

Goldman Sachs Real Estate Diversified Income Fund

Notification of Source of Distributions

Pursuant to Rule 19a-1 under the Investment Company Act of 1940

The Goldman Sachs Real Estate Diversified Income Fund (the “Fund”) declared a distribution on June 27, 2025, for which a portion is estimated to be in excess of the Fund’s current net income as calculated in accordance with good accounting practice. The Fund’s distributions normally consist of dividends and distributions received from Private Real Estate Investment Trusts (“REITs”) and other portfolio securities held by the Fund. Historically, dividends and distributions received from REITs include a return of capital for tax purposes. As a result, when the Fund pays these distributions to shareholders, they may share a similar tax treatment. Estimated as of June 16, 2025, the source of distributions paid fiscal year-to-date by the Fund is as follows:

<u>Net Income</u>	<u>Realized Gain</u>	<u>Return of Capital</u>
11.5%	-	88.5%

The ultimate composition of these distributions may vary from the estimates provided above due to a variety of factors including future income and expenses and realized gains and losses from the purchase and sale of securities and other properties.
