).

The Investment Adviser measures the Fund's performance against the S&P 500[®] Index.

PRINCIPAL RISKS OF THE FUND

Loss of money is a risk of investing in the Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation (“FDIC”) or any government agency. The Fund should not be relied upon as a complete investment program. There can be no assurance that the Fund will achieve its investment objective. Investments in the Fund involve substantial risks which prospective investors should consider carefully before investing. The Fund's principal risks are presented below in alphabetical order, and not in the order of importance or potential exposure.

Credit/Default Risk. An issuer or guarantor of fixed income securities or instruments held by the Fund (which may have low credit ratings) may default on its obligation to pay interest and repay principal or default on any other obligation. Additionally, the credit quality of securities may deteriorate rapidly, which may impair the Fund's liquidity and cause significant deterioration in net asset value (“NAV”). These risks are heightened in market environments where interest rates are rising as well as in non-investment grade fixed income securities.

Energy Sector Risk. The Fund invests in companies in the energy sector, and will therefore be susceptible to adverse economic, business, social, political, environmental, regulatory or other developments affecting that sector. The energy sector has historically experienced substantial price volatility. MLPs, energy infrastructure companies and other companies operating in the energy sector are subject to specific risks, including, among others: fluctuations in commodity prices and/or interest rates; increased governmental or environmental regulation; reduced availability of natural gas or other commodities for transporting, processing, storing or delivering; declines in domestic or foreign production; slowdowns in new construction; extreme weather or other natural disasters; and threats of attack by terrorists on energy assets. Energy companies can be significantly affected by the supply of, and demand for, particular energy products (such as oil and natural gas),

which may result in overproduction or underproduction. Additionally, changes in the regulatory environment for energy companies may adversely impact their profitability. Over time, depletion of natural gas reserves and other energy reserves may also affect the profitability of energy companies.

During periods of heightened volatility, energy producers that are burdened with debt may seek bankruptcy relief. Bankruptcy laws may permit the revocation or renegotiation of contracts between energy producers and MLPs/energy infrastructure companies, which could have a dramatic impact on the ability of MLPs/energy infrastructure companies to pay distributions to their investors, including the Fund, which in turn could impact the ability of the Fund to pay dividends and dramatically impact the value of the Fund's investments.

Dividend-Paying Investments Risk. The Fund's investments in dividend-paying securities could cause the Fund to underperform other funds. Securities that pay dividends, as a group, can fall out of favor with the market, causing such securities to underperform securities that do not pay dividends. Depending upon market conditions and political and legislative responses to such conditions, dividend-paying securities that meet the Fund's investment criteria may not be widely available and/or may be highly concentrated in only a few market sectors. In addition, issuers that have paid regular dividends or distributions to shareholders may not continue to do so at the same level or at all in the future. This may limit the ability of the Fund to produce current income.

Foreign and Emerging Countries Risk. Foreign securities may be subject to risk of loss because of more or less foreign government regulation; less public information; less stringent investor protections; less stringent accounting, corporate governance, financial reporting and disclosure standards; and less economic, political and social stability in the countries in which the Fund invests. The imposition of sanctions, exchange controls (including repatriation restrictions), confiscations, trade restrictions (including tariffs) and other government restrictions by the United States and other governments, or from problems in share registration, settlement or custody, may also result in losses. The type and severity of sanctions and other similar measures, including counter sanctions and other retaliatory actions, that may be imposed could vary broadly in scope, and their impact is impossible to predict. For example, the imposition of sanctions and other similar measures could, among other things, cause a decline in the value and/or liquidity of securities issued by the sanctioned country or companies located in or economically tied to the sanctioned country and increase market volatility and disruption in the sanctioned country and throughout the world. Sanctions and other similar measures could limit or prevent the Fund from buying and selling securities (in the sanctioned country and other markets), significantly delay or prevent the settlement of securities transactions, and significantly impact the Fund's liquidity and performance. Foreign risk also involves the risk of negative foreign currency exchange rate fluctuations, which may cause the value of securities denominated in such foreign currency (or other instruments through which the Fund has exposure to foreign currencies) to decline in value. Currency exchange rates may fluctuate significantly over short periods of time. These risks are more pronounced in connection with the Fund's investments in securities of issuers located in, or otherwise economically tied to, emerging countries.

Interest Rate Risk. When interest rates increase, fixed income securities or instruments held by the Fund will generally decline in value. Long-term fixed income securities or instruments will normally have more price volatility because of this risk than short-term fixed income securities or instruments. Changing interest rates may have unpredictable effects on the markets, may result in heightened market volatility and may detract from Fund performance. In addition, changes in monetary policy may exacerbate the risks associated with changing

interest rates. Funds with longer average portfolio durations will generally be more sensitive to changes in interest rates than funds with a shorter average portfolio duration. Fluctuations in interest rates may also affect the liquidity of fixed income securities and instruments held by the Fund.

Investment Style Risk. Different investment styles (e.g., "growth," "value" or "quantitative") tend to shift in and out of favor depending upon market and economic conditions and investor sentiment. The Fund's quantitative style and emphasis on companies with rising dividend payments could cause the Fund to underperform other funds that invest in similar asset classes but employ a different investment style. Securities that pay high dividends, as a group, can fall out of favor with the market, causing such companies to underperform companies that do not pay high dividends. Additionally, a sharp rise in interest rates or an economic downturn could cause a company to reduce or eliminate its dividend.

Infrastructure Company Risk. Infrastructure companies are susceptible to various factors that may negatively impact their businesses or operations, including costs associated with compliance with and changes in environmental, governmental and other regulations, rising interest costs in connection with capital construction and improvement programs, government budgetary constraints that impact publicly funded projects, the effects of general economic conditions throughout the world, surplus capacity and depletion concerns, increased competition from other providers of services, uncertainties regarding the availability of fuel and other natural resources at reasonable prices, the effects of energy conservation policies, unfavorable tax laws or accounting policies and high leverage. Infrastructure companies will also be affected by innovations in technology that could render the way in which a company delivers a product or service obsolete and natural or man-made disasters.

Large Shareholder Transactions Risk. The Fund may experience adverse effects when certain large shareholders purchase or redeem large amounts of shares of the Fund. Such large shareholder redemptions, which may occur rapidly or unexpectedly, may cause the Fund to sell portfolio securities at times when it would not otherwise do so, which may negatively impact the Fund's NAV and liquidity. Similarly, large Fund share purchases may adversely affect the Fund's performance to the extent that the Fund is delayed in investing new cash or otherwise maintains a larger cash position than it ordinarily would. These transactions may also accelerate the realization of taxable income to shareholders if such sales of investments resulted in gains, and may also increase transaction costs. In addition, a large redemption could result in the Fund's current expenses being allocated over a smaller asset base, leading to an increase in the Fund's expense ratio.

Management Risk. A strategy used by the Investment Adviser may fail to produce the intended results. The Investment Adviser attempts to execute a complex strategy for the Fund using proprietary quantitative models. Investments selected using these models may perform differently than expected as a result of the factors used in the models, the weight placed on each factor, changes from the factors' historical trends, and technical and other issues in the construction, implementation and maintenance of the models (including, for example, data problems, unauthorized changes and/or software issues). There is no guarantee that the Investment Adviser's use of these quantitative models will result in effective investment decisions for the Fund. Additionally, commonality of holdings across quantitative money managers may amplify losses.

Market Risk. The value of the securities in which the Fund invests may go up or down in response to the prospects of individual companies, particular sectors, governments or countries and/or general economic

conditions throughout the world due to increasingly interconnected global economies and financial markets. Events such as war, military conflict, geopolitical disputes, acts of terrorism, social or political unrest, natural disasters, recessions, inflation, rapid interest rate changes, supply chain disruptions, tariffs and other restrictions on trade, sanctions or the spread of infectious illness or other public health threats, or the threat or potential of one or more such events and developments, could also significantly impact the Fund and its investments.

Master Limited Partnership Risk. Investments in securities of an MLP involve risks that differ from investments in common stock, including risks related to limited control and limited rights to vote on matters affecting the MLP. Certain MLP securities may trade in lower volumes due to their smaller capitalizations, and may be subject to more abrupt or erratic price movements and lower market liquidity. MLPs are generally considered interest-rate sensitive investments. During periods of interest rate volatility, these investments may not provide attractive returns.

Mid-Cap and Small-Cap Risk. Investments in mid-capitalization and small-capitalization companies involve greater risks than those associated with larger, more established companies. These securities may be subject to more abrupt or erratic price movements and may lack sufficient market liquidity, and these issuers often face greater business risks.

Other Investments Risk. By investing in pooled investment vehicles (including investment companies and ETFs), partnerships and REITs indirectly through the Fund, investors will incur a proportionate share of the expenses of the other pooled investment vehicles, partnerships and REITs held by the Fund (including operating costs and investment management fees) in addition to the fees and expenses regularly borne by the Fund. In addition, the Fund will be affected by the investment policies, practices and performance of such investments in direct proportion to the amount of assets the Fund invests therein.

REIT Risk. REITs whose underlying properties are concentrated in a particular industry or geographic region are subject to risks affecting such industries and regions. The securities of REITs involve greater risks than those associated with larger, more established companies and may be subject to more abrupt or erratic price movements because of interest rate changes, economic conditions and other factors. Securities of such issuers may lack sufficient market liquidity to enable a fund to effect sales at an advantageous time or without a substantial drop in price.

Stock Risk. Stock prices have historically risen and fallen in periodic cycles. U.S. and foreign stock markets have experienced periods of substantial price volatility in the past and may do so again in the future.

Tax Risk. MLPs are generally treated as partnerships for U.S. federal income tax purposes. Partnerships do not pay U.S. federal income tax at the partnership level. Rather, each partner is allocated a share of the partnership's income, gains, losses, deductions and expenses. A change in current tax law or a change in the underlying business mix of a given MLP could result in an MLP being treated as a corporation for U.S. federal income tax purposes, which would result in the MLP being required to pay U.S. federal income tax (as well as state and local income taxes) on its taxable income. This would have the effect of reducing the amount of cash available for distribution by the MLP and could result in a reduction in the value of the Fund's investment in the MLP and lower income to the Fund.

To the extent a distribution received by the Fund from an MLP is treated as a return of capital, the Fund's adjusted tax basis in the interests of the MLP may be reduced, which will result in an increase in an amount of

income or gain (or decrease in the amount of loss) that will be recognized by the Fund for tax purposes upon the sale of any such interests or upon subsequent distributions in respect of such interests. Furthermore, any return of capital distribution received from the MLP may require the Fund to restate the character of its distributions and amend any shareholder tax reporting previously issued. Moreover, a portion of any gain or loss recognized by the Fund on a disposition of an MLP equity security (or by an MLP on a disposition of an underlying asset) may be separately computed and treated as ordinary income or loss under the Internal Revenue Code of 1986, as amended (the "Code"), to the extent attributable to assets of the MLP that give rise to depreciation recapture, intangible drilling and development cost recapture, or other "unrealized receivables" or "inventory items" under the Code. Any such gain may exceed net taxable gain realized on the disposition and will be recognized even if there is a net taxable loss on the sale. The Fund's net capital losses may only be used to offset capital gains and therefore cannot be used to offset gains that are treated as ordinary income. Thus, the Fund could recognize both gain that is treated as ordinary income and a capital loss on a disposition of an MLP equity security (or on an MLP's disposition of an underlying asset) and would not be able to use the capital loss to offset that gain.

PERFORMANCE

The bar chart and table below provide an indication of the risks of investing in the Fund by showing: (a) changes in the performance of the Fund's Class A Shares from year to year; and (b) how the average annual total returns of the Fund's Class A, Class C, Institutional, Investor, Class R and Class R6 Shares compare to those of a broad-based securities market index. Prior to the close of business on June 30, 2020, Dividend Assets Capital, LLC ("DAC"), a sub-adviser, was responsible for managing the Fund's MLP & Energy Infrastructure Sleeve. Prior to the close of business on March 30, 2018, DAC was also responsible for managing the Fund's 10/10 Sleeve. Accordingly, the performance information set forth below for periods prior to those respective dates reflects DAC's management of the MLP & Energy Infrastructure Sleeve and the 10/10 Sleeve, as applicable. Past performance of the Fund, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available at no cost at am.gs.com or by calling the appropriate phone number on the back cover of the Prospectus.

The bar chart (including "Best Quarter" and "Worst Quarter" information) does not reflect the sales loads applicable to Class A Shares. If the sales loads were reflected, returns would be less. Performance reflects applicable fee waivers and/or expense limitations in effect during the periods shown.

CALENDAR YEAR (CLASS A)

During the periods shown in the chart above:	Returns	Quarter ended
Best Quarter Return	22.50%	June 30, 2020
Worst Quarter Return	-27.00%	March 31, 2020

AVERAGE ANNUAL TOTAL RETURN

For the period ended December 31, 2025	1 Year	5 Years	10 Years	Inception Date
Class A Shares				3/23/2004
Returns Before Taxes	1.17%	9.83%	9.72%	
Returns After Taxes on Distributions	-1.65%	6.62%	5.77%	
Returns After Taxes on Distributions and Sale of Fund Shares	2.54%	7.13%	6.64%	
Class C Shares				4/14/2005
Returns Before Taxes	5.14%	10.24%	9.51%*	
Institutional Shares				3/21/2007
Returns Before Taxes	7.45%	11.44%	10.72%	
Investor Shares				2/27/2012
Returns Before Taxes	7.32%	11.36%	10.61%	
Class R Shares				2/27/2012
Returns	6.80%	10.80%	10.06%	
Class R6 Shares				2/28/2018
Returns Before Taxes	7.39%	11.42%	10.72%**	
S&P 500® Index	17.88%	14.42%	14.81%	

Benchmark returns do not reflect any deductions for fees or expenses.

* Class C Shares automatically convert into Class A Shares eight years after the purchase date. The 10-Year performance for Class C Shares does not reflect the conversion to Class A Shares after the first eight years of performance.

** Class R6 Shares commenced operations on February 28, 2018. Prior to that date, the performance of Class R6 Shares shown in the table above is that of Institutional Shares. Performance has not been adjusted to reflect the lower expenses of Class R6 Shares. Class R6 Shares would have had higher returns because: (i) Institutional Shares and Class R6 Shares represent interests in the same portfolio of securities; and (ii) Class R6 Shares have lower expenses.

The after-tax returns are for Class A Shares only. The after-tax returns for Class C, Institutional, Investor and Class R6 Shares, and returns for Class R Shares (which are offered exclusively to employee benefit plans), will vary. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. In addition, the after-tax returns shown are not relevant to investors who hold Fund Shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

PORTFOLIO MANAGEMENT

Goldman Sachs Asset Management, L.P. is the investment adviser for the Fund (the "Investment Adviser" or "GSAM").

Goldman Sachs Multi-Asset Solutions Group: Siwen Wu, Managing Director, has managed the Fund since 2021.

GSAM Quantitative Investment Strategies Team (10/10 Sleeve Portfolio Managers): Monali Vora, CFA, Managing Director, has managed the Fund since 2018; and Aron Kershner, Managing Director, has managed the Fund since 2018.

GSAM Energy Infrastructure & Renewables Team (MLP & Energy Infrastructure Sleeve Portfolio Manager): Matthew Cooper, Vice President, has managed the Fund since 2026.

BUYING AND SELLING FUND SHARES

The minimum initial investment for Class A and Class C Shares is, generally, \$1,000. The minimum initial investment for Institutional Shares is, generally, \$1,000,000 for individual or certain institutional investors, alone or in combination with other assets under the management of the Investment Adviser and its affiliates. There is no

minimum for initial purchases of Investor, Class R and Class R6 Shares, except for certain institutional investors who purchase Class R6 Shares directly with the Fund's transfer agent for which the minimum initial investment is \$5,000,000. Those share classes with a minimum initial investment requirement do not impose it on certain employee benefit plans, and Institutional Shares do not impose it on certain investment advisers investing on behalf of other accounts.

The minimum subsequent investment for Class A and Class C shareholders is \$50, except for certain employee benefit plans, for which there is no minimum. There is no minimum subsequent investment for Institutional, Investor, Class R or Class R6 shareholders.

You may purchase and redeem (sell) shares of the Fund on any business day through certain intermediaries that have a relationship with Goldman Sachs, including banks, trust companies, brokers, registered investment advisers and other financial institutions ("Intermediaries").

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. Investments made through tax-deferred arrangements may become taxable upon withdrawal from such arrangements.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase shares of the Fund through an Intermediary, the Fund and/or its related companies may pay the Intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your Intermediary's website for more information.
