

# GOLDMAN SACHS ETF TRUST

Goldman Sachs S&P 500 Premium Income ETF  
(the “Fund”)

*Supplement dated May 6, 2026 to the  
Prospectus, Summary Prospectus and Statement of Additional Information (“SAI”),  
each dated April 30, 2026*

The Board of Trustees of Goldman Sachs ETF Trust (the “Board”) previously approved a change to the Fund’s sub-classification under the Investment Company Act of 1940 from “diversified” to “non-diversified.”

These changes are subject to approval by the respective shareholders of the Fund at a meeting that will be held on or about June 12, 2026 (the “Meeting”). Changing the Fund’s status to “non-diversified” would provide Goldman Sachs Asset Management, L.P., the Fund’s investment adviser, with enhanced flexibility to invest a greater portion of the Fund’s assets in individual issuers. Market appreciation among issuers in certain industry segments has expanded their market capitalizations, increasing their weightings in major stock benchmarks. Given the weightings of the largest holdings in the Fund’s benchmark and the appreciation of the Fund’s largest holdings, the portfolio managers of the Fund believe that it is important to have flexibility to continue to invest in these holdings, and that they will be better able to execute the Fund’s investment strategy and other policies with this additional flexibility. If approved by shareholders of the Fund at the Meeting, the Fund, as a non-diversified fund, would be more susceptible to adverse developments affecting any single issuer held in its portfolio to the extent that the Fund accumulates a larger position in that issuer, and would be more susceptible to greater losses because of these developments.

Prior to the Meeting, shareholders of the Fund entitled to vote at the Meeting will receive a proxy statement that will contain additional information about the Fund’s diversification status and fundamental restrictions.

**This supplement should be retained with your Prospectus, Summary Prospectus and SAI for future reference.**

# Summary Prospectus

April 30, 2026

## GOLDMAN SACHS S&P 500 PREMIUM INCOME ETF

Ticker: GPIX Stock Exchange: The NASDAQ Stock Market LLC

Before you invest, you may want to review the Goldman Sachs S&P 500 Premium Income ETF (the “Fund”) Prospectus, which contains more information about the Fund and its risks. You can find the Fund’s Prospectus, reports to shareholders and other information about the Fund online at [dfinview.com/GoldmanSachs](https://dfinview.com/GoldmanSachs). You can also get this information at no cost by calling 800-621-2550 or by sending an e-mail request to [gs-funds-document-requests@gs.com](mailto:gs-funds-document-requests@gs.com). The Fund’s Prospectus and Statement of Additional Information (“SAI”), both dated April 30, 2026, are incorporated by reference into this Summary Prospectus.

### INVESTMENT OBJECTIVE

The Goldman Sachs S&P 500 Premium Income ETF (the “Fund”) seeks current income while maintaining prospects for capital appreciation.

### FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy, hold and sell Shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

#### Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

Management Fee	0.35%
Distribution and Service (12b-1) Fee	0.00%
Other Expenses	0.00%
<b>Total Annual Fund Operating Expenses</b>	<b>0.35%</b>
Fee Waiver <sup>1</sup>	(0.06)%
<b>Total Annual Fund Operating Expenses After Fee Waiver</b>	<b>0.29%</b>

<sup>1</sup> The Investment Adviser has agreed to waive its management fee in order to achieve an effective net management fee rate of 0.29% as an annual percentage rate of average daily net assets of the Fund through at least April 30, 2027, and prior to such date the Investment Adviser may not terminate the arrangement without the approval of the Board of Trustees.

### EXPENSE EXAMPLE

This Example is intended to help you compare the cost of owning Shares of the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same (except that the Example incorporates the fee waiver arrangement for only the first year). Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$30	\$106	\$190	\$437

### PORTFOLIO TURNOVER

The Fund may pay transaction costs when it buys and sells securities or instruments (*i.e.*, “turns over” its portfolio). A high rate of portfolio turnover may result in increased transaction costs, including brokerage commissions, which must be borne by the Fund and its shareholders, and is also likely to result in higher short-term capital gains for taxable shareholders. These costs are not reflected in total annual fund operating expenses or in the expense example above, but are reflected in the Fund’s performance. The Fund’s portfolio turnover rate for the fiscal year ended December 31, 2025 was 27% of the average value of its portfolio.

### PRINCIPAL INVESTMENT STRATEGIES

The Fund invests, under normal circumstances, at least 80% of its net assets plus any borrowings for investment purposes (measured at the time of purchase) (“Net Assets”) in investments in companies that are included in the Fund’s benchmark, the S&P 500<sup>®</sup> Index. These investments may include equity securities such as common stock, preferred stock, warrants and other rights to acquire stock, options, and derivatives on equity instruments that generate premium income for the Fund. The Fund seeks to achieve its objective by investing primarily in a portfolio of stocks comprised significantly of those included in the Fund’s benchmark and selling call options with exposure to the benchmark. The Fund will generally seek to maintain style, capitalization and industry characteristics similar to its benchmark. The equity portion of the Fund’s portfolio will generally be invested in the

benchmark components in approximately the same weighting that such components have within the benchmark at the applicable time. However, under various circumstances, including when balancing investment and tax considerations, the Fund may not invest in all of the securities in the benchmark in the approximate benchmark weight. The Fund may also invest in pooled investment vehicles, including exchange-traded funds (“ETFs”) and unit investment trusts (“UITs”) for cash management purposes.

The Fund is managed in a way that seeks, under normal circumstances, to provide monthly distributions at a relatively stable rate with performance that captures the majority of the returns (and risk) associated with the benchmark. The Fund’s investment strategy may cause a significant portion of the distributions to shareholders to be treated as a return of capital. Additional sources of distributions may include but are not limited to income received from investments that provide exposure to equity securities of companies that pay dividends. No guarantee can be made regarding the tax characterization of the distributions.

To generate income, the Fund employs a dynamic options “overwrite” strategy whereby the Fund sells (writes) call options on a varying percentage of the market value of the equity investments in the Fund’s portfolio (the “Option Strategy”). The Fund expects that, under normal circumstances, the overwrite level (i.e., the ratio of the notional value of call options sold by the Fund to the market value of the equity investments in the Fund’s portfolio) will be between 25% and 75% of the value of the equity investments in the Fund’s portfolio. The Fund generally expects to sell call options on underliers that provide economic exposure to the Fund’s benchmark, such as an ETF that seeks to track such index, and not on securities of issuers included in such index and held by the Fund. The Fund is an actively managed ETF, which is a fund that trades like other publicly traded securities. The Fund is not an index fund and does not seek to replicate the performance of a specified index.

The Fund may invest in FLEXible EXchange<sup>®</sup> Options (“FLEX Options”), other types of listed options and over-the-counter (“OTC”) options. FLEX Options are customized exchange-traded option contracts available through the Chicago Board Option Exchange. Through FLEX Options, the Fund could customize key contract terms such as exercise prices and expiration dates.

During periods in which the equity markets are generally unchanged or falling, or in a modestly rising market where the income from premiums exceeds the aggregate appreciation of the underlying index over its exercise price, a portfolio receiving premiums from its call option writing strategy may outperform the same portfolio without such an options strategy. However, in rising markets where the aggregate appreciation of the underlying index over its exercise price exceeds the income from premiums, a portfolio with a call writing strategy could underperform the same portfolio without the options.

Additionally, the Fund’s investment strategies may involve active and frequent trading resulting in high portfolio turnover.

The Fund will rebalance the portion of its portfolio that invests in companies included in the Fund’s benchmark index in accordance with the rebalance schedule of that index.

## PRINCIPAL RISKS OF THE FUND

**Loss of money is a risk of investing in the Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation (“FDIC”) or any government agency. The Fund should not be relied upon as a complete investment program. There can be no assurance that the**

**Fund will achieve its investment objective. Investments in the Fund involve substantial risks which prospective investors should consider carefully before investing. The Fund’s principal risks are presented below in alphabetical order, and not in the order of importance or potential exposure.**

**Derivatives Risk.** The Fund’s use of options, futures, forwards, swaps and other derivative instruments may result in losses, including due to adverse market movements. These instruments, which may pose risks in addition to and greater than those associated with investing directly in securities, currencies or other assets and instruments, may increase market exposure and be illiquid or less liquid, volatile, difficult to price and leveraged so that small changes in the value of the underlying assets or instruments may produce disproportionate losses to the Fund. Certain derivatives are also subject to counterparty risk, which is the risk that the other party in the transaction will not fulfill its contractual obligations. The use of derivatives is a highly specialized activity that involves investment techniques and risks different from those associated with investments in more traditional securities and instruments.

**Large Shareholder Risk.** Certain shareholders, including other funds advised by the Investment Adviser, may from time to time own a substantial amount of the Fund’s Shares. In addition, a third party investor, the Investment Adviser or an affiliate of the Investment Adviser, an authorized participant, a lead market maker, or another entity (i.e., a seed investor) may invest in the Fund and hold its investment solely to facilitate commencement of the Fund or to facilitate the Fund’s achieving a specified size or scale. Any such investment may be held for a limited period of time. There can be no assurance that any large shareholder would not redeem its investment, that the size of the Fund would be maintained at such levels or that the Fund would continue to meet applicable listing requirements. Redemptions by large shareholders could have a significant negative impact on the Fund, including on the Fund’s liquidity. In addition, transactions by large shareholders may account for a large percentage of the trading volume on The NASDAQ Stock Market LLC (the “Exchange”) and may, therefore, have a material upward or downward effect on the market price of the Shares.

**Management Risk.** The Fund is actively managed, which means that investment decisions are made based on investment views. There is no guarantee that the investment views will produce the desired results or expected returns, which may cause the Fund to fail to meet its investment objective or to underperform its benchmark index or funds with similar investment objectives and strategies.

**Market Risk.** The value of the securities in which the Fund invests may go up or down in response to the prospects of individual companies, particular sectors, governments or countries and/or general economic conditions throughout the world due to increasingly interconnected global economies and financial markets. Events such as war, military conflict, geopolitical disputes, acts of terrorism, social or political unrest, natural disasters, recessions, inflation, rapid interest rate changes, supply chain disruptions, tariffs and other restrictions on trade, sanctions or the spread of infectious illness or other public health threats, or the threat or potential of one or more such events and developments, could also significantly impact the Fund and its investments.

**Market Trading Risk.** The net asset value (“NAV”) of the Fund and the value of your investment may fluctuate. Market prices of Shares may fluctuate, in some cases significantly, in response to the Fund’s NAV, the intraday value of the Fund’s holdings and supply and demand for Shares. The Fund faces numerous market trading risks, including disruptions to creations and redemptions, the existence of extreme market volatility or potential lack of an active trading market for Shares.

Any of these factors, among others, may result in Shares trading at a significant premium or discount to NAV, which will be reflected in the intraday bid/ask spreads and/or the closing price of Shares as compared to NAV. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may pay more for, or receive less than, the underlying value of the Shares, respectively. Additionally, in stressed market conditions, the market for Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund's underlying portfolio holdings.

The securities held by the Fund may be traded in markets that close at a different time than the stock exchange on which the Fund's Shares are listed. Liquidity in those securities may be reduced after the applicable closing times. Accordingly, during the time when the Fund's listing exchange is open but after the applicable market closing, fixing or settlement times, bid-ask spreads and the resulting premium or discount to the Shares' NAV may widen.

**Option Writing Risk.** Writing (selling) call options limits the opportunity to profit from an increase in the market value of stocks in exchange for up-front cash (the premium) at the time of selling the call option. In a sharp rising market, the Fund could significantly underperform the market. Furthermore, premium received from the Fund's call option writing strategies may not fully protect it against market declines because the Fund will continue to bear the risk of a decline in the value of its portfolio securities. In a sharply-falling equity market, the Fund will likely also experience sharp declines in its NAV.

**Other Investment Companies Risk.** By investing in other investment companies (including ETFs) indirectly through the Fund, investors will incur a proportionate share of the expenses of the other investment companies held by the Fund (including operating costs and investment management fees) in addition to the fees regularly borne by the Fund. In addition, the Fund will be affected by the investment policies, practices and performance of such investment companies in direct proportion to the amount of assets the Fund invests therein.

**Stock Risk.** Stock prices have historically risen and fallen in periodic cycles. U.S. and foreign stock markets have experienced periods of substantial price volatility in the past and may do so again in the future.

**Strategy Risk.** While the Fund seeks to provide monthly distributions, there is no guarantee that distributions will always be paid or will be paid at a relatively stable rate. In addition, the Fund's investment strategy may result in a significant portion of distributions being paid as a return of capital for tax purposes. However, the Fund may distribute no return of capital in certain years or under certain market conditions, such that all of the distributions paid in such years or market environments may be classified and taxable as ordinary income. In addition, redemption transactions may affect the tax character of distributions paid to shareholders. No assurance can be given regarding the future tax character of the Fund's distributions. A return of capital is not taxable, but it reduces the shareholder's basis in its shares, which reduces the loss (or increases the gain) on a subsequent taxable disposition of shares. The Fund's option writing strategy is expected to eliminate the tax holding periods for the Fund's investment portfolio, minimizing the likelihood of the Fund distributing long-term capital gains to shareholders. Dividends from the Fund are not expected to qualify as qualified dividend income eligible for taxation at the lowest capital gains tax rates.

**Tracking Error/Index Risk.** Tracking error is the divergence of the Fund's performance (without regard to the options overwrite strategy) from that of the benchmark. The performance of the Fund's equity investments may diverge from that of the benchmark for a number of reasons. Tracking error may occur because of transaction costs, the

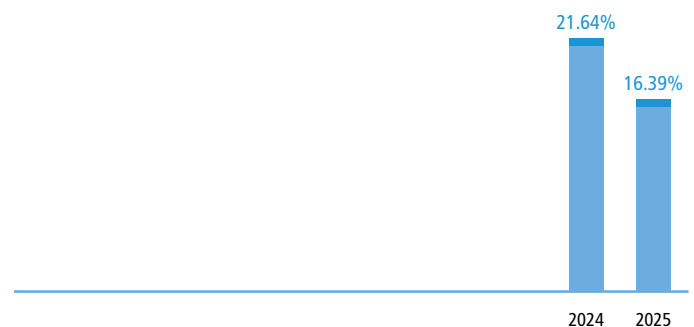

Fund's holding of cash, differences in accrual of dividends, changes to the benchmark or the need to meet new or existing regulatory requirements. Unlike the Fund, the returns of the benchmark are not reduced by investment and other operating expenses, including the trading costs associated with implementing changes to its portfolio of investments. Tracking error risk may be heightened during times of market volatility or other unusual market conditions. For tax efficiency purposes, the Fund may sell certain securities to realize losses, which will result in deviation from the benchmark. The Fund will be negatively affected by general declines in the securities and asset classes represented in the benchmark. In addition, unless a specific security is removed from the benchmark, the Fund generally would not sell a security because the security's issuer was in financial trouble.

**Valuation Risk.** The sale price the Fund could receive for a security may differ from the Fund's valuation of the security, particularly for securities that trade in low volume or volatile markets or that are valued using a fair value methodology. Because non-U.S. exchanges may be open on days when the Fund does not price its Shares, the value of foreign securities or assets in the Fund's portfolio may change on days when investors will not be able to purchase or sell the Fund's Shares. The Fund relies on various sources to calculate its NAV. The information may be provided by third parties that are believed to be reliable, but the information may not be accurate due to errors by such pricing sources, technological issues or otherwise. NAV calculation may also be impacted by operational risks arising from factors such as failures in systems and technology.

## PERFORMANCE

The bar chart and table below provide an indication of the risks of investing in the Fund by showing: (a) changes in the performance of the Fund's Shares from year to year; and (b) how the average annual total returns of the Fund's Shares compare to those of a broad-based securities market index. The Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available at no cost at [am.gs.com](http://am.gs.com) or by calling the appropriate phone number on the back cover of the Prospectus.

## CALENDAR YEAR

During the periods shown in the chart above:	Returns	Quarter ended
Best Quarter Return	9.28%	June 30, 2025
Worst Quarter Return	-3.64%	March 31, 2025

## AVERAGE ANNUAL TOTAL RETURN

For the period ended December 31, 2025	1 Year	Since Inception	Inception Date
<b>Goldman Sachs S&amp;P 500 Premium Income ETF</b>			10/24/2023
Returns Before Taxes	16.39%	22.66%	
Returns After Taxes on Distributions	14.14%	20.21%	
Returns After Taxes on Distributions and Sale of Fund Shares	9.56%	16.67%	
S&P 500 <sup>®</sup> Index	17.88%	26.07%	

Benchmark returns do not reflect any deductions for fees or expenses.

## PORTFOLIO MANAGEMENT

Goldman Sachs Asset Management, L.P. is the investment adviser for the Fund (the “Investment Adviser” or “GSAM”).

*Portfolio Managers:* Raj Garigipati, Managing Director; has managed the Fund since October 2023; Aron Kershner, Managing Director, and John Sienkiewicz, Managing Director, have each managed the Fund since March 2025.

## BUYING AND SELLING FUND SHARES

Individual Shares of the Fund may only be purchased and sold in secondary market transactions through a broker or dealer at market price. Because Shares trade at market prices, rather than NAV, Shares of the Fund may trade at a price greater than NAV (*i.e.*, a premium) or less than NAV (*i.e.*, a discount).

You may incur costs attributable to the difference between the highest price a buyer is willing to pay for Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) (the “bid-ask spread”) when buying or selling Shares in the secondary market.

Recent information, including information about the Fund’s NAV, market price, premiums and discounts, and bid-ask spreads, is included on the Fund’s website at [am.gs.com](http://am.gs.com).

## TAX INFORMATION

To the extent a Fund’s distributions constitute a return of capital, they are not taxable but will reduce the shareholder’s basis in its shares, which reduces the loss (or increases the gain) on a subsequent taxable disposition of shares. Any portion of a Fund’s distributions that do not constitute a return of capital is taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. Investments made through tax-deferred arrangements may become taxable upon withdrawal from such arrangements.

## PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), GSAM or other related companies may pay the intermediary for the sale of Fund Shares or related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s website for more information.
