

ActiveBeta® Emerging Markets Equity ETF

As of July 31, 2024

Seeks to track performance of the Goldman Sachs ActiveBeta® Emerging Markets Equity Index

Opportunity to Outperform the Market

GEM tracks an index that selects stocks based on four distinct attributes that are associated with long-term performance: good value, strong momentum, high quality, and low volatility.

Diversifies Your Portfolio

GEM may be an attractive option for investors to diversify their equity exposure and gain efficient access to four distinct performance attributes.

Lower Cost

ActiveBeta® Emerging Markets Equity ETF is competitively priced vs. peers.¹

Market Price	10.65	2.44	5.47

The returns represent past performance. Past performance does not guarantee future results. The Fund's investment return and principal value will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted above. Please visit our Web site at: www.GSAMFUNDS.com/ETFs to obtain the most recent month-end returns. Performance reflects cumulative total returns for periods of less than one year and average annual total returns for periods greater than one year. All Fund performance data reflect the reinvestment of distributions.

Total returns are calculated assuming purchase of a share at the market price or NAV on the first day and sale of a share at the market price or NAV on the last day of each period reported. The Total Returns Based on NAV and Market Price do not reflect brokerage commissions in connection with the purchase or sale of Fund shares, which if included would lower the performance shown above. The NAV used in the Total Return calculation assumes all management fees and operating expenses incurred by the Fund. Market Price returns are based upon the last trade as of 4:00pm EST and do not reflect the returns you would receive if you traded shares at other times. The first day of secondary market trading is typically several days after the fund inception of investment operations date; therefore, the NAV of the Fund is used as a proxy for the period from inception of investment operations to the first day of secondary market trading to calculate the Market Price returns.

The Investment Adviser has agreed to reduce or limit "Other Expenses" (excluding taxes, interest, brokerage fees, costs of holding shareholder meetings, litigation, indemnification and extraordinary expenses) to 0.05% of the Fund's average daily net assets. This arrangement will remain in effect permanently. The Investment Adviser may not terminate the arrangement without the approval of the Board of Trustees.

Net Asset Value is the market value of one share of the Fund. This amount is derived by dividing the total value of all the securities in the fund's portfolio, less any liabilities, by the number of fund shares outstanding. Market Price is the price at which the Fund's shares are trading on the NYSE Arca. The Market Price of the Fund's shares will fluctuate and, at the time of sale, shares may be worth more or less than the original investment or the Fund's then current net asset value. The Fund cannot predict whether its shares will trade at, above or below net asset value. The Goldman Sachs ActiveBeta® Emerging Markets Equity Index ("the Index") is designed to deliver exposure to equity securities of emerging market issuers. The Index seeks to capture common sources of active equity returns, including value (i.e., how attractively a stock is priced relative to its "fundamentals", such as book value or free cash flow), momentum (i.e., whether a company's share price is trending up or down), quality (i.e., profitability) and low volatility (i.e., a relatively low degree of fluctuation in a company's share price over time). The Index is reconstituted and rebalanced quarterly. It is not possible to invest directly in an unmanaged index.

Source: Morningstar as of 6/30/2024. The net expense ratio of GEM is below the average net expense ratio of all Strategic beta ETFs in the Morningstar Diversified Emerging Markets category. Per Morningstar, Strategic beta—widely referred to as smart beta—refers broadly to a group of indexes and the exchange-traded products and other investment products that track them. Most seek to enhance returns or minimize risk relative to more traditional benchmarks. These indexes may also aim to capture a specific factor or set of factors such as value, momentum, small size, low volatility, or quality.

Fund holdings and allocations shown are unaudited, and may not be representative of current or future investments. Fund holdings and allocations may not include the Fund's entire investment portfolio, which may change at any time. Fund holdings should not be relied on in making investment decisions and should not be construed as research or investment advice regarding particular securities. Current and future holdings are subject to risk. Percentages may not sum to 100% due to rounding.

The Investment Company Act of 1940 (the "Act") imposes certain limits on investment companies purchasing or acquiring any security issued by another registered investment company. For these purposes the definition of "investment company" includes funds that are unregistered because they are exempted from the definition of investment company by sections 3(c) and 3(c) of the Act. You should consult your legal counsel for more information.

GOLDMAN SACHS ("GS") DOES NOT MAKE GUARANTEES, REPRESENTATIONS OR WARRANTIES REGARDING THE ADVISABILITY OF INVESTING IN SECURITIES, THE FUND, THE ABILITY OF THE INDEX TO TRACK GENERAL MARKET PERFORMANCE, THE ACCURACY OR COMPLETENESS OF THE INDEX OR ANY DATA RELATED THERETO. GS LICENSES CERTAIN TRADEMARKS AND TRADE NAMES TO THE FUND AND HAS NO OBLIGATION TO TAKE FUND OR SHAREHOLDER NEEDS INTO CONSIDERATION IN DETERMINING, COMPOSING OR CALCULATING THE INDEX. GS DISCLAIMS LIABILITY FOR ANY ERRORS OR INTERRUPTIONS IN THE CALCULATION OF THE INDEX AND MAKES NO WARRANTY RELATED TO MARKS, THE INDEX OR ANY DATA INCLUDED THEREIN. PLEASE REFER TO THE PROSPECTUS FOR ADDITIONAL INFORMATION.

To construct our ActiveBeta® Index we:

Start with the market capitalization weighted universeScore each stock in the universe on four distinct factors: Value, Momentum, Quality and Low VolatilityConstruct 4 factor indices by overweighting stocks with higher factor scores and underweighting or removing stocks with lower factor scores; constraining weights to remain broadly in line with the marketCombine these 4 factor indices equally to form the ActiveBeta® IndexRebalance the ActiveBeta® Index quarterly, using a patent-pending technique to reduce turnover

The Goldman Sachs ActiveBeta® Emerging Markets Equity ETF (the "Fund") seeks to provide investment results that closely correspond, before fees and expenses, to the performance of the Goldman Sachs ActiveBeta® Emerging Markets Equity Index (the "Index"), which delivers exposure to equity securities of emerging market issuers. The Fund's investments are subject to **market risk**, which means that the value of the securities in which it invests may go up or down in response to the prospects of individual companies, particular sectors or governments and/or general economic conditions. **Foreign and emerging markets investments** may be more volatile and less liquid than investments in U.S. securities and are subject to the risks of currency fluctuations and adverse social, economic or political developments. Because the Fund may **concentrate its investments** in an industry or group of industries to the extent that the Index is concentrated, the Fund may be subject to greater risk of loss as a result of adverse economic, business or other developments affecting that industry or group of industries. The securities of **mid- and small-capitalization companies** involve greater risks than those associated with larger, more established companies and may be subject to more abrupt or erratic price movements. The Fund is **not actively managed**, and therefore the Fund will not generally dispose of a security unless the security is removed from the Index. The Index **calculation methodology** may rely on information based on assumptions and estimates and neither the Fund, the index provider nor the investment adviser can guarantee the accuracy of the methodology's valuation of securities or the availability or timeliness of the production of the Index. **Performance may vary substantially from the performance of the Index** as a result of transaction costs, expenses and other factors. **Fund shares are not individually redeemable and are issued and redeemed by the Fund at their net asset value ("NAV") only in large, specified blocks of shares called creation units. Shares otherwise can be bought and sold only through exchange trading at market price (not NAV). Shares may trade at a premium or discount to their NAV in the secondary market. Brokerage commissions will reduce returns.**

Investment terms: The Price to Book (P/B) ratio is used to compare a stock's book value to its market value. It can be aggregated for groups of stocks. The Price to Earnings (P/E) ratio compares a stock's earnings in a specified fiscal period to its market value. It can be aggregated for groups of stocks. **Return on Equity (ROE)** is the amount of net income as a percentage of shareholders equity. **#Dividend Yield** is derived as a weighted average of the dividend yield of the underlying securities and is not a distribution payment made by the fund.

The Global Industry Classification Standard (GICS) was developed by and is the exclusive property and a service mark of Morgan Stanley Capital International Inc. (MSCI) and Standard & Poor's, a division of The McGraw-Hill Companies, Inc. (S&P) and is licensed for use by Goldman Sachs. Neither MSCI, S&P nor any other party involved in making or compiling the GICS or any GICS classifications makes any express or implied warranties or representations with respect to such standard or classification (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such standard or classification. Without limiting any of the foregoing, in no event shall MSCI, S&P, any of their affiliates or any third party involved in making or compiling the GICS or any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

ActiveBeta® is a registered trademark of Goldman Sachs Asset Management. Diversification does not protect an investor from market risk and does not ensure a profit. The Weighted Average Market Cap represents the average value of the companies in the index or portfolio. A basis point is 1/100th of a percent.

The MSCI Emerging Markets Index captures large and mid cap representation across 23 Emerging Markets countries. It is not possible to invest directly in an unmanaged index. Neither MSCI nor any other party involved in or related to compiling, computing, or creating the MSCI data makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability, or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates or any third party involved in or related to compiling, computing or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent.

The method of calculation of the **30-Day Standardized Subsidized Yield** is mandated by the Securities and Exchange Commission and is determined by dividing the net investment income per share earned during the last 30 days of the period by the maximum public offering price ("POP") per share on the last day of the period. This number is then annualized. The 30-Day Standardized Subsidized Yield reflects fee waivers and/or expense reimbursements recorded by the Fund during the period. Without waivers and/or reimbursements, yields would be reduced. This yield does not necessarily reflect income actually earned and distributed by the Fund and, therefore, may not be correlated with the dividends or other distributions paid to shareholders. The **30-Day Standardized Unsubsidized Yield** does not adjust for any fee waivers and/or expense reimbursements in effect. If the Fund does not incur any fee waivers and/or expense reimbursements during the period, the 30-Day Standard Subsidized Yield and 30-Day Standardized Unsubsidized Yield will be identical.
