The percentage shown for each investment category reflects the value of investments in that category as a percentage of net assets.

- (a) Exempt from registration under Rule 144A of the Securities Act of 1933.
- (b) Variable rate security. Interest rate or distribution rate disclosed is that which is in effect on February 28, 2025.
- (c) When-issued security.
- (d) TBA (To Be Announced) Securities are purchased on a forward commitment basis with an approximate principal amount and no defined maturity date. The actual principal and maturity date will be determined upon settlement when the specific mortgage pools are assigned. Total market value of TBA securities (excluding forward sales contracts, if any) amounts to \$9,137,110 which represents approximately 1.2% of the Fund's net assets as of February 28, 2025.
- (e) Interest rates represent either the stated coupon rate, annualized yield on date of purchase for discounted securities, or, for floating rate securities, the current reset rate, which is based upon current interest rate indices.
- (f) Represents an affiliated issuer.

#### 1. ORGANIZATION

Goldman Sachs ETF Trust (the "Trust") is an open-end management investment company, registered under the Investment Company Act of 1940, as amended (the "Act"), consisting of multiple series. The Trust was organized as a Delaware statutory trust on December 16, 2009. The following table lists the series of the Trust that is included in this report (the "Fund") along with its diversification status under the Act:

Fund Diversified Non-Diversified

Goldman Sachs Ultra Short Bond ETF

The investment objective of the Fund is to provide current income with preservation of capital.

Goldman Sachs Asset Management, L.P. ("GSAM"), an affiliate of Goldman Sachs & Co. LLC ("Goldman Sachs"), serves as investment adviser to the Fund pursuant to a management agreement (the "Agreement") with the Trust. The Fund is an exchange-traded fund ("ETF"). Shares of the Ultra Short Bond ETF are listed and traded on the Cboe BZX Exchange, Inc. ("Cboe BZX"). Market prices for the Fund's shares may be different from their net asset value ("NAV"). The Fund issues and redeems shares at its NAV only in blocks of a specified number of shares, or multiples thereof, referred to as "Creation Units". Creation Units are issued and redeemed generally for a designated portfolio of securities (including any portion of such securities for which cash may be substituted) and a specified amount of cash. Shares generally trade in the secondary market in quantities less than a Creation Unit at market prices that change throughout the day. Only those that have entered into an authorized participant agreement with ALPS Distributors, Inc. (the "Distributor") may do business directly with the Fund.

#### 2. SIGNIFICANT ACCOUNTING POLICIES

The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") and require management to make estimates and assumptions that may affect the reported amounts and disclosures. Actual results may differ from those estimates and assumptions. The Fund is an investment company under GAAP and follows the accounting and reporting guidance applicable to investment companies.

- A. Investment Valuation The Fund's valuation policy is to value investments at fair value.
- B. Investment Income and Investments Investment income includes interest income, dividend income, and securities lending income, if any. Interest income is accrued daily and adjusted for amortization of premiums and accretion of discounts. Dividend income is recognized on ex-dividend date or, for certain foreign securities, as soon as such information is obtained subsequent to the ex-dividend date. Non-cash dividends, if any, are recorded at the fair market value of the securities received. Investment transactions are reflected on trade date. Realized gains and losses are calculated using identified cost. Investment transactions are recorded on the following business day for daily NAV calculations. Investment income is recorded net of any foreign withholding taxes, less any amounts reclaimable. The Fund may file withholding tax reclaims in certain jurisdictions to recover a portion of amounts previously withheld. Any foreign capital gains tax is accrued daily based upon net unrealized gains, and is payable upon sale of such investments. Distributions received from the Fund's investments in U.S. real estate investment trusts ("REITs") may be characterized as ordinary income, net capital gain and/or a return of capital. A return of capital is recorded by the Fund as a reduction to the cost basis of the REIT.
- C. Expenses Expenses incurred directly by the Fund are charged to the Fund, and certain expenses incurred by the Trust that may not solely relate to the Fund are allocated to the Fund and the other applicable funds of the Trust on a straight-line and/or prorata basis, depending upon the nature of the expenses, and are accrued daily.
- D. Federal Taxes and Distributions to Shareholders It is the Fund's policy to comply with the requirements of the Internal Revenue Code of 1986, as amended (the "Code"), applicable to regulated investment companies and to distribute each year substantially all of its investment company taxable income and capital gains to its shareholders. Accordingly, the Fund is not required to make any provisions for the payment of federal income tax. Distributions to shareholders are recorded on the ex-dividend date. Income distributions, if any, are declared and paid monthly. Capital gains distributions, if any, are declared and paid annually.

Net capital losses, if any, are carried forward to future fiscal years and may be used to the extent allowed by the Code to offset any future capital gains. Losses that are carried forward will retain their character as either short-term or long-term capital losses. Utilization of capital loss carryforwards will reduce the requirement of future capital gains distributions.

# Notes to Financial Statements (continued)

February 28, 2025 (Unaudited)

### 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

The characterization of distributions to shareholders for financial reporting purposes is determined in accordance with federal income tax rules, which may differ from GAAP. The source of the Fund's distributions may be shown in the accompanying financial statements as either from distributable earnings or capital. Certain components of the Fund's net assets on the Statement of Assets and Liabilities reflect permanent GAAP/tax differences based on the appropriate tax character.

### 3. INVESTMENTS AND FAIR VALUE MEASUREMENTS

U.S. GAAP defines the fair value of a financial instrument as the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price); the Fund's policy is to use the market approach. GAAP establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The level in the fair value hierarchy within which the fair value measurement in its entirety falls shall be determined based on the lowest level input that is significant to the fair value measurement in its entirety. The levels used for classifying investments are not necessarily an indication of the risk associated with investing in these investments. The three levels of the fair value hierarchy are described below:

Level 1 — Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2 — Quoted prices in markets that are not active or financial instruments for which significant inputs are observable (including, but not limited to, quoted prices for similar investments, interest rates, foreign exchange rates, volatility and credit spreads), either directly or indirectly;

Level 3 — Prices or valuations that require significant unobservable inputs (including GSAM's assumptions in determining fair value measurement).

The Board of Trustees ("Trustees") has approved Valuation Procedures that govern the valuation of the portfolio investments held by the Fund, including investments for which market quotations are not readily available. With respect to the Fund's investments that do not have readily available market quotations, the Trustees have designated GSAM as the valuation designee to perform fair valuations pursuant to Rule 2a-5 under the Act (the "Valuation Designee") GSAM has day-to-day responsibility for implementing and maintaining internal controls and procedures related to the valuation of the Fund's investments. To assess the continuing appropriateness of pricing sources and methodologies, GSAM regularly performs price verification procedures and issues challenges as necessary to third party pricing vendors or brokers, and any differences are reviewed in accordance with the Valuation Procedures.

A. Level 1 and Level 2 Fair Value Investments — The valuation techniques and significant inputs used in determining the fair values for investments classified as Level 1 and Level 2 are as follows:

Debt Securities— Debt securities for which market quotations are readily available are valued daily on the basis of quotations supplied by dealers or an independent pricing service. The pricing services may use valuation models or matrix pricing, which consider: (i) yield or price with respect to bonds that are considered comparable in characteristics such as rating, interest rate and maturity date or (ii) quotations from securities dealers to determine current value. With the exception of treasury securities of G7 countries, which are generally classified as Level 1, these investments are generally classified as Level 2 of the fair value hierarchy.

- i. Commercial Paper Commercial paper normally represents short-term unsecured promissory notes issued in bearer form by banks or bank holding companies, corporations, finance companies and other issuers. Commercial paper consists of direct U.S. dollar-denominated obligations of domestic or foreign issuers. Asset-backed commercial paper is issued by a special purpose entity that is organized to issue the commercial paper and to purchase trade receivables or other financial assets.
- ii. Mortgage-Backed and Asset-Backed Securities Mortgage-backed securities represent direct or indirect participations in, or are collateralized by and payable from, mortgage loans secured by residential and/or commercial real estate property. Asset-backed securities include securities whose principal and interest payments are collateralized by pools of other assets or receivables. The value of certain mortgage-backed and asset-backed securities (including adjustable rate mortgage loans) may be particularly sensitive to changes in prevailing interest rates. The value of these securities may also fluctuate in response to the market's perception of the creditworthiness of the issuers.

### 3. INVESTMENTS AND FAIR VALUE MEASUREMENTS (continued)

Asset-backed securities may present credit risks that are not presented by mortgage-backed securities because they generally do not have the benefit of a security interest in collateral that is comparable to mortgage assets. Some asset-backed securities may only have a subordinated claim on collateral.

Stripped mortgage-backed securities are usually structured with two different classes: one that receives substantially all interest payments (interest-only, or "IO" and/or high coupon rate with relatively low principal amount, or "IOette"), and the other that receives substantially all principal payments (principal-only, or "PO") from a pool of mortgage loans. Little to no principal will be received at the maturity of an IO; as a result, periodic adjustments are recorded to reduce the cost of the security until maturity. These adjustments are included in interest income.

iii. When-Issued Securities and Forward Commitments — When-issued securities, including TBA ("To Be Announced") securities, are securities that are authorized but not yet issued in the market and purchased in order to secure what is considered to be an advantageous price or yield to the Fund. A forward commitment involves entering into a contract to purchase or sell securities, typically on an extended settlement basis, for a fixed price at a future date. The purchase of securities on a when-issued or forward commitment basis involves a risk of loss if the value of the security to be purchased declines before the settlement date. Conversely, the sale of securities on a forward commitment basis involves the risk that the value of the securities sold may increase before the settlement date. Although the Fund will generally purchase securities on a when-issued or forward commitment basis with the intention of acquiring the securities for its portfolio, the Fund may dispose of when-issued securities or forward commitments prior to settlement, which may result in a realized gain or loss. For financial reporting purposes, cash collateral that has been pledged to cover obligations of the Fund and cash collateral received, if any, is reported separately on the Statement of Assets and Liabilities as receivables/payables for collateral on other investments. Non-cash collateral pledged by the Fund, if any, is noted in the Schedule of Investments.

Money Market Funds — Investments in the Goldman Sachs Financial Square Government Fund ("Underlying Money Market Fund") are valued at the NAV per share of the Institutional Share class on the day of valuation. These investments are generally classified as Level 1 of the fair value hierarchy. For information regarding the Underlying Money Market Fund's accounting policies and investment holdings, please see the Underlying Money Market Fund's shareholder report.

- B. Level 3 Fair Value Investments To the extent that significant inputs to valuation models and other alternative pricing sources are unobservable, or if quotations are not readily available, or if GSAM believes that such quotations do not accurately reflect fair value, the fair value of the Fund's investments may be determined under the Valuation Procedures. GSAM, consistent with its procedures and applicable regulatory guidance, may make an adjustment to the most recent valuation prices of either domestic or foreign securities in light of significant events to reflect what it believes to be the fair value of the securities at the time of determining the Fund's NAV. To the extent investments are valued using single source broker quotations obtained directly from the broker or passed through from third party pricing vendors, such investments are classified as Level 3 investments.
- C. Fair Value Hierarchy The following is a summary of the Fund's investments classified in the fair value hierarchy as of February 28, 2025:

# **Ultra Short Bond ETF**

Investment Type	Level 1	Level 2	Level 3		
Assets					
Fixed Income					
Asset-Backed Securities	\$ _	\$ 188,491,306	\$	_

February 28, 2025 (Unaudited)

### 4. AGREEMENTS AND AFFILIATED TRANSACTIONS

A. Management Agreement — Under the Agreement, GSAM manages the Fund, subject to the general supervision of the Trustees.

As compensation for the services rendered pursuant to the Agreement, the assumption of the expenses related thereto and administration of the Fund's business affairs, including providing facilities, GSAM is entitled to a management fee, accrued daily and paid monthly, equal to an annual percentage rate of the Fund's average daily net assets.

The Fund operates under a unitary management fee structure. Under the unitary fee structure, GSAM is responsible for paying substantially all the expenses of the Fund, excluding payments under the Fund's 12b-1 plan (if any), interest expenses, taxes, acquired fund fees and expenses, brokerage fees, costs of holding shareholder meetings, litigation, indemnification and extraordinary expenses. As the Fund directly pays fees and expenses of the independent Trustees, the management fee collected by GSAM will be reduced by an amount equal to the fees and expenses paid by the Fund to the independent Trustees.

For the six months ended February 28, 2025, contractual and effective net management fees with GSAM were at the following rates:

Fund	Contractual Unitary Management Fee	Effective Net Unitary Management Fee*
Ultra Short Bond ETF	0.20%	0.15%

<sup>\*</sup> Effective Net Unitary Management Fee includes the impact of management fee waivers, if any.

GSAM has agreed to waive a portion of its management fee in order to achieve an effective net management fee rate of 0.16% as an annual percentage rate of average daily net assets of the Ultra Short Bond ETF. This arrangement will remain in effect through at least December 29, 2025, and prior to such date, the Investment Adviser may not terminate the arrangement without the approval of the Trustees. For the six months ended February 28, 2025, GSAM waived \$137,776 of the Fund's management fees.

The Ultra Short Bond ETF invests in Institutional Shares of the Goldman Sachs Financial Square Government Fund, which is an affiliated Underlying Fund. GSAM has agreed to waive a portion of its management fee payable by the Fund in an amount equal to the management fee it earns as an investment adviser to the affiliated Underlying Fund in which the Fund invests. For the six months ended February 28, 2025, the management fee waived by GSAM for the Fund was as follows:

Fund	Fee Waived
Ultra Short Bond ETF	\$ 21,089

B. Other Transactions with Affiliates — The following table provides information about the Fund's investments in the Goldman Sachs Financial Square Government Fund for the six months ended February 28, 2025:

#### **Ultra Short Bond ETF**

		Beginning value as of August 31,				End	ing value as of	Shares as of			
Underlying Fund		2024	Pu	rchases at Cost	Pro	roceeds from Sales		February 28, 2025 February 28, 202		Divid	end Income
Goldman Sachs Financial Square Government Fund - Institutional Shares											
	\$	20,893,997	\$	386,537,779	\$	367,214,408	\$	40,217,368	40,217,368	\$	611,874

### 5. CREATION AND REDEMPTION OF CREATION UNITS

The Trust issues and redeems shares of the Fund only in Creation Units on a continuous basis through the Distributor, without an initial sales load, at NAV next determined after receipt, on any Business Day (as defined in the Statement of Additional Information), of an order in proper form. Shares of the Fund may only be purchased or redeemed by certain financial institutions (each an "Authorized Participant"). An Authorized Participant is either (1) a "Participating Party" or other participant in the clearing process through the Continuous Net Settlement System of the National Securities Clearing Corporation; or (2) a Depository Trust Company participant; which, in either case, must have executed an agreement with the Distributor. Retail investors will typically not qualify as

## 5. CREATION AND REDEMPTION OF CREATION UNITS (continued)

an Authorized Participant or have the resources to buy and sell whole Creation Units. Therefore, they will be unable to purchase or redeem the shares directly from the Fund. Rather, most retail investors will purchase shares in the secondary market at market prices with the assistance of a broker and may be subject to customary brokerage commissions or fees. Fixed creation and redemption transaction fees are imposed in connection with creations and redemptions.

Authorized Participants transacting in Creation Units for cash may also pay a variable charge to compensate the relevant fund for certain transaction costs (e.g. taxes on currency or other financial transactions, and brokerage costs) and market impact expenses relating to investing in portfolio securities. Such variable charges, if any, are included in "Proceeds from sale of shares" in the Statement of Changes in Net Assets.

Share activity is as follows:

	Ultra Short Bond ETF									
	For the Six Months E February 28, (Unaudite	nded 2025		For the Fiscal Year Ended August 31, 2024						
	Shares		Dollars	Shares		Dollars				
Fund Share Activity										
Shares sold	6,300,000	\$	317,331,613	5,475,000	\$	274,297,911				
Shares redeemed	(3,575,000)		(180,201,385)	(4,750,000)		(238,449,615)				
NET INCREASE IN SHARES	2,725,000	\$	137,130,228	725,000	\$	35,848,296				

### 6. PORTFOLIO SECURITIES TRANSACTIONS

The cost of purchases and proceeds from sales and maturities of long-term securities for the six months ended February 28, 2025, were as follows:

	Purchase of			Purchases (Excluding		Sales and Maturities of		Sales and Maturities (Excluding	
Fund	U.S. Government and Agency Obligations			U.S. Government and Agency Obligations)		U.S. Government and Agency Obligations		U.S. Government and Agency Obligations)	
Ultra Short Bond ETF	\$	3,318,807	\$	535,251,340	\$	25,931,699	\$	455,529,369	

### 7. TAX INFORMATION

As of the Fund's most recent fiscal year end, August 31, 2024, the Fund's capital loss carryforwards and certain timing differences on a tax basis were as follows:

	Ultra Short Bond ETF
Capital loss carryforwards:	
Perpetual Short-Term	\$ (888,028)
Perpetual Long-Term	(1,429,953)
Total capital loss carryforwards	(2,317,981)
Timing differences — (Post-October Capital Loss Deferral)	(138,521)

# Notes to Financial Statements (continued)

February 28, 2025 (Unaudited)

### 7. TAX INFORMATION (continued)

As of February 28, 2025, the Fund's aggregate security unrealized gains and losses based on cost for U.S. federal income tax purposes were as follows:

	Ultra	Ultra Short Bond ETF	
Tax Cost	\$	758,003,650	
Gross unrealized gain		3,119,926	
Gross unrealized loss		(1,174,145)	
Net unrealized gain (loss)	\$	1,945,781	

The difference between GAAP-basis and tax-basis unrealized gains (losses) is attributable primarily to wash sales and differences in the tax treatment of market discount accretion and premium amortization.

GSAM has reviewed the Fund's tax positions for all open tax years (the current year, and prior three tax years, as applicable) and has concluded that no provision for income tax is required in the Fund's financial statements. Such open tax year remains subject to examination and adjustment by tax authorities.

#### 8. OTHER RISKS

The Fund's risks include, but are not limited to, the following:

Foreign and Emerging Countries Risk — Investing in foreign markets may involve special risks and considerations not typically associated with investing in the U.S. Foreign securities may be subject to risk of loss because of more or less foreign government regulation; less public information; less stringent investor protections; less stringent accounting, corporate governance, financial reporting and disclosure standards; and less economic, political and social stability in the countries in which the Fund invests. The imposition of sanctions, exchange controls (including repatriation restrictions), confiscation of assets and property, trade restrictions (including tariffs) and other government restrictions by the U.S. or other governments, or from problems in registration, settlement or custody, may also result in losses. The type and severity of sanctions and other similar measures, including counter sanctions and other retaliatory actions, that may be imposed could vary broadly in scope, and their impact is impossible to predict. For example, the imposition of sanctions and other similar measures could, among other things, cause a decline in the value and/or liquidity of securities issued by the sanctioned country or companies located in or economically tied to the sanctioned country and increase market volatility and disruption in the sanctioned country and throughout the world. Sanctions and other similar measures could limit or prevent the Fund from buying and selling securities (in the sanctioned country and other markets), significantly delay or prevent the settlement of securities transactions, and significantly impact the Fund's liquidity and performance. Foreign risk also involves the risk of negative foreign currency exchange rate fluctuations, which may cause the value of securities denominated in such foreign currency (or other instruments through which the Fund has exposure to foreign currencies) to decline in value. Currency exchange rates may fluctuate significantly over short periods of time.

Industry Concentration Risk — In following its methodology, an Index from time to time may be concentrated to a significant degree in securities of issuers located in a single industry or group of industries. Concentrating Fund investments in a limited number of issuers conducting business in the same industry or group of industries will subject the Fund to a greater risk of loss as a result of adverse economic, business, political, environmental or other developments than if its investments were diversified across different industries.

Interest Rate Risk — When interest rates increase, fixed income securities or instruments held by the Fund will generally decline in value. Long-term fixed income securities or instruments will normally have more price volatility because of this risk than short term fixed income securities or instruments. A wide variety of market factors can cause interest rates to rise, including central bank monetary policy, rising inflation and changes in general economic conditions. Changing interest rates may have unpredictable effects on the markets, may result in heightened market volatility and may detract from Fund performance. In addition, changes in monetary policy may exacerbate the risks associated with changing interest rates. Funds with longer average portfolio durations will generally be more sensitive to changes in interest rates than funds with a shorter average portfolio duration. Fluctuations in interest rates may

### 8. OTHER RISKS (continued)

also affect the liquidity of fixed income securities and instruments held by the Fund. A sudden or unpredictable increase in interest rates may cause volatility in the market and may decrease the liquidity of the Fund's investments, which would make it harder for the Fund to sell its investments at an advantageous time.

Large Shareholder Transaction Risk — Certain shareholders, including other funds advised by the Investment Adviser, may from time to time own a substantial amount of the Fund's Shares. In addition, a third party investor, the Investment Adviser or an affiliate of the Investment Adviser, an authorized participant, a lead market maker, or another entity (i.e., a seed investor) may invest in the Fund and hold its investment solely to facilitate commencement of the Fund or to facilitate the Fund's achieving a specified size or scale. Any such investment may be held for a limited period of time. There can be no assurance that any large shareholder would not redeem its investment, that the size of the Fund would be maintained at such levels or that the Fund would continue to meet applicable listing requirements. Redemptions by large shareholders could have a significant negative impact on the Fund, including on the Fund's liquidity. In addition, transactions by large shareholders may account for a large percentage of the trading volume on the Cboe BZX and may, therefore, have a material upward or downward effect on the market price of the Shares.

Liquidity Risk — The Fund may make investments that are illiquid or that may become less liquid in response to market developments or adverse investor perceptions. Illiquid investments may be more difficult to value. To the extent the Fund engages in cash redemptions, liquidity risk may also refer to the risk that the Fund will not be able to pay redemption proceeds within the allowable time period or without significant dilution to remaining investors' interests because of unusual market conditions, declining prices of the securities sold, an unusually high volume of redemption requests, or other reasons. To meet redemption requests, the Fund may be forced to sell investments at an unfavorable time and/or under unfavorable conditions. If the Fund is forced to sell securities at an unfavorable time and/or under unfavorable conditions, such sales may adversely affect the Fund's NAV and dilute remaining investors' interests. Liquidity risk may be the result of, among other things, the reduced number and capacity of traditional market participants to make a market in fixed income securities or the lack of an active market. The potential for liquidity risk may be magnified by a rising interest rate environment or other circumstances where investor redemptions from fixed income funds may be higher than normal, potentially causing increased supply in the market due to selling activity. These risks may be more pronounced in connection with the Fund's investments in securities of issuers located in emerging market countries. Redemptions by large shareholders may have a negative impact on the Fund's liquidity.

Market and Credit Risks — In the normal course of business, the Fund trades financial instruments and enters into financial transactions where risk of potential loss exists due to changes in the market (market risk). The value of the securities in which the Fund invests may go up or down in response to the prospects of individual companies, particular sectors or governments and/ or general economic conditions throughout the world due to increasingly interconnected global economies and financial markets. Events such as war, military conflict, geopolitical disputes, acts of terrorism, social or political unrest, natural disasters, recessions, inflation, rapid interest rate changes, supply chain disruptions, tariffs and other restrictions on trade, sanctions or the spread of infectious illness or other public health threats, or the threat or potential of one or more such events and developments, could also significantly impact the Fund and its investments. Additionally, the Fund may also be exposed to credit risk in the event that an issuer or guarantor fails to perform or that an institution or entity with which the Fund has unsettled or open transactions defaults.

Market Trading Risk — The Fund faces numerous market trading risks, including disruptions to creations and redemptions, the existence of extreme market volatility or potential lack of an active trading market for Shares. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may pay more for, or receive less than, the underlying value of the Shares, respectively. The Investment Adviser cannot predict whether Shares will trade below, at or above their NAV.

Mortgage-Backed and Other Asset-Backed Securities Risk — Mortgage-related and other asset-backed securities are subject to credit/ default, interest rate and certain additional risks, including "extension risk" (i.e., in periods of rising interest rates, issuers may pay principal later than expected) and "prepayment risk" (i.e., in periods of declining interest rates, issuers may pay principal more quickly than expected, causing the Fund to reinvest proceeds at lower prevailing interest rates). Due to these risks, asset-backed securities may become more volatile in certain interest rate environments. Mortgage-backed securities offered by non-governmental issuers are subject to other risks as well, including failures of private insurers to meet their obligations and unexpectedly high rates of default on the mortgages backing the securities, particularly during periods of rising interest rates. Other asset-backed securities

# Notes to Financial Statements (continued)

February 28, 2025 (Unaudited)

## 8. OTHER RISKS (continued)

are subject to risks similar to those associated with mortgage-backed securities, as well as risks associated with the nature and servicing of the assets backing the securities. Asset-backed securities may not have the benefit of a security interest in collateral comparable to that of mortgage assets, resulting in additional credit risk.

### 9. INDEMNIFICATIONS

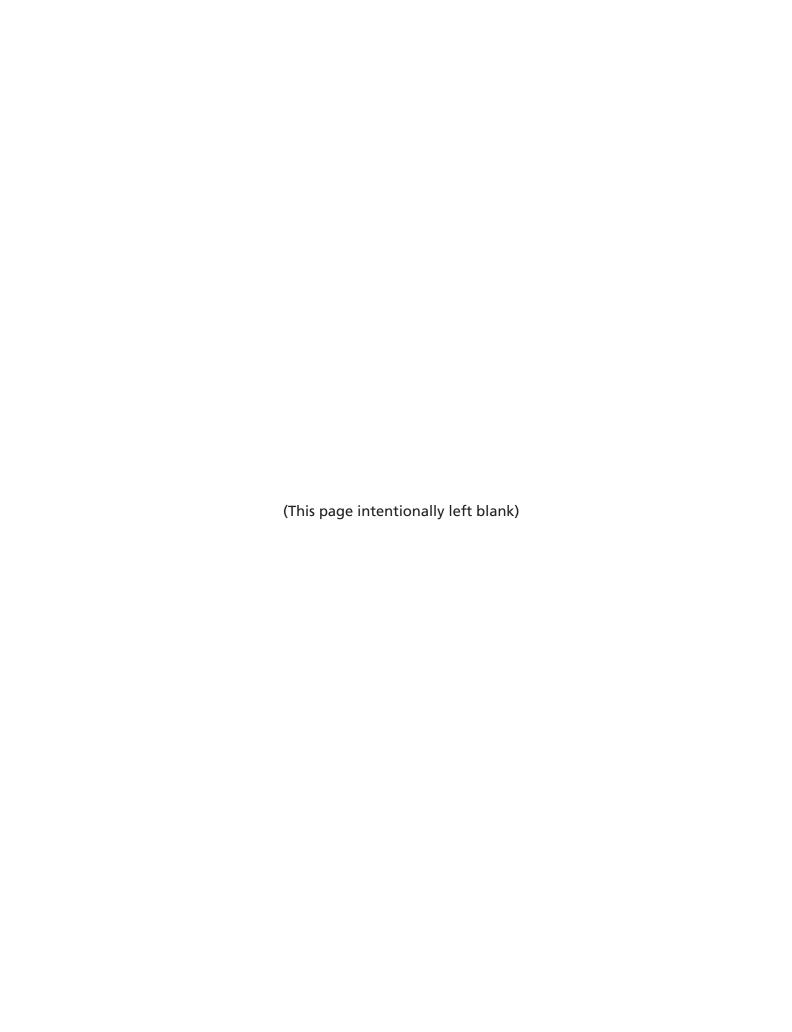

Under the Trust's organizational documents, its Trustees, officers, employees and agents are indemnified, to the extent permitted by the Act and state law, against certain liabilities that may arise out of performance of their duties to the Fund. Additionally, in the course of business, the Fund enters into contracts that contain a variety of indemnification clauses. The Fund's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Fund that have not yet occurred. However, GSAM believes the risk of loss under these arrangements to be remote.

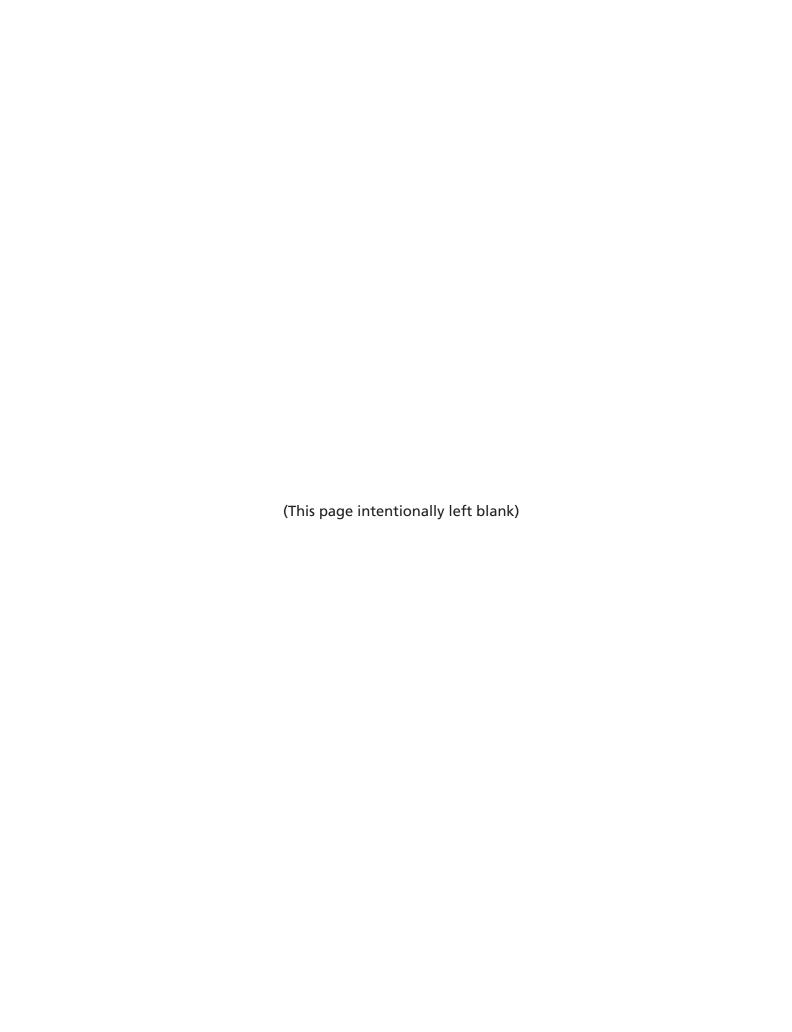

### 10. OTHER MATTERS

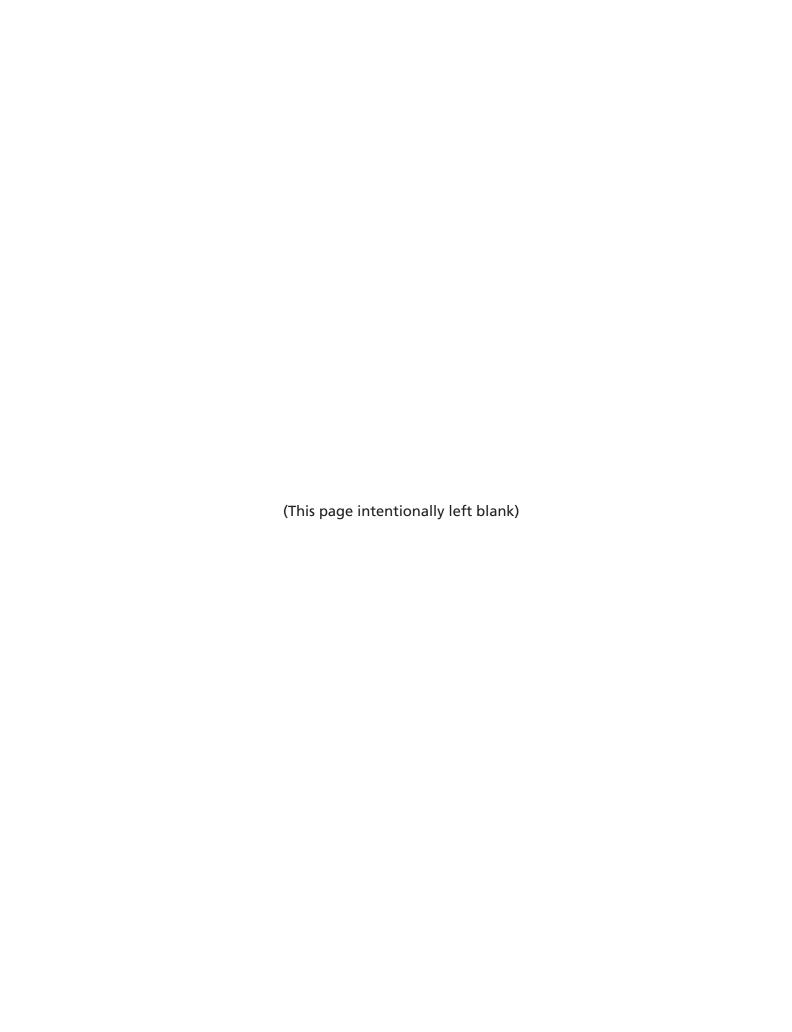

The Fund adopted Fund Accounting Standards Board Accounting Standards Update 2023-07, Segment Reporting (Topic 280) - Improvements to Reportable Segment Disclosures. The Fund operates in one segment. The segment derives its revenues from Fund investments made in accordance with the defined investment strategy of the Fund, as prescribed in the Fund's prospectus. The Chief Operating Decision Maker ("CODM") is the Investment Adviser. The CODM monitors and actively manages the operating results of the Fund. The financial information the CODM leverages to assess the segment's performance and to make decisions for the Fund's single segment, is consistent with that presented within the Fund's financial statements.

## 11. SUBSEQUENT EVENTS

Subsequent events have been evaluated through the date of issuance, and GSAM has concluded that there is no impact requiring adjustment or disclosure in the financial statements.
