2. BOARD OF DIRECTORS' REPORT

2.1 General information

Goldman Sachs Paraplufonds 3 N.V. ('the Fund') is an investment fund with variable capital. The Fund has its head office in The Hague, has its registered office in Amsterdam and is listed in the trade register of the Chamber of Commerce and Industry of The Hague.

The Fund does not have any employees. The Fund is managed by Goldman Sachs Asset Management B.V ('GSAM BV'), which is licensed by the Dutch Authority for the Financial Markets ('Stichting Autoriteit Financiële Markten', also referred to as 'AFM') under the Dutch Financial Supervision Act ('Wet op het financieel toezicht', also referred to as 'Wft'). The Executive Board of the Fund is formed by GSAM BV. All shares in GSAM BV are held by Goldman Sachs Asset Management International Holdings B.V. Both entities are part of The Goldman Sachs Group, Inc. (hereinafter referred to as 'Goldman Sachs').

Goldman Sachs is listed on the New York Stock Exchange and qualifies as a bank holding company under US law. Goldman Sachs is a globally operating financial institution which – by means of a substantial variety of leading companies and subsidiaries – offers (integrated) financial services to private individuals, companies and institutions.

The AFM and the central bank of the Netherlands (De Nederlandsche Bank N.V. also referred to as 'DNB') act as supervisors. The AFM is charged with conduct supervision on the grounds of the Wft. Prudential supervision is performed by DNB.

The reporting structure of Goldman Sachs Paraplufonds 3 N.V. and its included Sub-funds is organized as follows:

- This report of Goldman Sachs Paraplufonds 3 N.V. contains aggregate information of all the Sub-funds included in Goldman Sachs Paraplufonds 3 N.V.
- The more detailed information regarding the investment portfolios and individual Share Classes is included in the semi-annual reports of the Sub-funds. The annual reports of the individual Sub-funds are provided in the appendix.
- In addition, the semi-annual reports are published at the level of the individual Sub-funds. The semi-annual reports of the respective Sub-funds are available on the website of the manager.

The semi-annual report for the year 2024 of Goldman Sachs Paraplufonds 3 N.V. consists of the semi-annual report of the umbrella fund, as included in this report, as well as the separate semi-annual reports for each Sub-fund, as included in the appendix of this report. The semi-annual report of the umbrella fund contains specific references to the individual semi-annual reports of the Sub-funds, that are part of the semi-annual report of the umbrella fund.

2.2 Key figures

For an overview of the key figures per Share Class per Sub-fund, we refer to the semi-annual reports of the Sub-funds, as included in the appendix.

2.3 Fund information

For Goldman Sachs Paraplufonds 3 N.V., both an annual report and a semi-annual report are prepared. Additionally, a monthly update is published for each Sub-fund, providing current information including performance figures, portfolio allocations, and the largest investments within the Sub-fund.

A prospectus is available with comprehensive information about the structure, profile, and investment policy of Goldman Sachs Paraplufonds 3 N.V. and its Sub-funds.

For each Share Class, a Key Investor Document (Essentiële Informatiedocument) has been prepared, providing information on the Share Class(es) of the Fund, ongoing costs, and risks. Please read it before purchasing shares in a Share Class of the Fund. Do not take unnecessary risks; read the Key Investor Document.

Financial information, prospectus, Key Investor Document, and other important information are published on the website of the manager.

2.4 Objective

Goldman Sachs Paraplufonds 3 N.V. aims to provide participants with an investment opportunity in an actively and professionally managed portfolio of financial instruments. The investment policy of the Sub-funds is designed to achieve the highest possible total return in the long term through diversification and within the established objectives and risk profiles. For the specific objective of each Sub-fund, refer to the semi-annual report of the respective Subfund, as included in the appendix.

2.5 Investment policy

Each Sub-fund may invest in parties affiliated with the Fund's manager, as well as (directly and indirectly) in other UCITS and investment institutions. The Sub-funds will allocate their assets to achieve the best possible results. Additionally, a portion of the assets may be held in liquid funds.

The specific investment policy for each Sub-fund is detailed in the annual report of the Sub-funds, as included in the appendix.

The manager applies specific criteria for responsible investing for each Sub-fund. These criteria reflect the manager's investment beliefs and values, relevant legislation, and internationally recognized standards. The manager seeks, where legally possible, to avoid investing in issuers involved in activities including, but not limited to, the development, production, maintenance, or trade of controversial weapons, tobacco production, coal mining for electricity generation, and oil extraction from oil sands. Furthermore, additional restrictions may apply to Sub-funds with sustainable investment objectives.

Regarding investments in UCITS and/or investment institutions of third parties (including ETFs and index funds), it should be noted that the aforementioned investment restrictions cannot be imposed on these UCITS and/or investment institutions.

2.6 Risk profile

Investing in Sub-funds of Goldman Sachs Paraplufonds 3 N.V. involves financial opportunities as well as financial risks. The value of the investments can both increase and decrease, and shareholders of Sub-funds may potentially receive back less than they initially invested. Diversification of investments is expected to have a mitigating effect on these risks. For more insight in the fund specific risks in 2024, we refer to the semi-annual reports of the Sub-funds, as included in the appendix.

2.7 Outsourcing

Where a Sub-fund has outsourced management activities, this is detailed in the annual report of the Sub-funds, as included in the appendix.

Outsourcing of fund accounting

The manager of the Fund has outsourced the fund administration to The Bank of New York Mellon SA/NV. This outsourcing includes, among other things, the calculation of the net asset value, accounting, and processing payments. The manager remains responsible for the quality and continuity of these services.

Outsourcing of financial reporting

The manager of the Fund has outsourced the preparation of multiple financial reports, including the (semi)annual reports of the Dutch GSAM BV funds, to DM Financial Netherlands B.V. The manager remains responsible for the quality and continuity of the financial reports.

2.8 Structure

The Fund is an open-end investment company with variable capital as described in Article 76a of Book 2 of the Dutch Civil Code. Except in special circumstances, the Fund may in principle issue or redeem shares on any business day.

The Fund is an undertaking for collective investment in transferable securities ("UCITS") within the meaning of the Dutch Financial Supervision Act ('Wet op het financial toezicht', also referred to as 'Wft'). GSAM BV acts as manager of the Fund as defined in Section 1:1 of the Wft and in that capacity holds a license as defined in Section 2:69b(1), preamble and part (a) of the Wft from the AFM.

The Fund has an umbrella structure, which means that the ordinary shares are divided into various series of shares (Sub-funds), with each series of shares corresponding to a separate Sub-fund. Goldman Sachs Paraplufonds 3 N.V. is the legal owner of the assets held by the individual Sub-funds.

A Sub-fund is a segregated part of the capital of the Fund for which a separate investment policy is pursued. The Wft states that all standards directed in whole or in part towards the Fund are also applicable to the Sub-funds. The part of the assets of the Sub-fund to be paid into, or allocated to, each Fund is invested separately in accordance with a specific investment policy. Both gains and losses in the investment portfolio of a Sub-fund are credited or charged to the relevant Sub-fund.

The capital of a Sub-fund is segregated and subject to a statutory priority arrangement. Consequently, the assets of a Sub-fund may only be used to pay liabilities connected to the management and safe-keeping of the Sub-fund and the shares in that Sub-fund.

A Sub-fund is divided into one or more Share Classes. The Share Classes within the Sub-fund may differ in terms of cost and fee structure, the minimum amount of initial investment, demands on the quality of the investors, the currency in which the net asset value is expressed, etc.

The following Share Classes are present within the Sub-funds during the reporting period:

- Share Class P: A listed Share Class intended for private (non-professional) investors.
- Share Class I: A Share Class intended for professional investors.
- Share Class U: A Share Class intended for insurers approved by the manager for the purpose of capital accumulation
- Share Class G: A Share Class intended for insurers affiliated with the manager for the purpose of capital accumulation in the context of unit-linked insurance..
- Share Class D: A Share Class intended for professional investors who pay the management fee and other expenses to the manager directly based on an agreement.
- Share Class Z: A Share Class for other UCITS managed by the manager and collective investment institutions
 or professional investors who pay the management fee directly to the manager or to a party
 affiliated to the manager.

We refer to the notes to the balance sheet under 'Net asset value' for the distribution of the authorized capital and issued capital per Share Class in the Sub-funds.

2.9 Tax aspects

The Fund has the status of a tax-exempt investment institution (VBI) as referred to in Article 6a of the Corporate Income Tax Act 1969. As a tax-exempt investment institution within the meaning of Article 6a of the Corporate Income Tax Act 1969, the Fund will be exempt from corporate income tax on the investment income it receives if certain conditions (open-end character, collective investment, investment in financial instruments with risk diversification) are met.

Dividends distributed on foreign investments will often be subject to withholding tax in the respective country. Interest payments may also be subject to foreign withholding tax. Foreign and Dutch withholding tax withheld on behalf of the Fund generally cannot be reclaimed or offset. As a tax-exempt investment institution, the Fund cannot generally benefit from Dutch double taxation treaties.

The Fund is exempt from withholding tax on all its distributions.

2.10 Depositary of Goldman Sachs Paraplufonds 3 N.V.

The assets of the Fund are in the safe-keeping of The Bank of New York Mellon SA/NV, Amsterdam branch, as the depositary of the Fund (the 'depositary').

The shareholders' equity of the depositary amounts to at least € 730,000.

The manager and depositary of the Fund have entered into a written agreement relating to management and depositary services. The main elements of this agreement are the following:

- The depositary ensures that the cash flows of the Fund are properly controlled and in particular that all payments by or on behalf of investors during the subscription for shares have been received and that all cash of the Fund has been recorded in cash accounts in the name of the Fund or in the name of the depositary acting on behalf of the Fund, opened with (in principle) an entity as described in Article 18(1)(a), (b) and (c) of European Directive 2006/73/EC (a credit institution or a bank authorized in a third country).
- The assets of the Fund consisting of financial instruments are entrusted to the depositary. The depositary holds in safe-keeping all financial instruments that can be registered on a financial instruments account in the books of the depositary, on separate accounts in the name of the Fund. In addition, the depositary holds in safe-keeping all financial instruments that can be physically delivered to the depositary.
- For the other assets of the Fund, the depositary determines whether the Fund is the owner of these assets based
 on information or documents provided by the manager or based on other external evidence. The depositary keeps
 a register for these other assets.
- The depositary ensures that the sale, issue, repurchase, redemption and cancellation of shares in the Fund take place in accordance with Dutch law, the Articles of Association of the Fund and the relevant procedures.
- The depositary ensures that the value of the shares in the Fund is calculated in accordance with Dutch law, the Articles of Association of the Fund and the relevant procedures.
- The depositary carries out the instructions of the manager, unless they conflict with Dutch law or the Articles of Association of the Fund.
- The depositary ensures that the equivalent value of the transactions involving the assets of the Fund is transferred to the Fund by the usual deadlines.
- The depositary ensures that the income of the Fund is allocated in accordance with Dutch law and the Articles of Association of the Fund.

In the context of depositary services, the depositary acts in the interest of the Fund as well as the investors in the Fund.

3.5.9 Collateral

To mitigate counterparty risk for the Sub-fund, a collateral arrangement with the counterparty can be established for certain assets. The Sub-fund must determine the value of the received collateral on a daily basis and verify if additional collateral needs to be exchanged.

The collateral is typically provided in the form of:

- · Cash and cash equivalents, usually referred to as cash collateral;
- Bonds issued or guaranteed by highly rated countries;
- Bonds issued or guaranteed by prominent issuers and for which there is a sufficiently liquid market. Bonds issued by financial sector issuers are excluded due to correlation risk; or
- Shares admitted to or traded on a regulated market, provided that these shares are included in a major index.

The Sub-fund must ensure that it is able to enforce its rights to the collateral if an event occurs that requires its exercise. Therefore, the collateral must be available at all times, either directly or through the mediation of a prominent financial institution or a wholly-owned subsidiary of that institution, so that the Sub-fund can immediately seize or liquidate the collateralized assets if the counterparty fails to meet its obligations.

The Sub-fund will ensure that the collateral received from transactions in OTC derivatives, securities lending, and repo transactions meets the following conditions:

- The collateralized assets received are valued at market prices. To mitigate the risk of the collateral's value held by a Sub-fund being lower than the claim on the counterparty, a conservative markdown policy is applied. This collateral haircut is applied to collateral received in relation to (i) OTC derivatives, (ii) securities lending, and (iii) repo transactions. A markdown is a reduction applied to the value of collateralized assets and aims to absorb the volatility in the value of the collateral between two margin calls or during the required time to liquidate the collateral. This process includes a liquidity element in terms of remaining maturity and a credit quality element in terms of the rating of the security. The markdown policy takes into account the characteristics of the asset class involved, including the creditworthiness of the collateral issuer, the volatility of collateral prices, and potential currency mismatches. Markdowns applied to cash, high-quality government bonds, and corporate bonds typically range between 0% to 15%, and markdowns on equities range from 10% to 15%. Regulation also requires an additional 8% markdown to be applied when the currency unit of the collateral, if the collateral is a bond, differs from the permitted currency units in the legal documentation for bilateral derivative transactions. In exceptional market conditions, a different markdown level may be applied. Under the agreement with the respective counterparty, which may or may not involve minimum booking amounts, it is intended that, for the purpose of the collateral haircut and if applicable, each received collateral is valued at an amount equal to or higher than the respective exposure of the counterparty;
- The received collateral for OTC derivatives, securities lending, and repo transactions must be sufficiently liquid so that they can be quickly sold at a price that deviates little from the pre-sale valuation;
- The collateralized assets are held by the Sub-fund's Custodian or by a sub-custodian provided that the Sub-fund's Custodian has transferred the custody of the collateral to such sub-custodian and that the Custodian remains liable for the collateral if the sub-custodian loses it;
- Collateral received in the context of transactions in OTC derivatives, securities lending, and repo transactions
 cannot be sold or provided as security to a third party during the term of the agreement. However, received cash
 collateral can be reinvested.

3.5.10 Investments by marketability

For further details per Sub-fund, we refer to the section 'Investments by marketability' in the semi-annual report 2024 of the Sub-funds, as included in the appendix.

3.5.11 Receivables

All receivables have a remaining maturity of less than one year.

Receivable for investment transactions

These receivables arise due to the fact that there are a few days between the sale date and the receipt date of the payment for investment transactions.

Interest receivable

This concerns accrued, not yet received, interest on investments.

Receivables from shareholders

This concerns amounts receivable from shareholders for subscription to shares.

3.5.15 Off-balance sheet rights and obligations

For a detailed breakdown per Sub-fund, we refer to the section 'Off-Balance Sheet Rights and Obligations' in the semi-annual report 2024 of the Sub-funds, as included in the appendix.

3.6 Notes to the profit and loss statement

3.6.1 Income of investments

Interest from investments

Relates to interest income from investments.

3.6.2 Other result

Foreign currency translation

This concerns the foreign currency translation result on other balance sheet items.

Interest other

This relates to the interest earned on cash and cash equivalents, margin account and collateral during the reporting period.

Subscription and redemption fee

| Amounts x € 1,000 | 2024 | 2023 |
|----------------------------------|------|------|
| Subscription and redemption fees | 79 | 58 |

This concerns the fees charged to shareholders for the subscription to or redemption of units of participation in a Sub-fund. This fee is calculated as a percentage-based entry or exit fee on the net asset value per share to protect existing shareholders of the Sub-funds and is beneficiary to the Sub-funds.

The fixed subscription and redemption fee is determined at Sub-fund level. The fee is calculated based on the actual average purchase and sale costs related to the securities in which the Sub-funds invest. For the specific percentage per Sub-fund, refer to the annual report of the Sub-funds as included in the appendix.

Whether a subscription fee or redemption fee is applied for this compensation, depends on whether the Sub-fund, taking into account all Share Classes, has a net inflow (resulting in a subscription fee) or net outflow (resulting in a redemption fee). Any surplus or deficit resulting from the actual costs of the Sub-funds deviating from the mentioned fee above will be beneficiary to or borne by the Sub-funds.

Other income

Other income includes revenues that are not directly generated from investment income. It also includes a reimbursement of the allocated costs related to investments in investment funds. These allocated costs are included in the (un)realized changes in the value of Investment Funds and are reimbursed for Share Classes with a Fixed Miscellaneous Fee or all-in fee, as these costs are included in the Fixed Miscellaneous Fee or all-in fee of the respective Share Class.

3.6.3 Operating expenses

Operating costs

Each Share Class within a Sub-fund has its own cost structure. For detailed information on the cost structure per Share Class per Sub-fund and the specific percentage for each Share Class per Sub-fund regarding the management fee, all-in fee, Fixed Miscellaneous Fee, and Other Costs, please refer to the annual report of the Sub-funds, as included in the appendix.

For the period 1 January through 30 June

| Amounts x € 1,000 | 2024 | 2023 |
|-------------------------|------|------|
| Management fee | 274 | 294 |
| All-in fee | 452 | 320 |
| Fixed Miscellaneous Fee | 27 | 29 |
| Other costs | 106 | 130 |
| Total | 859 | 773 |

The management fee, all-in fee and Fixed Miscellaneous Fee represent a fixed percentage per year per Share Class of the Sub-fund, calculated on a daily basis over the total net asset value at the end of each day.

The All-in fee includes the management fee, as well as regular and/or ongoing costs included in the Other Costs section below. Where applicable, the all-in fee also includes regular and/or ongoing costs embedded in the value of investment funds and fee sharing.

The Fixed Miscellaneous Fee serves as compensation for regular and/or ongoing costs as outlined in the Other Costs section below. Where applicable, the Fixed Miscellaneous Fee also includes regular and/or ongoing costs included in the value of investment funds and fee sharing.

The other costs concern regular and/or recurring expenses as well as non-recurring and extraordinary expenses of the Fund, such as the costs of administration, reporting (also understood to include the costs of data provision and the processing and calculation of the financial data of the investment fund), the safe-keeping of the assets, the auditor, the supervision, any stock exchange listing, making payments, publications, shareholder meetings, legal proceedings including any class actions, the costs of collateral management activities as well as external advisers and service providers, such as – where appropriate – the Fund Agent and Transfer Agent.

Costs attributable to Share Class D are reimbursed to Share Class D by the manager, resulting in the costs for Share Class D of the Sub-fund being essentially nil.

Interest other

This relates to the interest accrued during the reporting period on debts to credit institutions.

3.7 Other general notes

3.7.1 Subsequent events

For information regarding subsequent events, we refer you to the semi-annual report 2024 of the Sub-funds, as included in the appendix.

The Hague, 23 August 2024

Goldman Sachs Asset Management B.V.

4. OTHER INFORMATION

4.1 Statutory provisions regarding appropriation of the result

According to Article 23 of the Articles of Association of Goldman Sachs Paraplufonds 3 N.V. the Executive Board decides for each type of shares what part of the balance will be allocated to the additional reserve maintained for the relevant type. After the aforementioned addition, a dividend, in so far as possible, is paid on the priority shares equal to six per cent (6%) of the nominal value of these shares. There is no further distribution of profit on the priority shares. The remainder is distributed to the holders of ordinary shares of the relevant type, unless the general meeting decides otherwise.

If the aforementioned balance of income and expenses is negative, the amount is deducted from the additional reserve that is maintained for the relevant type of shares.

4.2 Management interest

For the specification of directors' interests as of 30 June 2024 and 1 January 2024, we refer you to the annual reports of the Sub-funds, as included in the appendix.

4.3 Special statutory rights

This concerns the rights of the holders of preference shares related to the nomination for appointment of Board Members, remuneration of Board Members, and prior approval of amendments to the articles of association or a decision to liquidate the company.

4.4 Preference shares

Goldman Sachs Fund Holdings B.V., located in The Hague, holds 10 preference shares in the capital of Goldman Sachs Paraplufonds 3 N.V.

The management board of Goldman Sachs Fund Holdings B.V. is ultimately responsible for the way the voting rights connected to the preference shares are exercised. At the end of the reporting period, the management board of Goldman Sachs Fund Holdings B.V. consisted of Mrs. T. Katgerman and Mrs. M.M.E. Thewessen.

Effective from 1 July 2024, Mrs. M.M.E. Thewessen has resigned as board member of Goldman Sachs Fund Holdings B.V. Effective from 2 July 2024, Mr. A.H.L.M. Philipsen has been appointed as board member of Goldman Sachs Fund Holdings B.V.

2.3 Notes to the key figures

2.3.1 Reporting period

The key figures for 2024 relate to the positions at 30 June and the period from 1 January through 30 June. The key figures for the other years relate to the positions at 31 December and the period from 1 January through 31 December, unless stated otherwise.

2.3.2 Net asset value per share

The net asset value of each Share Class of the Sub-fund will be determined by the manager. The manager calculates the net asset value per Share Class each business day. The net asset value per share of each Share Class is determined by dividing the net asset value of a Share Class by the number of outstanding shares of that Share Class at the calculation date.

2.3.3 Transaction price

The transaction price of each Share Class of the Sub-fund is determined by the manager on each business day and is based on the net asset value per share of each Share Class with an upcharge (subscription fee) or discount (redemption fee) to cover the costs of purchase and sale of 'physical' investments. The subscription and redemption fee is for the protection of existing shareholders of the Sub-fund and is beneficial to the Sub-fund. When no transaction has taken place on a business day, the transaction price is equal to the net asset value per share.

2.3.4 Net performance

The net performance of each Share Class of the Sub-fund is based on the net asset value per share, taking into account any dividend distributions. The relative performance is the difference between the net performance of each Share Class of the Sub-fund and the performance of the index.

2.4 General information

AAA Bond Fund (NL) ('the Sub-fund') is part of Goldman Sachs Paraplufonds 3 N.V. (refer to paragraph 2.10 Structure for more information). The semi-annual report of Goldman Sachs Paraplufonds 3 N.V. (hereinafter referred to as the 'Fund') is available on the website of the manager.

The Sub-fund does not have any employees. Goldman Sachs Asset Management B.V. ('GSAM BV'), located in The Hague, is the manager of the Sub-fund and is licensed by the Dutch Authority for the Financial Markets ('Stichting Autoriteit Financiële Markten', also referred to as 'AFM') under the Dutch Financial Supervision Act ('Wet op het financieel toezicht', also referred to as 'Wft'). The Executive Board of the Fund is formed by GSAM BV. All shares in GSAM BV are held by Goldman Sachs Asset Management International Holdings B.V. Both entities are part of The Goldman Sachs Group, Inc. (hereinafter referred to as 'Goldman Sachs').

Goldman Sachs is listed on the New York Stock Exchange and qualifies as a bank holding company under US law. Goldman Sachs is a globally operating financial institution which – by means of a substantial variety of leading companies and subsidiaries – offers (integrated) financial services to private individuals, companies and institutions.

The AFM and the central bank of the Netherlands ('De Nederlandsche Bank N.V.', also referred to as 'DNB') act as supervisors. The AFM is charged with conduct supervision on the grounds of the Wft. Prudential supervision is performed by DNB.

2.5 Objective

The Sub-fund aims to achieve a better total return in the long term than the index through active management.

2.6 Investment policy

The Sub-fund primarily invests in a diversified portfolio of AAA government bonds denominated in euros from governments in the eurozone.

The creditworthiness of the bonds must be at least AA- (Standard & Poor's and Fitch) and/or Aa3 (Moody's). The credit ratings must be issued by at least two rating agencies.

The actively managed Sub-fund has the ability to hold investments both directly and indirectly – for example, by gaining exposure to the relevant financial instruments via derivatives or investments in other investment funds – within its investment process, with deviation limits applied relative to the index. The composition of the Sub-fund's investments may materially differ from that of the index. The index is a representative reflection of the investment universe. The Sub-fund may invest in securities that are not part of the index.

The Sub-fund promotes environmental and/or social characteristics, as described in Article 8 of Regulation (EU) 2019/2088 (on sustainability-related disclosures in the financial services sector, as amended or supplemented from time to time).

The Sub-fund applies Stewardship as well as an ESG integration approach and exclusion criteria concerning various activities.

The Sub-fund considers the principal adverse impacts (PAIs) on sustainability factors mainly through Stewardship.

The Sub-fund may use derivatives such as options, futures, warrants, and swaps. These can be applied for hedging risks and efficient portfolio management. Leverage may be involved, increasing the Sub-fund's sensitivity to market movements. When using derivatives, it is ensured that the portfolio as a whole remains within the investment restrictions. The risk profile associated with the type of investor targeted by the Sub-fund does not change as a result of the use of these instruments.

In addition to the above, the following applies to the investment policy of the Sub-fund:

- the Sub-fund may invest more than 35% of its invested capital in German government bonds and/or Dutch government bonds and has received an exemption from the AFM in accordance with Article 136, paragraph 2, of the Decree on Conduct of Business Supervision of Financial Enterprises;
- to the extent that the capital is not invested in the aforementioned financial instruments, there is the possibility to invest the capital in certain money market instruments (such as certificates of deposit and commercial paper), money market funds, or to hold it in the form of liquid assets;
- Additional income can be generated by entering into repurchase agreements ("repo's") and lending transactions (lending securities from the investment portfolio);
- subject to the provisions on leverage in the Prospectus, the maximum expected level of gross leverage (sum of the nominal values) of the Sub-fund is 50%, and the maximum expected level of net leverage (commitment method) is 25%;
- the global exposure of this Sub-fund is determined using the relative Value-at-Risk method;
- the manager of GSAM BV Umbrella Fund has the authority to take on short-term loans on behalf of the Sub-fund as debtor;
- · transactions with affiliated parties will take place on market terms;
- the Sub-fund invests, in line with its investment policy, globally in financial instruments with counterparties approved by the manager;
- the Sub-fund will invest no more than ten percent of its managed capital in participations in other investment funds.

2.7 Dividend policy

The dividend for Share Class I is paid annually. Share Class Z does not distribute any dividend.

2.8 Index

Bloomberg Barclays Euro-Aggregate Treasury AAA 1-10Y.

2.9 Outsourcing

Outsourcing of fund accounting

The manager of the Fund has outsourced the accounting function to The Bank of New York Mellon SA/NV. This outsourcing relates to, among others, the calculation of the net asset value, maintaining accounting records and processing of and executing payments. The manager remains ultimately responsible for the quality and continuity of these services.

Outsourcing of financial reporting

The manager of the Fund, has outsourced the preparation of multiple financial reports, including the (semi-)annual reports of the Dutch GSAM BV funds, to DM Financial Netherlands B.V. The manager remains ultimately responsible for the quality and continuity of all financial reports.

2.10 Structure

The Fund is an open-end investment company with variable capital as described in Article 76a of Book 2 of the Dutch Civil Code. Except in special circumstances, the Fund may in principle issue or redeem shares on any business day.

The Fund is an undertaking for collective investment in transferable securities ('UCITS') within the meaning of the Dutch Financial Supervision Act ('Wet op het financial toezicht', also referred to as 'Wft'). GSAM BV acts as manager of the Fund as defined in Section 1:1 of the Wft and in that capacity holds a license as defined in Section 2:69b(1), preamble and part (a) of the Wft from the AFM.

The Fund has an umbrella structure, which means that the ordinary shares are divided into various series of shares, with each series of shares corresponding to a separate Sub-fund. Goldman Sachs Paraplufonds 3 N.V. is the legal owner of the assets held by the individual Sub-funds.

A Sub-fund is a segregated part of the capital of the Fund for which a separate investment policy is pursued. The Wft states that all standards directed in whole or in part towards the Fund are also applicable to the Sub-funds. The part of the assets of the Sub-fund to be paid into, or allocated to, each Fund is invested separately in accordance with a specific investment policy. Both gains and losses in the investment portfolio of a Sub-fund are credited or charged to the relevant Sub-fund.

The capital of a Sub-fund is segregated and subject to a statutory priority arrangement. Consequently, the assets of a Sub-fund may only be used to pay liabilities connected to the management and safe-keeping of the Sub-fund and the shares in that Sub-fund.

A Sub-fund is divided into one or more Share Classes. The Share Classes within the Sub-fund may differ in terms of cost and fee structure, the minimum amount of initial investment, demands on the quality of the investors, the currency in which the net asset value is expressed, etc.

Fees

Management fee

An annual management fee is charged to the Share Class, which is calculated pro-rata on a daily basis by using the total net asset value of the Share Class at the end of every day.

Other costs

Other costs may be charged to the Share Class. These costs, if applicable, are further explained in the notes to the respective Share Class as included in the financial statements.

Subscription and redemption fee

This concerns the fee charged to shareholders upon the purchase or sale of shares in the Sub-fund. The fee is calculated as a percentage markup or markdown on the net asset value per share, serves to protect the existing shareholders of the Sub-fund and is beneficial to the Sub-fund.

The actual percentage of the subscription and redemption fee can fluctuate and is published on the manager's website. This percentage may be changed without prior notice if the manager deems it necessary to protect the existing shareholders of the Sub-fund.

Maximum subscription and redemption fee

For transparency reasons, the manager has set a maximum percentage of the net asset value of the shares for the subscription and redemption fee. In exceptional market conditions, at the discretion of the manager, the manager may, in the interest of the existing investors of the Sub-fund, apply a higher percentage than the maximum percentage applicable to the Sub-fund at that time. In addition, the manager may, in the interest of the existing shareholders, apply a higher percentage than the maximum percentage applicable to the Sub-fund at that time in the event of exceptionally large orders to buy and sell shares in the Sub-fund, to compensate for the related additional transaction costs.

2.11 Tax aspects

The Sub-fund is part of Goldman Sachs Paraplufonds 3 N.V., which has the status of a tax-exempt investment institution (VBI) as referred to in Article 6a of the Corporate Income Tax Act 1969. As a tax-exempt investment institution within the meaning of Article 6a of the Corporate Income Tax Act 1969, the Fund will be exempt from corporate income tax on the investment income it receives if certain conditions (open-end character, collective investment, investment in financial instruments with risk diversification) are met.

Dividends distributed on foreign investments will often be subject to withholding tax in the respective country. Interest payments may also be subject to foreign withholding tax. Foreign and Dutch withholding tax withheld on behalf of the Fund generally cannot be reclaimed or offset. As a tax-exempt investment institution, the Fund cannot generally benefit from Dutch double taxation treaties.

The Fund is exempt from withholding tax on all its distributions.

2.12 Transfer Agent

Shares of Share Classes I and Z can be bought and sold through the mediation of The Bank of New York Mellon SA/NV in Brussels, Belgium. The costs associated with the safe-keeping of shares of investors by The Bank of New York Mellon SA/NV in Brussels, Belgium are charged by the manager to the relevant Share Classes. The Transfer Agent, i.e. The Bank of New York Mellon SA/NV, is responsible for the evaluation and the acceptance of the buy and sell orders concerning shares of the relevant Share Classes as entered in the order book, subject to the conditions stated in the prospectus.

The Transfer Agent will only accept orders which have been entered on the basis of a settlement deadline which is in line with generally accepted market practice. After closure of the order book, the Transfer Agent will forward the balance of all buy and sell orders to the Fund. The transaction price at which these buy and sell orders are executed on the following business day is to be published by the manager.

2.13 Depositary of Goldman Sachs Paraplufonds 3 N.V.

The assets of the Fund are in the safe-keeping of The Bank of New York Mellon SA/NV, Amsterdam branch, as the depositary of the Fund (the 'depositary').

The shareholders' equity of the depositary amounts to at least EUR 730,000.

The manager and depositary of the Fund have entered into a written agreement relating to management and depositary services. The main elements of this agreement are the following:

- The depositary ensures that the cash flows of the Fund are properly controlled and in particular that all payments by or on behalf of investors during the subscription for shares have been received and that all cash of the Fund has been recorded in cash accounts in the name of the Fund or in the name of the depositary acting on behalf of the Fund, opened with (in principle) an entity as described in Article 18(1)(a), (b) and (c) of European Directive 2006/73/EC (a credit institution or a bank authorized in a third country).
- The assets of the Fund consisting of financial instruments are entrusted to the depositary. The depositary holds in safe-keeping all financial instruments that can be registered on a financial instruments account in the books of the depositary, on separate accounts in the name of the Fund. In addition, the depositary holds in safe-keeping all financial instruments that can be physically delivered to the depositary.
- For the other assets of the Fund, the depositary determines whether the Fund is the owner of these assets based on information or documents provided by the manager or based on other external evidence. The depositary keeps a register for these other assets.
- The depositary ensures that the sale, issue, repurchase, redemption and cancellation of shares in the Fund take place in accordance with Dutch law, the Articles of Association of the Fund and the relevant procedures.
- The depositary ensures that the value of the shares in the Fund is calculated in accordance with Dutch law, the Articles of Association of the Fund and the relevant procedures.
- The depositary carries out the instructions of the manager, unless they conflict with Dutch law or the Articles of Association of the Fund.
- The depositary ensures that the equivalent value of the transactions involving the assets of the Fund is transferred to the Fund by the usual deadlines.
- The depositary ensures that the income of the Fund is allocated in accordance with Dutch law and the Articles of Association of the Fund.

In the context of depositary services, the depositary acts in the interests of the Fund as well as the investors in the Fund.

2.14 Principal risks and uncertainties

Investing in the Sub-fund entails financial opportunities as well as financial risks. The value of investments can both rise and fall, and shareholders of the Sub-fund may receive less than they invested. Diversification of investments is expected to have a mitigating effect on these risks.

A comprehensive overview of the risks, categorized as 'high, medium, and low' risks, associated with the Sub-fund is provided in the prospectus. In the event of new regulations regarding risk management, additional information will be included. The main risks faced by the Sub-fund are:

Market risk

The Sub-fund is sensitive to changes in the value of investments due to fluctuations in prices in financial markets such as equities or fixed-income markets (market risk). Additionally, prices of individual instruments in which the Sub-fund invests may also fluctuate. If the Sub-fund utilizes derivatives as described under "Investment Policy," these may be employed for both hedging risks and efficient portfolio management. This may involve leveraging, thereby increasing the Sub-fund's sensitivity to market movements.

To mitigate market risks, investments are diversified across various countries, sectors, and/or companies. An overview of the portfolio composition as of each balance sheet date is provided in the Composition of Investments.

Interest rate risk

When investing in fixed-income securities, interest rate risk is incurred. This risk occurs when the interest rate of a security fluctuates. When interest rates decrease, the general expectation is that the value of fixed-income securities increases. Conversely, when interest rates rise, the general expectation is that the value of fixed-income securities decreases.

Currency risk

If investments can be made in securities denominated in currencies other than the currency in which the Sub-fund is denominated, currency fluctuations can have both positive and negative effects on the investment result.

Liquidity risk

Liquidity risks may arise when a particular underlying investment is difficult to sell. Since the Sub-fund may invest in illiquid securities, there is a risk that the Sub-fund may not have the ability to release financial resources that may be needed to meet certain obligations.

During the reporting period, there were no issues regarding liquidity. The available cash of the Sub-fund was sufficient to manage the inflow and outflow of capital during the reporting period. It is expected that this will also be the case in the upcoming reporting period.

Credit risk

Investors should be fully aware that every investment carries credit risks. Bonds and debt instruments entail actual credit risk on the issuer. This risk can be measured based on the issuer's credit rating. Bonds and debt instruments issued by lower-rated issuers typically carry higher credit risk and a greater chance of default than those issued by higher-rated issuers. If the issuer of bonds or debt instruments encounters financial or economic difficulties, leading to an increase in credit risk and likely downgrade of the rating, it can affect the value of the bonds or debt instruments (which may lose their value entirely).

Fraud risks and corruption

Fraud is any intentional act or omission to mislead others, causing loss to the victim and/or profit to the perpetrator. Corruption is the misuse of entrusted power for personal gain, including bribery. The lack of controls in the payment process increases the likelihood and therefore creates the opportunity for fraud.

The asset management industry is characterized by the management of third party assets, which is quite extensive in its entirety. Having access to these assets increases GSAM BV's inherent fraud and corruption risk profile. To manage this risk, GSAM BV conducts an annual fraud and corruption risk assessment to determine the identification, exposure to and management of these risks. GSAM BV concludes in its annual risk assessment that there are no high residual risks in the context of fraud and corruption. The main inherent risks identified by GSAM BV in the annual risk assessment are the following:

- Cyber risks;
- Unauthorized withdrawal of funds;
- Fraudulent invoices;
- Insider trading risk;
- Bribery.

The following measures have been taken to mitigate these inherent risks:

<u>Cyber risks</u>, cyber risk is recognized as a collective term which, knowingly (e.g. ransomware) or unknowingly (e.g. hack), can lead to a withdrawal of assets. The range of techniques that a malicious person can use is extensive. That is why it is important for GSAM BV to be aware of these techniques and to test its own environment accordingly. The measures taken are inspired by the NIST cyber security framework of protect, detect, respond, recover and identify and are evaluated annually on the basis of the Cyber Security Risk Assessment.

<u>Unauthorized withdrawal of funds</u>, is prevented by having authorization limits and a four (or more) eyes principles, whereby modern techniques such as 2 factor authentication are required.

<u>Fraudulent invoices</u>, the payment of invoices at the expense of an investment fund is only permitted if this corresponds with the prospectus. The beneficiary as well as the correctness of the amounts charged are often verifiable, through a link with the assets. Invoices must be assessed and approved in advance by budget holders, in accordance with the procuration policy. Within this process, a separation of functions has been made between ordering, entering and approval.

<u>Insider trading risk</u>, involves misusing information for personal gain, or having orders executed in such a way that self-enrichment can be achieved at the expense of the fund. The measures taken to prevent this are diverse, including best execution review, mandatory periodic reporting on personal investment portfolios, education in the form of mandatory training and pre-employment screening.

<u>Bribery</u> involves having a tender being influenced by, for example, bribes, dinners, travel and gifts. To mitigate this, GSAM BV has a strict policy, whereby anything with a value of more than fifty euros may not be accepted. Furthermore, in the context of broker execution, price and quality assessments are carried out periodically, the outcome of which is indicative of the extent to which orders are allocated to these brokers.

The residual risk, following from the risks described above, are determined by GSAM BV as 'medium' and are accepted through a formal risk acceptance, or at the level of the foreign GSAM BV entities.

Furthermore, there is a clear legal and operational separation between the asset manager, the external administrator, the fund and the custodian. This segregation of duties has an important preventive effect on the risk of fraud and corruption.

The beforementioned control measures are part of a larger control framework, of which various parts are periodically assessed by an external auditor via the GSAM BV ISAE 3402 report. Furthermore, GSAM BV applies the 3-lines of defense mechanism, in which risk management and internal audit continuously test and monitor the effectiveness of the administrative organization and internal control. GSAM BV also applies various soft controls, such as tone at the top, e-learnings, code of ethics and a whistleblower policy.

Sustainability risks

Sustainability risks can represent their own risk or influence other risks and contribute to general risks, such as market risks, liquidity risks, credit risks or operational risks. Sustainability risks may have a negative impact on the Sub-fund's return.

The sustainability risks to which the Sub-fund may be exposed include, for example:

- Climate change
- Health & safety
- Business conduct

The assessment of sustainability risks, as defined in Article 2(22) of Regulation (EU) 2019/2088 (on sustainability disclosures in the financial services sector, which Regulation may be amended or supplemented from time to time), is integrated into the investment decision process by application of Sub-fund-specific criteria for responsible investing and, where applicable, integration of relevant environmental, social and governance (ESG) factors.

The Sub-fund primarily invests in liquid assets, which means that the mentioned sustainability risks are incorporated into the valuation of the investments.

Issuer default risk

In addition to general trends in the financial markets, specific developments related to the issuer can also impact the value of an investment. Even careful security selection, for example, cannot eliminate the risk of loss due to a decline in value of the issuer's assets. The use of credit derivatives, if mentioned in the investment policy of the Fund, may entail credit risk.

2.15 Developments during the reporting period

2.15.1 General financial and economic developments in 2024

Economic Context

Recession fears continued to moderate at the start of 2024, as the US economy showed resilience despite significant rate hikes in 2022 and 1H 2023. A tight labor market, positive real wage growth, and strong equity markets supported consumer cash flows and balance sheets in the first quarter of 2024, leading to strong consumption. While US inflation prints were higher than expected in January and February, the US Federal Open Market Committee (FOMC) signaled confidence in March that disinflation would restart and recent elevated releases would prove temporary. In 2Q 2024, continued signs of improvement in global manufacturing indicators, strong earnings growth, and expectations of policy easing by major central banks supported positive momentum in risk assets. The disinflationary process also restarted, following higher than expected prints in 1Q 2024. US Core PCE (Personal Consumption Expenditures Price Index, Excluding Food and Energy) averaged 0.17% in April and May versus average reading of 0.37% in 1Q 2024.

While a slowdown in private consumption was notable in 2Q 2024, some moderation was arguably welcomed to achieve the US Federal Reserve's 2% inflation target. Any further moderation in consumption, however, could be a concern for policymakers and market participants, and renew fears of a recession. The rebalancing of the US labor market is somewhat similar. After strong data at the start of the year, the number of non-farm jobs added in April moderated to 175k versus an average of 235k in 1Q 2024. This was the lowest print in six months, and slower job growth helped allay fears that the economy was overheating, boosting expectations that interest rate cuts would still occur this year. The job openings rate for May rose to 4.9% from 4.8% in April. At its post pandemic peak, the job openings rate was at 7.4%. Like the consumption slowdown, further moderation in the US jobs opening rate could be reaching an inflection point where further rebalancing may not be encouraging news.

Outside of the US, growth momentum continued to improve albeit from weak levels, especially in Europe. Euro area 1Q 2024 GDP came in at 1.3% q/q annualized following 0.25% q/q annualized in 4Q 2023. Similarly, the UK economy expanded at a pace of 2.9% q/q annualized in 1Q 2024 after contracting at -0.9% annualized pace in 2H 2023. Chinese 1Q GDP surprised to the upside, with a reading of 5.3% y/y versus consensus expectation of 4.8% y/y.

Monetary Policy

The Federal Reserve tilted hawkish at the start of 2024 as inflation surprised to the upside and the strong economy gave US policymakers the option to be patient with the onset of the easing cycle. In May, the risk of renewed rate hikes was reduced due to moderation in US core services inflation and a downward revision of 1Q GDP, which came in at 1.2% q/q annualized versus 1.6% initially reported. In June, the Fed revised its median dot plot projection, which now suggests one 25bps rate cut this year, reduced from three projected in March. There's still a possibility that the Fed may implement two rate cuts in the second half of 2024. Fed Chair Jerome Powell noted during the June press conference that cuts totaling 25bps vs 50bps in 2024 was a close call for many participants.

The FOMC's dual mandate of inflation and labor market looks more two-sided now compared with a year ago when it was squarely focused on inflation. Going forward, the FOMC aims to stabilize the unemployment rate around the current level of 4% and bring inflation down to 2%. Therefore, the timing and magnitude of further policy rate calibration becomes crucial. Easing too soon could reignite inflationary pressures; waiting too long could break the labor market. The potential uncertainty from the upcoming US presidential election further complicates the overall economic outlook.

Elsewhere, the Swiss National Bank surprised markets in March and cut policy rates by 25bps, becoming the first G10 central bank to start its easing cycle. The European Central Bank and the Bank of Canada started their respective easing cycles in June, both cutting by 25bps. In terms of forward guidance, both central banks have suggested that further rate cuts are likely if the data evolves in line with expectations. In the UK, Bank of England leaned dovish, but did not ease policy in June. It noted that the decision to leave rates unchanged was finely balanced and recent strength in services inflation were largely driven by volatile components. The market interpretation was that the bank may be ready to begin easing in August.

On the geopolitical front, markets encountered increased uncertainty in Europe as French President Emmanuel Macron dissolved parliament and called snap parliamentary elections, scheduled for June 30 and July 7, after his party's defeat in the EU parliamentary elections. As a result, the market priced in a higher geopolitical risk premium in European assets leading to underperformance of European assets versus peers. In Asia, the Bank of Japan (BoJ) decided to end its negative interest rate policy at its March meeting.

Bond Markets

Bond yields went higher at the start of 2024 as recession fears continued to ease and the US inflation surprised to the upside. The US 10y yield went up by 35bps to 4.2% in 1Q 2024, following a decline of 70bps in 4Q 2023. Yields were modestly higher in 2Q 2024, with the 10y yield up by 15bps. However, the increase largely happened in April after strong labor market and inflation data leading to the 10y yield moving from 4.2% to 4.7%. Subsequently, as inflation and activity data moderated, the 10y yield declined 35bps in May and June.

In Germany and the UK, 10y yields were up 25bps each in 2Q 2024. Strong 1Q GDP releases along with somewhat stickier inflation and wage data in Europe led to higher yields. In France, the 10y yield was 55bps in 2Q as the market priced in a higher term premium given increased political uncertainty. As a result, the French-German 10y spread widened from 50bps to 80bps by the end of the quarter, the highest level since the European debt crisis in 2011-12. At the short end, the US 2y yield went up by 10bps, leaving the 2s10s curve inverted around -40bps. In Asia, May marked the first time since 2012 that the 10y Japanese government bond yield had been above 1%, a major milestone with the markets pricing in a more hawkish stance from the BoJ over the rest of the year.

Commodities generally delivered strong returns in 1H 2024 with oil (WTI) and copper up by 15% and 13%, respectively. Gold and silver rallied by 13% and 22%. Within currencies, the USD continued its strong performance and was up 2.6% in 2Q, following a gain 1.8% in 1Q. Moderating but still healthy growth, high carry, and political uncertainty in France and Mexico helped USD rally on a trade-weighted basis. JPY was one of the worst performing major currencies, down 6% versus the USD. Negative carry on JPY versus most currencies and a positive environment for pro-risk assets weighed on JPY. GBP was flat whereas EUR was down 0.8% versus the USD. A few notable outliers were AUD, which rallied 2.2% versus the USD, benefitting from relatively hawkish central bank policy given elevated inflation, risk on backdrop, and higher metal prices. MXN, on the others hand, was down 9% versus the USD. A landslide victory of the incumbent party in the Mexican presidential election in May sparked fears of higher fiscal spending with fewer checks and balances coupled with a tail risk of the new government's interference in monetary policy. Since then, attempts by newly elected President Claudia Sheinbaum to calm markets have led to some stabilization in MXN.

Overview of investment funds

The below table shows the investment funds in which the Sub-fund was invested at the end of the reporting period. The Hague, 23 August 2024

Goldman Sachs Asset Management B.V.

4. OTHER INFORMATION

4.1 Statutory provisions regarding appropriation of results

According to Article 23 of the Articles of Association of Goldman Sachs Paraplufonds 3 N.V. the Executive Board decides for each type of shares what part of the balance will be allocated to the additional reserve maintained for the relevant type. After the aforementioned addition, a dividend, in so far as possible, is paid on the priority shares equal to six per cent (6%) of the nominal value of these shares. There is no further distribution of profit on the priority shares. The remainder is distributed to the holders of ordinary shares of the relevant type, unless the general meeting decides otherwise.

If the aforementioned balance of income and expenses is negative, the amount is deducted from the additional reserve that is maintained for the relevant type of shares.

4.2 Management interest

At 30 June 2024 and 1 January 2024, the Board members had no personal interest in (an investment of) the Subfund.

2.3 Notes to the key figures

2.3.1 Reporting period

The key figures for 2024 relate to the positions at 30 June and the period from 1 January through 30 June. The key figures for the other years relate to the positions at 31 December and the period from 1 January through 31 December, unless stated otherwise.

2.3.2 Net asset value per share

The net asset value of each Share Class of the Sub-fund will be determined by the manager. The manager calculates the net asset value per Share Class each business day. The net asset value per share of each Share Class is determined by dividing the net asset value of a Share Class by the number of outstanding shares of that Share Class at the calculation date.

2.3.3 Transaction price

The transaction price of each Share Class of the Sub-fund is determined by the manager on each business day and is based on the net asset value per share of each Share Class with an upcharge (subscription fee) or discount (redemption fee) to cover the costs of purchase and sale of 'physical' investments. The subscription and redemption fee is for the protection of existing shareholders of the Sub-fund and is beneficial to the Sub-fund. When no transaction has taken place on a business day, the transaction price is equal to the net asset value per share.

2.3.4 Net performance

The net performance of each Share Class of the Sub-fund is based on the net asset value per share, taking into account any dividend distributions. The relative performance is the difference between the net performance of each Share Class of the Sub-fund and the performance of the index.

2.4 General information

Euro Covered Bond Fund (NL) ('the Sub-fund') is part of Goldman Sachs Paraplufonds 3 N.V. (refer to paragraph 2.10 Structure for more information). The semi-annual report of Goldman Sachs Paraplufonds 3 N.V. (hereinafter referred to as the 'Fund') is available on the website of the manager.

The Sub-fund does not have any employees. Goldman Sachs Asset Management B.V. ('GSAM BV'), located in The Hague, is the manager of the Sub-fund and is licensed by the Dutch Authority for the Financial Markets ('Stichting Autoriteit Financiële Markten', also referred to as 'AFM') under the Dutch Financial Supervision Act ('Wet op het financieel toezicht', also referred to as 'Wft'). The Executive Board of the Fund is formed by GSAM BV. All shares in GSAM BV are held by Goldman Sachs Asset Management International Holdings B.V. Both entities are part of The Goldman Sachs Group, Inc. (hereinafter referred to as 'Goldman Sachs').

Goldman Sachs is listed on the New York Stock Exchange and qualifies as a bank holding company under US law. Goldman Sachs is a globally operating financial institution which – by means of a substantial variety of leading companies and subsidiaries – offers (integrated) financial services to private individuals, companies and institutions.

The AFM and the central bank of the Netherlands ('De Nederlandsche Bank N.V.', also referred to as 'DNB') act as supervisors. The AFM is charged with conduct supervision on the grounds of the Wft. Prudential supervision is performed by DNB.

2.5 Objective

The objective of the Sub-fund is to achieve a better total long-term return than the index through active management, while adhering to deviation limits relative to the index. The composition of the Sub-fund may materially differ from that of the index. The index broadly represents the investment universe. The Sub-fund may invest in securities that are not part of the index.

2.6 Investment policy

The Sub-fund primarily invests in a diversified portfolio of investment grade covered bonds denominated in euros.

The Sub-fund promotes ecological and/or social characteristics, as described in Article 8 of Regulation (EU) 2019/2088 (on sustainability-related disclosures in the financial services sector, which may be amended or supplemented from time to time).

The Sub-fund applies Stewardship as well as an ESG integration approach and exclusion criteria concerning various activities. Additional information can be found in the prospectus.

The Sub-fund takes the Principal Adverse Impacts (PAIs) on sustainability factors into account mainly through Stewardship. Information regarding the Principal Adverse Impacts on sustainability factors can be found in the prospectus.

The Sub-fund has the ability to hold investments both directly and indirectly – for example, by gaining exposure to the relevant financial instruments through derivatives or investments in other investment funds.

The Sub-fund may use derivatives such as options, futures, warrants, swaps, and currency forwards. These can be applied for risk hedging and efficient portfolio management. This may involve leverage, increasing the Sub-fund's sensitivity to market movements. When using derivatives, care is taken to ensure that the portfolio as a whole remains within the investment restrictions. The risk profile associated with the type of investor targeted by the Sub-fund does not change as a result of the use of these instruments.

In addition to the above, the following applies to the investment policy of the Fund:

- the Sub-fund invests in fixed-income securities denominated in currencies of developed countries.
- the manager aims to fully hedge the assets invested in non-euro currencies.
- to the extent that assets are not invested in the aforementioned financial instruments, there is the possibility to
 invest assets in certain money market instruments (such as certificates of deposit and commercial paper), money
 market investment funds, or to hold assets in the form of cash.
- additional income can be generated through entering into lending transactions (lending securities from the investment portfolio).
- the Sub-fund may enter into repurchase agreements. The Sub-fund can act as a buyer (reverse repo) or seller (repo).
- subject to the provisions on leverage in the prospectus, the maximum expected level of gross leverage (sum of nominal values) of the Sub-fund is 100%, and the maximum expected level of net leverage ('commitment' method) is 25%.
- the 'global exposure' of this Sub-fund is determined using the 'relative Value-at-Risk' method.
- the manager of Goldman Sachs Paraplufonds 3 N.V. has the authority to enter into short-term loans as debtor on behalf of the Sub-fund.
- transactions with affiliated parties will be conducted on market terms.
- the Sub-fund invests globally in financial instruments, in line with the investment policy, with counterparties approved by the manager.
- the Sub-fund will not invest more than ten percent of its managed assets in units or shares of other investment funds in total.

2.7 Dividend policy

The Sub-fund does not distribute dividends.

2.9 Outsourcing

Outsourcing of fund accounting

The manager of the Fund has outsourced the accounting function to The Bank of New York Mellon SA/NV. This outsourcing relates to, among others, the calculation of the net asset value, maintaining accounting records and processing of and executing payments. The manager remains ultimately responsible for the quality and continuity of these services.

Outsourcing of financial reporting

The manager of the Fund, has outsourced the preparation of multiple financial reports, including the (semi-)annual reports of the Dutch GSAM BV funds, to DM Financial Netherlands B.V. The manager remains ultimately responsible for the quality and continuity of all financial reports.

2.10 Structure

The Fund is an open-end investment company with variable capital as described in Article 76a of Book 2 of the Dutch Civil Code. Except in special circumstances, the Fund may in principle issue or redeem shares on any business day.

The Fund is an undertaking for collective investment in transferable securities ('UCITS') within the meaning of the Dutch Financial Supervision Act ('Wet op het financial toezicht', also referred to as 'Wft'). GSAM BV acts as manager of the Fund as defined in Section 1:1 of the Wft and in that capacity holds a license as defined in Section 2:69b(1), preamble and part (a) of the Wft from the AFM.

The Fund has an umbrella structure, which means that the ordinary shares are divided into various series of shares, with each series of shares corresponding to a separate Sub-fund. Goldman Sachs Paraplufonds 3 N.V. is the legal owner of the assets held by the individual Sub-funds.

A Sub-fund is a segregated part of the capital of the Fund for which a separate investment policy is pursued. The Wft states that all standards directed in whole or in part towards the Fund are also applicable to the Sub-funds. The part of the assets of the Sub-fund to be paid into, or allocated to, each Fund is invested separately in accordance with a specific investment policy. Both gains and losses in the investment portfolio of a Sub-fund are credited or charged to the relevant Sub-fund.

The capital of a Sub-fund is segregated and subject to a statutory priority arrangement. Consequently, the assets of a Sub-fund may only be used to pay liabilities connected to the management and safe-keeping of the Sub-fund and the shares in that Sub-fund.

A Sub-fund is divided into one or more Share Classes. The Share Classes within the Sub-fund may differ in terms of cost and fee structure, the minimum amount of initial investment, demands on the quality of the investors, the currency in which the net asset value is expressed, etc.

| Summary of the main characteristics | s per Share Class at 30-06-2024 |

Fees

Other costs

Other costs may be charged to the Share Class. These costs, if applicable, are further explained in the notes to the respective Share Class as included in the financial statements.

Subscription and redemption fee

This concerns the fee charged to shareholders upon the purchase or sale of shares in the Sub-fund. The fee is calculated as a percentage markup or markdown on the net asset value per share, serves to protect the existing shareholders of the Sub-fund and is beneficial to the Sub-fund.

The actual percentage of the subscription and redemption fee can fluctuate and is published on the manager's website. This percentage may be changed without prior notice if the manager deems it necessary to protect the existing shareholders of the Sub-fund.

Maximum subscription and redemption fee

For transparency reasons, the manager has set a maximum percentage of the net asset value of the shares for the subscription and redemption fee. In exceptional market conditions, at the discretion of the manager, the manager may, in the interest of the existing investors of the Sub-fund, apply a higher percentage than the maximum percentage applicable to the Sub-fund at that time. In addition, the manager may, in the interest of the existing shareholders, apply a higher percentage than the maximum percentage applicable to the Sub-fund at that time in the event of exceptionally large orders to buy and sell shares in the Sub-fund, to compensate for the related additional transaction costs.

2.11 Tax aspects

The Sub-fund is part of Goldman Sachs Paraplufonds 3 N.V., which has the status of a tax-exempt investment institution (VBI) as referred to in Article 6a of the Corporate Income Tax Act 1969. As a tax-exempt investment institution within the meaning of Article 6a of the Corporate Income Tax Act 1969, the Fund will be exempt from corporate income tax on the investment income it receives if certain conditions (open-end character, collective investment, investment in financial instruments with risk diversification) are met.

Dividends distributed on foreign investments will often be subject to withholding tax in the respective country. Interest payments may also be subject to foreign withholding tax. Foreign and Dutch withholding tax withheld on behalf of the Fund generally cannot be reclaimed or offset. As a tax-exempt investment institution, the Fund cannot generally benefit from Dutch double taxation treaties.

The Fund is exempt from withholding tax on all its distributions.

2.12 Transfer Agent

Shares of Share Classes D and Z can be bought and sold through the mediation of The Bank of New York Mellon SA/NV in Brussels, Belgium. The costs associated with the safe-keeping of shares of investors by The Bank of New York Mellon SA/NV in Brussels, Belgium are charged by the manager to the relevant Share Classes. The Transfer Agent, i.e. The Bank of New York Mellon SA/NV, is responsible for the evaluation and the acceptance of the buy and sell orders concerning shares of the relevant Share Classes as entered in the order book, subject to the conditions stated in the prospectus.

The Transfer Agent will only accept orders which have been entered on the basis of a settlement deadline which is in line with generally accepted market practice. After closure of the order book, the Transfer Agent will forward the balance of all buy and sell orders to the Fund. The transaction price at which these buy and sell orders are executed on the following business day is to be published by the manager.

2.13 Depositary of Goldman Sachs Paraplufonds 3 N.V.

The assets of the Fund are in the safe-keeping of The Bank of New York Mellon SA/NV, Amsterdam branch, as the depositary of the Fund (the 'depositary').

The shareholders' equity of the depositary amounts to at least EUR 730,000.

The manager and depositary of the Fund have entered into a written agreement relating to management and depositary services. The main elements of this agreement are the following:

- The depositary ensures that the cash flows of the Fund are properly controlled and in particular that all payments by or on behalf of investors during the subscription for shares have been received and that all cash of the Fund has been recorded in cash accounts in the name of the Fund or in the name of the depositary acting on behalf of the Fund, opened with (in principle) an entity as described in Article 18(1)(a), (b) and (c) of European Directive 2006/73/EC (a credit institution or a bank authorized in a third country).
- The assets of the Fund consisting of financial instruments are entrusted to the depositary. The depositary holds in safe-keeping all financial instruments that can be registered on a financial instruments account in the books of the depositary, on separate accounts in the name of the Fund. In addition, the depositary holds in safe-keeping all financial instruments that can be physically delivered to the depositary.
- For the other assets of the Fund, the depositary determines whether the Fund is the owner of these assets based on information or documents provided by the manager or based on other external evidence. The depositary keeps a register for these other assets.
- The depositary ensures that the sale, issue, repurchase, redemption and cancellation of shares in the Fund take place in accordance with Dutch law, the Articles of Association of the Fund and the relevant procedures.
- The depositary ensures that the value of the shares in the Fund is calculated in accordance with Dutch law, the Articles of Association of the Fund and the relevant procedures.
- The depositary carries out the instructions of the manager, unless they conflict with Dutch law or the Articles of Association of the Fund.
- The depositary ensures that the equivalent value of the transactions involving the assets of the Fund is transferred to the Fund by the usual deadlines.
- The depositary ensures that the income of the Fund is allocated in accordance with Dutch law and the Articles of Association of the Fund.

In the context of depositary services, the depositary acts in the interests of the Fund as well as the investors in the Fund.

2.14 Principal risks and uncertainties

Investing in the Sub-fund entails financial opportunities as well as financial risks. The value of investments can both rise and fall, and shareholders of the Sub-fund may receive less than they invested. Diversification of investments is expected to have a mitigating effect on these risks.

A comprehensive overview of the risks, categorized as 'high, medium, and low' risks, associated with the Sub-fund is provided in the prospectus. In the event of new regulations regarding risk management, additional information will be included. The main risks faced by the Sub-fund are:

Market risk

The Sub-fund is sensitive to changes in the value of investments due to fluctuations in prices in financial markets such as equities or fixed-income markets (market risk). Additionally, prices of individual instruments in which the Sub-fund invests may also fluctuate. If the Sub-fund utilizes derivatives as described under "Investment Policy," these may be employed for both hedging risks and efficient portfolio management. This may involve leveraging, thereby increasing the Sub-fund's sensitivity to market movements.

To mitigate market risks, investments are diversified across various countries, sectors, and/or companies. An overview of the portfolio composition as of each balance sheet date is provided in the Composition of Investments.

Interest rate risk

When investing in fixed-income securities, interest rate risk is incurred. This risk occurs when the interest rate of a security fluctuates. When interest rates decrease, the general expectation is that the value of fixed-income securities increases. Conversely, when interest rates rise, the general expectation is that the value of fixed-income securities decreases.

Currency risk

If investments can be made in securities denominated in currencies other than the currency in which the Sub-fund is denominated, currency fluctuations can have both positive and negative effects on the investment result.

Liquidity risk

Liquidity risks may arise when a particular underlying investment is difficult to sell. Since the Sub-fund may invest in illiquid securities, there is a risk that the Sub-fund may not have the ability to release financial resources that may be needed to meet certain obligations.

During the reporting period, there were no issues regarding liquidity. The available cash of the Sub-fund was sufficient to manage the inflow and outflow of capital during the reporting period. It is expected that this will also be the case in the upcoming reporting period.

Credit risk

Investors should be fully aware that every investment carries credit risks. Bonds and debt instruments entail actual credit risk on the issuer. This risk can be measured based on the issuer's credit rating. Bonds and debt instruments issued by lower-rated issuers typically carry higher credit risk and a greater chance of default than those issued by higher-rated issuers. If the issuer of bonds or debt instruments encounters financial or economic difficulties, leading to an increase in credit risk and likely downgrade of the rating, it can affect the value of the bonds or debt instruments (which may lose their value entirely).

Fraud risks and corruption

Fraud is any intentional act or omission to mislead others, causing loss to the victim and/or profit to the perpetrator. Corruption is the misuse of entrusted power for personal gain, including bribery. The lack of controls in the payment process increases the likelihood and therefore creates the opportunity for fraud.

The asset management industry is characterized by the management of third party assets, which is quite extensive in its entirety. Having access to these assets increases GSAM BV's inherent fraud and corruption risk profile. To manage this risk, GSAM BV conducts an annual fraud and corruption risk assessment to determine the identification, exposure to and management of these risks. GSAM BV concludes in its annual risk assessment that there are no high residual risks in the context of fraud and corruption. The main inherent risks identified by GSAM BV in the annual risk assessment are the following:

- Cyber risks;
- Unauthorized withdrawal of funds;
- Fraudulent invoices;
- Insider trading risk;
- Bribery.

The following measures have been taken to mitigate these inherent risks:

<u>Cyber risks</u>, cyber risk is recognized as a collective term which, knowingly (e.g. ransomware) or unknowingly (e.g. hack), can lead to a withdrawal of assets. The range of techniques that a malicious person can use is extensive. That is why it is important for GSAM BV to be aware of these techniques and to test its own environment accordingly. The measures taken are inspired by the NIST cyber security framework of protect, detect, respond, recover and identify and are evaluated annually on the basis of the Cyber Security Risk Assessment.

<u>Unauthorized withdrawal of funds</u>, is prevented by having authorization limits and a four (or more) eyes principles, whereby modern techniques such as 2 factor authentication are required.

<u>Fraudulent invoices</u>, the payment of invoices at the expense of an investment fund is only permitted if this corresponds with the prospectus. The beneficiary as well as the correctness of the amounts charged are often verifiable, through a link with the assets. Invoices must be assessed and approved in advance by budget holders, in accordance with the procuration policy. Within this process, a separation of functions has been made between ordering, entering and approval.

<u>Insider trading risk</u>, involves misusing information for personal gain, or having orders executed in such a way that self-enrichment can be achieved at the expense of the fund. The measures taken to prevent this are diverse, including best execution review, mandatory periodic reporting on personal investment portfolios, education in the form of mandatory training and pre-employment screening.

<u>Bribery</u> involves having a tender being influenced by, for example, bribes, dinners, travel and gifts. To mitigate this, GSAM BV has a strict policy, whereby anything with a value of more than fifty euros may not be accepted. Furthermore, in the context of broker execution, price and quality assessments are carried out periodically, the outcome of which is indicative of the extent to which orders are allocated to these brokers.

The residual risk, following from the risks described above, are determined by GSAM BV as 'medium' and are accepted through a formal risk acceptance, or at the level of the foreign GSAM BV entities.

Furthermore, there is a clear legal and operational separation between the asset manager, the external administrator, the fund and the custodian. This segregation of duties has an important preventive effect on the risk of fraud and corruption.

The beforementioned control measures are part of a larger control framework, of which various parts are periodically assessed by an external auditor via the GSAM BV ISAE 3402 report. Furthermore, GSAM BV applies the 3-lines of defense mechanism, in which risk management and internal audit continuously test and monitor the effectiveness of the administrative organization and internal control. GSAM BV also applies various soft controls, such as tone at the top, e-learnings, code of ethics and a whistleblower policy.

Sustainability risks

Sustainability risks can represent their own risk or influence other risks and contribute to general risks, such as market risks, liquidity risks, credit risks or operational risks. Sustainability risks may have a negative impact on the Sub-fund's return.

The sustainability risks to which the Sub-fund may be exposed include, for example:

- Climate change
- Health & safety
- Business conduct

The assessment of sustainability risks, as defined in Article 2(22) of Regulation (EU) 2019/2088 (on sustainability disclosures in the financial services sector, which Regulation may be amended or supplemented from time to time), is integrated into the investment decision process by application of Sub-fund-specific criteria for responsible investing and, where applicable, integration of relevant environmental, social and governance (ESG) factors.

The Sub-fund primarily invests in liquid assets, which means that the mentioned sustainability risks are incorporated into the valuation of the investments.

Issuer default risk

In addition to general trends in the financial markets, specific developments related to the issuer can also impact the value of an investment. Even careful security selection, for example, cannot eliminate the risk of loss due to a decline in value of the issuer's assets. The use of credit derivatives, if mentioned in the investment policy of the Fund, may entail credit risk.

2.15 Developments during the reporting period

2.15.1 General financial and economic developments in 2024

Economic Context

Recession fears continued to moderate at the start of 2024, as the US economy showed resilience despite significant rate hikes in 2022 and 1H 2023. A tight labor market, positive real wage growth, and strong equity markets supported consumer cash flows and balance sheets in the first quarter of 2024, leading to strong consumption. While US inflation prints were higher than expected in January and February, the US Federal Open Market Committee (FOMC) signaled confidence in March that disinflation would restart and recent elevated releases would prove temporary. In 2Q 2024, continued signs of improvement in global manufacturing indicators, strong earnings growth, and expectations of policy easing by major central banks supported positive momentum in risk assets. The disinflationary process also restarted, following higher than expected prints in 1Q 2024. US Core PCE (Personal Consumption Expenditures Price Index, Excluding Food and Energy) averaged 0.17% in April and May versus average reading of 0.37% in 1Q 2024.

While a slowdown in private consumption was notable in 2Q 2024, some moderation was arguably welcomed to achieve the US Federal Reserve's 2% inflation target. Any further moderation in consumption, however, could be a concern for policymakers and market participants, and renew fears of a recession. The rebalancing of the US labor market is somewhat similar. After strong data at the start of the year, the number of non-farm jobs added in April moderated to 175k versus an average of 235k in 1Q 2024. This was the lowest print in six months, and slower job growth helped allay fears that the economy was overheating, boosting expectations that interest rate cuts would still occur this year. The job openings rate for May rose to 4.9% from 4.8% in April. At its post pandemic peak, the job openings rate was at 7.4%. Like the consumption slowdown, further moderation in the US jobs opening rate could be reaching an inflection point where further rebalancing may not be encouraging news.

Outside of the US, growth momentum continued to improve albeit from weak levels, especially in Europe. Euro area 1Q 2024 GDP came in at 1.3% q/q annualized following 0.25% q/q annualized in 4Q 2023. Similarly, the UK economy expanded at a pace of 2.9% q/q annualized in 1Q 2024 after contracting at -0.9% annualized pace in 2H 2023. Chinese 1Q GDP surprised to the upside, with a reading of 5.3% y/y versus consensus expectation of 4.8% y/y.

Monetary Policy

The Federal Reserve tilted hawkish at the start of 2024 as inflation surprised to the upside and the strong economy gave US policymakers the option to be patient with the onset of the easing cycle. In May, the risk of renewed rate hikes was reduced due to moderation in US core services inflation and a downward revision of 1Q GDP, which came in at 1.2% q/q annualized versus 1.6% initially reported. In June, the Fed revised its median dot plot projection, which now suggests one 25bps rate cut this year, reduced from three projected in March. There's still a possibility that the Fed may implement two rate cuts in the second half of 2024. Fed Chair Jerome Powell noted during the June press conference that cuts totaling 25bps vs 50bps in 2024 was a close call for many participants.

The FOMC's dual mandate of inflation and labor market looks more two-sided now compared with a year ago when it was squarely focused on inflation. Going forward, the FOMC aims to stabilize the unemployment rate around the current level of 4% and bring inflation down to 2%. Therefore, the timing and magnitude of further policy rate calibration becomes crucial. Easing too soon could reignite inflationary pressures; waiting too long could break the labor market. The potential uncertainty from the upcoming US presidential election further complicates the overall economic outlook.

Elsewhere, the Swiss National Bank surprised markets in March and cut policy rates by 25bps, becoming the first G10 central bank to start its easing cycle. The European Central Bank and the Bank of Canada started their respective easing cycles in June, both cutting by 25bps. In terms of forward guidance, both central banks have suggested that further rate cuts are likely if the data evolves in line with expectations. In the UK, Bank of England leaned dovish, but did not ease policy in June. It noted that the decision to leave rates unchanged was finely balanced and recent strength in services inflation were largely driven by volatile components. The market interpretation was that the bank may be ready to begin easing in August.

On the geopolitical front, markets encountered increased uncertainty in Europe as French President Emmanuel Macron dissolved parliament and called snap parliamentary elections, scheduled for June 30 and July 7, after his party's defeat in the EU parliamentary elections. As a result, the market priced in a higher geopolitical risk premium in European assets leading to underperformance of European assets versus peers. In Asia, the Bank of Japan (BoJ) decided to end its negative interest rate policy at its March meeting.

Bond Markets

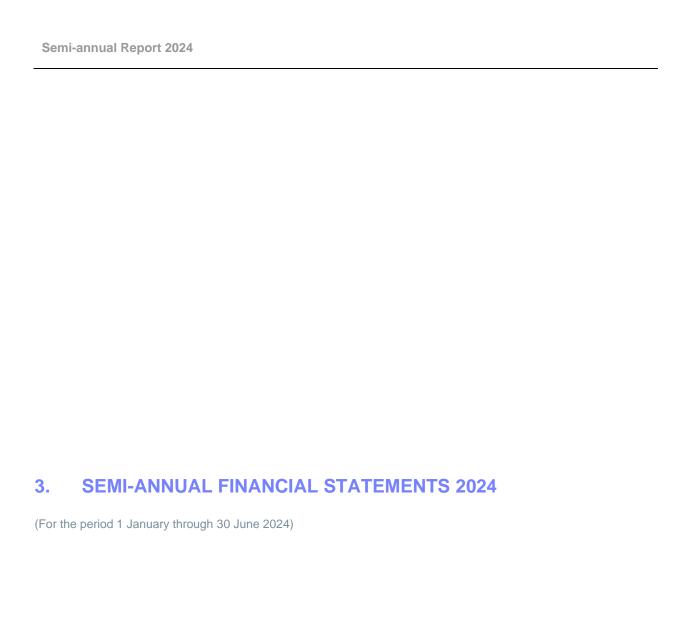

Bond yields went higher at the start of 2024 as recession fears continued to ease and the US inflation surprised to the upside. The US 10y yield went up by 35bps to 4.2% in 1Q 2024, following a decline of 70bps in 4Q 2023. Yields were modestly higher in 2Q 2024, with the 10y yield up by 15bps. However, the increase largely happened in April after strong labor market and inflation data leading to the 10y yield moving from 4.2% to 4.7%. Subsequently, as inflation and activity data moderated, the 10y yield declined 35bps in May and June.

In Germany and the UK, 10y yields were up 25bps each in 2Q 2024. Strong 1Q GDP releases along with somewhat stickier inflation and wage data in Europe led to higher yields. In France, the 10y yield was 55bps in 2Q as the market priced in a higher term premium given increased political uncertainty. As a result, the French-German 10y spread widened from 50bps to 80bps by the end of the quarter, the highest level since the European debt crisis in 2011-12. At the short end, the US 2y yield went up by 10bps, leaving the 2s10s curve inverted around -40bps. In Asia, May marked the first time since 2012 that the 10y Japanese government bond yield had been above 1%, a major milestone with the markets pricing in a more hawkish stance from the BoJ over the rest of the year.

Commodities generally delivered strong returns in 1H 2024 with oil (WTI) and copper up by 15% and 13%, respectively. Gold and silver rallied by 13% and 22%. Within currencies, the USD continued its strong performance and was up 2.6% in 2Q, following a gain 1.8% in 1Q. Moderating but still healthy growth, high carry, and political uncertainty in France and Mexico helped USD rally on a trade-weighted basis. JPY was one of the worst performing major currencies, down 6% versus the USD. Negative carry on JPY versus most currencies and a positive environment for pro-risk assets weighed on JPY. GBP was flat whereas EUR was down 0.8% versus the USD. A few notable outliers were AUD, which rallied 2.2% versus the USD, benefitting from relatively hawkish central bank policy given elevated inflation, risk on backdrop, and higher metal prices. MXN, on the others hand, was down 9% versus the USD. A landslide victory of the incumbent party in the Mexican presidential election in May sparked fears of higher fiscal spending with fewer checks and balances coupled with a tail risk of the new government's interference in monetary policy. Since then, attempts by newly elected President Claudia Sheinbaum to calm markets have led to some stabilization in MXN.

3.5.5 Collateral

To mitigate counterparty risk for the Sub-fund, a collateral arrangement with the counterparty can be established for certain assets. The Sub-fund must determine the value of the received collateral on a daily basis and verify if additional collateral needs to be exchanged.

The collateral is typically provided in the form of:

- Cash and cash equivalents, usually referred to as cash collateral;
- Bonds issued or guaranteed by highly rated countries;
- Bonds issued or guaranteed by prominent issuers and for which there is a sufficiently liquid market. Bonds
 issued by financial sector issuers are excluded due to correlation risk; or
- Shares admitted to or traded on a regulated market, provided that these shares are included in a major index.

The Sub-fund must ensure that it is able to enforce its rights to the collateral if an event occurs that requires its exercise. Therefore, the collateral must be available at all times, either directly or through the mediation of a prominent financial institution or a wholly-owned subsidiary of that institution, so that the Sub-fund can immediately seize or liquidate the collateralized assets if the counterparty fails to meet its obligations.

The Sub-fund will ensure that the collateral received from transactions in OTC derivatives, securities lending, and repo transactions meets the following conditions:

- The collateralized assets received are valued at market prices. To mitigate the risk of the collateral's value held by a Sub-fund being lower than the claim on the counterparty, a conservative markdown policy is applied. This collateral haircut is applied to collateral received in relation to (i) OTC derivatives, (ii) securities lending, and (iii) repo transactions. A markdown is a reduction applied to the value of collateralized assets and aims to absorb the volatility in the value of the collateral between two margin calls or during the required time to liquidate the collateral. This process includes a liquidity element in terms of remaining maturity and a credit quality element in terms of the rating of the security. The markdown policy takes into account the characteristics of the asset class involved, including the creditworthiness of the collateral issuer, the volatility of collateral prices, and potential currency mismatches. Markdowns applied to cash, high-quality government bonds, and corporate bonds typically range between 0% to 15%, and markdowns on equities range from 10% to 15%. Regulation also requires an additional 8% markdown to be applied when the currency unit of the collateral, if the collateral is a bond, differs from the permitted currency units in the legal documentation for bilateral derivative transactions. In exceptional market conditions, a different markdown level may be applied. Under the agreement with the respective counterparty, which may or may not involve minimum booking amounts, it is intended that, for the purpose of the collateral haircut and if applicable, each received collateral is valued at an amount equal to or higher than the respective exposure of the counterparty;
- The received collateral for OTC derivatives, securities lending, and repo transactions must be sufficiently liquid so that they can be quickly sold at a price that deviates little from the pre-sale valuation;
- The collateralized assets are held by the Sub-fund's custodian or by a sub-custodian provided that the Sub-fund's custodian has transferred the custody of the collateral to such sub-custodian and that the custodian remains liable for the collateral if the sub-custodian loses it;
- Collateral received in the context of transactions in OTC derivatives, securities lending, and repo
 transactions cannot be sold or provided as security to a third party during the term of the agreement.
 However, received cash collateral can be reinvested.

3.5.6 Investments by marketability

Goldman Sachs Asset Management B.V.

4. OTHER INFORMATION

4.1 Statutory provisions regarding appropriation of results

According to Article 23 of the Articles of Association of Goldman Sachs Paraplufonds 3 N.V. the Executive Board decides for each type of shares what part of the balance will be allocated to the additional reserve maintained for the relevant type. After the aforementioned addition, a dividend, in so far as possible, is paid on the priority shares equal to six per cent (6%) of the nominal value of these shares. There is no further distribution of profit on the priority shares. The remainder is distributed to the holders of ordinary shares of the relevant type, unless the general meeting decides otherwise.

If the aforementioned balance of income and expenses is negative, the amount is deducted from the additional reserve that is maintained for the relevant type of shares.

4.2 Management interest

At 30 June 2024 and 1 January 2024, the Board members had no personal interest in (an investment of) the Subfund.

2.4 Notes to the key figures

2.4.1 Reporting period

The key figures for 2024 relate to the positions at 30 June and the period from 1 January through 30 June. The key figures for the other years relate to the positions at 31 December and the period from 1 January through 31 December, unless stated otherwise.

2.4.2 Net asset value per share

The net asset value of each Share Class of the Sub-fund will be determined by the manager. The manager calculates the net asset value per Share Class each business day. The net asset value per share of each Share Class is determined by dividing the net asset value of a Share Class by the number of outstanding shares of that Share Class at the calculation date.

2.4.3 Transaction price

The transaction price of each Share Class of the Sub-fund is determined by the manager on each business day and is based on the net asset value per share of each Share Class with an upcharge (subscription fee) or discount (redemption fee) to cover the costs of purchase and sale of 'physical' investments. The subscription and redemption fee is for the protection of existing shareholders of the Sub-fund and is beneficial to the Sub-fund. When no transaction has taken place on a business day, the transaction price is equal to the net asset value per share.

2.4.4 Net performance

The net performance of each Share Class of the Sub-fund is based on the net asset value per share, taking into account any dividend distributions. The relative performance is the difference between the net performance of each Share Class of the Sub-fund and the performance of the index.

2.5 General information

Euro Credit Fund (NL) ('the Sub-fund') is part of Goldman Sachs Paraplufonds 3 N.V. (refer to paragraph 2.11 Structure for more information). The semi-annual report of Goldman Sachs Paraplufonds 3 N.V. (hereinafter referred to as the 'Fund') is available on the website of the manager.

The Sub-fund does not have any employees. Goldman Sachs Asset Management B.V. ('GSAM BV'), located in The Hague, is the manager of the Sub-fund and is licensed by the Dutch Authority for the Financial Markets ('Stichting Autoriteit Financiële Markten', also referred to as 'AFM') under the Dutch Financial Supervision Act ('Wet op het financieel toezicht', also referred to as 'Wft'). The Executive Board of the Fund is formed by GSAM BV. All shares in GSAM BV are held by Goldman Sachs Asset Management International Holdings B.V. Both entities are part of The Goldman Sachs Group, Inc. (hereinafter referred to as 'Goldman Sachs').

Goldman Sachs is listed on the New York Stock Exchange and qualifies as a bank holding company under US law. Goldman Sachs is a globally operating financial institution which – by means of a substantial variety of leading companies and subsidiaries – offers (integrated) financial services to private individuals, companies and institutions.

The AFM and the central bank of the Netherlands ('De Nederlandsche Bank N.V.', also referred to as 'DNB') act as supervisors. The AFM is charged with conduct supervision on the grounds of the Wft. Prudential supervision is performed by DNB.

2.6 Objective

The Fund aims to achieve a better overall long-term return than the index through active management, while applying deviation limits relative to the index.

2.7 Investment policy

The Sub-fund primarily invests in a diversified portfolio of high-quality corporate bonds denominated in euros, ranging from AAA to BBB- ratings.

The Sub-fund promotes environmental and/or social characteristics as described in Article 8 of Regulation (EU) 2019/2088 (on sustainability-related disclosures in the financial services sector, which may be amended or supplemented from time to time).

The Sub-fund applies Stewardship as well as an ESG integration approach and exclusion criteria related to various activities. Additional information can be found in the prospectus.

The Sub-fund primarily considers the principal adverse impacts (PAIs) on sustainability factors through Stewardship. Information on the principal adverse impacts on sustainability factors can be found in the prospectus.

The Sub-fund has the ability to hold investments both directly and indirectly — for example, by entering into exposure on the relevant financial instruments via derivatives or investments in other investment funds.

The Sub-fund may utilize derivatives such as options, futures, warrants, swaps, and forward currency contracts. These may be used to hedge risks and for efficient portfolio management. This may involve leveraging, which increases the sensitivity of the Sub-fund to market movements. When using derivatives, care is taken to ensure that the portfolio as a whole complies with investment restrictions. The risk profile associated with the type of investor targeted by the Sub-fund does not change due to the use of these instruments.

In addition to the above, the following applies to the investment policy of the Sub-fund:

- the Sub-fund primarily invests in high-quality corporate bonds denominated in euros, with ratings ranging from AAA to BBB-.
- the manager aims to fully hedge non-euro currency exposures back to the euro.
- If not invested in the aforementioned financial instruments, the Sub-fund may invest in certain money market instruments (e.g., certificates of deposit and commercial paper), money market funds, or hold assets in cash equivalents.
- additional income may be generated through entering into lending transactions (securities lending from the investment portfolio).
- the Sub-fund can engage in repurchase agreements (repos), acting as either buyer (reverse repo) or seller (repo).
- subject to leverage provisions in the prospectus, the maximum expected level of gross leverage (sum of nominal values) for the Sub-fund is 200%, and the maximum expected level of net leverage (commitment method) is 100%.
- the global exposure of this Sub-fund is determined using the relative Value-at-Risk method.
- the manager of Goldman Sachs Paraplufonds 3 N.V. is authorized to enter into short-term loans as a borrower on behalf of the Sub-fund.
- · transactions with related parties will occur on market terms.
- the Sub-fund invests globally in financial instruments in accordance with the investment policy, using counterparties approved by the manager.
- the Sub-fund will not invest more than ten percent of its managed assets in units or shares of other investment funds.

2.8 Dividend policy

The Sub-fund pursues an active dividend policy at the level of specific Share Classes. The Sub-fund may distribute interim dividends (which may be from income or from capital) if decided by management. The amount and frequency of distributions may vary from year to year and may be zero. Distributions may vary by Share Class as well as the method of payment.

The dividend for Share Class I is paid on an annual basis. Share Classes D and Z do not distribute dividends.

2.10 Outsourcing

Outsourcing of fund accounting

The manager of the Fund has outsourced the accounting function to The Bank of New York Mellon SA/NV. This outsourcing relates to, among others, the calculation of the net asset value, maintaining accounting records and processing of and executing payments. The manager remains ultimately responsible for the quality and continuity of these services.

Outsourcing of financial reporting

The manager of the Fund, has outsourced the preparation of multiple financial reports, including the (semi-)annual reports of the Dutch GSAM BV funds, to DM Financial Netherlands B.V. The manager remains ultimately responsible for the quality and continuity of all financial reports.

2.11 Structure

The Fund is an open-end investment company with variable capital as described in Article 76a of Book 2 of the Dutch Civil Code. Except in special circumstances, the Fund may in principle issue or redeem shares on any business day.

The Fund is an undertaking for collective investment in transferable securities ('UCITS') within the meaning of the Dutch Financial Supervision Act ('Wet op het financial toezicht', also referred to as 'Wft'). GSAM BV acts as manager of the Fund as defined in Section 1:1 of the Wft and in that capacity holds a license as defined in Section 2:69b(1), preamble and part (a) of the Wft from the AFM.

The Fund has an umbrella structure, which means that the ordinary shares are divided into various series of shares, with each series of shares corresponding to a separate Sub-fund. Goldman Sachs Paraplufonds 3 N.V. is the legal owner of the assets held by the individual Sub-funds.

A Sub-fund is a segregated part of the capital of the Fund for which a separate investment policy is pursued. The Wft states that all standards directed in whole or in part towards the Fund are also applicable to the Sub-funds. The part of the assets of the Sub-fund to be paid into, or allocated to, each Fund is invested separately in accordance with a specific investment policy. Both gains and losses in the investment portfolio of a Sub-fund are credited or charged to the relevant Sub-fund.

The capital of a Sub-fund is segregated and subject to a statutory priority arrangement. Consequently, the assets of a Sub-fund may only be used to pay liabilities connected to the management and safe-keeping of the Sub-fund and the shares in that Sub-fund.

A Sub-fund is divided into one or more Share Classes. The Share Classes within the Sub-fund may differ in terms of cost and fee structure, the minimum amount of initial investment, demands on the quality of the investors, the currency in which the net asset value is expressed, etc.

Fees

Management fee

An annual management fee is charged to the Share Class, which is calculated pro-rata on a daily basis by using the total net asset value of the Share Class at the end of every day.

Other costs

Other costs may be charged to the Share Class. These costs, if applicable, are further explained in the notes to the respective Share Class as included in the financial statements.

Subscription and redemption fee

This concerns the fee charged to shareholders upon the purchase or sale of shares in the Sub-fund. The fee is calculated as a percentage markup or markdown on the net asset value per share, serves to protect the existing shareholders of the Sub-fund and is beneficial to the Sub-fund.

The actual percentage of the subscription and redemption fee can fluctuate and is published on the manager's website. This percentage may be changed without prior notice if the manager deems it necessary to protect the existing shareholders of the Sub-fund.

Maximum subscription and redemption fee

For transparency reasons, the manager has set a maximum percentage of the net asset value of the shares for the subscription and redemption fee. In exceptional market conditions, at the discretion of the manager, the manager may, in the interest of the existing investors of the Sub-fund, apply a higher percentage than the maximum percentage applicable to the Sub-fund at that time. In addition, the manager may, in the interest of the existing shareholders, apply a higher percentage than the maximum percentage applicable to the Sub-fund at that time in the event of exceptionally large orders to buy and sell shares in the Sub-fund, to compensate for the related additional transaction costs.

2.12 Tax aspects

The Sub-fund is part of Goldman Sachs Paraplufonds 3 N.V., which has the status of a tax-exempt investment institution (VBI) as referred to in Article 6a of the Corporate Income Tax Act 1969. As a tax-exempt investment institution within the meaning of Article 6a of the Corporate Income Tax Act 1969, the Fund will be exempt from corporate income tax on the investment income it receives if certain conditions (open-end character, collective investment, investment in financial instruments with risk diversification) are met.

Dividends distributed on foreign investments will often be subject to withholding tax in the respective country. Interest payments may also be subject to foreign withholding tax. Foreign and Dutch withholding tax withheld on behalf of the Fund generally cannot be reclaimed or offset. As a tax-exempt investment institution, the Fund cannot generally benefit from Dutch double taxation treaties.

The Fund is exempt from withholding tax on all its distributions.

2.13 Transfer Agent

Shares of Share Classes I, D, and Z can be bought and sold through the mediation of The Bank of New York Mellon SA/NV in Brussels, Belgium. The costs associated with the safe-keeping of shares of investors by The Bank of New York Mellon SA/NV in Brussels, Belgium are charged by the manager to the relevant Share Classes. The Transfer Agent, i.e. The Bank of New York Mellon SA/NV, is responsible for the evaluation and the acceptance of the buy and sell orders concerning shares of the relevant Share Classes as entered in the order book, subject to the conditions stated in the prospectus.

The Transfer Agent will only accept orders which have been entered on the basis of a settlement deadline which is in line with generally accepted market practice. After closure of the order book, the Transfer Agent will forward the balance of all buy and sell orders to the Fund. The transaction price at which these buy and sell orders are executed on the following business day is to be published by the manager.

2.14 Depositary of Goldman Sachs Paraplufonds 3 N.V.

The assets of the Fund are in the safe-keeping of The Bank of New York Mellon SA/NV, Amsterdam branch, as the depositary of the Fund (the 'depositary').

The shareholders' equity of the depositary amounts to at least EUR 730,000.

The manager and depositary of the Fund have entered into a written agreement relating to management and depositary services. The main elements of this agreement are the following:

- The depositary ensures that the cash flows of the Fund are properly controlled and in particular that all payments by or on behalf of investors during the subscription for shares have been received and that all cash of the Fund has been recorded in cash accounts in the name of the Fund or in the name of the depositary acting on behalf of the Fund, opened with (in principle) an entity as described in Article 18(1)(a), (b) and (c) of European Directive 2006/73/EC (a credit institution or a bank authorized in a third country).
- The assets of the Fund consisting of financial instruments are entrusted to the depositary. The depositary holds in safe-keeping all financial instruments that can be registered on a financial instruments account in the books of the depositary, on separate accounts in the name of the Fund. In addition, the depositary holds in safe-keeping all financial instruments that can be physically delivered to the depositary.
- For the other assets of the Fund, the depositary determines whether the Fund is the owner of these assets based on information or documents provided by the manager or based on other external evidence. The depositary keeps a register for these other assets.
- The depositary ensures that the sale, issue, repurchase, redemption and cancellation of shares in the Fund take place in accordance with Dutch law, the Articles of Association of the Fund and the relevant procedures.
- The depositary ensures that the value of the shares in the Fund is calculated in accordance with Dutch law, the Articles of Association of the Fund and the relevant procedures.
- The depositary carries out the instructions of the manager, unless they conflict with Dutch law or the Articles of Association of the Fund.
- The depositary ensures that the equivalent value of the transactions involving the assets of the Fund is transferred to the Fund by the usual deadlines.
- The depositary ensures that the income of the Fund is allocated in accordance with Dutch law and the Articles of Association of the Fund.

In the context of depositary services, the depositary acts in the interests of the Fund as well as the investors in the Fund.

2.15 Principal risks and uncertainties

Investing in the Sub-fund entails financial opportunities as well as financial risks. The value of investments can both rise and fall, and shareholders of the Sub-fund may receive less than they invested. Diversification of investments is expected to have a mitigating effect on these risks.

A comprehensive overview of the risks, categorized as 'high, medium, and low' risks, associated with the Sub-fund is provided in the prospectus. In the event of new regulations regarding risk management, additional information will be included. The main risks faced by the Sub-fund are:

Market risk

The Sub-fund is sensitive to changes in the value of investments due to fluctuations in prices in financial markets such as equities or fixed-income markets (market risk). Additionally, prices of individual instruments in which the Sub-fund invests may also fluctuate. If the Sub-fund utilizes derivatives as described under "Investment Policy," these may be employed for both hedging risks and efficient portfolio management. This may involve leveraging, thereby increasing the Sub-fund's sensitivity to market movements.

To mitigate market risks, investments are diversified across various countries, sectors, and/or companies. An overview of the portfolio composition as of each balance sheet date is provided in the Composition of Investments.

Interest rate risk

When investing in fixed-income securities, interest rate risk is incurred. This risk occurs when the interest rate of a security fluctuates. When interest rates decrease, the general expectation is that the value of fixed-income securities increases. Conversely, when interest rates rise, the general expectation is that the value of fixed-income securities decreases.

Currency risk

If investments can be made in securities denominated in currencies other than the currency in which the Sub-fund is denominated, currency fluctuations can have both positive and negative effects on the investment result.

Liquidity risk

Liquidity risks may arise when a particular underlying investment is difficult to sell. Since the Sub-fund may invest in illiquid securities, there is a risk that the Sub-fund may not have the ability to release financial resources that may be needed to meet certain obligations.

During the reporting period, there were no issues regarding liquidity. The available cash of the Sub-fund was sufficient to manage the inflow and outflow of capital during the reporting period. It is expected that this will also be the case in the upcoming reporting period.

Credit risk

Investors should be fully aware that every investment carries credit risks. Bonds and debt instruments entail actual credit risk on the issuer. This risk can be measured based on the issuer's credit rating. Bonds and debt instruments issued by lower-rated issuers typically carry higher credit risk and a greater chance of default than those issued by higher-rated issuers. If the issuer of bonds or debt instruments encounters financial or economic difficulties, leading to an increase in credit risk and likely downgrade of the rating, it can affect the value of the bonds or debt instruments (which may lose their value entirely).

Fraud risks and corruption

Fraud is any intentional act or omission to mislead others, causing loss to the victim and/or profit to the perpetrator. Corruption is the misuse of entrusted power for personal gain, including bribery. The lack of controls in the payment process increases the likelihood and therefore creates the opportunity for fraud.

The asset management industry is characterized by the management of third party assets, which is quite extensive in its entirety. Having access to these assets increases GSAM BV's inherent fraud and corruption risk profile. To manage this risk, GSAM BV conducts an annual fraud and corruption risk assessment to determine the identification, exposure to and management of these risks. GSAM BV concludes in its annual risk assessment that there are no high residual risks in the context of fraud and corruption. The main inherent risks identified by GSAM BV in the annual risk assessment are the following:

- Cyber risks;
- Unauthorized withdrawal of funds;
- Fraudulent invoices;
- Insider trading risk;
- · Bribery.

The following measures have been taken to mitigate these inherent risks:

<u>Cyber risks</u>, cyber risk is recognized as a collective term which, knowingly (e.g. ransomware) or unknowingly (e.g. hack), can lead to a withdrawal of assets. The range of techniques that a malicious person can use is extensive. That is why it is important for GSAM BV to be aware of these techniques and to test its own environment accordingly. The measures taken are inspired by the NIST cyber security framework of protect, detect, respond, recover and identify and are evaluated annually on the basis of the Cyber Security Risk Assessment.

<u>Unauthorized withdrawal of funds</u>, is prevented by having authorization limits and a four (or more) eyes principles, whereby modern techniques such as 2 factor authentication are required.

<u>Fraudulent invoices</u>, the payment of invoices at the expense of an investment fund is only permitted if this corresponds with the prospectus. The beneficiary as well as the correctness of the amounts charged are often verifiable, through a link with the assets. Invoices must be assessed and approved in advance by budget holders, in accordance with the procuration policy. Within this process, a separation of functions has been made between ordering, entering and approval.

<u>Insider trading risk</u>, involves misusing information for personal gain, or having orders executed in such a way that self-enrichment can be achieved at the expense of the fund. The measures taken to prevent this are diverse, including best execution review, mandatory periodic reporting on personal investment portfolios, education in the form of mandatory training and pre-employment screening.

<u>Bribery</u> involves having a tender being influenced by, for example, bribes, dinners, travel and gifts. To mitigate this, GSAM BV has a strict policy, whereby anything with a value of more than fifty euros may not be accepted. Furthermore, in the context of broker execution, price and quality assessments are carried out periodically, the outcome of which is indicative of the extent to which orders are allocated to these brokers.

The residual risk, following from the risks described above, are determined by GSAM BV as 'medium' and are accepted through a formal risk acceptance, or at the level of the foreign GSAM BV entities.

Furthermore, there is a clear legal and operational separation between the asset manager, the external administrator, the fund and the custodian. This segregation of duties has an important preventive effect on the risk of fraud and corruption.

The beforementioned control measures are part of a larger control framework, of which various parts are periodically assessed by an external auditor via the GSAM BV ISAE 3402 report. Furthermore, GSAM BV applies the 3-lines of defense mechanism, in which risk management and internal audit continuously test and monitor the effectiveness of the administrative organization and internal control. GSAM BV also applies various soft controls, such as tone at the top, e-learnings, code of ethics and a whistleblower policy.

Sustainability risks

Sustainability risks can represent their own risk or influence other risks and contribute to general risks, such as market risks, liquidity risks, credit risks or operational risks. Sustainability risks may have a negative impact on the Sub-fund's return.

The sustainability risks to which the Sub-fund may be exposed include, for example:

- Climate change
- Health & safety
- Business conduct

The assessment of sustainability risks, as defined in Article 2(22) of Regulation (EU) 2019/2088 (on sustainability disclosures in the financial services sector, which Regulation may be amended or supplemented from time to time), is integrated into the investment decision process by application of Sub-fund-specific criteria for responsible investing and, where applicable, integration of relevant environmental, social and governance (ESG) factors.

The Sub-fund primarily invests in liquid assets, which means that the mentioned sustainability risks are incorporated into the valuation of the investments.

Issuer default risk

In addition to general trends in the financial markets, specific developments related to the issuer can also impact the value of an investment. Even careful security selection, for example, cannot eliminate the risk of loss due to a decline in value of the issuer's assets. The use of credit derivatives, if mentioned in the investment policy of the Sub-fund, may entail credit risk.

2.16 Developments during the reporting period

2.16.1 General financial and economic developments in 2024

Economic Context

Recession fears continued to moderate at the start of 2024, as the US economy showed resilience despite significant rate hikes in 2022 and 1H 2023. A tight labor market, positive real wage growth, and strong equity markets supported consumer cash flows and balance sheets in the first quarter of 2024, leading to strong consumption. While US inflation prints were higher than expected in January and February, the US Federal Open Market Committee (FOMC) signaled confidence in March that disinflation would restart and recent elevated releases would prove temporary. In 2Q 2024, continued signs of improvement in global manufacturing indicators, strong earnings growth, and expectations of policy easing by major central banks supported positive momentum in risk assets. The disinflationary process also restarted, following higher than expected prints in 1Q 2024. US Core PCE (Personal Consumption Expenditures Price Index, Excluding Food and Energy) averaged 0.17% in April and May versus average reading of 0.37% in 1Q 2024.

While a slowdown in private consumption was notable in 2Q 2024, some moderation was arguably welcomed to achieve the US Federal Reserve's 2% inflation target. Any further moderation in consumption, however, could be a concern for policymakers and market participants, and renew fears of a recession. The rebalancing of the US labor market is somewhat similar. After strong data at the start of the year, the number of non-farm jobs added in April moderated to 175k versus an average of 235k in 1Q 2024. This was the lowest print in six months, and slower job growth helped allay fears that the economy was overheating, boosting expectations that interest rate cuts would still occur this year. The job openings rate for May rose to 4.9% from 4.8% in April. At its post pandemic peak, the job openings rate was at 7.4%. Like the consumption slowdown, further moderation in the US jobs opening rate could be reaching an inflection point where further rebalancing may not be encouraging news.

Outside of the US, growth momentum continued to improve albeit from weak levels, especially in Europe. Euro area 1Q 2024 GDP came in at 1.3% q/q annualized following 0.25% q/q annualized in 4Q 2023. Similarly, the UK economy expanded at a pace of 2.9% q/q annualized in 1Q 2024 after contracting at -0.9% annualized pace in 2H 2023. Chinese 1Q GDP surprised to the upside, with a reading of 5.3% y/y versus consensus expectation of 4.8% y/y.

Monetary Policy

The Federal Reserve tilted hawkish at the start of 2024 as inflation surprised to the upside and the strong economy gave US policymakers the option to be patient with the onset of the easing cycle. In May, the risk of renewed rate hikes was reduced due to moderation in US core services inflation and a downward revision of 1Q GDP, which came in at 1.2% q/q annualized versus 1.6% initially reported. In June, the Fed revised its median dot plot projection, which now suggests one 25bps rate cut this year, reduced from three projected in March. There's still a possibility that the Fed may implement two rate cuts in the second half of 2024. Fed Chair Jerome Powell noted during the June press conference that cuts totaling 25bps vs 50bps in 2024 was a close call for many participants.

The FOMC's dual mandate of inflation and labor market looks more two-sided now compared with a year ago when it was squarely focused on inflation. Going forward, the FOMC aims to stabilize the unemployment rate around the current level of 4% and bring inflation down to 2%. Therefore, the timing and magnitude of further policy rate calibration becomes crucial. Easing too soon could reignite inflationary pressures; waiting too long could break the labor market. The potential uncertainty from the upcoming US presidential election further complicates the overall economic outlook.

Elsewhere, the Swiss National Bank surprised markets in March and cut policy rates by 25bps, becoming the first G10 central bank to start its easing cycle. The European Central Bank and the Bank of Canada started their respective easing cycles in June, both cutting by 25bps. In terms of forward guidance, both central banks have suggested that further rate cuts are likely if the data evolves in line with expectations. In the UK, Bank of England leaned dovish, but did not ease policy in June. It noted that the decision to leave rates unchanged was finely balanced and recent strength in services inflation were largely driven by volatile components. The market interpretation was that the bank may be ready to begin easing in August.

On the geopolitical front, markets encountered increased uncertainty in Europe as French President Emmanuel Macron dissolved parliament and called snap parliamentary elections, scheduled for June 30 and July 7, after his party's defeat in the EU parliamentary elections. As a result, the market priced in a higher geopolitical risk premium in European assets leading to underperformance of European assets versus peers. In Asia, the Bank of Japan (BoJ) decided to end its negative interest rate policy at its March meeting.

Bond Markets

Bond yields went higher at the start of 2024 as recession fears continued to ease and the US inflation surprised to the upside. The US 10y yield went up by 35bps to 4.2% in 1Q 2024, following a decline of 70bps in 4Q 2023. Yields were modestly higher in 2Q 2024, with the 10y yield up by 15bps. However, the increase largely happened in April after strong labor market and inflation data leading to the 10y yield moving from 4.2% to 4.7%. Subsequently, as inflation and activity data moderated, the 10y yield declined 35bps in May and June.

In Germany and the UK, 10y yields were up 25bps each in 2Q 2024. Strong 1Q GDP releases along with somewhat stickier inflation and wage data in Europe led to higher yields. In France, the 10y yield was 55bps in 2Q as the market priced in a higher term premium given increased political uncertainty. As a result, the French-German 10y spread widened from 50bps to 80bps by the end of the quarter, the highest level since the European debt crisis in 2011-12. At the short end, the US 2y yield went up by 10bps, leaving the 2s10s curve inverted around -40bps. In Asia, May marked the first time since 2012 that the 10y Japanese government bond yield had been above 1%, a major milestone with the markets pricing in a more hawkish stance from the BoJ over the rest of the year.

Commodities generally delivered strong returns in 1H 2024 with oil (WTI) and copper up by 15% and 13%, respectively. Gold and silver rallied by 13% and 22%. Within currencies, the USD continued its strong performance and was up 2.6% in 2Q, following a gain 1.8% in 1Q. Moderating but still healthy growth, high carry, and political uncertainty in France and Mexico helped USD rally on a trade-weighted basis. JPY was one of the worst performing major currencies, down 6% versus the USD. Negative carry on JPY versus most currencies and a positive environment for pro-risk assets weighed on JPY. GBP was flat whereas EUR was down 0.8% versus the USD. A few notable outliers were AUD, which rallied 2.2% versus the USD, benefitting from relatively hawkish central bank policy given elevated inflation, risk on backdrop, and higher metal prices. MXN, on the others hand, was down 9% versus the USD. A landslide victory of the incumbent party in the Mexican presidential election in May sparked fears of higher fiscal spending with fewer checks and balances coupled with a tail risk of the new government's interference in monetary policy. Since then, attempts by newly elected President Claudia Sheinbaum to calm markets have led to some stabilization in MXN.

3.5.8 Collateral

To mitigate counterparty risk for the Sub-fund, a collateral arrangement with the counterparty can be established for certain assets. The Sub-fund must determine the value of the received collateral on a daily basis and verify if additional collateral needs to be exchanged.

The collateral is typically provided in the form of:

- Cash and cash equivalents, usually referred to as cash collateral;
- Bonds issued or guaranteed by highly rated countries;
- Bonds issued or guaranteed by prominent issuers and for which there is a sufficiently liquid market. Bonds issued by financial sector issuers are excluded due to correlation risk; or
- Shares admitted to or traded on a regulated market, provided that these shares are included in a major index.

The Sub-fund must ensure that it is able to enforce its rights to the collateral if an event occurs that requires its exercise. Therefore, the collateral must be available at all times, either directly or through the mediation of a prominent financial institution or a wholly-owned subsidiary of that institution, so that the Sub-fund can immediately seize or liquidate the collateralized assets if the counterparty fails to meet its obligations.

The Sub-fund will ensure that the collateral received from transactions in OTC derivatives, securities lending, and repo transactions meets the following conditions:

- The collateralized assets received are valued at market prices. To mitigate the risk of the collateral's value held by a Sub-fund being lower than the claim on the counterparty, a conservative markdown policy is applied. This collateral haircut is applied to collateral received in relation to (i) OTC derivatives, (ii) securities lending, and (iii) repo transactions. A markdown is a reduction applied to the value of collateralized assets and aims to absorb the volatility in the value of the collateral between two margin calls or during the required time to liquidate the collateral. This process includes a liquidity element in terms of remaining maturity and a credit quality element in terms of the rating of the security. The markdown policy takes into account the characteristics of the asset class involved, including the creditworthiness of the collateral issuer, the volatility of collateral prices, and potential currency mismatches. Markdowns applied to cash, high-quality government bonds, and corporate bonds typically range between 0% to 15%, and markdowns on equities range from 10% to 15%. Regulation also requires an additional 8% markdown to be applied when the currency unit of the collateral, if the collateral is a bond, differs from the permitted currency units in the legal documentation for bilateral derivative transactions. In exceptional market conditions, a different markdown level may be applied. Under the agreement with the respective counterparty, which may or may not involve minimum booking amounts, it is intended that, for the purpose of the collateral haircut and if applicable, each received collateral is valued at an amount equal to or higher than the respective exposure of the counterparty;
- The received collateral for OTC derivatives, securities lending, and repo transactions must be sufficiently liquid so that they can be quickly sold at a price that deviates little from the pre-sale valuation;
- The collateralized assets are held by the Sub-fund's custodian or by a sub-custodian provided that the Sub-fund's custodian has transferred the custody of the collateral to such sub-custodian and that the custodian remains liable for the collateral if the sub-custodian loses it;
- Collateral received in the context of transactions in OTC derivatives, securities lending, and repo
 transactions cannot be sold or provided as security to a third party during the term of the agreement.
 However, received cash collateral can be reinvested.

3.5.9 Investments by marketability

4. OTHER INFORMATION

4.1 Statutory provisions regarding appropriation of results

According to Article 23 of the Articles of Association of Goldman Sachs Paraplufonds 3 N.V. the Executive Board decides for each type of shares what part of the balance will be allocated to the additional reserve maintained for the relevant type. After the aforementioned addition, a dividend, in so far as possible, is paid on the priority shares equal to six per cent (6%) of the nominal value of these shares. There is no further distribution of profit on the priority shares. The remainder is distributed to the holders of ordinary shares of the relevant type, unless the general meeting decides otherwise.

If the aforementioned balance of income and expenses is negative, the amount is deducted from the additional reserve that is maintained for the relevant type of shares.

4.2 Management interest

At 30 June 2024 and 1 January 2024, the Board members had no personal interest in (an investment of) the Subfund.

2.5 Notes to the key figures

2.5.1 Reporting period

The key figures for 2024 relate to the positions at 30 June and the period from 1 January through 30 June. The key figures for the other years relate to the positions at 31 December and the period from 1 January through 31 December, unless stated otherwise.

2.5.2 Net asset value per share

The net asset value of each Share Class of the Sub-fund will be determined by the manager. The manager calculates the net asset value per Share Class each business day. The net asset value per share of each Share Class is determined by dividing the net asset value of a Share Class by the number of outstanding shares of that Share Class at the calculation date.

2.5.3 Transaction price

The transaction price of each Share Class of the Sub-fund is determined by the manager on each business day and is based on the net asset value per share of each Share Class with an upcharge (subscription fee) or discount (redemption fee) to cover the costs of purchase and sale of 'physical' investments. The subscription and redemption fee is for the protection of existing shareholders of the Sub-fund and is beneficial to the Sub-fund. When no transaction has taken place on a business day, the transaction price is equal to the net asset value per share.

2.5.4 Net performance

The net performance of each Share Class of the Sub-fund is based on the net asset value per share, taking into account any dividend distributions. The relative performance is the difference between the net performance of each Share Class of the Sub-fund and the performance of the index.

2.6 General information

Geldmarkt Fonds (NL) ('the Sub-fund') is part of Goldman Sachs Paraplufonds 3 N.V. (refer to paragraph 2.12 Structure for more information). The semi-annual report of Goldman Sachs Paraplufonds 3 N.V. (hereinafter referred to as the 'Fund') is available on the website of the manager.

The Sub-fund does not have any employees. Goldman Sachs Asset Management B.V. ('GSAM BV'), located in The Hague, is the manager of the Sub-fund and is licensed by the Dutch Authority for the Financial Markets ('Stichting Autoriteit Financiële Markten', also referred to as 'AFM') under the Dutch Financial Supervision Act ('Wet op het financieel toezicht', also referred to as 'Wft'). The Executive Board of the Fund is formed by GSAM BV. All shares in GSAM BV are held by Goldman Sachs Asset Management International Holdings B.V. Both entities are part of The Goldman Sachs Group, Inc. (hereinafter referred to as 'Goldman Sachs').

Goldman Sachs is listed on the New York Stock Exchange and qualifies as a bank holding company under US law. Goldman Sachs is a globally operating financial institution which – by means of a substantial variety of leading companies and subsidiaries – offers (integrated) financial services to private individuals, companies and institutions.

The AFM and the central bank of the Netherlands ('De Nederlandsche Bank N.V.', also referred to as 'DNB') act as supervisors. The AFM is charged with conduct supervision on the grounds of the Wft. Prudential supervision is performed by DNB.

2.7 Objective

The Fund aims to achieve a better overall long-term return than the index through active management.

2.8 Investment policy

The Sub-fund may invest in all types of money market instruments including commercial paper, deposits, treasury bills, deposit certificates, and bonds. All investments are denominated in euros. The manager applies its own internal credit quality assessment procedure to evaluate the credit quality of a money market instrument. If the internal credit quality assessment procedure results in an investment grade rating of Baa3 or higher, the issuer is considered to have received a favorable assessment. Additionally, the Sub-fund only invests in senior issues of issuers that have received at least an investment grade rating from one or more rating agencies such as Moody's, Standard and Poor's, and/or Fitch.

The Sub-fund promotes environmental and/or social characteristics as described in Article 8 of Regulation (EU) 2019/2088 (on sustainability-related disclosures in the financial services sector, which regulation may be amended or supplemented from time to time).

The Sub-fund applies Stewardship as well as an ESG integration approach and exclusion criteria related to various activities. Additional information can be found in the prospectus.

The Sub-fund considers the principal adverse impacts (PAIs) on sustainability factors primarily through Stewardship. Information on the principal adverse impacts on sustainability factors can be found in the prospectus.

In addition to the above, the following applies to the investment policy of the Fund:

- the global exposure of this Sub-fund is determined using the commitment method.
- contrary to what is stated in the prospectus, no disclosure regarding the leverage used by this Sub-fund will be provided in the annual report.
- transactions with related parties will be conducted on market terms.
- the Sub-fund invests globally in financial instruments in accordance with the investment policy, using counterparties approved by the manager.
- the Sub-fund will not invest more than ten percent of its managed assets in units or shares of other investment funds.

2.9 Dividend policy

The Sub-fund does not distribute dividends.

2.10 Index

Euribor 1-month - 12.5 bps.

2.11 Outsourcing

Outsourcing of fund accounting

The manager of the Fund has outsourced the accounting function to The Bank of New York Mellon SA/NV. This outsourcing relates to, among others, the calculation of the net asset value, maintaining accounting records and processing of and executing payments. The manager remains ultimately responsible for the quality and continuity of these services.

Outsourcing of financial reporting

The manager of the Fund, has outsourced the preparation of multiple financial reports, including the (semi-)annual reports of the Dutch GSAM BV funds, to DM Financial Netherlands B.V. The manager remains ultimately responsible for the quality and continuity of all financial reports.

Outsourcing of management activities

The manager has outsourced on reporting date all or part of its management activities for the Sub-fund to an affiliated external asset manager which, as such, is part of Goldman Sachs as a group. This concerns Goldman Sachs Asset Management International (GSAMI), established in the United Kingdom.

The affiliated external asset manager is responsible for taking investment decisions within the framework of the investment policy as determined by the manager and as described in the prospectus of the Sub-fund, collecting and conducting research on the basis of which these decisions can be taken and giving instructions for the purchase and sale of financial instruments as well as the settlement of such transactions, when the occasion arises.

2.12 Structure

The Fund is an open-end investment company with variable capital as described in Article 76a of Book 2 of the Dutch Civil Code. Except in special circumstances, the Fund may in principle issue or redeem shares on any business day.

The Fund is an undertaking for collective investment in transferable securities ('UCITS') within the meaning of the Dutch Financial Supervision Act ('Wet op het financial toezicht', also referred to as 'Wft'). GSAM BV acts as manager of the Fund as defined in Section 1:1 of the Wft and in that capacity holds a license as defined in Section 2:69b(1), preamble and part (a) of the Wft from the AFM.

The Fund has an umbrella structure, which means that the ordinary shares are divided into various series of shares, with each series of shares corresponding to a separate Sub-fund. Goldman Sachs Paraplufonds 3 N.V. is the legal owner of the assets held by the individual Sub-funds.

A Sub-fund is a segregated part of the capital of the Fund for which a separate investment policy is pursued. The Wft states that all standards directed in whole or in part towards the Fund are also applicable to the Sub-funds. The part of the assets of the Sub-fund to be paid into, or allocated to, each Fund is invested separately in accordance with a specific investment policy. Both gains and losses in the investment portfolio of a Sub-fund are credited or charged to the relevant Sub-fund.

The capital of a Sub-fund is segregated and subject to a statutory priority arrangement. Consequently, the assets of a Sub-fund may only be used to pay liabilities connected to the management and safe-keeping of the Sub-fund and the shares in that Sub-fund.

A Sub-fund is divided into one or more Share Classes. The Share Classes within the Sub-fund may differ in terms of cost and fee structure, the minimum amount of initial investment, demands on the quality of the investors, the currency in which the net asset value is expressed, etc.

Fees

Management fee

An annual management fee is charged to the Share Class, which is calculated pro-rata on a daily basis by using the total net asset value of the Share Class at the end of every day.

Other costs

Other costs may be charged to the Share Class. These costs, if applicable, are further explained in the notes to the respective Share Class as included in the financial statements.

Subscription and redemption fee

This concerns the fee charged to shareholders upon the purchase or sale of shares in the Sub-fund. The fee is calculated as a percentage markup or markdown on the net asset value per share, serves to protect the existing shareholders of the Sub-fund and is beneficial to the Sub-fund.

The actual percentage of the subscription and redemption fee can fluctuate and is published on the manager's website. This percentage may be changed without prior notice if the manager deems it necessary to protect the existing shareholders of the Sub-fund.

Maximum subscription and redemption fee

For transparency reasons, the manager has set a maximum percentage of the net asset value of the shares for the subscription and redemption fee. In exceptional market conditions, at the discretion of the manager, the manager may, in the interest of the existing investors of the Sub-fund, apply a higher percentage than the maximum percentage applicable to the Sub-fund at that time. In addition, the manager may, in the interest of the existing shareholders, apply a higher percentage than the maximum percentage applicable to the Sub-fund at that time in the event of exceptionally large orders to buy and sell shares in the Sub-fund, to compensate for the related additional transaction costs.

2.13 Tax aspects

The Sub-fund is part of Goldman Sachs Paraplufonds 3 N.V., which has the status of a tax-exempt investment institution (VBI) as referred to in Article 6a of the Corporate Income Tax Act 1969. As a tax-exempt investment institution within the meaning of Article 6a of the Corporate Income Tax Act 1969, the Fund will be exempt from corporate income tax on the investment income it receives if certain conditions (open-end character, collective investment, investment in financial instruments with risk diversification) are met.

Dividends distributed on foreign investments will often be subject to withholding tax in the respective country. Interest payments may also be subject to foreign withholding tax. Foreign and Dutch withholding tax withheld on behalf of the Fund generally cannot be reclaimed or offset. As a tax-exempt investment institution, the Fund cannot generally benefit from Dutch double taxation treaties.

The Fund is exempt from withholding tax on all its distributions.

2.14 Transfer Agent

Shares of Share Classes U, G, D and Z can be bought and sold through the mediation of The Bank of New York Mellon SA/NV in Brussels, Belgium. The costs associated with the safe-keeping of shares of investors by The Bank of New York Mellon SA/NV in Brussels, Belgium are charged by the manager to the relevant Share Classes. The Transfer Agent, i.e. The Bank of New York Mellon SA/NV, is responsible for the evaluation and the acceptance of the buy and sell orders concerning shares of the relevant Share Classes as entered in the order book, subject to the conditions stated in the prospectus.

The Transfer Agent will only accept orders which have been entered on the basis of a settlement deadline which is in line with generally accepted market practice. After closure of the order book, the Transfer Agent will forward the balance of all buy and sell orders to the Fund. The transaction price at which these buy and sell orders are executed on the following business day is to be published by the manager.

2.15 Depositary of Goldman Sachs Paraplufonds 3 N.V.

The assets of the Fund are in the safe-keeping of The Bank of New York Mellon SA/NV, Amsterdam branch, as the depositary of the Fund (the 'depositary').

The shareholders' equity of the depositary amounts to at least EUR 730,000.

The manager and depositary of the Fund have entered into a written agreement relating to management and depositary services. The main elements of this agreement are the following:

- The depositary ensures that the cash flows of the Fund are properly controlled and in particular that all payments by or on behalf of investors during the subscription for shares have been received and that all cash of the Fund has been recorded in cash accounts in the name of the Fund or in the name of the depositary acting on behalf of the Fund, opened with (in principle) an entity as described in Article 18(1)(a), (b) and (c) of European Directive 2006/73/EC (a credit institution or a bank authorized in a third country).
- The assets of the Fund consisting of financial instruments are entrusted to the depositary. The depositary holds in safe-keeping all financial instruments that can be registered on a financial instruments account in the books of the depositary, on separate accounts in the name of the Fund. In addition, the depositary holds in safe-keeping all financial instruments that can be physically delivered to the depositary.
- For the other assets of the Fund, the depositary determines whether the Fund is the owner of these assets based on information or documents provided by the manager or based on other external evidence. The depositary keeps a register for these other assets.
- The depositary ensures that the sale, issue, repurchase, redemption and cancellation of shares in the Fund take place in accordance with Dutch law, the Articles of Association of the Fund and the relevant procedures.
- The depositary ensures that the value of the shares in the Fund is calculated in accordance with Dutch law, the Articles of Association of the Fund and the relevant procedures.
- The depositary carries out the instructions of the manager, unless they conflict with Dutch law or the Articles of Association of the Fund.
- The depositary ensures that the equivalent value of the transactions involving the assets of the Fund is transferred to the Fund by the usual deadlines.
- The depositary ensures that the income of the Fund is allocated in accordance with Dutch law and the Articles of Association of the Fund.

In the context of depositary services, the depositary acts in the interests of the Fund as well as the investors in the Fund.

2.16 Principal risks and uncertainties

Investing in the Sub-fund entails financial opportunities as well as financial risks. The value of investments can both rise and fall, and shareholders of the Sub-fund may receive less than they invested. Diversification of investments is expected to have a mitigating effect on these risks.

A comprehensive overview of the risks, categorized as 'high, medium, and low' risks, associated with the Sub-fund is provided in the prospectus. In the event of new regulations regarding risk management, additional information will be included. The main risks faced by the Sub-fund are:

Market risk

The Sub-fund is sensitive to changes in the value of investments due to fluctuations in prices in financial markets such as equities or fixed-income markets (market risk). Additionally, prices of individual instruments in which the Sub-fund invests may also fluctuate. If the Sub-fund utilizes derivatives as described under "Investment Policy," these may be employed for both hedging risks and efficient portfolio management. This may involve leveraging, thereby increasing the Sub-fund's sensitivity to market movements.

To mitigate market risks, investments are diversified across various countries, sectors, and/or companies. An overview of the portfolio composition as of each balance sheet date is provided in the Composition of Investments.

Interest rate risk

When investing in fixed-income securities, interest rate risk is incurred. This risk occurs when the interest rate of a security fluctuates. When interest rates decrease, the general expectation is that the value of fixed-income securities increases. Conversely, when interest rates rise, the general expectation is that the value of fixed-income securities decreases.

Currency risk

If investments can be made in securities denominated in currencies other than the currency in which the Sub-fund is denominated, currency fluctuations can have both positive and negative effects on the investment result.

Liquidity risk

Liquidity risks may arise when a particular underlying investment is difficult to sell. Since the Sub-fund may invest in illiquid securities, there is a risk that the Sub-fund may not have the ability to release financial resources that may be needed to meet certain obligations.

During the reporting period, there were no issues regarding liquidity. The available cash of the Sub-fund was sufficient to manage the inflow and outflow of capital during the reporting period. It is expected that this will also be the case in the upcoming reporting period.

Credit risk

Investors should be fully aware that every investment carries credit risks. Bonds and debt instruments entail actual credit risk on the issuer. This risk can be measured based on the issuer's credit rating. Bonds and debt instruments issued by lower-rated issuers typically carry higher credit risk and a greater chance of default than those issued by higher-rated issuers. If the issuer of bonds or debt instruments encounters financial or economic difficulties, leading to an increase in credit risk and likely downgrade of the rating, it can affect the value of the bonds or debt instruments (which may lose their value entirely).

Fraud risks and corruption

Fraud is any intentional act or omission to mislead others, causing loss to the victim and/or profit to the perpetrator. Corruption is the misuse of entrusted power for personal gain, including bribery. The lack of controls in the payment process increases the likelihood and therefore creates the opportunity for fraud.

The asset management industry is characterized by the management of third party assets, which is quite extensive in its entirety. Having access to these assets increases GSAM BV's inherent fraud and corruption risk profile. To manage this risk, GSAM BV conducts an annual fraud and corruption risk assessment to determine the identification, exposure to and management of these risks. GSAM BV concludes in its annual risk assessment that there are no high residual risks in the context of fraud and corruption. The main inherent risks identified by GSAM BV in the annual risk assessment are the following:

- Cyber risks;
- Unauthorized withdrawal of funds;
- Fraudulent invoices;
- Insider trading risk;
- Bribery.

The following measures have been taken to mitigate these inherent risks:

<u>Cyber risks</u>, cyber risk is recognized as a collective term which, knowingly (e.g. ransomware) or unknowingly (e.g. hack), can lead to a withdrawal of assets. The range of techniques that a malicious person can use is extensive. That is why it is important for GSAM BV to be aware of these techniques and to test its own environment accordingly. The measures taken are inspired by the NIST cyber security framework of protect, detect, respond, recover and identify and are evaluated annually on the basis of the Cyber Security Risk Assessment.

<u>Unauthorized withdrawal of funds</u>, is prevented by having authorization limits and a four (or more) eyes principles, whereby modern techniques such as 2 factor authentication are required.

<u>Fraudulent invoices</u>, the payment of invoices at the expense of an investment fund is only permitted if this corresponds with the prospectus. The beneficiary as well as the correctness of the amounts charged are often verifiable, through a link with the assets. Invoices must be assessed and approved in advance by budget holders, in accordance with the procuration policy. Within this process, a separation of functions has been made between ordering, entering and approval.

<u>Insider trading risk</u>, involves misusing information for personal gain, or having orders executed in such a way that self-enrichment can be achieved at the expense of the fund. The measures taken to prevent this are diverse, including best execution review, mandatory periodic reporting on personal investment portfolios, education in the form of mandatory training and pre-employment screening.

<u>Bribery</u> involves having a tender being influenced by, for example, bribes, dinners, travel and gifts. To mitigate this, GSAM BV has a strict policy, whereby anything with a value of more than fifty euros may not be accepted. Furthermore, in the context of broker execution, price and quality assessments are carried out periodically, the outcome of which is indicative of the extent to which orders are allocated to these brokers.

The residual risk, following from the risks described above, are determined by GSAM BV as 'medium' and are accepted through a formal risk acceptance, or at the level of the foreign GSAM BV entities.

Furthermore, there is a clear legal and operational separation between the asset manager, the external administrator, the fund and the custodian. This segregation of duties has an important preventive effect on the risk of fraud and corruption.

The beforementioned control measures are part of a larger control framework, of which various parts are periodically assessed by an external auditor via the GSAM BV ISAE 3402 report. Furthermore, GSAM BV applies the 3-lines of defense mechanism, in which risk management and internal audit continuously test and monitor the effectiveness of the administrative organization and internal control. GSAM BV also applies various soft controls, such as tone at the top, e-learnings, code of ethics and a whistleblower policy.

Sustainability risks

Sustainability risks can represent their own risk or influence other risks and contribute to general risks, such as market risks, liquidity risks, credit risks or operational risks. Sustainability risks may have a negative impact on the Sub-fund's return.

The sustainability risks to which the Sub-fund may be exposed include, for example:

- Climate change
- Health & safety
- Business conduct

The assessment of sustainability risks, as defined in Article 2(22) of Regulation (EU) 2019/2088 (on sustainability disclosures in the financial services sector, which Regulation may be amended or supplemented from time to time), is integrated into the investment decision process by application of Sub-fund-specific criteria for responsible investing and, where applicable, integration of relevant environmental, social and governance (ESG) factors.

The Sub-fund primarily invests in liquid assets, which means that the mentioned sustainability risks are incorporated into the valuation of the investments.

Issuer default risk

In addition to general trends in the financial markets, specific developments related to the issuer can also impact the value of an investment. Even careful security selection, for example, cannot eliminate the risk of loss due to a decline in value of the issuer's assets. The use of credit derivatives, if mentioned in the investment policy of the Fund, may entail credit risk.

2.17 Developments during the reporting period

2.17.1 General financial and economic developments in 2024

Economic Context

Recession fears continued to moderate at the start of 2024, as the US economy showed resilience despite significant rate hikes in 2022 and 1H 2023. A tight labor market, positive real wage growth, and strong equity markets supported consumer cash flows and balance sheets in the first quarter of 2024, leading to strong consumption. While US inflation prints were higher than expected in January and February, the US Federal Open Market Committee (FOMC) signaled confidence in March that disinflation would restart and recent elevated releases would prove temporary. In 2Q 2024, continued signs of improvement in global manufacturing indicators, strong earnings growth, and expectations of policy easing by major central banks supported positive momentum in risk assets. The disinflationary process also restarted, following higher than expected prints in 1Q 2024. US Core PCE (Personal Consumption Expenditures Price Index, Excluding Food and Energy) averaged 0.17% in April and May versus average reading of 0.37% in 1Q 2024.

While a slowdown in private consumption was notable in 2Q 2024, some moderation was arguably welcomed to achieve the US Federal Reserve's 2% inflation target. Any further moderation in consumption, however, could be a concern for policymakers and market participants, and renew fears of a recession. The rebalancing of the US labor market is somewhat similar. After strong data at the start of the year, the number of non-farm jobs added in April moderated to 175k versus an average of 235k in 1Q 2024. This was the lowest print in six months, and slower job growth helped allay fears that the economy was overheating, boosting expectations that interest rate cuts would still occur this year. The job openings rate for May rose to 4.9% from 4.8% in April. At its post pandemic peak, the job openings rate was at 7.4%. Like the consumption slowdown, further moderation in the US jobs opening rate could be reaching an inflection point where further rebalancing may not be encouraging news.

Outside of the US, growth momentum continued to improve albeit from weak levels, especially in Europe. Euro area 1Q 2024 GDP came in at 1.3% q/q annualized following 0.25% q/q annualized in 4Q 2023. Similarly, the UK economy expanded at a pace of 2.9% q/q annualized in 1Q 2024 after contracting at -0.9% annualized pace in 2H 2023. Chinese 1Q GDP surprised to the upside, with a reading of 5.3% y/y versus consensus expectation of 4.8% y/y.

Monetary Policy

The Federal Reserve tilted hawkish at the start of 2024 as inflation surprised to the upside and the strong economy gave US policymakers the option to be patient with the onset of the easing cycle. In May, the risk of renewed rate hikes was reduced due to moderation in US core services inflation and a downward revision of 1Q GDP, which came in at 1.2% q/q annualized versus 1.6% initially reported. In June, the Fed revised its median dot plot projection, which now suggests one 25bps rate cut this year, reduced from three projected in March. There's still a possibility that the Fed may implement two rate cuts in the second half of 2024. Fed Chair Jerome Powell noted during the June press conference that cuts totaling 25bps vs 50bps in 2024 was a close call for many participants.

The FOMC's dual mandate of inflation and labor market looks more two-sided now compared with a year ago when it was squarely focused on inflation. Going forward, the FOMC aims to stabilize the unemployment rate around the current level of 4% and bring inflation down to 2%. Therefore, the timing and magnitude of further policy rate calibration becomes crucial. Easing too soon could reignite inflationary pressures; waiting too long could break the labor market. The potential uncertainty from the upcoming US presidential election further complicates the overall economic outlook.

Elsewhere, the Swiss National Bank surprised markets in March and cut policy rates by 25bps, becoming the first G10 central bank to start its easing cycle. The European Central Bank and the Bank of Canada started their respective easing cycles in June, both cutting by 25bps. In terms of forward guidance, both central banks have suggested that further rate cuts are likely if the data evolves in line with expectations. In the UK, Bank of England leaned dovish, but did not ease policy in June. It noted that the decision to leave rates unchanged was finely balanced and recent strength in services inflation were largely driven by volatile components. The market interpretation was that the bank may be ready to begin easing in August.

On the geopolitical front, markets encountered increased uncertainty in Europe as French President Emmanuel Macron dissolved parliament and called snap parliamentary elections, scheduled for June 30 and July 7, after his party's defeat in the EU parliamentary elections. As a result, the market priced in a higher geopolitical risk premium in European assets leading to underperformance of European assets versus peers. In Asia, the Bank of Japan (BoJ) decided to end its negative interest rate policy at its March meeting.

Bond Markets

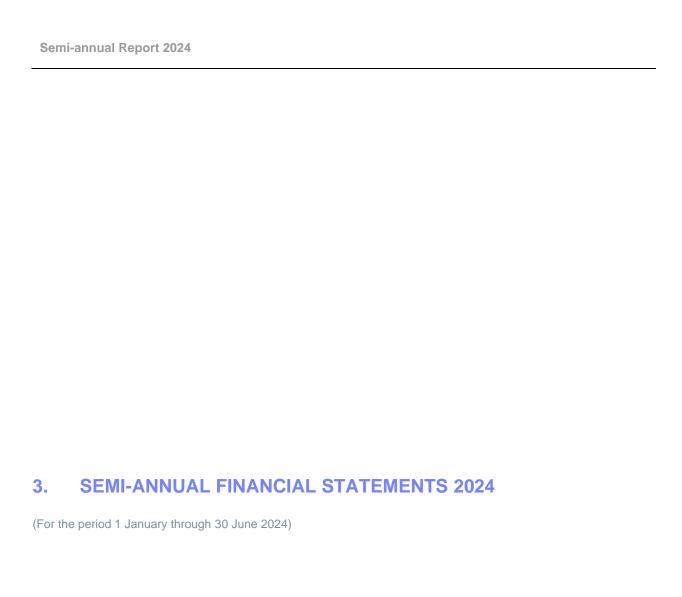

Bond yields went higher at the start of 2024 as recession fears continued to ease and the US inflation surprised to the upside. The US 10y yield went up by 35bps to 4.2% in 1Q 2024, following a decline of 70bps in 4Q 2023. Yields were modestly higher in 2Q 2024, with the 10y yield up by 15bps. However, the increase largely happened in April after strong labor market and inflation data leading to the 10y yield moving from 4.2% to 4.7%. Subsequently, as inflation and activity data moderated, the 10y yield declined 35bps in May and June.

In Germany and the UK, 10y yields were up 25bps each in 2Q 2024. Strong 1Q GDP releases along with somewhat stickier inflation and wage data in Europe led to higher yields. In France, the 10y yield was 55bps in 2Q as the market priced in a higher term premium given increased political uncertainty. As a result, the French-German 10y spread widened from 50bps to 80bps by the end of the quarter, the highest level since the European debt crisis in 2011-12. At the short end, the US 2y yield went up by 10bps, leaving the 2s10s curve inverted around -40bps. In Asia, May marked the first time since 2012 that the 10y Japanese government bond yield had been above 1%, a major milestone with the markets pricing in a more hawkish stance from the BoJ over the rest of the year.

Commodities generally delivered strong returns in 1H 2024 with oil (WTI) and copper up by 15% and 13%, respectively. Gold and silver rallied by 13% and 22%. Within currencies, the USD continued its strong performance and was up 2.6% in 2Q, following a gain 1.8% in 1Q. Moderating but still healthy growth, high carry, and political uncertainty in France and Mexico helped USD rally on a trade-weighted basis. JPY was one of the worst performing major currencies, down 6% versus the USD. Negative carry on JPY versus most currencies and a positive environment for pro-risk assets weighed on JPY. GBP was flat whereas EUR was down 0.8% versus the USD. A few notable outliers were AUD, which rallied 2.2% versus the USD, benefitting from relatively hawkish central bank policy given elevated inflation, risk on backdrop, and higher metal prices. MXN, on the others hand, was down 9% versus the USD. A landslide victory of the incumbent party in the Mexican presidential election in May sparked fears of higher fiscal spending with fewer checks and balances coupled with a tail risk of the new government's interference in monetary policy. Since then, attempts by newly elected President Claudia Sheinbaum to calm markets have led to some stabilization in MXN.

Goldman Sachs Asset Management B.V.

4. OTHER INFORMATION

4.1 Statutory provisions regarding appropriation of results

According to Article 23 of the Articles of Association of Goldman Sachs Paraplufonds 3 N.V. the Executive Board decides for each type of shares what part of the balance will be allocated to the additional reserve maintained for the relevant type. After the aforementioned addition, a dividend, in so far as possible, is paid on the priority shares equal to six per cent (6%) of the nominal value of these shares. There is no further distribution of profit on the priority shares. The remainder is distributed to the holders of ordinary shares of the relevant type, unless the general meeting decides otherwise.

If the aforementioned balance of income and expenses is negative, the amount is deducted from the additional reserve that is maintained for the relevant type of shares.

4.2 Management interest

At 30 June 2024 and 1 January 2024, the Board members had no personal interest in (an investment of) the Subfund.

2.2 Notes to the key figures

2.2.1 Reporting period

The key figures for 2024 relate to the positions at 30 June and the period from 1 January through 30 June. The key figures for the other years relate to the positions at 31 December and the period from 1 January through 31 December, unless stated otherwise.

Share Class U of the Sub-fund started on 27 September 2021. The key figures 2021 for this Share Class relate to the positions at 31 December 2021 and the period from 27 September 2021 through 31 December 2021.

2.2.2 Net asset value per share

The net asset value of each Share Class of the Sub-fund will be determined by the manager. The manager calculates the net asset value per Share Class each business day. The net asset value per share of each Share Class is determined by dividing the net asset value of a Share Class by the number of outstanding shares of that Share Class at the calculation date.

2.2.3 Transaction price

The transaction price of each Share Class of the Sub-fund is determined by the manager on each business day and is based on the net asset value per share of each Share Class with an upcharge (subscription fee) or discount (redemption fee) to cover the costs of purchase and sale of 'physical' investments. The subscription and redemption fee is for the protection of existing shareholders of the Sub-fund and is beneficial to the Sub-fund. When no transaction has taken place on a business day, the transaction price is equal to the net asset value per share.

2.2.4 Net performance

The net performance of each Share Class of the Sub-fund is based on the net asset value per share, taking into account any dividend distributions.

2.3 General information

Global High Yield Zero Duration Bond Fund (NL) ('the Sub-fund') is part of Goldman Sachs Paraplufonds 3 N.V. (refer to paragraph 2.9 Structure for more information). The semi-annual report of Goldman Sachs Paraplufonds 3 N.V. (hereinafter referred to as the 'Fund') is available on the website of the manager.

The Sub-fund does not have any employees. Goldman Sachs Asset Management B.V. ('GSAM BV'), located in The Hague, is the manager of the Sub-fund and is licensed by the Dutch Authority for the Financial Markets ('Stichting Autoriteit Financiële Markten', also referred to as 'AFM') under the Dutch Financial Supervision Act ('Wet op het financieel toezicht', also referred to as 'Wft'). The Executive Board of the Fund is formed by GSAM BV. All shares in GSAM BV are held by Goldman Sachs Asset Management International Holdings B.V. Both entities are part of The Goldman Sachs Group, Inc. (hereinafter referred to as 'Goldman Sachs').

Goldman Sachs is listed on the New York Stock Exchange and qualifies as a bank holding company under US law. Goldman Sachs is a globally operating financial institution which – by means of a substantial variety of leading companies and subsidiaries – offers (integrated) financial services to private individuals, companies and institutions.

The AFM and the central bank of the Netherlands ('De Nederlandsche Bank N.V.', also referred to as 'DNB') act as supervisors. The AFM is charged with conduct supervision on the grounds of the Wft. Prudential supervision is performed by DNB.

2.4 Objective

The Sub-fund aims to achieve a comparable return to the master UCITS, taking into account a duration target.

2.5 Investment policy

This Sub-fund is a feeder UCITS. This means that at least 85% of the assets under management of the Sub-fund are invested in a so-called master UCITS, where the actual investments in financial instruments take place. Consequently, the objective and investment policy of the Sub-fund are identical to the objective and investment policy of the master UCITS mentioned below.

The Sub-fund implements its investment policy by investing at least 85% of its assets in Goldman Sachs Global High Yield (Former NN), comprising a portfolio of corporate bonds and other fixed income securities with high expected yield from global high yield markets.

The Sub-fund aims to hedge its interest rate risk by maintaining an average duration of approximately 0 years. Duration is hedged through offsetting positions using financial instruments, including derivatives such as futures and swaps.

The duration overlay leads to a difference in duration between the Sub-fund and the master UCITS, which may result in performance differences.

The master UCITS is actively managed and its investments primarily consist of corporate bonds, interest-bearing and non-interest-bearing debt instruments (including private loans, structured and project financings, and (euro) medium term notes), and short-term debt instruments such as deposits, commercial paper, and similar instruments issued by financial institutions. These investments are issued or entered into by financial institutions, corporations, and other entities denominated in euro or other currencies of developed countries. A developed country is defined as a country whose government bonds, issued by the central government and denominated in the country's own currency, have a long-term credit rating of at least BBB- (Standard & Poor's) or Baa3 (Moody's).

The master UCITS promotes environmental and/or social characteristics, as described in Article 8 of Regulation (EU) 2019/2088 (on sustainability-related disclosures in the financial services sector, which may be amended from time to time).

The master UCITS applies Stewardship as well as an ESG integration approach and exclusion criteria related to various activities. Additional information can be found in the prospectus.

The master UCITS considers the Principal Adverse Impact (PAI) on sustainability factors primarily through Stewardship. Information on the main adverse impacts on sustainability factors can be found in the prospectus.

The master UCITS has the ability to hold investments both directly and indirectly – for example, by taking exposure to the relevant financial instruments through derivatives or investments in other investment funds – in accordance with its investment process, with deviation limits relative to the index. The composition of the master UCITS' investments may materially differ from that of the index. The index represents a broad representation of the investment universe. The master UCITS may invest in securities that are not part of the index.

Issuing entities offer the opportunity to obtain warrants in addition to high yield bonds. These warrants are inseparably linked to the bonds and are often valued together with the bonds. The warrants provide the right to acquire shares of the issuing entity at a predetermined price in the future. Additionally, the master UCITS may invest in convertible bonds. In order to potentially benefit from additional returns, the master UCITS has the option to invest in these warrants, convertible bonds, and the shares obtained through them. A position in shares will be sold as soon as possible, but in any case within a period of six months. The master UCITS may also invest in corporate bonds from emerging markets.

The master UCITS may use derivatives such as options, futures, warrants, swaps, and currency forward contracts. These may be used for risk hedging and efficient portfolio management. This may involve leverage, which can increase the sensitivity of the Sub-fund to market movements. When using derivatives, care is taken to ensure that the overall portfolio remains within the investment restrictions. The risk profile associated with the type of investor targeted by the Sub-fund does not change as a result of the use of these instruments.

In addition to the above, the following applies to the investment policy of the Fund:

- to the extent that the assets are not invested in the aforementioned financial instruments, there is the possibility to invest the assets in certain money market instruments (such as certificates of deposit and commercial paper), money market funds, or hold them in the form of cash equivalents;
- additional income may be generated through entering into repurchase agreements ("repos") and lending transactions (lending securities from the investment portfolio);
- subject to the provisions on leverage in the prospectus, the maximum expected level of gross leverage (sum of nominal values) of the Sub-fund is 300%, and the maximum expected level of net leverage (commitment method) is 25%:
- the global exposure of this Sub-fund is determined according to the Absolute Value-at-Risk method;
- the manager of Goldman Sachs Umbrella Fund 3 N.V. has the authority to enter into short-term loans as a borrower on behalf of the Sub-fund;
- transactions with related parties will take place on market terms;
- in line with the investment policy, the Sub-fund invests globally in financial instruments with counterparties approved by the manager.

2.6 Dividend policy

The Sub-fund does not distribute dividends.

2.7 Index

None.

2.8 Outsourcing

Outsourcing of fund accounting

The manager of the Fund has outsourced the accounting function to The Bank of New York Mellon SA/NV. This outsourcing relates to, among others, the calculation of the net asset value, maintaining accounting records and processing of and executing payments. The manager remains ultimately responsible for the quality and continuity of these services.

Outsourcing of financial reporting

The manager of the Fund, has outsourced the preparation of multiple financial reports, including the (semi-)annual reports of the Dutch GSAM BV funds, to DM Financial Netherlands B.V. The manager remains ultimately responsible for the quality and continuity of all financial reports.

2.9 Structure

The Fund is an open-end investment company with variable capital as described in Article 76a of Book 2 of the Dutch Civil Code. Except in special circumstances, the Fund may in principle issue or redeem shares on any business day.

The Fund is an undertaking for collective investment in transferable securities ('UCITS') within the meaning of the Dutch Financial Supervision Act ('Wet op het financial toezicht', also referred to as 'Wft'). GSAM BV acts as manager of the Fund as defined in Section 1:1 of the Wft and in that capacity holds a license as defined in Section 2:69b(1), preamble and part (a) of the Wft from the AFM.

The Fund has an umbrella structure, which means that the ordinary shares are divided into various series of shares, with each series of shares corresponding to a separate Sub-fund. Goldman Sachs Paraplufonds 3 N.V. is the legal owner of the assets held by the individual Sub-funds.

A Sub-fund is a segregated part of the capital of the Fund for which a separate investment policy is pursued. The Wft states that all standards directed in whole or in part towards the Fund are also applicable to the Sub-funds. The part of the assets of the Sub-fund to be paid into, or allocated to, each Fund is invested separately in accordance with a specific investment policy. Both gains and losses in the investment portfolio of a Sub-fund are credited or charged to the relevant Sub-fund.

The capital of a Sub-fund is segregated and subject to a statutory priority arrangement. Consequently, the assets of a Sub-fund may only be used to pay liabilities connected to the management and safe-keeping of the Sub-fund and the shares in that Sub-fund.

A Sub-fund is divided into one or more Share Classes. The Share Classes within the Sub-fund may differ in terms of cost and fee structure, the minimum amount of initial investment, demands on the quality of the investors, the currency in which the net asset value is expressed, etc.

Fees

All-in fee

Maximum redemption fee

An annual All-in fee is charged to the Share Class, which is calculated pro-rata on a daily basis by using the total net asset value of the Share Class at the end of every day.

Other costs

Other costs may be charged to the Share Class. These costs, if applicable, are further explained in the notes to the respective Share Class as included in the financial statements.

Subscription and redemption fee

This concerns the fee charged to shareholders upon the purchase or sale of shares in the Sub-fund. The fee is calculated as a percentage markup or markdown on the net asset value per share, serves to protect the existing shareholders of the Sub-fund and is beneficial to the Sub-fund.

The actual percentage of the subscription and redemption fee can fluctuate and is published on the manager's website. This percentage may be changed without prior notice if the manager deems it necessary to protect the existing shareholders of the Sub-fund.

Maximum subscription and redemption fee

For transparency reasons, the manager has set a maximum percentage of the net asset value of the shares for the subscription and redemption fee. In exceptional market conditions, at the discretion of the manager, the manager may, in the interest of the existing investors of the Sub-fund, apply a higher percentage than the maximum percentage applicable to the Sub-fund at that time. In addition, the manager may, in the interest of the existing shareholders, apply a higher percentage than the maximum percentage applicable to the Sub-fund at that time in the event of exceptionally large orders to buy and sell shares in the Sub-fund, to compensate for the related additional transaction costs.

0.10%

2.10 Tax aspects

The Sub-fund is part of Goldman Sachs Paraplufonds 3 N.V., which has the status of a tax-exempt investment institution (VBI) as referred to in Article 6a of the Corporate Income Tax Act 1969. As a tax-exempt investment institution within the meaning of Article 6a of the Corporate Income Tax Act 1969, the Fund will be exempt from corporate income tax on the investment income it receives if certain conditions (open-end character, collective investment, investment in financial instruments with risk diversification) are met.

Dividends distributed on foreign investments will often be subject to withholding tax in the respective country. Interest payments may also be subject to foreign withholding tax. Foreign and Dutch withholding tax withheld on behalf of the Fund generally cannot be reclaimed or offset. As a tax-exempt investment institution, the Fund cannot generally benefit from Dutch double taxation treaties.

The Fund is exempt from withholding tax on all its distributions.

2.11 Transfer Agent

Shares of Share Class U can be bought and sold through the mediation of The Bank of New York Mellon SA/NV in Brussels, Belgium. The costs associated with the safe-keeping of shares of investors by The Bank of New York Mellon SA/NV in Brussels, Belgium are charged by the manager to the relevant Share Classes. The Transfer Agent, i.e. The Bank of New York Mellon

SA/NV, is responsible for the evaluation and the acceptance of the buy and sell orders concerning shares of the relevant Share Classes as entered in the order book, subject to the conditions stated in the prospectus.

The Transfer Agent will only accept orders which have been entered on the basis of a settlement deadline which is in line with generally accepted market practice. After closure of the order book, the Transfer Agent will forward the balance of all buy and sell orders to the Fund. The transaction price at which these buy and sell orders are executed on the following business day is to be published by the manager.

2.12 Depositary of Goldman Sachs Paraplufonds 3 N.V.

The assets of the Fund are in the safe-keeping of The Bank of New York Mellon SA/NV, Amsterdam branch, as the depositary of the Fund (the 'depositary').

The shareholders' equity of the depositary amounts to at least EUR 730,000.

The manager and depositary of the Fund have entered into a written agreement relating to management and depositary services. The main elements of this agreement are the following:

- The depositary ensures that the cash flows of the Fund are properly controlled and in particular that all payments by or on behalf of investors during the subscription for shares have been received and that all cash of the Fund has been recorded in cash accounts in the name of the Fund or in the name of the depositary acting on behalf of the Fund, opened with (in principle) an entity as described in Article 18(1)(a), (b) and (c) of European Directive 2006/73/EC (a credit institution or a bank authorized in a third country).
- The assets of the Fund consisting of financial instruments are entrusted to the depositary. The depositary holds in safe-keeping all financial instruments that can be registered on a financial instruments account in the books of the depositary, on separate accounts in the name of the Fund. In addition, the depositary holds in safe-keeping all financial instruments that can be physically delivered to the depositary.
- For the other assets of the Fund, the depositary determines whether the Fund is the owner of these assets based on information or documents provided by the manager or based on other external evidence. The depositary keeps a register for these other assets.
- The depositary ensures that the sale, issue, repurchase, redemption and cancellation of shares in the Fund take place in accordance with Dutch law, the Articles of Association of the Fund and the relevant procedures.
- The depositary ensures that the value of the shares in the Fund is calculated in accordance with Dutch law, the Articles of Association of the Fund and the relevant procedures.
- The depositary carries out the instructions of the manager, unless they conflict with Dutch law or the Articles of Association of the Fund.
- The depositary ensures that the equivalent value of the transactions involving the assets of the Fund is transferred to the Fund by the usual deadlines.
- The depositary ensures that the income of the Fund is allocated in accordance with Dutch law and the Articles of Association of the Fund.

In the context of depositary services, the depositary acts in the interests of the Fund as well as the investors in the Fund.

2.13 Principal risks and uncertainties

Investing in the Sub-fund entails financial opportunities as well as financial risks. The value of investments can both rise and fall, and shareholders of the Sub-fund may receive less than they invested. Diversification of investments is expected to have a mitigating effect on these risks.

A comprehensive overview of the risks, categorized as 'high, medium, and low' risks, associated with the Sub-fund is provided in the prospectus. In the event of new regulations regarding risk management, additional information will be included. The main risks faced by the Sub-fund are:

Market risk

The Sub-fund is sensitive to changes in the value of investments due to fluctuations in prices in financial markets such as equities or fixed-income markets (market risk). Additionally, prices of individual instruments in which the Sub-fund invests may also fluctuate. If the Sub-fund utilizes derivatives as described under "Investment Policy," these may be employed for both hedging risks and efficient portfolio management. This may involve leveraging, thereby increasing the Sub-fund's sensitivity to market movements.

To mitigate market risks, investments are diversified across various countries, sectors, and/or companies.

Interest rate risk

When investing in fixed-income securities, interest rate risk is incurred. This risk occurs when the interest rate of a security fluctuates. When interest rates decrease, the general expectation is that the value of fixed-income securities increases. Conversely, when interest rates rise, the general expectation is that the value of fixed-income securities decreases.

Currency risk

If investments can be made in securities denominated in currencies other than the currency in which the Sub-fund is denominated, currency fluctuations can have both positive and negative effects on the investment result.

Liquidity risk

Liquidity risks may arise when a particular underlying investment is difficult to sell. Since the Sub-fund may invest in illiquid securities, there is a risk that the Sub-fund may not have the ability to release financial resources that may be needed to meet certain obligations.

During the reporting period, there were no issues regarding liquidity. The available cash of the Sub-fund was sufficient to manage the inflow and outflow of capital during the reporting period. It is expected that this will also be the case in the upcoming reporting period.

Credit risk

Investors should be fully aware that every investment carries credit risks. Bonds and debt instruments entail actual credit risk on the issuer. This risk can be measured based on the issuer's credit rating. Bonds and debt instruments issued by lower-rated issuers typically carry higher credit risk and a greater chance of default than those issued by higher-rated issuers. If the issuer of bonds or debt instruments encounters financial or economic difficulties, leading to an increase in credit risk and likely downgrade of the rating, it can affect the value of the bonds or debt instruments (which may lose their value entirely).

Fraud risks and corruption

Fraud is any intentional act or omission to mislead others, causing loss to the victim and/or profit to the perpetrator. Corruption is the misuse of entrusted power for personal gain, including bribery. The lack of controls in the payment process increases the likelihood and therefore creates the opportunity for fraud.

The asset management industry is characterized by the management of third party assets, which is quite extensive in its entirety. Having access to these assets increases GSAM BV's inherent fraud and corruption risk profile. To manage this risk, GSAM BV conducts an annual fraud and corruption risk assessment to determine the identification, exposure to and management of these risks. GSAM BV concludes in its annual risk assessment that there are no high residual risks in the context of fraud and corruption. The main inherent risks identified by GSAM BV in the annual risk assessment are the following:

- · Cyber risks;
- Unauthorized withdrawal of funds;
- Fraudulent invoices:
- Insider trading risk;
- Bribery.

The following measures have been taken to mitigate these inherent risks:

<u>Cyber risks</u>, cyber risk is recognized as a collective term which, knowingly (e.g. ransomware) or unknowingly (e.g. hack), can lead to a withdrawal of assets. The range of techniques that a malicious person can use is extensive. That is why it is important for GSAM BV to be aware of these techniques and to test its own environment accordingly. The measures taken are inspired by the NIST cyber security framework of protect, detect, respond, recover and identify and are evaluated annually on the basis of the Cyber Security Risk Assessment.

<u>Unauthorized withdrawal of funds</u>, is prevented by having authorization limits and a four (or more) eyes principles, whereby modern techniques such as 2 factor authentication are required.

<u>Fraudulent invoices</u>, the payment of invoices at the expense of an investment fund is only permitted if this corresponds with the prospectus. The beneficiary as well as the correctness of the amounts charged are often verifiable, through a link with the assets. Invoices must be assessed and approved in advance by budget holders, in accordance with the procuration policy. Within this process, a separation of functions has been made between ordering, entering and approval.

<u>Insider trading risk</u>, involves misusing information for personal gain, or having orders executed in such a way that self-enrichment can be achieved at the expense of the fund. The measures taken to prevent this are diverse, including best execution review, mandatory periodic reporting on personal investment portfolios, education in the form of mandatory training and pre-employment screening.

<u>Bribery</u> involves having a tender being influenced by, for example, bribes, dinners, travel and gifts. To mitigate this, GSAM BV has a strict policy, whereby anything with a value of more than fifty euros may not be accepted. Furthermore, in the context of broker execution, price and quality assessments are carried out periodically, the outcome of which is indicative of the extent to which orders are allocated to these brokers.

The residual risk, following from the risks described above, are determined by GSAM BV as 'medium' and are accepted through a formal risk acceptance, or at the level of the foreign GSAM BV entities.

Furthermore, there is a clear legal and operational separation between the asset manager, the external administrator, the fund and the custodian. This segregation of duties has an important preventive effect on the risk of fraud and corruption.

The beforementioned control measures are part of a larger control framework, of which various parts are periodically assessed by an external auditor via the GSAM BV ISAE 3402 report. Furthermore, GSAM BV applies the 3-lines of defense mechanism, in which risk management and internal audit continuously test and monitor the effectiveness of the administrative organization and internal control. GSAM BV also applies various soft controls, such as tone at the top, e-learnings, code of ethics and a whistleblower policy.

Sustainability risks

Sustainability risks can represent their own risk or influence other risks and contribute to general risks, such as market risks, liquidity risks, credit risks or operational risks. Sustainability risks may have a negative impact on the Sub-fund's return.

The sustainability risks to which the Sub-fund may be exposed include, for example:

- Climate change
- Health & safety
- · Business conduct

The assessment of sustainability risks, as defined in Article 2(22) of Regulation (EU) 2019/2088 (on sustainability disclosures in the financial services sector, which Regulation may be amended or supplemented from time to time), is integrated into the investment decision process by application of Sub-fund-specific criteria for responsible investing and, where applicable, integration of relevant environmental, social and governance (ESG) factors.

The Sub-fund primarily invests in liquid assets, which means that the mentioned sustainability risks are incorporated into the valuation of the investments.

Issuer default risk

In addition to general trends in the financial markets, specific developments related to the issuer can also impact the value of an investment. Even careful security selection, for example, cannot eliminate the risk of loss due to a decline in value of the issuer's assets. The use of credit derivatives, if mentioned in the investment policy of the Fund, may entail credit risk.

2.14 Developments during the reporting period

2.14.1 General financial and economic developments in 2024

Economic Context

Recession fears continued to moderate at the start of 2024, as the US economy showed resilience despite significant rate hikes in 2022 and 1H 2023. A tight labor market, positive real wage growth, and strong equity markets supported consumer cash flows and balance sheets in the first quarter of 2024, leading to strong consumption. While US inflation prints were higher than expected in January and February, the US Federal Open Market Committee (FOMC) signaled confidence in March that disinflation would restart and recent elevated releases would prove temporary. In 2Q 2024, continued signs of improvement in global manufacturing indicators, strong earnings growth, and expectations of policy easing by major central banks supported positive momentum in risk assets. The disinflationary process also restarted, following higher than expected prints in 1Q 2024. US Core PCE (Personal Consumption Expenditures Price Index, Excluding Food and Energy) averaged 0.17% in April and May versus average reading of 0.37% in 1Q 2024.

While a slowdown in private consumption was notable in 2Q 2024, some moderation was arguably welcomed to achieve the US Federal Reserve's 2% inflation target. Any further moderation in consumption, however, could be a concern for policymakers and market participants, and renew fears of a recession. The rebalancing of the US labor market is somewhat similar. After strong data at the start of the year, the number of non-farm jobs added in April moderated to 175k versus an average of 235k in 1Q 2024. This was the lowest print in six months, and slower job growth helped allay fears that the economy was overheating, boosting expectations that interest rate cuts would still occur this year. The job openings rate for May rose to 4.9% from 4.8% in April. At its post pandemic peak, the job openings rate was at 7.4%. Like the consumption slowdown, further moderation in the US jobs opening rate could be reaching an inflection point where further rebalancing may not be encouraging news.

Outside of the US, growth momentum continued to improve albeit from weak levels, especially in Europe. Euro area 1Q 2024 GDP came in at 1.3% q/q annualized following 0.25% q/q annualized in 4Q 2023. Similarly, the UK economy expanded at a pace of 2.9% q/q annualized in 1Q 2024 after contracting at -0.9% annualized pace in 2H 2023. Chinese 1Q GDP surprised to the upside, with a reading of 5.3% y/y versus consensus expectation of 4.8% y/y.

Monetary Policy

The Federal Reserve tilted hawkish at the start of 2024 as inflation surprised to the upside and the strong economy gave US policymakers the option to be patient with the onset of the easing cycle. In May, the risk of renewed rate hikes was reduced due to moderation in US core services inflation and a downward revision of 1Q GDP, which came in at 1.2% q/q annualized versus 1.6% initially reported. In June, the Fed revised its median dot plot projection, which now suggests one 25bps rate cut this year, reduced from three projected in March. There's still a possibility that the Fed may implement two rate cuts in the second half of 2024. Fed Chair Jerome Powell noted during the June press conference that cuts totaling 25bps vs 50bps in 2024 was a close call for many participants.

The FOMC's dual mandate of inflation and labor market looks more two-sided now compared with a year ago when it was squarely focused on inflation. Going forward, the FOMC aims to stabilize the unemployment rate around the current level of 4% and bring inflation down to 2%. Therefore, the timing and magnitude of further policy rate calibration becomes crucial. Easing too soon could reignite inflationary pressures; waiting too long could break the labor market. The potential uncertainty from the upcoming US presidential election further complicates the overall economic outlook.

Elsewhere, the Swiss National Bank surprised markets in March and cut policy rates by 25bps, becoming the first G10 central bank to start its easing cycle. The European Central Bank and the Bank of Canada started their respective easing cycles in June, both cutting by 25bps. In terms of forward guidance, both central banks have suggested that further rate cuts are likely if the data evolves in line with expectations. In the UK, Bank of England leaned dovish, but did not ease policy in June. It noted that the decision to leave rates unchanged was finely balanced and recent strength in services inflation were largely driven by volatile components. The market interpretation was that the bank may be ready to begin easing in August.

On the geopolitical front, markets encountered increased uncertainty in Europe as French President Emmanuel Macron dissolved parliament and called snap parliamentary elections, scheduled for June 30 and July 7, after his party's defeat in the EU parliamentary elections. As a result, the market priced in a higher geopolitical risk premium in European assets leading to underperformance of European assets versus peers. In Asia, the Bank of Japan (BoJ) decided to end its negative interest rate policy at its March meeting.

Bond Markets

Bond yields went higher at the start of 2024 as recession fears continued to ease and the US inflation surprised to the upside. The US 10y yield went up by 35bps to 4.2% in 1Q 2024, following a decline of 70bps in 4Q 2023. Yields were modestly higher in 2Q 2024, with the 10y yield up by 15bps. However, the increase largely happened in April after strong labor market and inflation data leading to the 10y yield moving from 4.2% to 4.7%. Subsequently, as inflation and activity data moderated, the 10y yield declined 35bps in May and June.

In Germany and the UK, 10y yields were up 25bps each in 2Q 2024. Strong 1Q GDP releases along with somewhat stickier inflation and wage data in Europe led to higher yields. In France, the 10y yield was 55bps in 2Q as the market priced in a higher term premium given increased political uncertainty. As a result, the French-German 10y spread widened from 50bps to 80bps by the end of the quarter, the highest level since the European debt crisis in 2011-12. At the short end, the US 2y yield went up by 10bps, leaving the 2s10s curve inverted around -40bps. In Asia, May marked the first time since 2012 that the 10y Japanese government bond yield had been above 1%, a major milestone with the markets pricing in a more hawkish stance from the BoJ over the rest of the year.

Commodities generally delivered strong returns in 1H 2024 with oil (WTI) and copper up by 15% and 13%, respectively. Gold and silver rallied by 13% and 22%. Within currencies, the USD continued its strong performance and was up 2.6% in 2Q, following a gain 1.8% in 1Q. Moderating but still healthy growth, high carry, and political uncertainty in France and Mexico helped USD rally on a trade-weighted basis. JPY was one of the worst performing major currencies, down 6% versus the USD. Negative carry on JPY versus most currencies and a positive environment for pro-risk assets weighed on JPY. GBP was flat whereas EUR was down 0.8% versus the USD. A few notable outliers were AUD, which rallied 2.2% versus the USD, benefitting from relatively hawkish central bank policy given elevated inflation, risk on backdrop, and higher metal prices. MXN, on the others hand, was down 9% versus the USD. A landslide victory of the incumbent party in the Mexican presidential election in May sparked fears of higher fiscal spending with fewer checks and balances coupled with a tail risk of the new government's interference in monetary policy. Since then, attempts by newly elected President Claudia Sheinbaum to calm markets have led to some stabilization in MXN.

3.4.2 Securities lending

The Sub-fund is allowed to engage in securities lending techniques to generate additional income. During the reporting period, the Sub-fund did not engage in securities lending.

3.4.3 Master-feeder structure Global High Yield Zero Duration Bond Fund (NL)

This Sub-fund is a feeder UCITS. This means that at least 85% of the managed assets of the Sub-fund are invested in a master UCITS, where the actual investments take place in financial instruments. As a result, the objective and investment policy of the Sub-fund are identical to the objective and investment policy of the master UCITS referred to below.

The Sub-fund executes the investment policy by investing 85% or more of the managed assets in Share Class Zz Cap EUR (hedged iii) of Goldman Sachs Global High Yield (Former NN), a sub-fund of Goldman Sachs Funds III, which is an undertaking for collective investment in transferable securities established in Luxembourg (the 'master UCITS').

The master UCITS has an 'umbrella structure', which means that the master UCITS is divided into sub-funds. A sub-fund is divided into one or more share classes. The share classes within the sub-fund may differ in terms of cost and fee structure, the minimum amount of initial investment, demands on the quality of the investors, the currency in which the net asset value is expressed, etc.

According to the directive for undertakings for collective investment in transferable securities as defined in the financial supervision act in Luxembourg, the master UCITS is admitted to the market and subject to supervision in Luxembourg. The master UCITS has a European passport for the offering of units in Europe and, as such, has been notified in the Netherlands and entered in the AFM register. The master UCITS is not supervised by the AFM.

Goldman Sachs Asset Management B.V.

4. OTHER INFORMATION

4.1 Statutory provisions regarding appropriation of results

According to Article 23 of the Articles of Association of Goldman Sachs Paraplufonds 3 N.V. the Executive Board decides for each type of shares what part of the balance will be allocated to the additional reserve maintained for the relevant type. After the aforementioned addition, a dividend, in so far as possible, is paid on the priority shares equal to six per cent (6%) of the nominal value of these shares. There is no further distribution of profit on the priority shares. The remainder is distributed to the holders of ordinary shares of the relevant type, unless the general meeting decides otherwise.

If the aforementioned balance of income and expenses is negative, the amount is deducted from the additional reserve that is maintained for the relevant type of shares.

4.2 Management interest

At 30 June 2024 and 1 January 2024, the Board members had no personal interest in (an investment of) the Subfund.

2.4 Notes to the key figures

2.4.1 Reporting period

The key figures for 2024 relate to the positions at 30 June and the period from 1 January through 30 June. The key figures for the other years relate to the positions at 31 December and the period from 1 January through 31 December, unless stated otherwise.

The last shareholder of Share Class I redeemed its shares on 26 February 2024. The performance figures for the year 2024 for this Share Class relate to the period from 1 January 2024 through 26 February 2024.

2.4.2 Net asset value per share

The net asset value of each Share Class of the Sub-fund will be determined by the manager. The manager calculates the net asset value per Share Class each business day. The net asset value per share of each Share Class is determined by dividing the net asset value of a Share Class by the number of outstanding shares of that Share Class at the calculation date.

2.4.3 Transaction price

The transaction price of each Share Class of the Sub-fund is determined by the manager on each business day and is based on the net asset value per share of each Share Class with an upcharge (subscription fee) or discount (redemption fee) to cover the costs of purchase and sale of 'physical' investments. The subscription and redemption fee is for the protection of existing shareholders of the Sub-fund and is beneficial to the Sub-fund. When no transaction has taken place on a business day, the transaction price is equal to the net asset value per share.

2.4.4 Net performance

The net performance of each Share Class of the Sub-fund is based on the net asset value per share, taking into account any dividend distributions. The relative performance is the difference between the net performance of each Share Class of the Sub-fund and the performance of the index.

2.5 General information

Goldman Sachs Global High Yield Bond Fund (Former NN) (NL) ('the Sub-fund') is part of Goldman Sachs Paraplufonds 3 N.V. (refer to paragraph 2.11 Structure for more information). The semi-annual report of Goldman Sachs Paraplufonds 3 N.V. (hereinafter referred to as the 'Fund') is available on the website of the manager.

The Sub-fund does not have any employees. Goldman Sachs Asset Management B.V. ('GSAM BV'), located in The Hague, is the manager of the Sub-fund and is licensed by the Dutch Authority for the Financial Markets ('Stichting Autoriteit Financiële Markten', also referred to as 'AFM') under the Dutch Financial Supervision Act ('Wet op het financieel toezicht', also referred to as 'Wft'). The Executive Board of the Fund is formed by GSAM BV. All shares in GSAM BV are held by Goldman Sachs Asset Management International Holdings B.V. Both entities are part of The Goldman Sachs Group, Inc. (hereinafter referred to as 'Goldman Sachs').

Goldman Sachs is listed on the New York Stock Exchange and qualifies as a bank holding company under US law. Goldman Sachs is a globally operating financial institution which – by means of a substantial variety of leading companies and subsidiaries – offers (integrated) financial services to private individuals, companies and institutions.

The AFM and the central bank of the Netherlands ('De Nederlandsche Bank N.V.', also referred to as 'DNB') act as supervisors. The AFM is charged with conduct supervision on the grounds of the Wft. Prudential supervision is performed by DNB.

2.6 Objective

The Fund aims to achieve a better overall long-term return than the index through active management.

2.7 Investment policy

This Sub-fund operates as a feeder UCITS. This means that at least 85% of its managed assets are invested in a master UCITS, where actual investments in financial instruments take place. Consequently, the objectives and investment policies of the Sub-fund are identical to those of the master UCITS described below.

The Sub-fund executes its investment policy by investing at least 85% of its assets in Goldman Sachs Global High Yield (Former NN), which holds a portfolio of corporate bonds and other fixed income securities with high expected interest income in global high yield markets.

The master UCITS is actively managed and primarily invests in: corporate bonds, interest-bearing debts (including private loans, structured and project financings, and (euro) medium term notes), and short-term debts such as deposits, money market instruments, certificates of deposit, commercial paper, and similar instruments issued or entered into by financial institutions, companies, and other institutions denominated in euros or other currencies of developed countries. A developed country is defined as one where government securities issued by the central government and denominated in its own currency have a long-term credit rating of at least BBB- (Standard & Poor's) or Baa3 (Moody's).

The master UCITS promotes environmental and/or social characteristics as described in Article 8 of Regulation (EU) 2019/2088 (on sustainability-related disclosures in the financial services sector, which may be amended or supplemented from time to time).

The master UCITS applies Stewardship as well as an ESG integration approach and exclusion criteria related to various activities. Additional information can be found in the prospectus.

The master UCITS primarily considers the principal adverse impacts (PAIs) on sustainability factors through Stewardship. Information on the principal adverse impacts on sustainability factors can be found in the prospectus.

The master UCITS has the ability to hold investments both directly and indirectly — for example, by entering into exposure on the relevant financial instruments via derivatives or investments in other investment funds — according to its investment process, which includes deviation thresholds from the index. The composition of the master UCITS' investments may materially differ from that of the index. The index represents a representative sample of the investment universe. The master UCITS may invest in securities that are not part of the index.

Issuers provide the opportunity to obtain warrants in addition to high yield bonds. These warrants are inseparably linked to the bonds and are typically valued together with the bonds. The warrants provide the right to acquire shares of the issuer at a predetermined price in the future. Additionally, the master UCITS may invest in convertible bonds. To potentially benefit from additional returns, the master UCITS has the option to invest in these warrants, convertible bonds, and the shares acquired through them. A position in shares will be sold as soon as possible, but in any case within a period of six months. The master UCITS may also invest in corporate bonds from Emerging Markets.

The master UCITS may use derivatives such as options, futures, warrants, swaps, and forward currency contracts. These may be employed for hedging risks and efficient portfolio management. This may involve leveraging, which increases the sensitivity of the Sub-fund to market movements. When using derivatives, care is taken to ensure that the portfolio as a whole complies with investment restrictions.

The risk profile associated with the type of investor targeted by the Sub-fund does not change as a result of using these instruments.

In addition to the above, the following applies to the investment policy of the Fund:

- If not invested in the aforementioned financial instruments, the Sub-fund may invest in certain money market instruments (such as certificates of deposit and commercial paper), money market funds, or hold assets in cash equivalents.
- regarding the maximum expected levels of gross leverage (sum of nominal values) and net leverage ('commitment' method), reference is made to the prospectus of the master UCITS, taking into account the provisions on leverage financing.
- the manager of Goldman Sachs Paraplufonds 3 N.V. has the authority to enter into short-term loans as a borrower on behalf of the Sub-fund.
- · transactions with related parties will occur on market terms.
- the Sub-fund invests globally in financial instruments in accordance with the investment policy, using counterparties approved by the manager.

2.8 Dividend policy

The Sub-fund pursues an active dividend policy at the level of specific Share Classes. The Sub-fund may distribute interim dividends (which may be from income or from capital) if decided by management. The amount and frequency of distributions may vary from year to year and may be zero. Distributions may vary by Share Class as well as the method of payment.

In 2024 no dividend has been paid for Share Class I as the last remaining shareholder redeemed its participations before the annual dividend payment in June (ex dividend date).

2.9 Index

Bloomberg Barclays US High Yield (70%) and the Bloomberg Barclays Pan-European ex Fin Subord 2% Issuer Capped (30%).

2.10 Outsourcing

Outsourcing of fund accounting

The manager of the Fund has outsourced the accounting function to The Bank of New York Mellon SA/NV. This outsourcing relates to, among others, the calculation of the net asset value, maintaining accounting records and processing of and executing payments. The manager remains ultimately responsible for the quality and continuity of these services.

Outsourcing of financial reporting

The manager of the Fund, has outsourced the preparation of multiple financial reports, including the (semi-)annual reports of the Dutch GSAM BV funds, to DM Financial Netherlands B.V. The manager remains ultimately responsible for the quality and continuity of all financial reports.

Outsourcing of management activities

The manager has outsourced on reporting date all or part of its management activities for the Sub-fund to an affiliated external asset manager which, as such, is part of Goldman Sachs as a group. This concerns Goldman Sachs Asset Management International (GSAMI), established in the United Kingdom.

The affiliated external asset manager is responsible for taking investment decisions within the framework of the investment policy as determined by the manager and as described in the prospectus of the Sub-fund, collecting and conducting research on the basis of which these decisions can be taken and giving instructions for the purchase and sale of financial instruments as well as the settlement of such transactions, when the occasion arises.

GSAMI is allowed to outsource the portfolio management for the Fund to one or more group companies as a subdelegated asset manager. GSAMI has entered into a sub-delegation agreement with Goldman Sachs Asset Management, L.P. and Goldman Sachs Asset Management (Singapore) Pte. Ltd.

2.11 Structure

The Fund is an open-end investment company with variable capital as described in Article 76a of Book 2 of the Dutch Civil Code. Except in special circumstances, the Fund may in principle issue or redeem shares on any business day.

The Fund is an undertaking for collective investment in transferable securities ('UCITS') within the meaning of the Dutch Financial Supervision Act ('Wet op het financial toezicht', also referred to as 'Wft'). GSAM BV acts as manager of the Fund as defined in Section 1:1 of the Wft and in that capacity holds a license as defined in Section 2:69b(1), preamble and part (a) of the Wft from the AFM.

The Fund has an umbrella structure, which means that the ordinary shares are divided into various series of shares, with each series of shares corresponding to a separate Sub-fund. Goldman Sachs Paraplufonds 3 N.V. is the legal owner of the assets held by the individual Sub-funds.

A Sub-fund is a segregated part of the capital of the Fund for which a separate investment policy is pursued. The Wft states that all standards directed in whole or in part towards the Fund are also applicable to the Sub-funds. The part of the assets of the Sub-fund to be paid into, or allocated to, each Fund is invested separately in accordance with a specific investment policy. Both gains and losses in the investment portfolio of a Sub-fund are credited or charged to the relevant Sub-fund.

The capital of a Sub-fund is segregated and subject to a statutory priority arrangement. Consequently, the assets of a Sub-fund may only be used to pay liabilities connected to the management and safe-keeping of the Sub-fund and the shares in that Sub-fund.

A Sub-fund is divided into one or more Share Classes. The Share Classes within the Sub-fund may differ in terms of cost and fee structure, the minimum amount of initial investment, demands on the quality of the investors, the currency in which the net asset value is expressed, etc.

Fees

Management fee

An annual management fee is charged to the Share Class, which is calculated pro-rata on a daily basis by using the total net asset value of the Share Class at the end of every day.

Fixed Miscellaneous Fee

In addition to the management fee, other costs are charged to the Share Class. These costs are charged through a fixed annual fee, the Fixed Miscellaneous Fee ('Vaste Overige Kostenvergoeding'), which is calculated pro-rata on a daily basis on the total assets of the Share Class at the end of each day.

Other costs

Other costs may be charged to the Share Class. These costs, if applicable, are further explained in the notes to the respective Share Class as included in the financial statements.

Subscription and redemption fee

This concerns the fee charged to shareholders upon the purchase or sale of shares in the Sub-fund. The fee is calculated as a percentage markup or markdown on the net asset value per share, serves to protect the existing shareholders of the Sub-fund and is beneficial to the Sub-fund.

The actual percentage of the subscription and redemption fee can fluctuate and is published on the manager's website. This percentage may be changed without prior notice if the manager deems it necessary to protect the existing shareholders of the Sub-fund.

Maximum subscription and redemption fee

For transparency reasons, the manager has set a maximum percentage of the net asset value of the shares for the subscription and redemption fee. In exceptional market conditions, at the discretion of the manager, the manager may, in the interest of the existing investors of the Sub-fund, apply a higher percentage than the maximum percentage applicable to the Sub-fund at that time. In addition, the manager may, in the interest of the existing shareholders, apply a higher percentage than the maximum percentage applicable to the Sub-fund at that time in the event of exceptionally large orders to buy and sell shares in the Sub-fund, to compensate for the related additional transaction costs.

2.12 Tax aspects

The Sub-fund is part of Goldman Sachs Paraplufonds 3 N.V., which has the status of a tax-exempt investment institution (VBI) as referred to in Article 6a of the Corporate Income Tax Act 1969. As a tax-exempt investment institution within the meaning of Article 6a of the Corporate Income Tax Act 1969, the Fund will be exempt from corporate income tax on the investment income it receives if certain conditions (open-end character, collective investment, investment in financial instruments with risk diversification) are met.

Dividends distributed on foreign investments will often be subject to withholding tax in the respective country. Interest payments may also be subject to foreign withholding tax. Foreign and Dutch withholding tax withheld on behalf of the Fund generally cannot be reclaimed or offset. As a tax-exempt investment institution, the Fund cannot generally benefit from Dutch double taxation treaties.

The Fund is exempt from withholding tax on all its distributions.

2.13 Fund Agent

The Fund has agreed with ING Bank N.V. that the latter company will act as Fund Agent. The Fund Agent is responsible for the evaluation and the acceptance of the buy and sell orders as entered in the exchange order book with regard to Share Class P of each Sub-fund, subject to the conditions as stated in the prospectus.

The Fund Agent will only accept orders which fulfil the following conditions:

- 1) Orders must be entered on the basis of a standard market settlement deadline.
- 2) Orders must be entered by another party affiliated with Euroclear Nederland.

Once the order book has been closed, the Fund Agent will transmit all buy and sell orders relating to Share Class P of each Sub-fund to the Fund via the Transfer Agent. The transaction price at which these buy and sell orders are executed on the following business day is supplied to Euronext Amsterdam by NYSE Euronext by the manager, via the Fund Agent.

2.14 Transfer Agent

Shares of Share Classes I and Z can be bought and sold through the mediation of The Bank of New York Mellon SA/NV in Brussels, Belgium. The costs associated with the safe-keeping of shares of investors by The Bank of New York Mellon SA/NV in Brussels, Belgium are charged by the manager to the relevant Share Classes. The Transfer Agent, i.e. The Bank of New York Mellon SA/NV, is responsible for the evaluation and the acceptance of the buy and sell orders concerning shares of the relevant Share Classes as entered in the order book, subject to the conditions stated in the prospectus.

The Transfer Agent will only accept orders which have been entered on the basis of a settlement deadline which is in line with generally accepted market practice. After closure of the order book, the Transfer Agent will forward the balance of all buy and sell orders to the Fund. The transaction price at which these buy and sell orders are executed on the following business day is to be published by the manager.

2.15 Depositary of Goldman Sachs Paraplufonds 3 N.V.

The assets of the Fund are in the safe-keeping of The Bank of New York Mellon SA/NV, Amsterdam branch, as the depositary of the Fund (the 'depositary').

The shareholders' equity of the depositary amounts to at least EUR 730,000.

The manager and depositary of the Fund have entered into a written agreement relating to management and depositary services. The main elements of this agreement are the following:

- The depositary ensures that the cash flows of the Fund are properly controlled and in particular that all payments by or on behalf of investors during the subscription for shares have been received and that all cash of the Fund has been recorded in cash accounts in the name of the Fund or in the name of the depositary acting on behalf of the Fund, opened with (in principle) an entity as described in Article 18(1)(a), (b) and (c) of European Directive 2006/73/EC (a credit institution or a bank authorized in a third country).
- The assets of the Fund consisting of financial instruments are entrusted to the depositary. The depositary holds in safe-keeping all financial instruments that can be registered on a financial instruments account in the books of the depositary, on separate accounts in the name of the Fund. In addition, the depositary holds in safe-keeping all financial instruments that can be physically delivered to the depositary.
- For the other assets of the Fund, the depositary determines whether the Fund is the owner of these assets based
 on information or documents provided by the manager or based on other external evidence. The depositary keeps
 a register for these other assets.
- The depositary ensures that the sale, issue, repurchase, redemption and cancellation of shares in the Fund take place in accordance with Dutch law, the Articles of Association of the Fund and the relevant procedures.
- The depositary ensures that the value of the shares in the Fund is calculated in accordance with Dutch law, the Articles of Association of the Fund and the relevant procedures.
- The depositary carries out the instructions of the manager, unless they conflict with Dutch law or the Articles of Association of the Fund.
- The depositary ensures that the equivalent value of the transactions involving the assets of the Fund is transferred to the Fund by the usual deadlines.
- The depositary ensures that the income of the Fund is allocated in accordance with Dutch law and the Articles of Association of the Fund.

In the context of depositary services, the depositary acts in the interests of the Fund as well as the investors in the Fund.

2.16 Principal risks and uncertainties

Investing in the Sub-fund entails financial opportunities as well as financial risks. The value of investments can both rise and fall, and shareholders of the Sub-fund may receive less than they invested. Diversification of investments is expected to have a mitigating effect on these risks.

A comprehensive overview of the risks, categorized as 'high, medium, and low' risks, associated with the Sub-fund is provided in the prospectus. In the event of new regulations regarding risk management, additional information will be included. The main risks faced by the Sub-fund are:

Market risk

The Sub-fund is sensitive to changes in the value of investments due to fluctuations in prices in financial markets such as equities or fixed-income markets (market risk). Additionally, prices of individual instruments in which the Sub-fund invests may also fluctuate. If the Sub-fund utilizes derivatives as described under "Investment Policy," these may be employed for both hedging risks and efficient portfolio management. This may involve leveraging, thereby increasing the Sub-fund's sensitivity to market movements.

To mitigate market risks, investments are diversified across various countries, sectors, and/or companies.

Interest rate risk

When investing in fixed-income securities, interest rate risk is incurred. This risk occurs when the interest rate of a security fluctuates. When interest rates decrease, the general expectation is that the value of fixed-income securities increases. Conversely, when interest rates rise, the general expectation is that the value of fixed-income securities decreases.

Currency risk

If investments can be made in securities denominated in currencies other than the currency in which the Sub-fund is denominated, currency fluctuations can have both positive and negative effects on the investment result.

Liquidity risk

Liquidity risks may arise when a particular underlying investment is difficult to sell. Since the Sub-fund may invest in illiquid securities, there is a risk that the Sub-fund may not have the ability to release financial resources that may be needed to meet certain obligations.

During the reporting period, there were no issues regarding liquidity. The available cash of the Sub-fund was sufficient to manage the inflow and outflow of capital during the reporting period. It is expected that this will also be the case in the upcoming reporting period.

Credit risk

Investors should be fully aware that every investment carries credit risks. Bonds and debt instruments entail actual credit risk on the issuer. This risk can be measured based on the issuer's credit rating. Bonds and debt instruments issued by lower-rated issuers typically carry higher credit risk and a greater chance of default than those issued by higher-rated issuers. If the issuer of bonds or debt instruments encounters financial or economic difficulties, leading to an increase in credit risk and likely downgrade of the rating, it can affect the value of the bonds or debt instruments (which may lose their value entirely).

Fraud risks and corruption

Fraud is any intentional act or omission to mislead others, causing loss to the victim and/or profit to the perpetrator. Corruption is the misuse of entrusted power for personal gain, including bribery. The lack of controls in the payment process increases the likelihood and therefore creates the opportunity for fraud.

The asset management industry is characterized by the management of third party assets, which is quite extensive in its entirety. Having access to these assets increases GSAM BV's inherent fraud and corruption risk profile. To manage this risk, GSAM BV conducts an annual fraud and corruption risk assessment to determine the identification, exposure to and management of these risks. GSAM BV concludes in its annual risk assessment that there are no high residual risks in the context of fraud and corruption. The main inherent risks identified by GSAM BV in the annual risk assessment are the following:

- Cyber risks;
- Unauthorized withdrawal of funds;
- Fraudulent invoices;
- Insider trading risk;
- Bribery.

The following measures have been taken to mitigate these inherent risks:

<u>Cyber risks</u>, cyber risk is recognized as a collective term which, knowingly (e.g. ransomware) or unknowingly (e.g. hack), can lead to a withdrawal of assets. The range of techniques that a malicious person can use is extensive. That is why it is important for GSAM BV to be aware of these techniques and to test its own environment accordingly. The measures taken are inspired by the NIST cyber security framework of protect, detect, respond, recover and identify and are evaluated annually on the basis of the Cyber Security Risk Assessment.

<u>Unauthorized withdrawal of funds</u>, is prevented by having authorization limits and a four (or more) eyes principles, whereby modern techniques such as 2 factor authentication are required.

<u>Fraudulent invoices</u>, the payment of invoices at the expense of an investment fund is only permitted if this corresponds with the prospectus. The beneficiary as well as the correctness of the amounts charged are often verifiable, through a link with the assets. Invoices must be assessed and approved in advance by budget holders, in accordance with the procuration policy. Within this process, a separation of functions has been made between ordering, entering and approval.

<u>Insider trading risk</u>, involves misusing information for personal gain, or having orders executed in such a way that self-enrichment can be achieved at the expense of the fund. The measures taken to prevent this are diverse, including best execution review, mandatory periodic reporting on personal investment portfolios, education in the form of mandatory training and pre-employment screening.

<u>Bribery</u> involves having a tender being influenced by, for example, bribes, dinners, travel and gifts. To mitigate this, GSAM BV has a strict policy, whereby anything with a value of more than fifty euros may not be accepted. Furthermore, in the context of broker execution, price and quality assessments are carried out periodically, the outcome of which is indicative of the extent to which orders are allocated to these brokers.

The residual risk, following from the risks described above, are determined by GSAM BV as 'medium' and are accepted through a formal risk acceptance, or at the level of the foreign GSAM BV entities.

Furthermore, there is a clear legal and operational separation between the asset manager, the external administrator, the fund and the custodian. This segregation of duties has an important preventive effect on the risk of fraud and corruption.

The beforementioned control measures are part of a larger control framework, of which various parts are periodically assessed by an external auditor via the GSAM BV ISAE 3402 report. Furthermore, GSAM BV applies the 3-lines of defense mechanism, in which risk management and internal audit continuously test and monitor the effectiveness of the administrative organization and internal control. GSAM BV also applies various soft controls, such as tone at the top, e-learnings, code of ethics and a whistleblower policy.

Sustainability risks

Sustainability risks can represent their own risk or influence other risks and contribute to general risks, such as market risks, liquidity risks, credit risks or operational risks. Sustainability risks may have a negative impact on the Sub-fund's return.

The sustainability risks to which the Sub-fund may be exposed include, for example:

- Climate change
- Health & safety
- Business conduct

The assessment of sustainability risks, as defined in Article 2(22) of Regulation (EU) 2019/2088 (on sustainability disclosures in the financial services sector, which Regulation may be amended or supplemented from time to time), is integrated into the investment decision process by application of Sub-fund-specific criteria for responsible investing and, where applicable, integration of relevant environmental, social and governance (ESG) factors.

The Sub-fund primarily invests in liquid assets, which means that the mentioned sustainability risks are incorporated into the valuation of the investments.

Issuer default risk

In addition to general trends in the financial markets, specific developments related to the issuer can also impact the value of an investment. Even careful security selection, for example, cannot eliminate the risk of loss due to a decline in value of the issuer's assets. The use of credit derivatives, if mentioned in the investment policy of the Fund, may entail credit risk.

2.17 Developments during the reporting period

2.17.1 General financial and economic developments in 2024

Economic Context

Recession fears continued to moderate at the start of 2024, as the US economy showed resilience despite significant rate hikes in 2022 and 1H 2023. A tight labor market, positive real wage growth, and strong equity markets supported consumer cash flows and balance sheets in the first quarter of 2024, leading to strong consumption. While US inflation prints were higher than expected in January and February, the US Federal Open Market Committee (FOMC) signaled confidence in March that disinflation would restart and recent elevated releases would prove temporary. In 2Q 2024, continued signs of improvement in global manufacturing indicators, strong earnings growth, and expectations of policy easing by major central banks supported positive momentum in risk assets. The disinflationary process also restarted, following higher than expected prints in 1Q 2024. US Core PCE (Personal Consumption Expenditures Price Index, Excluding Food and Energy) averaged 0.17% in April and May versus average reading of 0.37% in 1Q 2024.

While a slowdown in private consumption was notable in 2Q 2024, some moderation was arguably welcomed to achieve the US Federal Reserve's 2% inflation target. Any further moderation in consumption, however, could be a concern for policymakers and market participants, and renew fears of a recession. The rebalancing of the US labor market is somewhat similar. After strong data at the start of the year, the number of non-farm jobs added in April moderated to 175k versus an average of 235k in 1Q 2024. This was the lowest print in six months, and slower job growth helped allay fears that the economy was overheating, boosting expectations that interest rate cuts would still occur this year. The job openings rate for May rose to 4.9% from 4.8% in April. At its post pandemic peak, the job openings rate was at 7.4%. Like the consumption slowdown, further moderation in the US jobs opening rate could be reaching an inflection point where further rebalancing may not be encouraging news.

Outside of the US, growth momentum continued to improve albeit from weak levels, especially in Europe. Euro area 1Q 2024 GDP came in at 1.3% q/q annualized following 0.25% q/q annualized in 4Q 2023. Similarly, the UK economy expanded at a pace of 2.9% q/q annualized in 1Q 2024 after contracting at -0.9% annualized pace in 2H 2023. Chinese 1Q GDP surprised to the upside, with a reading of 5.3% y/y versus consensus expectation of 4.8% y/y.

Monetary Policy

The Federal Reserve tilted hawkish at the start of 2024 as inflation surprised to the upside and the strong economy gave US policymakers the option to be patient with the onset of the easing cycle. In May, the risk of renewed rate hikes was reduced due to moderation in US core services inflation and a downward revision of 1Q GDP, which came in at 1.2% q/q annualized versus 1.6% initially reported. In June, the Fed revised its median dot plot projection, which now suggests one 25bps rate cut this year, reduced from three projected in March. There's still a possibility that the Fed may implement two rate cuts in the second half of 2024. Fed Chair Jerome Powell noted during the June press conference that cuts totaling 25bps vs 50bps in 2024 was a close call for many participants.

The FOMC's dual mandate of inflation and labor market looks more two-sided now compared with a year ago when it was squarely focused on inflation. Going forward, the FOMC aims to stabilize the unemployment rate around the current level of 4% and bring inflation down to 2%. Therefore, the timing and magnitude of further policy rate calibration becomes crucial. Easing too soon could reignite inflationary pressures; waiting too long could break the labor market. The potential uncertainty from the upcoming US presidential election further complicates the overall economic outlook.

Elsewhere, the Swiss National Bank surprised markets in March and cut policy rates by 25bps, becoming the first G10 central bank to start its easing cycle. The European Central Bank and the Bank of Canada started their respective easing cycles in June, both cutting by 25bps. In terms of forward guidance, both central banks have suggested that further rate cuts are likely if the data evolves in line with expectations. In the UK, Bank of England leaned dovish, but did not ease policy in June. It noted that the decision to leave rates unchanged was finely balanced and recent strength in services inflation were largely driven by volatile components. The market interpretation was that the bank may be ready to begin easing in August.

On the geopolitical front, markets encountered increased uncertainty in Europe as French President Emmanuel Macron dissolved parliament and called snap parliamentary elections, scheduled for June 30 and July 7, after his party's defeat in the EU parliamentary elections. As a result, the market priced in a higher geopolitical risk premium in European assets leading to underperformance of European assets versus peers. In Asia, the Bank of Japan (BoJ) decided to end its negative interest rate policy at its March meeting.

Bond Markets

Bond yields went higher at the start of 2024 as recession fears continued to ease and the US inflation surprised to the upside. The US 10y yield went up by 35bps to 4.2% in 1Q 2024, following a decline of 70bps in 4Q 2023. Yields were modestly higher in 2Q 2024, with the 10y yield up by 15bps. However, the increase largely happened in April after strong labor market and inflation data leading to the 10y yield moving from 4.2% to 4.7%. Subsequently, as inflation and activity data moderated, the 10y yield declined 35bps in May and June.

In Germany and the UK, 10y yields were up 25bps each in 2Q 2024. Strong 1Q GDP releases along with somewhat stickier inflation and wage data in Europe led to higher yields. In France, the 10y yield was 55bps in 2Q as the market priced in a higher term premium given increased political uncertainty. As a result, the French-German 10y spread widened from 50bps to 80bps by the end of the quarter, the highest level since the European debt crisis in 2011-12. At the short end, the US 2y yield went up by 10bps, leaving the 2s10s curve inverted around -40bps. In Asia, May marked the first time since 2012 that the 10y Japanese government bond yield had been above 1%, a major milestone with the markets pricing in a more hawkish stance from the BoJ over the rest of the year.

Commodities generally delivered strong returns in 1H 2024 with oil (WTI) and copper up by 15% and 13%, respectively. Gold and silver rallied by 13% and 22%. Within currencies, the USD continued its strong performance and was up 2.6% in 2Q, following a gain 1.8% in 1Q. Moderating but still healthy growth, high carry, and political uncertainty in France and Mexico helped USD rally on a trade-weighted basis. JPY was one of the worst performing major currencies, down 6% versus the USD. Negative carry on JPY versus most currencies and a positive environment for pro-risk assets weighed on JPY. GBP was flat whereas EUR was down 0.8% versus the USD. A few notable outliers were AUD, which rallied 2.2% versus the USD, benefitting from relatively hawkish central bank policy given elevated inflation, risk on backdrop, and higher metal prices. MXN, on the others hand, was down 9% versus the USD. A landslide victory of the incumbent party in the Mexican presidential election in May sparked fears of higher fiscal spending with fewer checks and balances coupled with a tail risk of the new government's interference in monetary policy. Since then, attempts by newly elected President Claudia Sheinbaum to calm markets have led to some stabilization in MXN.

Equity Markets

Equities started 2024 on a strong footing with significant gains in 1Q 2024 following a strong end to 2023, with several equity indices reaching all-time highs. Continued signs of improvement in global manufacturing indicators, a resilient US economy, and expectations of policy easing by major central banks supported risk appetite. In 2Q global developed market equities (MSCI World) and emerging market equities (MSCI EM) were up by 3.2% and 6.4%, respectively, following gains of 10% and 4.5% in 1Q. Within developed market equities, US equities outperformed their peers with a gain of 4.5% in 2Q, whereas Japanese equities (TOPIX) were up by 1.7%. Euro area equities (EURO STOXX 50) were down by 1.3% following increased uncertainty in June due to the defeat of President Macron's party in the EU parliamentary election and subsequent call for a snap parliamentary election in France.

Among US sectors, the technology sector outperformed as it rallied 8.8%, followed by utilities, up 4.6%. Materials, industrials, and energy underperformed noticeably with a sell-off of 4.5%, 2.9%, and 2.7%, respectively. Ongoing divergence between mega-cap stocks and the rest remained visible over 2Q 2024. For example, the Magnificent 7 was up by another 16.9% in 2Q, which helped the S&P 500 post a third consecutive quarterly gain of 4.5%. There was weakness elsewhere, as the equal-weighted S&P 500 fell by -2.6%, and the small-cap Russell 2000 was down by 3.3%.

Elsewhere, China equities rallied at the start of 2024, outperforming most DM and EM equity markets, but retreated in June. Widely cited reasons for the pullback include profit-taking after a strong tail-risk compression rally, less-forceful-than-expected property policy announcements against an improved policy expectation backdrop post the April Politburo meeting, resurfacing geopolitical risks regarding cross-strait relations, and sluggish earnings revision trends.

3.4.2 Securities lending

The Sub-fund is allowed to engage in securities lending techniques to generate additional income. During the reporting period, the Sub-fund did not engage in securities lending.

3.4.3 Master-feeder structure Goldman Sachs Global High Yield Bond Fund (Former NN) (NL)

This Sub-fund is a feeder UCITS. This means that at least 85% of the assets of the Sub-fund are invested in a master UCITS, where the actual investments in financial instruments take place. As a result, the objective and investment policy of the Sub-fund are identical to the objective and investment policy of the master UCITS referred to below.

The Sub-fund implements the investment policy by investing 85% or more of the managed assets in Share Class Zz DIS EUR (hedged iii) of Goldman Sachs Global High Yield (Former NN), a sub-fund of Goldman Sachs Funds III, a UCITS fund established in Luxembourg (the 'master UCITS').

The master UCITS has an umbrella structure, which means that the master UCITS is divided into sub-funds. A sub-fund is divided into one or more share classes. The share classes within the sub-fund may differ in terms of cost and fee structure, the minimum amount of initial investment, demands on the quality of the investors, the currency in which the net asset value is expressed, etc.

According to the UCITS Directive as defined in the Luxembourg financial supervision laws and regulations, the master UCITS is admitted to the market and subject to supervision in Luxembourg. The master UCITS has a 'European passport' for the offering of participations in Europe and, as such, has been notified in the Netherlands and entered in the register kept by the AFM. The master UCITS is, as such, not under the supervision of the AFM.

The Hague, 23 August 2024

Goldman Sachs Asset Management B.V.

4. OTHER INFORMATION

4.1 Statutory provisions regarding appropriation of results

According to Article 23 of the Articles of Association of Goldman Sachs Paraplufonds 3 N.V. the Executive Board decides for each type of shares what part of the balance will be allocated to the additional reserve maintained for the relevant type. After the aforementioned addition, a dividend, in so far as possible, is paid on the priority shares equal to six per cent (6%) of the nominal value of these shares. There is no further distribution of profit on the priority shares. The remainder is distributed to the holders of ordinary shares of the relevant type, unless the general meeting decides otherwise.

If the aforementioned balance of income and expenses is negative, the amount is deducted from the additional reserve that is maintained for the relevant type of shares.

4.2 Management interest

The total personal interest in (the investments of) the Sub-fund (if applicable, including investments in GSAM BV funds in which participation occurred) in number of shares and option rights, or nominal value in bonds, held by the Board members at 30 June 2024 and 1 January 2024, is specified as follows:
