

Goldman Sachs International Equity Dividend and Premium Fund

Seeks to maximize total return with an emphasis on income

Growth Potential

The high-quality, dividend paying large cap international stocks in which we invest have performed well historically and have tended to be less volatile than small cap international stocks.

Total Returns at NAV (%)

■ Class I ■ MSCI EAFE (net)

Average Annual Total Returns (%)

Below are the fund's average annual total returns with all distributions reinvested for periods ended 06.30.25

(as of 06/30/2025)	1 Year	5 Years	10 Years
NAV	16.79%	9.70%	4.73%

Standardized After-Tax Returns (%)

	1 year	5 years	10 years
Returns before taxes	16.79	9.70	4.73
Returns after taxes on distributions	15.69	8.99	4.12
Returns after taxes on dist. and sale of fund shares	10.30	7.73	3.79

Source: Goldman Sachs Asset Management and MSCI.

The returns represent past performance. Past performance does not guarantee future results. The Fund's investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted above. Please visit our Web site at: am.gs.com to obtain the most recent month-end returns.

The Standardized Total Returns are average annual total returns or cumulative total returns (only if the performance period is one year or less) as of the most recent calendar quarter-end. They assume reinvestment of all distributions at net asset value. Because Institutional Shares do not involve a sales charge, such a charge is not applied to their Standardized Total Returns.

The expense ratios of the Fund, both current (net of any fee waivers or expense limitations) and before waivers (gross of any fee waivers or expense limitations) are as set forth above. Pursuant to a contractual arrangement, the Fund's waivers and/or expense limitations will remain in place through at least April 30, 2026 and prior to such date the Investment Adviser may not terminate the arrangements without the approval of the Fund's Board of Trustees. Please refer to the Fund's prospectus for the most recent expenses.

There is no guarantee that dividends will be paid.

Morningstar Risk-Adjusted Ratings: Foreign Large Blend Category- Class I Shares 3 Year 2 stars out of 658 funds, 5 Year 3 stars out of 622 funds, 10 year 2 stars out of 448 funds. The Morningstar Rating® is calculated for funds with at least a 3-year history based on a risk-adjusted return measure that accounts for variation in a fund's monthly excess returns. Exchange-traded funds and open-ended mutual funds are considered a single population. In each category, the top 10% = 5 stars, next 22.5% = 4 stars, next 35% = 3 stars, next 22.5% = 2 stars, and bottom 10% = 1 star. Overall rating is derived from a weighted average of the returns associated with its 3-, 5-, and 10-year (if applicable) rating, excluding all sales charges. Weights are based on the # of months of total returns: 100% 3-year rating for 36-59 months, 60% 5-year rating/40% 3-year rating for 60-119 months, and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months. Performance reflects cumulative total returns for periods of less than one year and average annual total returns for periods of greater than one year. Since inception returns for periods of less than one year are cumulative. All Fund performance data reflect the reinvestment of distributions.

All or a portion of the Fund's distributions may be treated for tax purposes as a return of capital, however, the final characterization of such distributions will be reported annually on Form 1099-DIV. The final tax status of the distributions may differ substantially from the above dividend information. Dividends are accrued daily and paid monthly. Distributions from net investment income, if any, are normally declared daily and paid monthly. Distributions from net capital gains, if any, are normally declared and paid annually. The Net Asset Value (NAV) is the market value of one share of the Fund. Percentages may not sum to 100% due to rounding. Assets Under Supervision (AUS) includes assets under management and other client assets for which Goldman Sachs does not have full discretion.

Lipper Total Return Rankings - Lipper Analytical Services, Inc., an independent publisher of mutual fund rankings, records rankings for these and other Goldman Sachs Funds for one-year, three-year, five-year, and ten-year total returns periods. Lipper compares mutual funds within a universe of funds with similar investment objectives, including dividend reinvestment. Lipper rankings are based on **total return** at net asset value and do not reflect sales charges. Lipper rankings do not imply that the fund had a high total return. Data as of 06.30.25. **Rankings for other share classes may vary.**

Tax Awareness

We seek high after-tax results through active strategies that include generating potential returns primarily from qualified dividends and long-term capital gains, which are subject to favorable tax rates.

The Goldman Sachs International Equity Dividend and Premium Fund invests primarily in dividend-paying equity investments in non-U.S. issuers. The Fund’s investments are subject to **market risk**, which means that the value of the securities in which it invests may go up or down in response to the prospects of individual companies, particular sectors or governments and/or general economic conditions. **Foreign investments** may be more volatile and less liquid than investments in U.S. securities and are subject to the risks of currency fluctuations and adverse economic, social or political developments. The Fund is also subject to the risks associated with **writing (selling) call options**, which limits the opportunity to profit from an increase in the market value of stocks in exchange for up-front cash at the time of selling the call option. In a rising market, the Fund could significantly underperform the market, and the Fund’s options strategies may not fully protect it against declines in the value of the market. The Investment Adviser’s **use of quantitative models** to execute the Fund’s investment strategy may fail to produce the intended result. **Different investment styles** (e.g., “quantitative”) tend to shift in and out of favor, and at times the Fund may underperform other funds that invest in similar asset classes. The Fund is also subject to the risk that the pre-tax performance of the Fund may be lower than the performance of a similar fund that is not tax-managed. No assurance can be offered that the Fund’s **tax-managed strategies** will reduce the amount of taxable income and capital gains distributed by the Fund to shareholders.

The MSCI EAFE Index (unhedged) is a market capitalization weighted composite of securities in 21 developed markets as of June 30, 2023. The Index is unmanaged and the figures do not include any deduction for fees, expenses or taxes. It is not possible to invest directly in an unmanaged index. Source: MSCI. Neither MSCI nor any other party involved in or related to compiling, computing, or creating the MSCI data makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability, or fitness for a particular purpose with respect to any of such data. No further distribution or dissemination of the MSCI data is permitted without MSCI’s express written consent.

The after-tax returns are calculated using the historically highest individual federal marginal income tax rates at the time of distributions and do not reflect state and local taxes. The 2023 tax rates (20% for qualifying ordinary income dividends and long-term capital gain distributions and 37% for non-qualifying ordinary income dividends) and tax characteristics of distributions were used to estimate after-tax returns in 2023. Actual after-tax returns will be calculated at calendar year-end and depend on an investor’s tax situation and may differ from those shown. In addition, the after-tax returns shown are not relevant to investors who hold Fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts. Under certain circumstances, the addition of the tax benefits from capital losses resulting from redemptions may cause the Returns After Taxes on Distributions and Sale of Fund Shares to be greater than the Returns After Taxes on Distributions or even Returns Before Taxes. **Standardized after-tax returns assume reinvestment of all distributions at NAV and reflect a maximum initial sales charge of 5.5% for Class A Shares.**

Returns Before Taxes do not reflect taxes on distributions on a Fund’s Class A and I Shares nor do they show how performance can be impacted by taxes when shares are redeemed. **Returns After Taxes on Distributions** reflect taxes paid on distributions on a Fund’s Class A and I Shares and taxes applicable when the shares are redeemed. Goldman Sachs does not provide legal, tax or accounting advice. Goldman Sachs clients should obtain independent tax advice based on their particular situation.

The method of calculation of the **30-Day Standardized Subsidized Yield** is mandated by the Securities and Exchange Commission and is determined by dividing the net investment income per share earned during the last 30 days of the period by the maximum public offering price (“POP”) per share on the last day of the period. This number is then annualized. The 30-Day Standardized Subsidized Yield reflects fee waivers and/or expense reimbursements recorded by the Fund during the period. Without waivers and/or reimbursements, yields would be reduced. This yield does not necessarily reflect income actually earned and distributed by the Fund and, therefore, may not be correlated with the dividends or other distributions paid to shareholders.

The **30-Day Standardized Unsubsidized Yield** does not adjust for any fee waivers and/or expense reimbursements in effect. If the Fund does not incur any fee waivers and/or expense reimbursements during the period, the 30-Day Standard Subsidized Yield and 30-Day Standardized Unsubsidized Yield will be identical. The 12 month distribution rate is calculated by taking the sum of all cash distributions over the past 12 months and dividing by the month end NAV in the last month of the period. Distributions may include interest from fixed income, dividends from equities, short term and long term capital gains, return of capital, and special distributions. Return of capital distribution may include a return of some or all of the money that an investor invested in Fund shares. Distributions from securities such as MLPs passing through the fund may also be characterized as return of capital. Special distributions may include any off-cycle distributions that occur outside of regular interest or dividend payment dates, such as when a company opts to pay a special dividend. The amounts and sources of distribution are not provided for tax reporting purposes. The Fund reports the character of distributions for federal income tax purposes each calendar year on Form 1099-DIV. Distributions will fluctuate over time and a large proportion of the distribution may occur at the end of the year in the form of capital gains. Distributions and market value movements affect the NAV of the fund and will also affect this calculation. 12 month distribution rate numbers are based on historical distributions and NAVs and are not predictive of future distributions or yields. 12 month distribution rate is calculated to provide a sense of the total cash flow associated with investment in the Fund, but should not be confused with SEC yield, dividend yield or interest yield.

Correlation Measure - R-squared: Measures how closely the historical movement of a portfolio’s returns relates to a particular market index over a specified time period. **Risk Measures** - Standard Deviation: Measures the historical total risk of a portfolio by assessing the probable range within which a portfolio’s return could deviate from its average return over a defined historical period of time. Beta: Measures the historical market risk of a portfolio or the volatility of a portfolio relative to an underlying index over a defined historical period of time.

Fund holdings and allocations shown are unaudited, and may not be representative of current or future investments. Fund holdings and allocations may not include the Fund’s entire investment portfolio, which may change at any time. Fund holdings should not be relied on in making investment decisions and should not be construed as research or investment advice regarding particular securities. Current and future holdings are subject to risk.

Goldman Sachs does not provide legal, tax or accounting advice, unless explicitly agreed between you and Goldman Sachs (generally through certain services offered only to clients of Private Wealth Management). Any statement contained in this presentation concerning U.S. tax matters is not intended or written to be used and cannot be used for the purpose of avoiding penalties imposed on the relevant taxpayer. Notwithstanding anything in this document to the contrary, and except as required to enable compliance with applicable securities law, you may disclose to any person the US federal and state income tax treatment and tax structure of the transaction and all materials of any kind (including tax opinions and other tax analyses) that are provided to you relating to such tax treatment and tax structure, without Goldman Sachs imposing any limitation of any kind. Investors should be aware that a determination of the tax consequences to them should take into account their specific circumstances and that the tax law is subject to change in the future or retroactively and investors are strongly urged to consult with their own tax advisor regarding any potential strategy, investment or transaction.

This material is not authorized for distribution unless preceded or accompanied by a current prospectus or summary prospectus, if applicable. Investors should consider a fund’s objectives, risks, and charges and expenses, and read the summary prospectus, if available, and the prospectus carefully before investing or sending money. The summary prospectus, if available, and the Prospectus contains this and other information about the Fund.
