2. **Total Annual Fund Operating Expenses: GXUS 0.18%.** Please note the figures shown above is the unitary management fee. Under the management fee for GXUS, Goldman Sachs Asset Management LP, the Fund's investment adviser, is responsible for paying substantially all the expenses of the Fund, excluding the payments under the Fund's 12b-1 plan (if any), interest expenses, taxes, acquired fund fees and expenses, brokerage fees, costs of holding shareholder meetings, litigation, indemnification and extraordinary expenses. Please refer to the Fund's prospectus for the most recent expenses. Source: Morningstar as of 2025-06-30. The net expense ratio of GXUS is below the average net expense ratio of all Index Fund ETFs in the Morningstar Foreign Large Blend category.

The returns represent past performance. Past performance does not guarantee future results, which may vary. The Fund's investment return and principal value will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted above. Please visit our Website at: [am.gs.com/ETFs](http://am.gs.com/ETFs) to obtain the most recent month-end returns.

Given the Fund's investment objective of attempting to track the Index, the Fund does not follow traditional methods of active investment management, which may involve buying and selling securities based upon analysis of economic and market factors.

Performance reflects cumulative total returns for periods of less than one year and average annual total returns for periods of greater than one year. Since inception returns for periods of less than one year are cumulative. All Fund performance data reflect the reinvestment of distributions. Total returns are calculated assuming purchase of a share at the market price or net asset value ("NAV") on the first day and sale of a share at the market price or NAV on the last day of each period reported. The Total Returns Based on NAV and Market Price does not reflect brokerage commissions or sales charges in connection with the purchase or sale of Fund shares, which if included would lower the performance shown above. The NAV used in the Total Return calculation assumes all management fees and operating expenses incurred by the Fund. Total returns for periods less than one full year are not annualized.

Net Asset Value is the market value of one share of the Fund. This amount is derived by dividing the total value of all the securities in the Fund's portfolio, less any liabilities, by the number of Fund shares outstanding. Market Price is the price at which the Fund's shares are trading on the NYSE Arca. The Market Price of the Fund's shares will fluctuate and, at the time of sale, shares may be worth more or less than the original investment or the Fund's then current net asset value. The Fund cannot predict whether its shares will trade at, above or below net asset value.

The NAV used in the Total Return calculation assumes all management fees and operating expenses incurred by the Fund. Market price is the price at which the Fund's shares are trading on its applicable listing exchange. Market Price returns are based upon the last trade at 4:00pm EST and do not reflect the returns you would receive if you traded shares at other times. The first day of secondary market trading is typically several days after the Fund's inception of investment operations date; therefore, the NAV of the Fund is used as a proxy for the period from inception of investment operations to the first day of secondary market trading to calculate the Market Price returns.

Assets Under Supervision (AUS) includes assets under management and other client assets for which Goldman Sachs does not have full discretion.

The Investment Company Act of 1940 (the "Act") imposes certain limits on investment companies purchasing or acquiring any security issued by another registered investment company. For these purposes the definition of "investment company" includes funds that are unregistered because they are excepted from the definition of investment company by sections 3(c) and 3(c) of the Act. You should consult your legal counsel for more information.

The Goldman Sachs MarketBeta® Total International Equity ETF (the "Fund") seeks to provide investment results that closely correspond, before fees and expenses, to the performance of the Solactive GBS Global Markets ex United States Large & Mid Cap Index (the "Index"), which is designed to deliver exposure to equity securities of large and mid-capitalization issuers in global markets excluding the United States. The Fund's investments are subject to **market risk**, which means that the value of the securities in which it invests may go up or down in response to the prospects of individual companies, particular sectors or governments and/or general economic conditions. **Foreign and emerging markets investments** may be more volatile and less liquid than investments in U.S. securities and are subject to the risks of currency fluctuations and adverse economic, social or political developments, including sanctions, counter-sanctions and other retaliatory actions. Because the Fund may **concentrate its investments** in an industry or group of industries to the extent that the Index is concentrated, the Fund may be subject to greater risk of loss as a result of adverse economic, business or other developments affecting that industry or group of industries. The securities of **mid-capitalization companies** involve greater risks than those associated with larger, more established companies and may be subject to more abrupt or erratic price movements. The Fund is **not actively managed**, and therefore the Fund will not generally dispose of a security unless the security is removed from the Index. The Index **calculation methodology** may rely on information based on assumptions and estimates and neither the Fund, the index provider nor the investment adviser can guarantee the accuracy of the methodology's valuation of securities or the availability or timeliness of the production of the Index. **Performance may vary substantially from the performance of the Index** as a result of transaction costs, expenses and other factors.

**Fund shares are not individually redeemable and are issued and redeemed by the Fund at their net asset value ("NAV") only in large, specified blocks of shares called creation units. Shares otherwise can be bought and sold only through exchange trading at market price (not NAV). Shares may trade at a premium or discount to their NAV in the secondary market. Brokerage commissions will reduce returns.**

The Goldman Sachs MarketBeta® Total International Equity ETF is not sponsored, promoted, sold or supported in any other manner by Solactive AG nor does Solactive AG offer any express or implicit guarantee or assurance either with regard to the results of using the Solactive GBS Global Markets ex US Large & Mid Cap Index ("Solactive Index") and/or Solactive Index trade mark or the Solactive Index Price at any time or in any other respect. The Solactive Indexes are calculated and published by Solactive AG. Solactive AG uses its best efforts to ensure that the Solactive Indexes are calculated correctly. Irrespective of its obligations towards the Funds, Solactive AG has no obligation to point out errors in the Solactive Indexes to third parties including but not limited to investors and/or financial intermediaries of the Funds. Neither publication of a Solactive Index by Solactive AG nor the licensing of the Solactive Index or Solactive Index trade mark for the purpose of use in connection with a Fund constitutes a recommendation by Solactive AG to invest capital in said fund nor does it in any way represent an assurance or opinion of Solactive AG with regard to any investment in this fund. Solactive AG is registered as a benchmark administrator under the Regulation (EU) 2016/2011 (BMR). Solactive appears on the ESMA register of administrators.

Fund holdings and allocations shown are unaudited, and may not be representative of current or future investments. Fund holdings and allocations may not include the Fund's entire investment portfolio, which may change at any time. Fund holdings should not be relied on in making investment decisions and should not be construed as research or investment advice regarding particular securities. Current and future holdings are subject to risk. Percentages may not sum to 100% due to rounding.

Please note that one cannot invest directly into an index.

The method of calculation of the **30-Day Standardized Yield** is mandated by the Securities and Exchange Commission and is determined by dividing the net investment income per share earned during the last 30 days of the period by the maximum public offering price ("POP") per share on the last day of the period. This number is then annualized. The yield figure reflects the dividends and interest earned during the 30 day period, after the deduction of the fund's expenses.

The **Price to Book (P/B) ratio** is used to compare a stock's book value to its market value. It can be aggregated for groups of stocks. The **Price to Earnings (P/E) ratio** compares a stock's earnings in a specified fiscal period to its market value. It can be aggregated for groups of stocks. **Return on Equity (ROE)** is the amount of net income as a percentage of shareholders equity. **#Dividend Yield** is derived as a weighted average of the dividend yield of the underlying securities and is not a distribution payment made by the fund. The **Weighted Average Market Cap** represents the average value of the companies in the index or portfolio.

The Global Industry Classification Standard ("GICS") was developed by and is the exclusive property and a service mark of MSCI Inc.
