KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a sub-fund of Goldman Sachs Funds III (the “Fund”), an umbrella fund constituted as a mutual fund and domiciled in Luxembourg. Its home regulator is Commission de Surveillance du Secteur Financier.
- The Sub-Fund invests primarily in equities.
- No Dividend will be declared or distributed.
- The shares in the Fund are capital markets products other than prescribed capital markets products (as defined in the Securities and Futures (Capital Markets Products) Regulations 2018) and Specified Investment Products (as defined in MAS Notice SFA 04-N12: Notice on the Sale of Investment Products and MAS Notice FAA-N16: Notice on Recommendations on Investment Products).

Refer to the Important Information section and paragraphs 1 and 2 of the Singapore Prospectus for further information on features of the product.

Investment Strategy

- Subject to certain investment restrictions, the Sub-Fund invests predominantly in a diversified portfolio comprised of equities and/or other Transferable Securities (warrants on Transferable Securities – up to a maximum of 10% of its net assets - and convertible bonds) issued by companies established, listed or traded in any European country.
- The Sub-Fund invests in companies that offer an attractive expected return profile based on fundamental analysis and is actively managed with deviation limits relative to its Index, the MSCI Europe (NR). The Sub-Fund’s investments will therefore materially deviate from the Index. Measured over a period of several years, the Sub-Fund aims to beat the performance of the Index.
- The Index is a broad representation of the Sub-Fund’s investment universe. The Sub-Fund may also include investments into securities that are not part of the Index. The Sub-Fund integrates ESG factors into its fundamental analysis. The Sub-Fund

KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT? The value of the product and its dividends or coupons may rise or fall. These risk factors may cause you to lose some or all of your investment, and your principal may be at risk:</p>	<p>Refer to paragraph 6 of the Singapore Prospectus for further information on risks of the product.</p>
Market and Credit Risks	
<ul style="list-style-type: none"> • You are exposed to market risks. The investments of the Sub-Fund are impacted by various factors, including the development of the financial market, the economic development of issuers who are themselves affected by the general world economic situation and the economic and political conditions in each country. • You are exposed to counterparty risks. When OTC derivative contracts are entered into, the Sub-Fund may be exposed to risks from the solvency and liquidity of its counterparties and from their ability to respect the conditions of these contracts. The counterparty risk associated with any of the Share-Classes of the Sub-Fund is borne by the Sub-Fund as a whole. • You are exposed to the risks of investing in European markets. Investments in securities of issuers located or incorporated in European markets or traded on stock exchanges or clearing systems in European markets. These markets may be subject to additional volatility risks given the economic and credit conditions of these economies after the global economic crisis in 2008. • You are exposed to the risks of investing in emerging markets. The Sub-Fund is exposed to risks relating to investments in securities of issuers located or incorporated in emerging markets or traded on stock exchanges or clearing systems in emerging markets and is therefore subject to additional legal, economic, political and taxation risks compared to funds investing in developed markets. • You are exposed to the risks of geographical concentration. The Sub-Fund invests primarily in European equities and therefore may have higher price volatility and liquidity risk than funds with a more diversified policy. • You are exposed to currency risks. Shares may be denominated in a currency other than the Singapore Dollar and the underlying assets of the Sub-Fund may be denominated in a currency other than the Reference Currency. The value of the Shares may thus be affected by exchange rate fluctuations. Not all Share-Classes are hedged against currency exposures. Any currency hedging process may not give a precise hedge and may involve additional risks. 	

Liquidity Risks																																			
<ul style="list-style-type: none"> The Sub-Fund is not listed on the Singapore Exchange and you can redeem only on Dealing Days. There is no secondary market for the Sub-Fund. All redemption requests should be made to the relevant authorised distributors. 																																			
Product-Specific Risks																																			
<ul style="list-style-type: none"> You are exposed to risks associated with Rule 144A securities. The market for Rule 144A securities is more limited than for most other types of securities. As a result, this may increase the volatility of the security prices and in extreme conditions, decrease the liquidity of a particular Rule 144A security. You are exposed to risks relating to derivatives. Investments in derivatives may increase the leverage, and therefore magnify the gains and losses, of the Sub-Fund. The Sub-Fund may also be subject to higher liquidity and counterparty risks compared to funds not investing in derivatives. You are exposed to the risks of investing in Russia. Russian securities and securities traded on the Russian markets are subject to increased risks as regards the ownership and custody of Transferable Securities. You are exposed to Sustainability Risks. Sustainability Risks can either represent a risk of their own or have an impact on other portfolio risks and contribute to the overall risk profile, similar to market risks, liquidity risks, credit risks or operational risks. <p>You should be aware that your investment in the Sub-Fund may be exposed to other risks from time to time.</p>
