Dividend

The percentage shown for each investment category reflects the value of investments in that category as a percentage of net assets.

- (a) Variable or floating rate security. Except for floating rate notes (for which final maturity is disclosed), maturity date disclosed is the next interest reset date. Interest rate disclosed is that which is in effect on February 28, 2025.
- (b) Exempt from registration under Rule 144A of the Securities Act of 1933.
- (c) Represents an affiliated issuer.

Investment Ab	breviations:
CMT	—Constant Maturity Treasury Index

- The percentage shown for each investment category reflects the value of investments in that category as a percentage of net assets.
- (a) Interest rates represent either the stated coupon rate, annualized yield on date of purchase for discounted securities, or, for floating rate securities, the current reset rate, which is based upon current interest rate indices.

- (b) TBA (To Be Announced) Securities are purchased on a forward commitment basis with an approximate principal amount and no defined maturity date. The actual principal and maturity date will be determined upon settlement when the specific mortgage pools are assigned. Total market value of TBA securities (excluding forward sales contracts, if any) amounts to \$42,158,123 which represents approximately 10.4% of the Fund's net assets as of February 28, 2025.
- (c) Securities with "Call" features. Maturity dates disclosed are the final maturity date.
- (d) Variable rate security. Interest rate or distribution rate disclosed is that which is in effect on February 28, 2025.
- (e) Issued with a zero coupon. Income is recognized through the accretion of discount.
- (f) Security with "Put" features and resetting interest rates. Maturity dates disclosed are the puttable dates. Interest rate disclosed is that which is in effect on February 28, 2025.
- (g) Exempt from registration under Rule 144A of the Securities Act of 1933.
- (h) Represents an affiliated issuer.

The percentage shown for each investment category reflects the value of investments in that category as a percentage of net assets.

- (a) Variable or floating rate security. Except for floating rate notes (for which final maturity is disclosed), maturity date disclosed is the next interest reset date. Interest rate disclosed is that which is in effect on February 28, 2025.
- (b) Exempt from registration under Rule 144A of the Securities Act of 1933.
- (c) Represents an affiliated issuer.

Notes to Financial Statements

February 28, 2025 (Unaudited)

1. ORGANIZATION

Goldman Sachs ETF Trust (the "Trust") is an open-end management investment company, registered under the Investment Company Act of 1940, as amended (the "Act"), consisting of multiple series. The Trust was organized as a Delaware statutory trust on December 16, 2009. The following table lists those series of the Trust that are included in this report (collectively, the "Funds" or individually a "Fund") along with their respective diversification status under the Act:

Fund	Diversified/ Non-Diversified
Goldman Sachs Access Emerging Markets USD Bond ETF	Diversified
Goldman Sachs Access High Yield Corporate Bond ETF	Diversified
Goldman Sachs Access Inflation Protected USD Bond ETF	Diversified
Goldman Sachs Access Investment Grade Corporate 1-5 Year Bond ETF	Diversified
Goldman Sachs Access Investment Grade Corporate Bond ETF	Diversified
Goldman Sachs Access Treasury 0-1 Year ETF	Diversified
Goldman Sachs Access U.S. Aggregate Bond ETF	Diversified
Goldman Sachs Access U.S. Preferred Stock and Hybrid Securities ETF	Diversified

The investment objective of each Fund is to provide investment results that closely correspond, before fees and expenses, to the performance of its respective Index.

Goldman Sachs Asset Management, L.P. ("GSAM"), an affiliate of Goldman Sachs & Co. LLC ("Goldman Sachs"), serves as investment adviser to the Funds pursuant to a management agreement (the "Agreement") with the Trust. Each Fund is an exchange-traded fund ("ETF"). Shares of the Access High Yield Corporate Bond ETF, Access Investment Grade Corporate 1-5 Year Bond ETF, Access Investment Grade Corporate Bond ETF, Access Treasury 0-1 Year ETF and Access U.S. Aggregate Bond ETF are listed and traded on the NYSE Arca, Inc. ("NYSE Arca"), shares of the Access Emerging Markets USD Bond ETF and Access Inflation Protected USD Bond ETF are listed and traded on the Cboe BZX Exchange, Inc. ("Cboe BZX"), and shares of the Access U.S. Preferred Stock and Hybrid Securities ETF are listed and traded on the NASDAQ Stock Market LLC ("NASDAQ"). Market prices for the Funds' shares may be different from their net asset value ("NAV"). The Funds issue and redeem shares at their respective NAV only in blocks of a specified number of shares, or multiples thereof, referred to as "Creation Units". Creation Units are issued and redeemed generally for a designated portfolio of securities (including any portion of such securities for which cash may be substituted) and a specified amount of cash. Shares generally trade in the secondary market in quantities less than a Creation Unit at market prices that change throughout the day. Only those that have entered into an authorized participant agreement with ALPS Distributors, Inc. (the "Distributor") may do business directly with the Funds.

2. SIGNIFICANT ACCOUNTING POLICIES

The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") and require management to make estimates and assumptions that may affect the reported amounts and disclosures. Actual results may differ from those estimates and assumptions. Each Fund is an investment company under GAAP and follows the accounting and reporting guidance applicable to investment companies.

A. Investment Valuation — The Funds' valuation policy is to value investments at fair value.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

B. Investment Income and Investments — Investment income includes interest income, dividend income, and securities lending income, if any. Interest income is accrued daily and adjusted for amortization of premiums and accretion of discounts. Dividend income is recognized on ex-dividend date or, for certain foreign securities, as soon as such information is obtained subsequent to the ex-dividend date. Non-cash dividends, if any, are recorded at the fair market value of the securities received. Investment transactions are reflected on trade date. Realized gains and losses are calculated using identified cost. Investment transactions are recorded on the following business day for daily NAV calculations. Investment income is recorded net of any foreign withholding taxes, less any amounts reclaimable. The Funds may file withholding tax reclaims in certain jurisdictions to recover a portion of amounts previously withheld. Any foreign capital gains tax is accrued daily based upon net unrealized gains, and is payable upon sale of such investments. Distributions received from the Funds' investments in U.S. real estate investment trusts ("REITs") may be characterized as ordinary income, net capital gain and/or a return of capital. A return of capital is recorded by the Funds as a reduction to the cost basis of the REIT.

For treasury inflation protected securities ("TIPS"), adjustments to principal due to inflation/deflation are reflected as increases/decreases to interest income with a corresponding adjustment to cost.

- C. Expenses Expenses incurred directly by a Fund are charged to the Fund, and certain expenses incurred by the Trust are allocated across the applicable Funds on a straight-line and/or pro-rata basis, depending upon the nature of the expenses, and are accrued daily.
- D. Federal Taxes and Distributions to Shareholders It is each Fund's policy to comply with the requirements of the Internal Revenue Code of 1986, as amended (the "Code"), applicable to regulated investment companies and to distribute each year substantially all of its investment company taxable income and capital gains to its shareholders. Accordingly, each Fund is not required to make any provisions for the payment of federal income tax. Distributions to shareholders are recorded on the ex-dividend date. For each Fund, income distributions, if any, are declared and paid monthly. Capital gains distributions, if any, are declared and paid annually.

Net capital losses, if any, are carried forward to future fiscal years and may be used to the extent allowed by the Code to offset any future capital gains. Losses that are carried forward will retain their character as either short-term or long-term capital losses. Utilization of capital loss carryforwards will reduce the requirement of future capital gains distributions.

The characterization of distributions to shareholders for financial reporting purposes is determined in accordance with federal income tax rules, which may differ from GAAP. The source of each Fund's distributions may be shown in the accompanying financial statements as either from distributable earnings or capital. Certain components of the Funds' net assets on the Statements of Assets and Liabilities reflect permanent GAAP/tax differences based on the appropriate tax character.

3. INVESTMENTS AND FAIR VALUE MEASUREMENTS

U.S. GAAP defines the fair value of a financial instrument as the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price); the Funds' policy is to use the market approach. GAAP establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The level in the fair value hierarchy within which the fair value measurement in its entirety falls shall be determined based on the lowest level input that is significant to the fair value measurement in its entirety. The levels used for classifying investments are not necessarily an indication of the risk associated with investing in these investments. The three levels of the fair value hierarchy are described below:

- Level 1 Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;
- Level 2 Quoted prices in markets that are not active or financial instruments for which significant inputs are observable (including, but not limited to, quoted prices for similar investments, interest rates, foreign exchange rates, volatility and credit spreads), either directly or indirectly;
- Level 3 Prices or valuations that require significant unobservable inputs (including GSAM's assumptions in determining fair value measurement).

Notes to Financial Statements (continued)

February 28, 2025 (Unaudited)

3. INVESTMENTS AND FAIR VALUE MEASUREMENTS (continued)

The Board of Trustees ("Trustees") has approved Valuation Procedures that govern the valuation of the portfolio investments held by the Funds, including investments for which market quotations are not readily available. With respect to the Funds' investments that do not have readily available market quotations, the Trustees have designated GSAM as the valuation designee to perform fair valuations pursuant to Rule 2a-5 under the Act (the "Valuation Designee") GSAM has day-to-day responsibility for implementing and maintaining internal controls and procedures related to the valuation of the Funds' investments. To assess the continuing appropriateness of pricing sources and methodologies, GSAM regularly performs price verification procedures and issues challenges as necessary to third party pricing vendors or brokers, and any differences are reviewed in accordance with the Valuation Procedures.

A. Level 1 and Level 2 Fair Value Investments — The valuation techniques and significant inputs used in determining the fair values for investments classified as Level 1 and Level 2 are as follows:

Equity Securities — Equity securities traded on a United States ("U.S.") securities exchange or the NASDAQ system, or those located on certain foreign exchanges, including but not limited to the Americas, are valued daily at their last sale price or official closing price on the principal exchange or system on which they are traded. If there is no sale or official closing price or such price is believed by GSAM to not represent fair value, equity securities will be valued at the valid closing bid price for long positions and at the valid closing ask price for short positions (i.e. where there is sufficient volume, during normal exchange trading hours). If no valid bid/ask price is available, the equity security will be valued pursuant to the Valuation Procedures and consistent with applicable regulatory guidance. To the extent these investments are actively traded, they are classified as Level 1 of the fair value hierarchy, otherwise they are generally classified as Level 2. Certain equity securities containing unique attributes may be classified as Level 2.

Unlisted equity securities for which market quotations are available are valued at the last sale price on the valuation date, or if no sale occurs, at the last bid price for long positions or the last ask price for short positions, and are generally classified as Level 2.

Debt Securities — Debt securities for which market quotations are readily available are valued daily on the basis of quotations supplied by dealers or an independent pricing service. The pricing services may use valuation models or matrix pricing, which consider: (i) yield or price with respect to bonds that are considered comparable in characteristics such as rating, interest rate and maturity date or (ii) quotations from securities dealers to determine current value. With the exception of treasury securities of G7 countries, which are generally classified as Level 1, these investments are generally classified as Level 2 of the fair value hierarchy.

- i. Commercial Paper Commercial paper normally represents short-term unsecured promissory notes issued in bearer form by banks or bank holding companies, corporations, finance companies and other issuers. Commercial paper consists of direct U.S. dollar-denominated obligations of domestic or foreign issuers. Asset-backed commercial paper is issued by a special purpose entity that is organized to issue the commercial paper and to purchase trade receivables or other financial assets.
- ii. Mortgage-Backed and Asset-Backed Securities Mortgage-backed securities represent direct or indirect participations in, or are collateralized by and payable from, mortgage loans secured by residential and/or commercial real estate property. Asset-backed securities include securities whose principal and interest payments are collateralized by pools of other assets or receivables. The value of certain mortgage-backed and asset-backed securities (including adjustable rate mortgage loans) may be particularly sensitive to changes in prevailing interest rates. The value of these securities may also fluctuate in response to the market's perception of the creditworthiness of the issuers.

Asset-backed securities may present credit risks that are not presented by mortgage-backed securities because they generally do not have the benefit of a security interest in collateral that is comparable to mortgage assets. Some asset-backed securities may only have a subordinated claim on collateral.

Stripped mortgage-backed securities are usually structured with two different classes: one that receives substantially all interest payments (interest-only, or "IO" and/or high coupon rate with relatively low principal amount, or "IOette"), and the other that receives substantially all principal payments (principal-only, or "PO") from a pool of mortgage loans. Little to no principal will be received at the maturity of an IO; as a result, periodic adjustments are recorded to reduce the cost of the security until maturity. These adjustments are included in interest income.

iii. Treasury Inflation Protected Securities — TIPS are treasury securities in which the principal amount is adjusted daily to keep pace with inflation, as measured by the U.S. Consumer Pricing Index for Urban Consumers. The repayment of the original bond principal upon maturity is guaranteed by the full faith and credit of the U.S. Government.

3. INVESTMENTS AND FAIR VALUE MEASUREMENTS (continued)

iv. When-Issued Securities and Forward Commitments — When-issued securities, including TBA ("To Be Announced") securities, are securities that are authorized but not yet issued in the market and purchased in order to secure what is considered to be an advantageous price or yield to a Fund. A forward commitment involves entering into a contract to purchase or sell securities, typically on an extended settlement basis, for a fixed price at a future date. The purchase of securities on a when-issued or forward commitment basis involves a risk of loss if the value of the security to be purchased declines before the settlement date. Conversely, the sale of securities on a forward commitment basis involves the risk that the value of the securities sold may increase before the settlement date. Although a Fund will generally purchase securities on a when-issued or forward commitment basis with the intention of acquiring the securities for its portfolio, the Fund may dispose of when-issued securities or forward commitments prior to settlement, which may result in a realized gain or loss. For financial reporting purposes, cash collateral that has been pledged to cover obligations of a Fund and cash collateral received, if any, is reported separately on the Statement(s) of Assets and Liabilities as receivables/payables for collateral on other investments. Non-cash collateral pledged by a Fund, if any, is noted in the Schedules of Investments.

Money Market Funds — Investments in the Goldman Sachs Financial Square Government Fund ("Underlying Money Market Fund") are valued at the NAV per share of the Institutional Share class on the day of valuation. These investments are generally classified as Level 1 of the fair value hierarchy. For information regarding the Underlying Money Market Fund's accounting policies and investment holdings, please see the Underlying Money Market Fund's shareholder report.

- B. Level 3 Fair Value Investments To the extent that significant inputs to valuation models and other alternative pricing sources are unobservable, or if quotations are not readily available, or if GSAM believes that such quotations do not accurately reflect fair value, the fair value of a Fund's investments may be determined under the Valuation Procedures. GSAM, consistent with its procedures and applicable regulatory guidance, may make an adjustment to the most recent valuation prices of either domestic or foreign securities in light of significant events to reflect what it believes to be the fair value of the securities at the time of determining a Fund's NAV. To the extent investments are valued using single source broker quotations obtained directly from the broker or passed through from third party pricing vendors, such investments are classified as Level 3 investments.

4. AGREEMENTS AND AFFILIATED TRANSACTIONS

A. Management Agreement — Under the Agreement, GSAM manages the Funds, subject to the general supervision of the Trustees.

As compensation for the services rendered pursuant to the Agreement, the assumption of the expenses related thereto and administration of the Funds' business affairs, including providing facilities, GSAM is entitled to a management fee, accrued daily and paid monthly, equal to an annual percentage rate of each Fund's average daily net assets.

The Funds operate under a unitary management fee structure. Under the unitary fee structure, GSAM is responsible for paying substantially all the expenses of each Fund, excluding payments under the Fund's 12b-1 plan (if any), interest expenses, taxes, acquired fund fees and expenses, brokerage fees, costs of holding shareholder meetings, litigation, indemnification and extraordinary expenses. As the Funds directly pay fees and expenses of the independent Trustees, the management fee collected by GSAM will be reduced by an amount equal to the fees and expenses paid by the Funds to the independent Trustees.

For the six months ended February 28, 2025, contractual and effective net management fees with GSAM were at the following rates:

Fund	Contractual Unitary Management Fee	Effective Unitary Management Fee	Effective Net Unitary Management Fee*
Goldman Sachs Access Emerging Markets USD Bond ETF	0.30%	0.43%	0.37%
Goldman Sachs Access High Yield Corporate Bond ETF	0.15%	0.31%	0.31%
Goldman Sachs Access Inflation Protected USD Bond ETF	0.12%	0.12%	0.12%
Goldman Sachs Access Investment Grade Corporate 1-5 Year Bond ETF	0.08%	0.13%	0.13%
Goldman Sachs Access Investment Grade Corporate Bond ETF	0.08%	0.13%	0.13%
Goldman Sachs Access Treasury 0-1 Year ETF	0.14%	0.14%	0.12%
Goldman Sachs Access U.S. Aggregate Bond ETF	0.08%	0.13%	0.12%
Goldman Sachs Access U.S. Preferred Stock and Hybrid Securities ETF	0.45%	0.45%	0.45%

^{*} Effective Net Unitary Management Fee includes the impact of management fee waivers, if any.

Effective February 1, 2025, Contractual Unitary Management Fee rates were reduced for the Access Emerging Markets USD Bond ETF, Access High Yield Corporate Bond ETF, Access Investment Grade Corporate 1-5 Year Bond ETF, Access Investment Grade Corporate Bond ETF and Access U.S. Aggregate Bond ETF to the rates in the above table. Prior to February 1, 2025 such rates were 0.45%, 0.34%, 0.14%, 0.14% and 0.14%, respectively.

Notes to Financial Statements (continued)

February 28, 2025 (Unaudited)

4. AGREEMENTS AND AFFILIATED TRANSACTIONS (continued)

GSAM has agreed to waive a portion of its management fee in order to achieve an effective net management fee rate of 0.12% as an annual percentage rate of average daily net assets of the Access Treasury 0-1 Year ETF. This arrangement will remain in effect through at least December 29, 2025 and prior to such dates the Investment Adviser may not terminate the arrangements without the approval of the Board of Trustees. Prior to February 1, 2025, GSAM waived a portion of its management fee for the Access Emerging Markets USD Bond ETF in order to achieve an effective net management fee rate of 0.39%. Effective February 1, 2025, GSAM will no longer waive a portion of its management fee for the Access Emerging Markets USD Bond ETF. For the six months ended February 28, 2025, GSAM waived \$17,124 and \$565,358 of the Funds' management fees for the Access Emerging Markets USD Bond ETF and the Access Treasury 0-1 Year ETF, respectively.

The Access Emerging Markets USD Bond ETF, Access High Yield Corporate Bond ETF, Access Inflation Protected USD Bond ETF, Access Investment Grade Corporate 1-5 Year Bond ETF, Access Investment Grade Corporate Bond ETF, Access U.S. Aggregate Bond ETF and Access U.S. Preferred Stock and Hybrid Securities ETF invest in Institutional Shares of the Goldman Sachs Financial Square Government Fund, which is an affiliated Underlying Fund. GSAM has agreed to waive a portion of its management fee payable by the Funds in an amount equal to the management fee it earns as an investment adviser to the affiliated Underlying Fund in which the Funds invest. For the six months ended February 28, 2025, the management fee waived by GSAM for each Fund was as follows:

Fund	Management Fee Waived
Access Emerging Markets USD Bond ETF	\$ 556
Access High Yield Corporate Bond ETF	1,225
Access Inflation Protected USD Bond ETF	315
Access Investment Grade Corporate 1-5 Year Bond ETF	11
Access Investment Grade Corporate Bond ETF	3,299
Access U.S. Aggregate Bond ETF	16,035
Access U.S. Preferred Stock and Hybrid Securities ETF	595

5. CREATION AND REDEMPTION OF CREATION UNITS

The Trust issues and redeems shares of the Funds only in Creation Units on a continuous basis through the Distributor, without an initial sales load, at NAV next determined after receipt, on any Business Day (as defined in the Statement of Additional Information), of an order in proper form. Shares of the Funds may only be purchased or redeemed by certain financial institutions (each an "Authorized Participant"). An Authorized Participant is either (1) a "Participating Party" or other participant in the clearing process through the Continuous Net Settlement System of the National Securities Clearing Corporation; or (2) a Depository Trust Company participant; which, in either case, must have executed an agreement with the Distributor. Retail investors will typically not qualify as an Authorized Participant or have the resources to buy and sell whole Creation Units. Therefore, they will be unable to purchase or redeem the shares directly from the Funds. Rather, most retail investors will purchase shares in the secondary market at market prices with the assistance of a broker and may be subject to customary brokerage commissions or fees. Fixed creation and redemption transaction fees are imposed in connection with creations and redemptions.

Notes to Financial Statements (continued)

February 28, 2025 (Unaudited)

5. CREATION AND REDEMPTION OF CREATION UNITS (continued)

Authorized Participants transacting in Creation Units for cash may also pay a variable charge to compensate the relevant fund for certain transaction costs (e.g. taxes on currency or other financial transactions, and brokerage costs) and market impact expenses relating to investing in portfolio securities. Such variable charges, if any, are included in "Proceeds from sale of shares" in the Statements of Changes in Net Assets.

As of February 28, 2025, the Funds' aggregate security unrealized gains and losses based on cost for U.S. federal income tax purposes were as follows:

	cess Emerging ets USD Bond ETF				Access Inflation tected USD Bond ETF	Access Investment Grade Corporate 1- Year Bond ETF		
Tax Cost	\$ 71,508,964	\$	143,377,984	\$	148,649,970	\$	6,901,368	
Gross unrealized gain	1,198,899		3,359,864		709,618		97,004	
Gross unrealized loss	(2,099,082)		(1,521,513)		(7,413,842)		(24,607)	
Net unrealized gain (loss)	\$ (900,183)	\$	1,838,351	\$	(6,704,224)	\$	72,397	
	Access Investment Grade Corporate Bond		cess Treasury 0-1	Acce	ess U.S. Aggregate	Access U.S. Preferred Stock and Hybrid		

	 ccess Investment de Corporate Bond ETF				ess U.S. Aggregate Bond ETF	Access U.S. Preferred Stock and Hybrid Securities ETF		
Tax Cost	\$ 887,406,045	\$	5,819,879,299	\$	446,531,747	\$	85,072,351	
Gross unrealized gain	8,062,885		3,426,496		4,527,741		1,394,599	
Gross unrealized loss	(40,702,349)		(129,210)		(13,180,975)		(729,830)	
Net unrealized gain (loss)	\$ (32,639,464)	\$	3,297,286	\$	(8,653,234)	\$	664,769	

The difference between GAAP-basis and tax-basis unrealized gains (losses) is due to wash sales, and differences in tax treatment of underlying fund investments, partnership investments, market discount accretion and premium amortization.

GSAM has reviewed the Funds' tax positions for all open tax years (the current year, and prior three tax years, as applicable) and has concluded that no provision for income tax is required in the Funds' financial statements. Such open tax year remains subject to examination and adjustment by tax authorities.

8. OTHER RISKS

The Funds' risks include, but are not limited to, the following:

Calculation Methodology Risk — The Index relies on various sources of information to assess the criteria of issuers included in the Index (or a Reference Index, if applicable), including fundamental information that may be based on assumptions and estimates. Neither the Fund, the Investment Adviser nor the Index Provider can offer assurances that the Index's calculation methodology or sources of information will provide a correct valuation of securities, nor can they guarantee the availability or timeliness of the production of the Index.

Foreign and Emerging Countries Risk — Investing in foreign markets may involve special risks and considerations not typically associated with investing in the U.S. Foreign securities may be subject to risk of loss because of more or less foreign government regulation; less public information; less stringent investor protections; less stringent accounting, corporate governance,

Notes to Financial Statements (continued)

February 28, 2025 (Unaudited)

8. OTHER RISKS (continued)

financial reporting and disclosure standards; and less economic, political and social stability in the countries in which a Fund invests. The imposition of sanctions, exchange controls (including repatriation restrictions), confiscation of assets and property, trade restrictions (including tariffs) and other government restrictions by the U.S. or other governments, or from problems in registration, settlement or custody, may also result in losses. The type and severity of sanctions and other similar measures, including counter sanctions and other retaliatory actions, that may be imposed could vary broadly in scope, and their impact is impossible to predict. For example, the imposition of sanctions and other similar measures could, among other things, cause a decline in the value and/or liquidity of securities issued by the sanctioned country or companies located in or economically tied to the sanctioned country and increase market volatility and disruption in the sanctioned country and throughout the world. Sanctions and other similar measures could limit or prevent a Fund from buying and selling securities (in the sanctioned country and other markets), significantly delay or prevent the settlement of securities transactions, and significantly impact the Fund's liquidity and performance. Foreign risk also involves the risk of negative foreign currency exchange rate fluctuations, which may cause the value of securities denominated in such foreign currency (or other instruments through which a Fund has exposure to foreign currencies) to decline in value. Currency exchange rates may fluctuate significantly over short periods of time. To the extent that a Fund also invests in securities of issuers located in, or economically tied to, emerging markets, these risks may be more pronounced.

Index Risk — FTSE Fixed Income LLC (the "Index Provider") constructs each Fund's Index in accordance with a rules-based methodology. A Fund will be negatively affected by general declines in the securities and asset classes represented in its Index. In addition, because the Funds are not "actively" managed, unless a specific security is removed from an Index, a Fund generally would not sell a security because the security's issuer was in financial trouble. Market disruptions and regulatory restrictions could have an adverse effect on a Fund's ability to adjust its exposure to the required levels in order to track the Index. A Fund also does not attempt to take defensive positions under any market conditions, including declining markets. Therefore, a Fund's performance could be lower than funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers. When the Index is rebalanced and a Fund in turn rebalances its portfolio to attempt to increase the correlation between the Fund's portfolio and the Index, any transaction costs and market exposure arising from such portfolio rebalancing may be borne directly by the Fund and its shareholders. The Index Provider may utilize third party data in constructing each Index, but it does not guarantee the accuracy or availability of any such third party data. The FTSE Goldman Sachs Emerging Markets USD Bond Index and FTSE Goldman Sachs US Preferred Stock and Hybrids Index are new and have limited performance history. Errors in index data, index computation or the construction of an Index in accordance with its methodology may occur from time to time and may not be identified and corrected by the Index Provider for a period of time or at all, which may have an adverse impact on the applicable Fund and its shareholders. In addition, neither a Fund, the Investment Adviser nor the Index Provider can guarantee the availability or timeliness of the production of the Index. The Index Provider may delay or change a scheduled rebalancing or reconstitution of an Index or the implementation of certain rules at its sole discretion. In such circumstances, a Fund, in replicating the composition of its Index, may have more or less exposure to a particular sector or individual company than had the Index been constructed in accordance with its stated methodology.

Industry Concentration Risk — In following its methodology, an Index from time to time may be concentrated to a significant degree in securities of issuers located in a single industry or group of industries. To the extent that an Index concentrates in the securities of issuers in a particular industry or group of industries, a Fund also will concentrate its investments to approximately the same extent. By concentrating its investments in an industry or group of industries, the applicable Fund may face more risks than if it were diversified broadly over numerous industries or groups of industries. If an Index is not concentrated in a particular industry or group of industries, the applicable Fund will not concentrate in a particular industry or group of industries.

Interest Rate Risk — When interest rates increase, fixed income securities or instruments held by a Fund will generally decline in value. Long-term fixed income securities or instruments will normally have more price volatility because of this risk than short-term fixed income securities or instruments. A wide variety of market factors can cause interest rates to rise, including central bank monetary policy, rising inflation and changes in general economic conditions. Changing interest rates may have unpredictable effects on the markets, may result in heightened market volatility and may detract from Fund performance. In addition, changes in monetary policy may exacerbate the risks associated with changing interest rates. Funds with longer average portfolio durations will generally be more sensitive to changes in interest rates than funds with a shorter average portfolio duration. Fluctuations in interest rates may

8. OTHER RISKS (continued)

also affect the liquidity of fixed income securities and instruments held by the Funds. A sudden or unpredictable increase in interest rates may cause volatility in the market and may decrease the liquidity of the Fund's investments, which would make it harder for the Fund to sell its investments at an advantageous time.

Large Shareholder Transaction Risk — Certain shareholders, including other funds advised by the Investment Adviser, may from time to time own a substantial amount of the Fund's Shares. In addition, a third party investor, the Investment Adviser or an affiliate of the Investment Adviser, an authorized participant, a lead market maker, or another entity (i.e., a seed investor) may invest in the Fund and hold its investment solely to facilitate commencement of the Fund or to facilitate the Fund's achieving a specified size or scale. Any such investment may be held for a limited period of time. There can be no assurance that any large shareholder would not redeem its investment, that the size of the Fund would be maintained at such levels or that the Fund would continue to meet applicable listing requirements. Redemptions by large shareholders could have a significant negative impact on the Fund, including on the Fund's liquidity. In addition, transactions by large shareholders may account for a large percentage of the trading volume on NYSE Arca, Cboe BZX and NASDAQ and may, therefore, have a material upward or downward effect on the market price of the Shares.

Liquidity Risk — A Fund may make investments that are illiquid or that may become less liquid in response to market developments or adverse investor perceptions. Illiquid investments may be more difficult to value. To the extent a Fund engages in cash redemptions, liquidity risk may also refer to the risk that a Fund will not be able to pay redemption proceeds within the allowable time period or without significant dilution to remaining investors' interests because of unusual market conditions, declining prices of the securities sold, an unusually high volume of redemption requests, or other reasons. To meet redemption requests, a Fund may be forced to sell investments at an unfavorable time and/or under unfavorable conditions. If a Fund is forced to sell securities at an unfavorable time and/or under unfavorable conditions, such sales may adversely affect the Fund's NAV and dilute remaining investors' interests. Liquidity risk may be the result of, among other things, the reduced number and capacity of traditional market participants to make a market in fixed income securities or the lack of an active market. The potential for liquidity risk may be magnified by a rising interest rate environment or other circumstances where investor redemptions from fixed income funds may be higher than normal, potentially causing increased supply in the market due to selling activity. These risks may be more pronounced in connection with a Fund's investments in securities of issuers located in emerging market countries. Redemptions by large shareholders may have a negative impact on a Fund's liquidity.

Market and Credit Risks — In the normal course of business, a Fund trades financial instruments and enters into financial transactions where risk of potential loss exists due to changes in the market (market risk). The value of the securities in which a Fund invests may go up or down in response to the prospects of individual companies, particular sectors or governments and/or general economic conditions throughout the world due to increasingly interconnected global economies and financial markets. Events such as war, military conflict, geopolitical disputes, acts of terrorism, social or political unrest, natural disasters, recessions, inflation, rapid interest rate changes, supply chain disruptions, tariffs and other restrictions on trade, sanctions or the spread of infectious illness or other public health threats, or the threat or potential of one or more such events and developments, could also significantly impact a Fund and its investments. Additionally, a Fund may also be exposed to credit risk in the event that an issuer or guarantor fails to perform or that an institution or entity with which the Fund has unsettled or open transactions defaults.

Market Trading Risk — Each Fund faces numerous market trading risks, including disruptions to creations and redemptions, the existence of extreme market volatility or potential lack of an active trading market for Shares. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may pay more for, or receive less than, the underlying value of the Shares, respectively. The Investment Adviser cannot predict whether Shares will trade below, at or above their NAV. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the securities of a Fund's Index trading individually or in the aggregate at any point in time.

Sampling Risk — A Fund's use of a representative sampling approach will result in its holding a smaller number of securities than are in the Index. As a result, an adverse development respecting a security held by a Fund could result in a greater decline in NAV than would be the case if a Fund held all of the securities in the Index. Conversely, a positive development relating to a security in the Index that is not held by a Fund could cause a Fund to underperform the Index. To the extent the assets in a Fund are smaller, these risks will be greater.

Notes to Financial Statements (continued)

8. OTHER RISKS (continued)

Tracking Error Risk — Tracking error is the divergence of a Fund's performance from that of its Index. The performance of a Fund may diverge from that of its Index for a number of reasons. Tracking error may occur because of transaction costs, a Fund's holding of cash, differences in accrual of dividends, changes to its Index or the need to meet new or existing regulatory requirements. Unlike a Fund, the returns of an Index are not reduced by investment and other operating expenses, including the trading costs associated with implementing changes to its portfolio of investments. Tracking error risk may be heightened during times of market volatility or other unusual market conditions.

9. INDEMNIFICATIONS

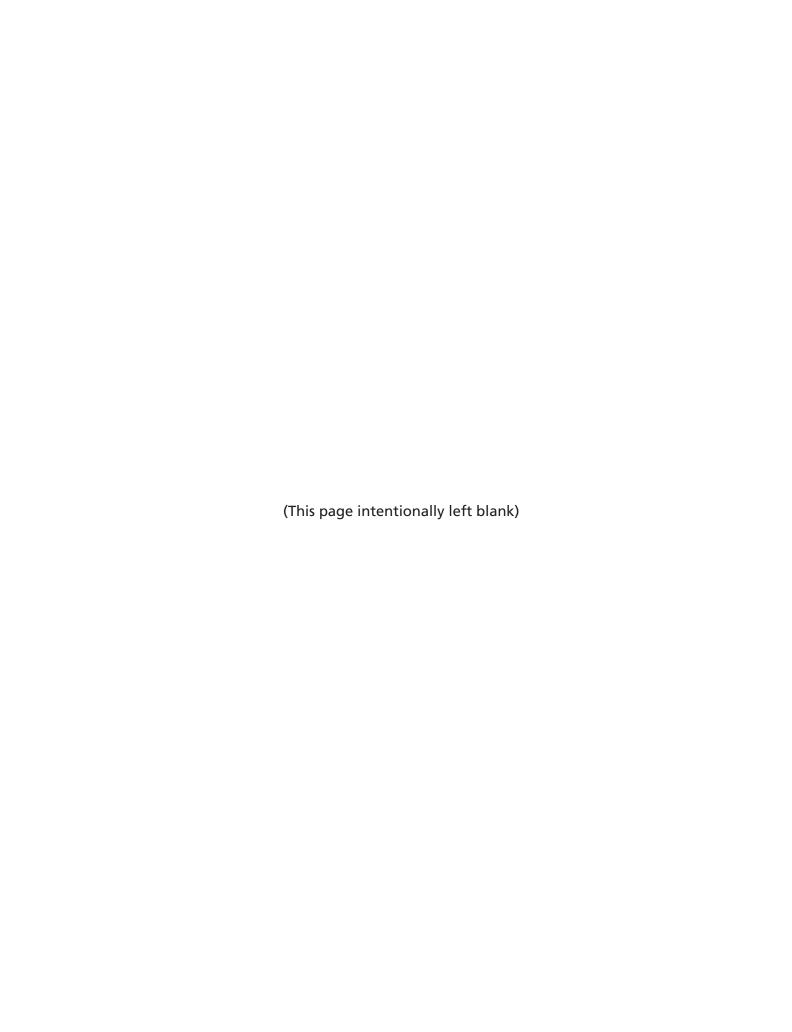

Under the Trust's organizational documents, its Trustees, officers, employees and agents are indemnified, to the extent permitted by the Act and state law, against certain liabilities that may arise out of performance of their duties to the Funds. Additionally, in the course of business, the Funds enter into contracts that contain a variety of indemnification clauses. The Funds' maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Funds that have not yet occurred. However, GSAM believes the risk of loss under these arrangements to be remote.

10. OTHER MATTERS

The Funds adopted Fund Accounting Standards Board Accounting Standards Update 2023-07, Segment Reporting (Topic 280) - Improvements to Reportable Segment Disclosures. Each Fund operates in one segment. The segment derives its revenues from Fund investments made in accordance with the defined investment strategy of the Fund, as prescribed in the Funds' prospectus. The Chief Operating Decision Maker ("CODM") is the Investment Adviser. The CODM monitors and actively manages the operating results of each Fund. The financial information the CODM leverages to assess the segment's performance and to make decisions for the Funds' single segment, is consistent with that presented within each Fund's financial statements.

11. SUBSEQUENT EVENTS

Subsequent events have been evaluated through the date of issuance, and GSAM has concluded that there is no impact requiring adjustment or disclosure in the financial statements.
