Goldman Sachs High Yield Municipal Fund

Market Review

The Fund's benchmark, as represented by the Bloomberg High Yield Muni / Muni Bond Index (60/40), returned 0.36% over the three months ended March 31, 2026.

The Federal Reserve maintained the federal funds rate at 3.50–3.75% during its January and March meetings, as it awaited further evidence of cooling prices. The market navigated a mixed technical backdrop: elevated new issue supply—with \$50 billion in March—met by resilient demand and persistent fund inflows.

Munis underperformed Treasuries across the curve in March as heavy supply and renewed inflation concerns pressured valuations. For Q1, ratios richened by an average of 4 ratios across the one- to five-year part of the curve and cheapened an average of 6 ratios across 10- to 30-year notes, ending Q1 at 63%/65%/71%/90% respectively for 2/5/10/30 years.

Fund Performance Attribution

The Goldman Sachs High Yield Municipal Fund returned 0.04% (1 share, net) during the first quarter of 2026, underperforming the Bloomberg High Yield Muni / Municipal Bond Index (60/40) by 31 basis points (bps, net).

- Longer than benchmark duration and curve positioning detracted from performance as rates sold off in March.
- Credit beta contributed to performance as credit spreads compressed.
- Security selection among low coupon tobacco structures and project finance credits detracted from relative performance. This was partially offset by the positive contribution of selection within the education and long-term health sectors.

Source: Goldman Sachs Asset Management, Morningstar. As of 31-Mar-2026. 1 share class inception date: 03-Apr-2000. Tax-Equivalent calculations assume 37% Federal Tax Rate, 3.8% Affordable Health Care Tax. Assumes 100% of the fund is federally tax exempt.

The returns represent past performance. Past performance does not predict future returns and does not guarantee future results, which may vary. The Fund's investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted above. Please visit our Web site at: <https://am.gs.com> to obtain the most recent month-end returns. The Standardized Total Returns are average annual total returns or cumulative total returns (only if the performance period is one year or less) as of the most recent calendar quarter-end. They assume reinvestment of all distributions at net asset value. Because Institutional Shares do not involve a sales charge, such a charge is not applied to their Standardized Total Returns. Please refer to page 6 for expense ratio disclosures.

The Morningstar Rating™ is calculated for funds with at least a 3-year history based on a risk-adjusted return measure that accounts for variation in a fund's monthly excess returns. Exchange-traded funds and open-ended mutual funds are considered a single population. In each category, the top 10% = 5 stars, next 22.5% = 4 stars, next 35% = 3 stars, next 22.5% = 2 stars, and bottom 10% = 1 star. Overall rating is derived from a weighted average of the returns associated with its 3-, 5-, and 10-year (if applicable) rating, excluding all sales charges. Weights are based on the # of months of total returns: 100% 3-year rating for 36-59 months, 60% 5-year rating/40% 3-year rating for 60-119 months, and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months. See page 4-5 for definitions.

Fund Positioning Changes

Credit Positioning

- For the first quarter, BBB and High Yield municipal credit spreads tightened by 5 bps and 10 bps, respectively. BBB spreads ended the quarter at 100 bps, while High Yield spreads ended the quarter at 189 bps. While credit spreads are currently in fair territory, we believe rigorous selection will play a key role in helping drive returns.
- Increased Fund exposure to BBB / Non-Rated securities and decreased exposure to AA / A rated securities, with a continued focus on selection within each ratings category.

Duration & Curve Positioning

- The municipal curve steepened over the first quarter. AAA tax-exempt muni yields decreased 3 bps in the 2 year tenor while increasing 35 bps and 31 bps in the 10 year and 30 year tenors, respectively. The difference between 2 and 30 year yields increased by 34 bps to end the quarter with a slope of 209 bps.
- Increased Fund exposure to the long end of the yield curve to maximize yield and take advantage of curve steepness.

Other Key Themes

- Increased exposure to 5%+ coupons in the portfolio with a focus on improving structure and yield.
- Modestly increased exposure to private activity bonds.
- Increased holdings in both special assessment and school district munis while reduced exposure to holdings in the project finance and prerefunded sectors.

Source: Goldman Sachs Asset Management, Bloomberg, BVAL Muni. As of 31-Mar-2026; 1. Internal Rating Allocations of Non-Rated Securities include holdings of securities not rated by any major rating agency. Unrated securities held in the fund are internally rated by the municipal credit research team under Goldman Sachs Asset Management. The municipal credit research team utilizes rating standards and rating scales similar to those used by Fitch, S&P and Moody's to assess the credit quality of holdings of securities not rated by any major rating agency; 2. Highest Grade is assigned by the Goldman Sachs Asset Management municipal credit research team. The obligors' capacity to meet their financial commitments on the obligation is very or extremely strong; 3. Medium Grade is assigned by the Goldman Sachs Asset Management municipal credit research team. The obligors exhibit adequate protection parameters, but are more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories; 4. Below Investment Grade is assigned by the Goldman Sachs Asset Management municipal credit research team. These obligors are regarded as having significant speculative characteristics. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposure to adverse conditions. **See page 5 for additional credit rating disclosures.** Fund holdings and allocations shown are unaudited, and may not be representative of current or future investments. Fund holdings and allocations may not include the Fund's entire investment portfolio, which may change at any time. Fund holdings should not be relied on in making investment decisions and should not be construed as research or investment advice regarding particular securities. Current and future holdings are subject to risk. **Past performance does not guarantee future results, which may vary.**

Market Technicals/Outlook

Supply: Robust

- March new issue supply amounted to \$50 billion (\$48 billion tax-exempt and \$2 billion taxable). This was an increase of 18% from February, and 17% higher versus March 2025. Weekly new issuance volumes in March ranged from \$10 billion to \$16 billion.
- For the first quarter, municipal issuance totaled \$127 billion (\$121 billion tax-exempt and \$6 billion taxable). This was 9% below the previous quarter, but 6% higher than the first quarter of 2025.

Municipal Issuance

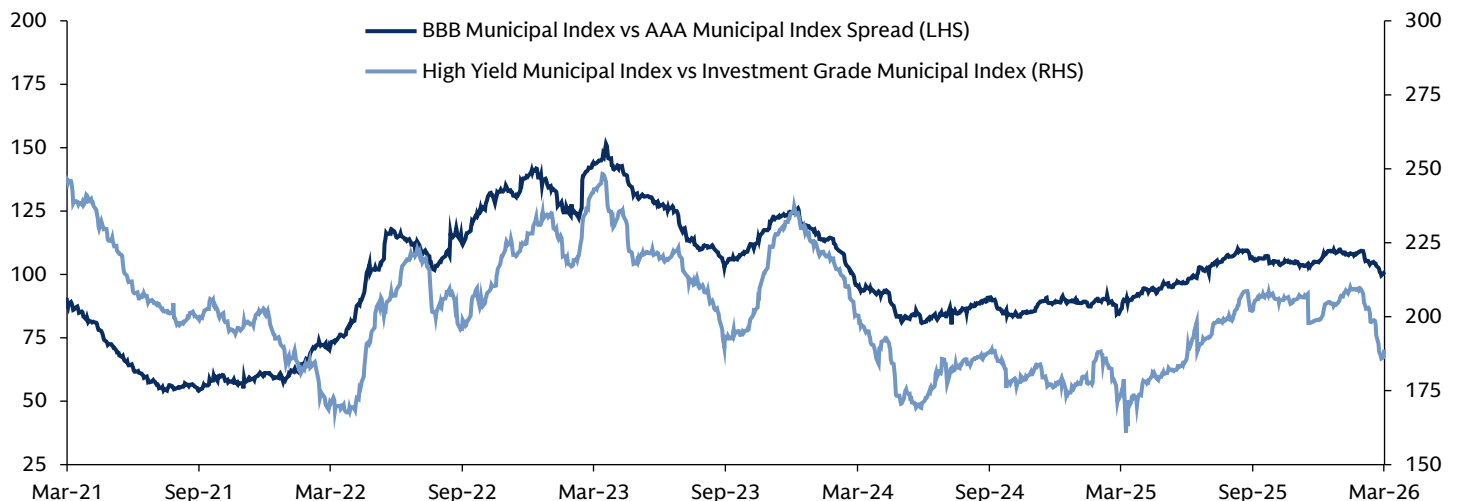

Demand: Positive

- Municipals saw strong inflows through March, with an average of \$810 million each week. Munis saw its first outflow week at the end of the month, breaking its 18-week streak of positive inflows. There were strong investment grade muni inflows, while high yield saw outflows over the month. Inflows were trending towards intermediate-term and long-term munis.
- Muni fund flows totaled \$3.8 billion for March. First quarter fund flows totaled \$26 billion (\$15 billion mutual funds and \$11 billion ETFs). Investment grade quality munis saw strong flows at the intermediate and long-end of the curve.

RISK CONSIDERATIONS

The Goldman Sachs High Yield Municipal Fund invests primarily in high yield municipal securities that, at the time of purchase, are medium quality or non-investment grade, the interest on which is exempt from regular federal income tax. The Fund may invest up to 100% of its net assets in private activity bonds, whose income may be subject to the **federal alternative minimum tax**. The Fund's investments in fixed income securities are subject to the risks associated with debt securities generally, including **credit, liquidity and interest rate risk**. **High yield, lower rated investments** involve greater price volatility and present greater risks, including greater liquidity risk, than higher rated fixed income securities. The Fund is subject to the risk that the liquidity of particular issuers or industries, or of all securities within a particular investment category, will shrink or disappear as a result of adverse economic, market or political events or adverse investor perception. The Fund may make investments that are or may become **illiquid**. At times, the Fund may be unable to sell illiquid investments without a substantial drop in price, if at all. The Fund may be more sensitive to adverse economic, business or political developments if it invests a substantial portion of its assets in bonds of similar projects or in particular types of municipal securities. Because the Fund may invest heavily in **investments in particular sectors or states**, the Fund is subject to greater risk of loss as a result of adverse events affecting those sectors or states than if its investments were not so focused. The Fund may be adversely impacted by **changes in tax rates and policies**, and is not suited for IRAs or other tax exempt or deferred accounts. The Fund's investments are also subject to **market risk**, which means that the value of the securities in which it invests may go up or down in response to the prospects of individual companies, particular sectors or governments and/or general economic conditions. The Fund's investments in **other investment companies** (including ETFs) subject it to additional expenses.

GENERAL DISCLOSURES

This material is not authorized for distribution unless preceded or accompanied by a current prospectus or summary prospectus, if applicable. Investors should consider a fund's objectives, risks, and charges and expenses, and read the summary prospectus, if available, and the prospectus carefully before investing or sending money. The summary prospectus, if available, and the [Prospectus](#) contains this and other information about the Fund.

THIS MATERIAL DOES NOT CONSTITUTE AN OFFER OR SOLICITATION IN ANY JURISDICTION WHERE OR TO ANY PERSON TO WHOM IT WOULD BE UNAUTHORIZED OR UNLAWFUL TO DO SO.

This material is provided for informational purposes only and should not be construed as investment advice or an offer or solicitation to buy or sell securities. This material is not intended to be used as a general guide to investing, or as a source of any specific investment recommendations, and makes no implied or express recommendations concerning the manner in which any client's account should or would be handled, as appropriate investment strategies depend upon the client's investment objectives.

Morningstar Percentile and Absolute Rankings are based on the total return percentile rank within each Morningstar Category and do not account for a fund's sales charge (if applicable). Rankings will not be provided for periods less than one year. The highest (or most favorable) percentile rank is 1 and the lowest (or least favorable) percentile rank is 100. Historical percentile ranks are based on a snapshot of the funds as they were at the time of the calculation. Percentile ranks within categories are most useful in those groups that have a large number of funds. For small universes, funds will be ranked at the highest percentage possible. For instance, if there are only two specialty-utility funds with 10-year average total returns, Morningstar will assign a percentile rank of 1 to the top-performing fund, and the second fund will earn a percentile rank of 51 (indicating the fund underperformed 50% of the sample). Rankings for other share classes may vary.

The Morningstar Rating™ is calculated for funds with at least a 3-year history based on a risk-adjusted return measure that accounts for variation in a fund's monthly excess returns. Exchange-traded funds and open-ended mutual funds are considered a single population. In each category, the top 10% = 5 stars, next 22.5% = 4 stars, next 35% = 3 stars, next 22.5% = 2 stars, and bottom 10% = 1 star. Overall rating is derived from a weighted average of the returns associated with its 3-, 5-, and 10-year (if applicable) rating, excluding all sales charges. Weights are based on the # of months of total returns: 100% 3-year rating for 36-59 months, 60% 5-year rating/40% 3-year rating for 60-119 months, and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months. See page 4-5 for definitions. Rankings for other share classes may vary.

The method of calculation of the **30-Day Standardized Subsidized Yield** is mandated by the Securities Exchange Commission and is determined by dividing the net investment income per share earned during the last 30 days of the period by the maximum public offering price of the Fund ("POP") per share on the last day of the period. This number is then annualized. The **30-Day Standardized Subsidized Yield** reflects fee waivers and/or expense reimbursements recorded by the Fund during the period. Without waivers and/or reimbursements, yields would be reduced. This yield does not necessarily reflect income actually earned and distributed by the Fund and, therefore, may not be correlated with the dividends or other distributions paid to shareholders. The 30-Day Standardized Unsubsidized Yield does not adjust for any fee waivers and/or expense reimbursements in effect. If the Fund does not incur any fee waivers and/or expense reimbursements during the period, the 30-Day Standard Subsidized Yield and 30-Day Standardized Unsubsidized Yield will be identical.

The Distribution Rate is the net annualized distribution rate for the month, based on the average daily income dividend during the period and the ending NAV per unit.

All or a portion of the Fund's distributions may be treated for tax purposes as a return of capital, however, the final characterization of such distributions will be reported annually on Form 1099-DIV. The final tax status of the distributions may differ substantially from the above dividend information. **Fiscal year to date, the estimated Return of Capital component of the current distributions was less than 20%.** The ultimate composition of these distributions may vary from the estimate provided due to a variety of factors. As a result, shareholders should not use the information provided in this notice for tax reporting purposes.

Index Benchmarks

Indices are unmanaged. The figures for the index reflect the reinvestment of all income or dividends, as applicable, but do not reflect the deduction of any fees or expenses which would reduce returns. Investors cannot invest directly in indices.

The indices referenced herein have been selected because they are well known, easily recognized by investors, and reflect those indices that the Investment Manager believes, in part based on industry practice, provide an appropriate benchmark against which to evaluate the investment or broader market described herein.

References to indices, benchmarks or other measures of relative market performance over a specified period of time are provided for your information only and do not imply that the portfolio will achieve similar results. The index composition may not reflect the manner in which a portfolio is constructed. While an adviser seeks to design a portfolio which reflects appropriate risk and return features, portfolio characteristics may deviate from those of the benchmark.

The Bloomberg Municipal Bond Index is a rules-based, market-value-weighted index engineered for the long-term tax-exempt bond market. To be included in the index, bonds must be rated investment-grade (Baa3/BBB- or higher) by at least two of the following ratings agencies: Moody's, S&P, Fitch. If only two of the three agencies rate the security the lower rating is used to determine index eligibility. If only one of the three agencies rates a security, the rating must be investment-grade. They must have an outstanding par value of at least \$7 million and be issued as part of a transaction of at least \$75 million. The bonds must be fixed rate, have a dated-date after December 31, 1990, and must be at least one year from their maturity date. It is not possible to invest in an unmanaged index.

The Bloomberg Municipal High Yield Bond Index is an unmanaged index made up of bonds that are non-investment grade, unrated, or rated below Ba1 by Moody's Investors Service with a remaining maturity of at least one year. The Index figures do not include any deduction for fees, expenses or taxes. It is not possible to invest directly in an unmanaged index.

Duration is a measure of the sensitivity of a bond's price to changes in interest rates. The option adjusted measure of duration takes into account the fact that yield changes may change the expected cash flows of the Fund's underlying securities because of the presence of an embedded option, such as a call or put.

A basis point is 1/100th of a percent.

Richening is the process where a bond's price increases relative to a benchmark, causing its yield to fall and making it more expensive to purchase for every dollar of interest it pays. Cheapening is the process where a bond's price decreases relative to a benchmark, causing its yield to rise and making it less expensive to purchase for every dollar of interest it pays.

Yield to Worst (YTW) is the interest rate that makes the present value of a bond's cash flows equal to the bond's price or initial investment, calculated by making worst-case scenario assumptions (excluding issuer default) on the bond by calculating the returns that would be received if provisions, including prepayment, call, put, and sinking fund, are used by the issuer. The YTW on derivatives, Treasury futures, and interest rate swaps incorporate the impact of current funding rates (due to a change in data source, funding rates on Treasury futures were not incorporated on the YTW calculation from approximately early 2020 through 9-Nov-2022. Since November 9, 2022, funding rates on Treasury futures have been incorporated). On a portfolio level, the YTW is a characteristic of the portfolio based on its holdings as of a particular date and is considered a long-term bond yield expressed as an annualized rate of return, assuming the portfolio securities are called with the lowest yield after running to each potential call date. The YTW does not represent the performance yield for a portfolio and may increase or decrease depending on the present value of a bond's market price as well as the number and size of payments remaining. As of April 14, 2023, the YTW has been capped at 15% in order to provide a more prudent and conservative representation.

This Fund and its respective benchmark have not been rated by an independent rating agency. The credit allocation provided refers to the Fund's underlying portfolio securities. For the purpose of determining compliance with any credit rating requirement, each Fund assigns a security, at the time of purchase, the highest rating by a Nationally Recognized Statistical Rating Organization (NRSRO) if the security is rated by more than one NRSRO. For this purpose, each Fund relies only on the ratings of the following NRSROs: Standard & Poor's, Moody's and Fitch, Inc. This method may differ from the method independently used by benchmark providers. Goldman Sachs Asset Management will use a single rating if that is the only one available. Securities that are not rated by all three agencies are reflected as such in the breakdown. Unrated securities may be purchased by a Fund if they are determined by the Investment Adviser to be of a credit quality consistent with the Fund's credit rating requirements. Unrated securities do not necessarily indicate low quality, and for such securities the investment adviser will evaluate the credit quality. Goldman Sachs Asset Management converts all ratings to the equivalent S&P major rating category when illustrating credit rating breakdowns. Ratings and fund/benchmark credit quality may change over time.

Non-Rated (NR) includes holdings of securities not rated by any major rating agency. Unrated securities held in the fund may be of higher, lower, or comparable credit quality to securities that have a credit rating from an NRSRO. Therefore, investors should not assume that the unrated securities in the fund increase or decrease the fund's overall credit quality.

Cash may include local currency, foreign currency, short-term investment funds, bank acceptances, commercial paper, margin, repurchase agreements, time deposits, variable-rate demand notes, and/or money market mutual funds. The Cash category may show a negative market value percentage as a result of a) the timing of trade date versus settlement date transactions and/or b) the portfolio's derivative investments, which are collateralized by the portfolio's available cash and securities. Such securities are AAA rated by an independent rating agency, have durations between -2 and 1 years, and are limited to the following sectors: governments, agencies, supranationals, corporates, and agency-backed adjustable-rate mortgages.

The expense ratios of the Fund, both current (net of any fee waivers or expense limitations) and before waivers (gross of any fee waivers or expense limitations) are as set forth above. Pursuant to a contractual arrangement, the Fund's waivers and/or expense limitations will remain in place through at least 7/29/26, and prior to such date the investment adviser may not terminate the arrangements without the approval of the Fund's Board of Trustees. Please refer to the Fund's prospectus for the most recent expenses.

Goldman Sachs & Co. LLC, distributor of the Fund(s), is not a bank, and Fund shares distributed by Goldman Sachs & Co. LLC are neither deposits nor obligations of, nor endorsed, nor guaranteed by any bank or other insured depository institution, nor are they insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board, or any other government agency. Investment in the Funds involves risks, including possible loss of the principal amount invested.
