

Summary Prospectus

December 29, 2024

GOLDMAN SACHS MARKETBETA[®] U.S. 1000 EQUITY ETF

Ticker: GUSA Stock Exchange: NYSE Arca, Inc.

Before you invest, you may want to review the Goldman Sachs MarketBeta[®] U.S. 1000 Equity ETF (the "Fund") Prospectus, which contains more information about the Fund and its risks. You can find the Fund's Prospectus, reports to shareholders and other information about the Fund online at dfinview.com/GoldmanSachs. You can also get this information at no cost by calling 800-621-2550 or by sending an e-mail request to gs-funds-document-requests@gs.com. The Fund's Prospectus and Statement of Additional Information ("SAI"), both dated December 29, 2024, are incorporated by reference into this Summary Prospectus.

INVESTMENT OBJECTIVE

The Goldman Sachs MarketBeta[®] U.S. 1000 Equity ETF (the "Fund") seeks to provide investment results that closely correspond, before fees and expenses, to the performance of the Solactive GBS United States 1000 Index (the "Index").

FEES AND EXPENSES OF THE FUND

The following table describes the fees and expenses that you may pay if you buy, hold and sell Shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

Management Fee	0.11%
Distribution and Service (12b-1) Fee	0.00%
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.11%

EXPENSE EXAMPLE

This Example is intended to help you compare the cost of owning Shares of the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$11	\$35	\$62	\$141

PORTFOLIO TURNOVER

The Fund may pay transaction costs when it buys and sells securities or instruments (*i.e.*, "turns over" its portfolio). A high rate of portfolio turnover may result in increased transaction costs, including brokerage commissions, which must be borne by the Fund and its shareholders,

and is also likely to result in higher short-term capital gains for taxable shareholders. These costs are not reflected in total annual fund operating expenses or in the expense example above, but are reflected in the Fund's performance. The Fund's portfolio turnover rate for the fiscal year ended August 31, 2024 was 2% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund seeks to achieve its investment objective by investing at least 80% of its assets (exclusive of collateral held from securities lending) in securities included in its underlying index, in depositary receipts representing securities included in its underlying index and in underlying stocks in respect of depositary receipts included in its underlying index.

The Index is designed to measure the performance of equity securities of large and mid-capitalization equity issuers covering approximately the largest 1,000 of the free-float market capitalization in the United States. It is calculated as a total return index in U.S. dollars and weighted by free-float market capitalization.

As of December 1, 2024, the Index consisted of 1,012 securities with a market capitalization range of between approximately \$723.79 million and \$3.59 trillion, and an average market capitalization of approximately \$62.50 billion. The components of the Index may change over time. The percentage of the portfolio exposed to any asset class will vary from time to time as the weightings of the securities within the Index change, and the Fund may not be invested in each asset class at all times. Solactive AG ("Solactive" or the "Index Provider") will generally deem an issuer to be a U.S. issuer if it is organized under the laws of the U.S. and it is primarily listed in the U.S.; in the event that these factors point to more than one country, the Index methodology provides for consideration of certain additional factors. The Index is normally reconstituted on a quarterly basis in February, May, August, and November. New securities from initial public offerings are also added on a semi-annual basis in February and August, subject to fulfillment of certain eligibility criteria.

Given the Fund's investment objective of attempting to track the Index, the Fund does not follow traditional methods of active investment management, which may involve buying and selling securities based upon analysis of economic and market factors.

The Fund seeks to invest in the Index components in approximately the same weighting that such components have within the Index at the applicable time. However, under various circumstances, it may not be possible or practicable to purchase all of the securities in the Index in the approximate Index weight. In these circumstances, the Fund may purchase a sample of securities in the Index. There may also be instances in which the Investment Adviser may choose to underweight or overweight a security in the Fund's Index, purchase securities not in the Fund's Index that the Investment Adviser believes are appropriate to substitute for certain securities in such Index or utilize various combinations of other available investment techniques.

The Index is owned and calculated by Solactive.

The Fund is classified as “diversified” under the Investment Company Act of 1940, as amended (the “Investment Company Act”). However, the Fund may become “non-diversified” solely as a result of a change in the relative market capitalization or index weighting of one or more constituents of the Index. A non-diversified fund may invest a larger percentage of its assets in fewer issuers than diversified funds.

The Fund may concentrate its investments (i.e., hold more than 25% of its total assets) in a particular industry or group of industries to the extent that the Index is concentrated. The degree to which components of the Index represent certain sectors or industries may change over time.

In managing the Fund, the Investment Adviser incorporates tax considerations into its investment process. Specifically, in seeking to track the underlying index, the Investment Adviser employs tax management strategies to seek tax efficiency for the Fund and its shareholders. These strategies generally seek to minimize taxable capital gain distributions to shareholders and include:

- Use of the Fund's in-kind redemption mechanism to effect changes to the portfolio;
- Monitoring the portfolio and from time to time selecting positions to sell to realize short-term capital losses and creating loss carryforward positions that offset long-term and short-term capital gains; and
- Use of tax lot selection to maximize tax efficiency.

There is no guarantee that such tax management strategies will be effective or will materially reduce the amount of taxable capital gains distributed by the Fund to shareholders.

PRINCIPAL RISKS OF THE FUND

Loss of money is a risk of investing in the Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation (“FDIC”) or any government agency. The Fund should not be relied upon as a complete investment program. There can be no assurance that the Fund will achieve its investment objective. Investments in the Fund involve substantial risks which prospective investors should consider carefully before investing. Each risk summarized below is considered a “principal risk” of investing in the Fund, regardless of the order in which it appears.

Index Risk. The Fund will be negatively affected by general declines in the securities and asset classes represented in the Index. In addition, because the Fund is not “actively” managed, unless a specific security is removed from the Index, the Fund generally would not sell a security because the security's issuer was in financial trouble, and the Fund does not take defensive positions in declining markets. Market disruptions and regulatory restrictions could have an adverse effect on the Fund's

ability to adjust its exposure to the required levels in order to track the Index. The Index Provider relies on third party data it believes to be reliable in constructing the Index, but it does not guarantee the accuracy or availability of any such third party data, and there is no guarantee with respect to the accuracy, availability or timeliness of the production of the Index.

Calculation Methodology Risk. The Index relies on various sources of information to assess the criteria of issuers included in the Index, including fundamental information that may be based on assumptions and estimates. Neither the Fund, the Investment Adviser nor the Index Provider can offer assurances that the Index's calculation methodology or sources of information will provide an accurate assessment of included issuers or a correct valuation of securities, nor can they guarantee the availability or timeliness of the production of the Index.

Market Risk. The value of the securities in which the Fund invests may go up or down in response to the prospects of individual companies, particular sectors or governments and/or general economic conditions throughout the world due to increasingly interconnected global economies and financial markets. Events such as war, military conflict, acts of terrorism, social unrest, natural disasters, recessions, inflation, rapid interest rate changes, supply chain disruptions, sanctions, the spread of infectious illness or other public health threats could also significantly impact the Fund and its investments.

Tracking Error Risk. Tracking error is the divergence of the Fund's performance from that of the Index. The performance of the Fund may diverge from that of the Index for a number of reasons. Tracking error may occur because of transaction costs, the Fund's holding of cash, differences in accrual of dividends, changes to the Index or the need to meet new or existing regulatory requirements. Unlike the Fund, the returns of the Index are not reduced by investment and other operating expenses, including the trading costs associated with implementing changes to its portfolio of investments. Tracking error risk may be heightened during times of market volatility or other unusual market conditions. The Fund may be required to deviate its investments from the securities and relative weightings of the Index to comply with the Investment Company Act, to meet the issuer diversification requirements of the Internal Revenue Code of 1986, as amended (the “Code”), applicable to regulated investment companies, or as a result of local market restrictions or other legal reasons, including regulatory limits or other restrictions on securities that may be purchased by the Investment Adviser and its affiliates.

Stock Risk. Stock prices have historically risen and fallen in periodic cycles. U.S. stock markets have experienced periods of substantial price volatility in the past and may do so again in the future.

Mid-Cap Risk. Investments in mid-capitalization companies involve greater risks than those associated with larger, more established companies. These securities may be subject to more abrupt or erratic price movements and may lack sufficient market liquidity, and these issuers often face greater business risks.

Market Trading Risk. The net asset value (“NAV”) of the Fund and the value of your investment may fluctuate. Market prices of Shares may fluctuate, in some cases significantly, in response to the Fund's NAV, the intraday value of the Fund's holdings and supply and demand for Shares. The Fund faces numerous market trading risks, including disruptions to creations and redemptions, the existence of extreme market volatility or potential lack of an active trading market for Shares. Any of these factors, among others, may result in Shares trading at a significant premium or discount to NAV, which will be reflected in the intraday bid/ask spreads and/or the closing price of Shares as compared to NAV. In addition, because liquidity in certain underlying securities may fluctuate, Shares may trade at a larger premium or discount to NAV.

than shares of other kinds of exchange-traded funds (“ETFs”). If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may pay more for, or receive less than, the underlying value of the Shares, respectively. Additionally, in stressed market conditions, the market for Shares become less liquid in response to deteriorating liquidity in the markets for the Fund’s underlying portfolio holdings.

Large Shareholder Risk. Certain shareholders, including other funds advised by the Investment Adviser, may from time to time own a substantial amount of the Fund’s Shares. In addition, a third party investor, the Investment Adviser or an affiliate of the Investment Adviser, an authorized participant, a lead market maker, or another entity (*i.e.*, a seed investor) may invest in the Fund and hold its investment solely to facilitate commencement of the Fund or to facilitate the Fund’s achieving a specified size or scale. Any such investment may be held for a limited period of time. There can be no assurance that any large shareholder would not redeem its investment, that the size of the Fund would be maintained at such levels or that the Fund would continue to meet applicable listing requirements. Redemptions by large shareholders could have a significant negative impact on the Fund, including on the Fund’s liquidity. In addition, transactions by large shareholders may account for a large percentage of the trading volume on the NYSE Arca, Inc. (the “Exchange”) and may, therefore, have a material upward or downward effect on the market price of the Shares.

Seed Investor Risk. GSAM and/or its affiliates may make payments to one or more investors that contribute seed capital to the Fund. Such payments may continue for a specified period of time and/or until a specified dollar amount is reached. Those payments will be made from the assets of GSAM and/or such affiliates (and not the Fund). Seed investors may contribute cash and/or securities in kind and such seed investment may constitute all or a majority of the assets in the Fund. There is a risk that such seed investors may redeem their investments in the Fund, particularly after payments from GSAM and/or its affiliates have ceased. As with redemptions by other large shareholders, such redemptions could have a significant negative impact on the Fund, including on the Fund’s liquidity and the market price of the Fund’s Shares. The form of a seed investor’s contribution and any redemption activity by a seed investor can affect, including adversely, the tax efficiency of the Fund. For more information, see the section titled “Tax Advantaged Product Structure” in the Prospectus.

Valuation Risk. The sale price the Fund could receive for a security may differ from the Fund’s valuation of the security and may differ from the value used by the Index, particularly for securities that trade in low volume or volatile markets or that are valued using a fair value methodology. The Fund relies on various sources to calculate its NAV. The information may be provided by third parties that are believed to be reliable, but the information may not be accurate due to errors by such pricing sources, technological issues or otherwise.

Geographic Risk. If the Fund focuses its investments in issuers located in a particular country or geographic region, it will subject the Fund to a greater extent than if investments were less focused, to the risks of volatile economic cycles and/or conditions and developments that may be particular to that country or region, such as: adverse securities markets; adverse exchange rates; adverse social, political, regulatory, economic, business, environmental or other developments; or natural disasters.

Industry Concentration Risk. In following its methodology, the Index from time to time may be concentrated to a significant degree in securities of issuers located in a single industry or group of industries.

To the extent that the Index concentrates in the securities of issuers in a particular industry or group of industries, the Fund also may concentrate its investments to approximately the same extent. By concentrating its investments in an industry or group of industries, the Fund may face more risks than if it were diversified broadly over numerous industries or groups of industries. If the Index is not concentrated in a particular industry or group of industries, the Fund will not concentrate in a particular industry or group of industries.

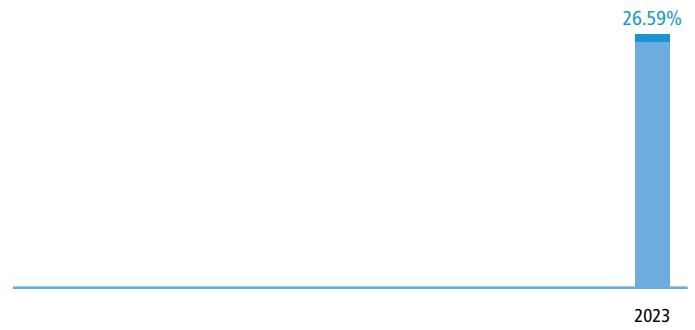

Diversification Risk. The Fund is classified as “diversified” under the Investment Company Act. However, the Fund may become “non-diversified” solely as a result of a change in the relative market capitalization or index weighting of one or more constituents of the Index. A non-diversified fund is permitted to invest a larger percentage of its assets in fewer issuers than diversified funds. This increased investment in fewer issuers may make the Fund more susceptible to adverse developments affecting any single issuer held in its portfolio, and may be more susceptible to greater losses because of these developments.

Cybersecurity Risk. The Fund may be susceptible to operational and information security risks resulting from cyber-attacks. Cyber-attacks include, among others, stealing or corrupting confidential information and other data that is maintained online or digitally for financial gain, denial-of-service attacks on websites causing operational disruption, and the unauthorized release of confidential information and other data. Cyber-attacks have the ability to cause significant disruptions and impact business operations; to result in financial losses; to prevent shareholders from transacting business; to interfere with the Fund’s calculation of NAV; and to lead to violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs and/or additional compliance costs. Cyber-attacks affecting the Fund or its Investment Adviser, custodian, Transfer Agent, or other third-party service providers may adversely impact the Fund and its shareholders.

PERFORMANCE

The bar chart and table below provide an indication of the risks of investing in the Fund by showing: (a) changes in the performance of the Fund’s Shares from year to year; and (b) how the average annual total returns of the Fund’s Shares compare to those of a regulatorily required broad-based securities market index (Russell 1000® Index) (the “Regulatory Benchmark”) and the Fund’s Index. The Fund has included in the table below the performance of the Regulatory Benchmark, which represents a broader measure of market performance, to comply with new regulatory requirements. For additional information about the Regulatory Benchmark, please see “Additional Benchmark Information” on page 14 of the Prospectus. The Fund’s past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available at no cost at am.gs.com or by calling the appropriate phone number on the back cover of the Prospectus.

CALENDAR YEAR

	Returns	Quarter ended
Year-to-Date Return	21.18%	September 30, 2024

During the periods shown in the chart above:	Returns	Quarter ended
Best Quarter Return	11.92%	December 31, 2023
Worst Quarter Return	-3.14%	September 30, 2023

AVERAGE ANNUAL TOTAL RETURN

For the period ended December 31, 2023	1 Year	Since Inception	Inception Date
Goldman Sachs MarketBeta US 1000 Equity ETF			4/5/2022
Returns Before Taxes	26.59%	4.47%	
Solactive GBS US 1000 Index	26.72%	4.47%	
Russell 1000® Index	26.53%	4.54%	

Benchmark returns do not reflect any deductions for fees or expenses.

PORTFOLIO MANAGEMENT

Goldman Sachs Asset Management, L.P. is the investment adviser for the Fund (the “Investment Adviser” or “GSAM”).

Portfolio Managers: Raj Garigipati, Managing Director has managed the Fund since April 2022; and Gauri Sekaria, Vice President, has managed the Fund since April 2024.

BUYING AND SELLING FUND SHARES

Individual Shares of the Fund may only be purchased and sold in secondary market transactions through a broker or dealer at market price. Because Shares trade at market prices, rather than NAV, Shares of the Fund may trade at a price greater than NAV (*i.e.*, a premium) or less than NAV (*i.e.*, a discount).

You may incur costs attributable to the difference between the highest price a buyer is willing to pay for Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) (the “bid-ask spread”) when buying or selling Shares in the secondary market.

Recent information, including information about the Fund’s NAV, market price, premiums and discounts, and bid-ask spreads, is included on the Fund’s website at am.gs.com.

TAX INFORMATION

The Fund’s distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. Investments made through tax-deferred arrangements may become taxable upon withdrawal from such arrangements.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), GSAM or other related companies may pay the intermediary for the sale of Fund Shares or related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
