# Future Health Care Equity ETF

As of September 30,2025

The Goldman Sachs Future Health Care Equity ETF (the "Fund") seeks long-term growth of capital.

#### Invest in the Future

Rapid change is disrupting the status quo across industries and around the world. Our Future ETFs seek to keep investors on the right side of disruption by looking beyond backward-looking benchmarks to identify innovative, attractively-valued companies aligned with durable secular growth themes.

## **Innovation in Health Care**

Technological advancements and declining costs are driving an unprecedented amount of innovation – and disruption – within healthcare. We believe this presents a unique wealth creation opportunity for investors.

# A Global, All-Cap, Active Approach

We draw on a deep bench of 100+ experienced investors around the world, conducting active, bottom-up security selection with a strong valuation discipline to identify companies creating ground-breaking solutions in the fields of genomics, precision medicine, tech-enabled procedures and digital healthcare.

### **Fund Facts**

r arra r acto	
Net Assets (MM)	\$19.27
Number of Holdings	37
Weighted Avg. Market Cap (BB)	\$176.43
P/E Ratio	35.66
Total Expense Ratio	0.75%
30-Day SEC Yield	0.01%

## Monthly Total Returns (%)

## Quarterly Total Returns (%)

(as of 9.30.25)	1 Year	5 Years	Since Inception
NAV	-10.51	N/A	-5.15
Market Price	-11.41	N/A	-5.39

The returns represent past performance. Past performance does not guarantee future results. The Fund's investment return and principal value will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted above. Please visit our Web site at: am.gs.com/ETFs to obtain the most recent month-end returns. Performance reflects cumulative total returns for periods of less than one year and average annual total returns for periods of greater than one year. Since Inception returns for periods of less than one year are cumulative. All Fund performance data reflect the reinvestment of distributions.

Total returns are calculated assuming purchase of a share at the market price or NAV on the first day and sale of a share at the market price or NAV on the last day of each period reported. The Total Returns Based on NAV and Market Price do not reflect brokerage commissions in connection with the purchase or sale of Fund shares, which if included would lower the performance shown above. The NAV used in the Total Return calculation assumes all management fees and operating expenses incurred by the Fund. Market Price returns are based upon the last trade as of 4:00pm EST and do not reflect the returns you would receive if you traded shares at other times. The first day of secondary market trading is typically several days after the fund inception of investment operations date; therefore, the NAV of the Fund is used as a proxy for the period from inception of investment operations to the first day of secondary market trading to calculate the Market Price returns.

Total Annual Fund Operating Expenses (%) 0.75%, Please note the figure shown above is the unitary management fee. Under the management fee for the Fund, Goldman Sachs Asset Management LP., the Fund's investment adviser, is responsible for paying substantially all the expenses of the Fund, excluding the payments under the Fund's 12b-1 plan (if any), interest expenses, taxes, acquired fund fees and expenses, brokerage fees, costs of holding shareholder meetings, litigation, indemnification and extraordinary expenses. Please refer to the Fund's prospectus for the most recent expenses.

Net Asset Value is the market value of one share of the Fund. This amount is derived by dividing the total value of all the securities in the Fund's portfolio, less any liabilities, by the number of Fund shares outstanding. The Fund cannot predict whether its shares will trade at, above or below net asset value.

Assets Under Supervision (AUS) includes assets under management and other client assets for which Goldman Sachs does not have full discretion. Fund holdings and allocations shown are unaudited, and may not be representative of current or future investments. Fund holdings and allocations may not include the Fund's entire investment portfolio, which may change at any time. Fund holdings should not be relied on in making investment decisions and should not be construed as research or investment advice regarding particular securities. Current and future holdings are subject to risk. Percentages may not sum to 100% due to rounding.

## GDOC seeks to invest in companies that we believe are creating innovative health care solutions across four key themes:

- Genomics: Sequencing, Diagnostic Testing, Genomics Supply Chain
- Precision Medicine: Targeted Oncology, Gene/Cell Therapy, Rare Diseases, Chronic diseases

Europe ex-UK	10.1
UK	4.4
Japan	3.1
Cash	1.5

### **Industry Exposure (%)**

Health Care	98.5
Cash	1.5

The Goldman Sachs Future Health Care Equity ETF (the "Fund") seeks long-term growth of capital. The Fund is an actively managed exchange-traded fund. The Fund pursues its investment objective by primarily investing in U.S. and non-U.S. health care companies that the Investment Adviser believes are aligned with key themes associated with innovation in health care. The Fund's investments are subject to market risk, which means that the value of the securities in which it invests may go up or down in response to the prospects of individual companies, particular sectors or governments and/or general economic conditions. The Fund's thematic investment strategy limits the universe of investment opportunities available to the Fund and may affect the Fund's performance relative to similar funds that do not seek to invest in companies exposed to such themes. The Fund relies on the Investment Adviser for the identification of companies the Investment Adviser believes are aligned with key themes associated with innovation in health care, and there is no guarantee that the Investment Adviser's views will reflect the beliefs or values of any particular investor or that companies in which the Fund invests will be successful in their efforts to drive innovation in health care. Different investment styles (e.g., "growth" and "value") tend to shift in and out of favor, and at times the Fund may underperform other funds that invest in similar asset classes. Because the Fund concentrates its investments in certain specific industries, the Fund is subject to greater risk of loss as a result of adverse economic, business or other developments affecting those industries than if its investments were more diversified across different industries. Stock prices of health care companies in particular may be especially volatile. Foreign and emerging markets investments may be more volatile and less liquid than investments in U.S. securities and are subject to the risks of currency fluctuations and adverse economic, social or political deve

Investment terms: The NTM P/E, or Next Twelve Month Price-to-Earnings ratio, uses the consensus forecasted earnings per share over the next twelve month period to calculate the price earnings ratio. The Weighted Average Market Cap represents the average value of the companies in the index or portfolio. The method of calculation of the 30-Day Standardized Yield is mandated by the Securities and Exchange Commission and is determined by dividing the net investment income per share earned during the last 30 days of the period by the maximum public offering price ("POP") per share on the last day of the period. This number is then annualized. The yield figure reflects the dividends and interest earned during the 30 day period, after the deduction of the fund's expenses.

Assets Under Supervision (AUS) includes assets under management and other client assets for which Goldman Sachs does not have full discretion. Fund holdings and allocations shown are unaudited, and may not be representative of current or future investments. Fund holdings and allocations may not include the Fund's entire investment portfolio, which may change at any time. Fund holdings should not be relied on in making investment decisions and should not be construed as research or investment advice regarding particular securities. Current and future holdings are subject to risk. Percentages may not sum to 100% due to rounding.

subject to risk. Percentages may not sum to 100% due to rounding.

The Global Industry Classification Standard (GICS) was developed by and is the exclusive property and a service mark of Morgan Stanley Capital International Inc. (MSCI) and Standard & Poor's, a division of The McGraw-Hill Companies, Inc. (S&P) and is licensed for use by Goldman Sachs. Neither MSCI, S&P nor any other party involved in making or compiling the GICS or any GICS classifications makes any express or implied warranties or representations with respect to such standard or classification (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such standard or classification. Without limiting any of the foregoing, in no event shall MSCI, S&P, any of their affiliates or any third party involved in making or compiling the GICS or any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. The Investment Company Act of 1940 (the "Act") imposes certain limits on investment companies purchasing or acquiring any security issued by another registered investment company. For these purposes the definition of "investment company" includes funds that are unregistered because they are excepted from the definition of investment company by sections 3(c)(1) and 3(c) (7) of the Act. You should consult your legal counsel for more information.
