

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Goldman Sachs AAA ABS - I Cap USD (hedged i)

ISIN: LU2299001029

A sub-fund (hereafter referred to as the fund) of Goldman Sachs Funds III

This fund is managed by Goldman Sachs Asset Management B.V.

Objectives and Investment Policy

The Fund is classified as a financial product under Article 8 of the EU Sustainable Finance Disclosure Regulation. The Fund promotes environmental or social characteristics but does not have a sustainable investment objective. The Fund integrates ESG factors and risk in the investment process alongside traditional factors. Detailed information on the sustainability related disclosures of the Fund can be found in the Template Pre-contractual disclosure (annex of the prospectus) on <https://www.gsam.com/responsible-investing/en-INT/non-professional/funds/documents>. The fund primarily invests in a diversified portfolio of bonds denominated in Euro or hedged back to Euro. We invest in asset backed securities, which are bonds backed by collateral, e.g. residential mortgages, commercial real estate debt, consumer loans or credit card receivables. Other eligible investments include, amongst others, deposits and money market paper. The team uses active management to generate long-term investment performance. The main driver of our performance is based on our top down approach, whereby we select in which sectors we want to be over- and underweight based on macro, fundamentals, valuation and momentum. Next to the top

approach we also use a bottom up approach in a later stage when it comes down to security selection. The fund positioning can materially deviate from the benchmark. Measured over a period of several years we aim to preserve capital and beat the performance of the Bloomberg Euro Floating AAA ABS benchmark. The benchmark is a broad representation of our investment universe. The fund may also include investments into instruments that are not part of the benchmark universe. For this specific hedged share class we apply a currency hedging strategy. The sub-fund's base currency is Euro (EUR) and the subfund can be exposed to non-EUR currencies. By hedging this share class we aim to exchange the base currency of the sub-fund (EUR) with the base currency of this share class US Dollar (USD). A currency hedge consists of taking an offsetting position in another currency. You can sell your participation in this fund on each (working) day on which the value of the units is calculated, which for this fund occurs daily. The fund seeks to provide you with capital growth and does not aim to provide a dividend. It will re-invest all earnings.

Risk and Reward Profile

Lower risk - Typically lower rewards				Higher risk - Typically Higher rewards		
1	2	3	4	5	6	7

Historical data, such as is used for calculating this indicator, may not be a reliable indication of the future risk profile of this fund. There is no guarantee that the risk indicator will remain unchanged, it may shift over time. The lowest category of risk does not mean that the investment is riskfree.

This fund is in category 2 because of the behaviour of the product during the measuring period. The overall market risk, taking into account past performances and future potential evolution of the

markets, associated with financial instruments used to reach the investment objective is considered medium.

These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers of these financial instruments who are themselves affected by the general world economic situation and economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of underlying investments is high. The Sub-Fund's liquidity risk is set to high. Liquidity risks may arise when a specific underlying investment is difficult to sell. Investments in a specific theme are more concentrated than investments in various themes. No guarantee is provided as to the recovery of the initial investment. Hedging share classes, a method to try to manage specific currency risk, may lead to additional credit risk and to residual market risk depending on the effectiveness of the hedging performed.

Charges

All charges paid by the investor are used to pay the running costs of the fund, including the cost of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest:

Entry charge	2%
Exit charge	0%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year:

Ongoing charge	0.27%
----------------	-------

Charges taken from the fund under certain specific conditions:

Performance fee	0%
-----------------	----

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses for the year ending 12/2024. This figure may vary from year to year. It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the funds when buying or selling units in another collective investment undertaking.

You can find more detail about the charges in the chapter "Subscriptions, redemptions and conversions" and "Fees, expenses and taxation" of the prospectus which is available on our website <https://www.gsam.com/responsible-investing/en-INT/non-professional/funds/documents>.

Past Performance

- Performance in the past is not a reliable indicator of future results.
- The past performance shown here takes account of all charges and costs, excluding entry and exit costs and fund switching costs.
- This sub-fund was launched in 2013.
- This share class was launched in 2021.
- The past performance is calculated in USD.
