Goldman Sachs Nasdaq-100 Core Premium Income ETF—Summary

Ticker: GPIQ Stock Exchange: The NASDAQ Stock Market LLC

INVESTMENT OBJECTIVE

The Goldman Sachs Nasdaq-100 Core Premium Income ETF (the “Fund”) seeks current income while maintaining prospects for capital appreciation.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy, hold and sell Shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

Management Fee	0.35%
Distribution and Service (12b-1) Fee	0.00%
Other Expenses ¹	0.00%
Total Annual Fund Operating Expenses	0.35%
Fee Waiver ²	(0.06)%
Total Annual Fund Operating Expenses After Fee Waiver	0.29%

¹ The Fund’s “Other Expenses” have been estimated to reflect expenses expected to be incurred during the first fiscal year.

² The Investment Adviser has agreed to waive its management fee in order to achieve an effective net management fee rate of 0.29% as an annual percentage rate of average daily net assets of the Fund through at least December 29, 2024, and prior to such date the Investment Adviser may not terminate the arrangement without the approval of the Board of Trustees.

EXPENSE EXAMPLE

This Example is intended to help you compare the cost of owning Shares of the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same (except that the Example incorporates the fee waiver arrangement for only the first year). Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years
\$30	\$106

PORTFOLIO TURNOVER

The Fund may pay transaction costs when it buys and sells securities or instruments (*i.e.*, “turns over” its portfolio). A high rate of portfolio turnover may result in increased transaction costs, including brokerage commissions, which must be borne by the Fund and its shareholders, and is also likely to result in higher short-term capital gains for taxable shareholders. These costs are not reflected in total annual fund operating expenses or in the expense example above, but are reflected in the Fund’s performance. Because the Fund had not commenced operations as of the end of the Fund’s fiscal year, there is no portfolio turnover information quoted for the Fund.

PRINCIPAL INVESTMENT STRATEGIES

The Fund invests, under normal circumstances, at least 80% of its net assets plus any borrowings for investment purposes (measured at the time of purchase) (“Net Assets”) in equity investments of companies that are included in the Fund’s benchmark. Equity investments may include common stock, preferred stock, warrants and other rights to acquire stock, and futures, forwards, options and other instruments with similar economic exposures. The Fund seeks to achieve its objective by investing primarily in a portfolio of stocks comprised significantly of those included in the Fund’s benchmark and selling call options with exposure to the benchmark. The Fund will generally seek to maintain style, capitalization and industry characteristics similar to its benchmark. The equity portion of the Fund’s portfolio will generally be invested in the benchmark components in approximately the same weighting that such components

have within the benchmark at the applicable time. However, under various circumstances, it may not be possible or practicable to purchase all of the securities in the benchmark in the approximate benchmark weight. The Fund may also invest in pooled investment vehicles, including exchange-traded funds (“ETFs”) and unit investment trusts (“UITs”) for cash management purposes. The Fund is managed in a way that seeks, under normal circumstances, to provide monthly distributions at a relatively stable rate with performance that captures the majority of the returns (and risk) associated with the benchmark. The Fund’s benchmark index is the Nasdaq-100 Index.

To generate income, the Fund employs a dynamic options “overwrite” strategy whereby the Fund sells (writes) call options on a varying percentage of the market value of the equity investments in the Fund’s portfolio (the “Option Strategy”). The overwrite level (i.e., the ratio of the notional value of call options sold by the Fund to the market value of the equity investments in the Fund’s portfolio) is generally revised each month and the Fund expects that, under normal circumstances, it will sell call options in an amount that is between 25% and 75% of the value of the equity investments in the Fund’s portfolio. The Fund generally expects to sell call options on underliers that provide economic exposure to the Fund’s benchmark, such as an ETF that tracks an index, and not on securities of issuers included in such index and held by the Fund. The Fund is an actively managed ETF, which is a fund that trades like other publicly-traded securities. The Fund is not an index fund and does not seek to replicate the performance of a specified index.

The Fund may invest in FLEXible EXchange[®] Options (“FLEX Options”), other types of listed options and over-the-counter (“OTC”) options. FLEX Options are customized exchange-traded option contracts available through the Chicago Board Option Exchange. Through FLEX Options, the Fund could customize key contract terms such as exercise prices and expiration dates.

Additional sources of distributions may include but are not limited to income received from investments that provide exposure to equity securities of companies that pay dividends.

During periods in which the equity markets are generally unchanged or falling, or in a modestly rising market where the income from premiums exceeds the aggregate appreciation of the underlying index over its exercise price, a portfolio receiving premiums from its call option writing strategy may outperform the same portfolio without such an options strategy. However, in rising markets where the aggregate appreciation of the underlying index over its exercise price exceeds the income from premiums, a portfolio with a call writing strategy could underperform the same portfolio without the options.

Additionally, the Fund’s investment strategies may involve active and frequent trading resulting in high portfolio turnover.

The Fund will rebalance the portion of its portfolio that invests in companies included in the Fund’s benchmark index in accordance with the rebalance schedule of that index.

The Fund concentrates its investments (i.e., holds more than 25% of its total assets) in securities of issuers in the information technology industries.

THE FUND IS NON-DIVERSIFIED UNDER THE INVESTMENT COMPANY ACT OF 1940, AS AMENDED (THE “INVESTMENT COMPANY ACT”), AND MAY INVEST A LARGER PERCENTAGE OF ITS ASSETS IN FEWER ISSUERS THAN DIVERSIFIED FUNDS.

PRINCIPAL RISKS OF THE FUND

Loss of money is a risk of investing in the Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation (“FDIC”) or any government agency. The Fund should not be relied upon as a complete investment program. There can be no assurance that the Fund will achieve its investment objective. Investments in the Fund involve substantial risks which prospective investors should consider carefully before investing. The Fund’s principal risks are presented below in alphabetical order, and not in the order of importance or potential exposure.

Derivatives Risk. The Fund’s use of options, futures, forwards, swaps and other derivative instruments may result in losses, including due to adverse market movements. These instruments, which may pose risks in addition to and greater than those associated with investing directly in securities, currencies or other assets and instruments, may increase market exposure and be illiquid or less liquid, volatile, difficult to price and leveraged so that small changes in the value of the underlying assets or instruments may produce disproportionate losses to the Fund. Certain derivatives are also subject to counterparty risk, which is the risk that the other party in the transaction will not fulfill its contractual obligations. The use of derivatives is a highly specialized activity that involves investment techniques and risks different from those associated with investments in more traditional securities and instruments.

Large Shareholder Risk. Certain shareholders, including other funds advised by the Investment Adviser, may from time to time own a substantial amount of the Fund’s Shares. In addition, a third party investor, the Investment Adviser or an affiliate of the Investment Adviser, an authorized participant, a lead market maker, or another entity (i.e., a seed investor) may invest in the Fund and hold its investment solely to facilitate commencement of the Fund or to facilitate the Fund’s achieving a specified size or scale. Any such investment may be held for a limited period of time. There can be no assurance that any large shareholder would not redeem its investment, that the size of the Fund would be maintained at such levels or that the Fund would continue to meet applicable listing requirements. Redemptions by large shareholders could have a significant negative impact on the Fund, including on the Fund’s liquidity. In addition, transactions by large shareholders may account for a large percentage of the trading volume on The NASDAQ Stock Market LLC (the “Exchange”) and may, therefore, have a material upward or downward effect on the market price of the Shares.

Industry Concentration Risk. The Fund concentrates its investments in specific industries or groups of industries that have historically experienced substantial price volatility. The Fund is subject to greater risk of loss as a result of adverse economic, business, political, environmental or other developments than if its investments were diversified across different industries or groups of industries. Securities of issuers held by the Fund may lack sufficient market liquidity to enable the Fund to sell the securities at an advantageous time or without a substantial drop in price.

Information Technology Industry Group Risk. The stock prices of technology and technology-related companies and therefore the value of the Fund may experience significant price movements as a result of intense market volatility, worldwide competition, consumer preferences, product compatibility, product obsolescence, government regulation, excessive investor optimism or pessimism, or other factors.

Management Risk. The Fund is actively managed, which means that investment decisions are made based on investment views. There is no guarantee that the investment views will produce the desired results or expected returns, which may cause the Fund to fail to meet its investment objective or to underperform its benchmark index or funds with similar investment objectives and strategies.

Market Risk. The value of the securities in which the Fund invests may go up or down in response to the prospects of individual companies, particular sectors or governments and/or general economic conditions throughout the world due to increasingly interconnected global economies and financial markets. Events such as war, military conflict, acts of terrorism, social unrest, natural disasters, recessions, inflation, rapid interest rate changes, supply chain disruptions, sanctions, the spread of infectious illness or other public health threats could also significantly impact the Fund and its investments.

Market Trading Risk. The net asset value (“NAV”) of the Fund and the value of your investment may fluctuate. Market prices of Shares may fluctuate, in some cases significantly, in response to the Fund’s NAV, the intraday value of the Fund’s holdings and supply and demand for Shares. The Fund faces numerous market trading risks, including disruptions to creations and redemptions, the existence of extreme market volatility or potential lack of an active trading market for Shares. Any of these factors, among others, may result in Shares trading at a significant premium or discount to NAV, which will be reflected in the intraday bid/ask spreads and/or the closing price of Shares as compared to NAV. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may pay more for, or receive less than, the underlying value of the Shares, respectively. Additionally, in stressed market conditions, the market for Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund’s underlying portfolio holdings.

The securities held by the Fund may be traded in markets that close at a different time than the stock exchange on which the Fund’s Shares are listed. Liquidity in those securities may be reduced after the applicable closing times. Accordingly, during the time when the Fund’s listing exchange is open but after the applicable market closing, fixing or settlement times, bid-ask spreads and the resulting premium or discount to the Shares’ NAV may widen.

Non-Diversification Risk. The Fund is non-diversified, meaning that it is permitted to invest a larger percentage of its assets in one or more issuers or in fewer issuers than diversified funds. Thus, the Fund may be more susceptible to adverse developments affecting any single issuer held in its portfolio, and may be more susceptible to greater losses because of these developments.

Option Writing Risk. Writing (selling) call options limits the opportunity to profit from an increase in the market value of stocks in exchange for up-front cash (the premium) at the time of selling the call option. In a sharp rising market, the Fund could significantly underperform the market. Furthermore, premium received from the Fund’s call option writing strategies may not fully protect it against market declines because the Fund will continue to bear the risk of a decline in the value of its portfolio securities. In a sharply-falling equity market, the Fund will likely also experience sharp declines in its NAV.

Other Investment Companies Risk. By investing in other investment companies (including ETFs) indirectly through the Fund, investors will incur a proportionate share of the expenses of the other investment companies held by the Fund (including operating costs and investment management fees) in addition to the fees regularly borne by the Fund. In addition, the Fund will be affected by the investment policies, practices and performance of such investment companies in direct proportion to the amount of assets the Fund invests therein.

Seed Investor Risk. GSAM and/or its affiliates may make payments to one or more investors that contribute seed capital to the Fund. Such payments may continue for a specified period of time and/or until a specified dollar amount is reached. Those payments will be made from the assets of GSAM and/or such affiliates (and not the Fund). Seed investors may contribute all or a majority of the assets in the Fund. There is a risk that such seed investors may redeem their investments in the Fund, particularly after payments from GSAM and/or its affiliates have ceased. As with redemptions by other large shareholders, such redemptions could have a significant negative impact on the Fund, including on the Fund’s liquidity and the market price of the Fund’s shares.

Stock Risk. Stock prices have historically risen and fallen in periodic cycles. U.S. and foreign stock markets have experienced periods of substantial price volatility in the past and may do so again in the future.

Strategy Risk. While the Fund seeks to provide monthly distributions, there is no guarantee that distributions will always be paid or will be paid at a relatively stable rate. Because the Fund seeks to provide monthly distributions at a relatively stable rate, shareholders may receive distributions which constitute a return of capital for tax purposes. A return of capital is not taxable, but it reduces the shareholder’s basis in its shares, which reduces the loss (or increases the gain) on a subsequent taxable distribution by such shareholder.

of the shares. The Fund's option writing strategy is expected to eliminate the tax holding periods for the Fund's investment portfolio, minimizing the likelihood of the Fund distributing long-term capital gains to shareholders. Dividends from the Fund are not expected to qualify as qualified dividend income eligible for taxation at the lowest capital gains tax rates.

Tracking Error/Index Risk. Tracking error is the divergence of the Fund's performance (without regard to the options overwrite strategy) from that of the benchmark. The performance of the Fund's equity investments may diverge from that of the benchmark for a number of reasons. Tracking error may occur because of transaction costs, the Fund's holding of cash, differences in accrual of dividends, changes to the benchmark or the need to meet new or existing regulatory requirements. Unlike the Fund, the returns of the benchmark are not reduced by investment and other operating expenses, including the trading costs associated with implementing changes to its portfolio of investments. Tracking error risk may be heightened during times of market volatility or other unusual market conditions. The Fund will be negatively affected by general declines in the securities and asset classes represented in the benchmark. In addition, unless a specific security is removed from the benchmark, the Fund generally would not sell a security because the security's issuer was in financial trouble.

Valuation Risk. The sale price the Fund could receive for a security may differ from the Fund's valuation of the security, particularly for securities that trade in low volume or volatile markets or that are valued using a fair value methodology. Because non-U.S. exchanges may be open on days when the Fund does not price its Shares, the value of foreign securities or assets in the Fund's portfolio may change on days when investors will not be able to purchase or sell the Fund's Shares. The Fund relies on various sources to calculate its NAV. The information may be provided by third parties that are believed to be reliable, but the information may not be accurate due to errors by such pricing sources, technological issues or otherwise. NAV calculation may also be impacted by operational risks arising from factors such as failures in systems and technology.

PERFORMANCE

As the Fund had not operated for a full calendar year as of the date of the Prospectus, there is no performance information quoted for the Fund. Updated performance information is available at no cost at www.gsamfunds.com/performance or by calling the appropriate phone number on the back cover of the Prospectus.

PORTFOLIO MANAGEMENT

Goldman Sachs Asset Management, L.P. is the investment adviser for the Fund (the "Investment Adviser" or "GSAM").

Portfolio Managers: Raj Garigipati, Managing Director; and William Helm, CFA, Vice President, have each managed the Fund since October 2023.

BUYING AND SELLING FUND SHARES

Individual Shares of the Fund may only be purchased and sold in secondary market transactions through a broker or dealer at market price. Because Shares trade at market prices, rather than NAV, Shares of the Fund may trade at a price greater than NAV (*i.e.*, a premium) or less than NAV (*i.e.*, a discount).

You may incur costs attributable to the difference between the highest price a buyer is willing to pay for Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) (the "bid-ask spread") when buying or selling Shares in the secondary market.

Recent information, including information about the Fund's NAV, market price, premiums and discounts, and bid-ask spreads, is included on the Fund's website at www.gsamfunds.com.

TAX INFORMATION

For important tax information, please see "Tax Information" on page 9 of the Prospectus.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

For important information about financial intermediary compensation, please see "Payments to Broker-Dealers and Other Financial Intermediaries" on page 9 of the Prospectus.

Goldman Sachs S&P 500 Core Premium Income ETF—Summary

Ticker: GPIX Stock Exchange: The NASDAQ Stock Market LLC

INVESTMENT OBJECTIVE

The Goldman Sachs S&P 500 Core Premium Income ETF (the “Fund”) seeks current income while maintaining prospects for capital appreciation.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy, hold and sell Shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

Management Fee	0.35%
Distribution and Service (12b-1) Fee	0.00%
Other Expenses ¹	0.00%
Total Annual Fund Operating Expenses	0.35%
Fee Waiver ²	(0.06)%
Total Annual Fund Operating Expenses After Fee Waiver	0.29%

¹ The Fund’s “Other Expenses” have been estimated to reflect expenses expected to be incurred during the first fiscal year.

² The Investment Adviser has agreed to waive its management fee in order to achieve an effective net management fee rate of 0.29% as an annual percentage rate of average daily net assets of the Fund through at least December 29, 2024, and prior to such date the Investment Adviser may not terminate the arrangement without the approval of the Board of Trustees.

EXPENSE EXAMPLE

This Example is intended to help you compare the cost of owning Shares of the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then sell all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same (except that the Example incorporates the fee waiver arrangement for only the first year). Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years
\$30	\$106

PORTFOLIO TURNOVER

The Fund may pay transaction costs when it buys and sells securities or instruments (*i.e.*, “turns over” its portfolio). A high rate of portfolio turnover may result in increased transaction costs, including brokerage commissions, which must be borne by the Fund and its shareholders, and is also likely to result in higher short-term capital gains for taxable shareholders. These costs are not reflected in total annual fund operating expenses or in the expense example above, but are reflected in the Fund’s performance. Because the Fund had not commenced operations as of the end of the Fund’s fiscal year, there is no portfolio turnover information quoted for the Fund.

PRINCIPAL INVESTMENT STRATEGIES

The Fund invests, under normal circumstances, at least 80% of its net assets plus any borrowings for investment purposes (measured at the time of purchase) (“Net Assets”) in equity investments of companies that are included in the Fund’s benchmark. Equity investments may include common stock, preferred stock, warrants and other rights to acquire stock, and futures, forwards, options and other instruments with similar economic exposures. The Fund seeks to achieve its objective by investing primarily in a portfolio of stocks comprised significantly of those included in the Fund’s benchmark and selling call options with exposure to the benchmark. The Fund will generally seek to maintain style, capitalization and industry characteristics similar to its benchmark. The equity portion of the Fund’s portfolio will generally be invested in the benchmark components in approximately the same weighting that such components

have within the benchmark at the applicable time. However, under various circumstances, it may not be possible or practicable to purchase all of the securities in the benchmark in the approximate benchmark weight. The Fund may also invest in pooled investment vehicles, including exchange-traded funds (“ETFs”) and unit investment trusts (“UITs”) for cash management purposes. The Fund is managed in a way that seeks, under normal circumstances, to provide monthly distributions at a relatively stable rate with performance that captures the majority of the returns (and risk) associated with the benchmark. The Fund’s benchmark index is the S&P 500[®] Index.

To generate income, the Fund employs a dynamic options “overwrite” strategy whereby the Fund sells (writes) call options on a varying percentage of the market value of the equity investments in the Fund’s portfolio (the “Option Strategy”). The overwrite level (i.e., the ratio of the notional value of call options sold by the Fund to the market value of the equity investments in the Fund’s portfolio) is generally revised each month and the Fund expects that, under normal circumstances, it will sell call options in an amount that is between 25% and 75% of the value of the equity investments in the Fund’s portfolio. The Fund generally expects to sell call options on underliers that provide economic exposure to the Fund’s benchmark, such as an ETF that seeks to track such index, and not on securities of issuers included in such index and held by the Fund. The Fund is an actively managed ETF, which is a fund that trades like other publicly traded securities. The Fund is not an index fund and does not seek to replicate the performance of a specified index.

The Fund may invest in FLEXible EXchange[®] Options (“FLEX Options”), other types of listed options and over-the-counter (“OTC”) options. FLEX Options are customized exchange-traded option contracts available through the Chicago Board Option Exchange. PRINCIPAL RISKS OF THE FUND

Loss of money is a risk of investing in the Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation (“FDIC”) or any government agency. The Fund should not be relied upon as a complete investment program. There can be no assurance that the Fund will achieve its investment objective. Investments in the Fund involve substantial risks which prospective investors should consider carefully before investing. The Fund’s principal risks are presented below in alphabetical order, and not in the order of importance or potential exposure.

Derivatives Risk. The Fund’s use of options, futures, forwards, swaps and other derivative instruments may result in losses, including due to adverse market movements. These instruments, which may pose risks in addition to and greater than those associated with investing directly in securities, currencies or other assets and instruments, may increase market exposure and be illiquid or less liquid, volatile, difficult to price and leveraged so that small changes in the value of the underlying assets or instruments may produce disproportionate losses to the Fund. In addition, a third party investor, the Investment Adviser or an affiliate of the Investment Adviser, an authorized participant, a lead market maker, or another entity (i.e., a seed investor) may invest in the Fund and hold its investment solely to facilitate commencement of the Fund or to facilitate the Fund’s achieving a specified size or scale. Any such investment may be held for a limited period of time. There can be no assurance that any large shareholder would not redeem its investment, that the size of the Fund would be maintained at such levels or that the Fund would continue to meet applicable listing requirements. Redemptions by large shareholders could have a significant negative impact on the Fund, including on the Fund’s liquidity. In addition, transactions by large shareholders may account for a large percentage of the trading volume on The NASDAQ Stock Market LLC (the “Exchange”) and may, therefore, have a material upward or downward effect on the market price of the Shares.

Management Risk. The Fund is actively managed, which means that investment decisions are made based on investment views. There is no guarantee that the investment views will produce the desired results or expected returns, which may cause the Fund to fail to meet its investment objective or to underperform its benchmark index or funds with similar investment objectives and strategies.

Market Risk. The value of the securities in which the Fund invests may go up or down in response to the prospects of individual companies, particular sectors or governments and/or general economic conditions throughout the world due to increasingly interconnected global economies and financial markets. Events such as war, military conflict, acts of terrorism, social unrest, natural disasters, recessions, inflation, rapid interest rate changes, supply chain disruptions, sanctions, the spread of infectious illness or other public health threats could also significantly impact the Fund and its investments.

Market Trading Risk. The net asset value (“NAV”) of the Fund and the value of your investment may fluctuate. Market prices of Shares may fluctuate, in some cases significantly, in response to the Fund’s NAV, the intraday value of the Fund’s holdings and supply and demand for Shares. The Fund faces numerous market trading risks, including disruptions to creations and redemptions, the existence of extreme market volatility or potential lack of an active trading market for Shares. Any of these factors, among others, may result in Shares trading at a significant premium or discount to NAV, which will be reflected in the intraday bid/ask spreads and/or the closing price of Shares as compared to NAV. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may pay more for, or receive less than, the underlying value of the Shares, respectively. Additionally, in stressed market conditions, the market for Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund’s underlying portfolio holdings.

The securities held by the Fund may be traded in markets that close at a different time than the stock exchange on which the Fund’s Shares are listed. Liquidity in those securities may be reduced after the applicable closing times. Accordingly, during the time when the Fund’s listing exchange is open but after the applicable market closing, fixing or settlement times, bid-ask spreads and the resulting premium or discount to the Shares’ NAV may widen.

Option Writing Risk. Writing (selling) call options limits the opportunity to profit from an increase in the market value of stocks in exchange for up-front cash (the premium) at the time of selling the call option. In a sharp rising market, the Fund could significantly underperform the market. Furthermore, premium received from the Fund’s call option writing strategies may not fully protect it against market declines because the Fund will continue to bear the risk of a decline in the value of its portfolio securities. In a sharply-falling equity market, the Fund will likely also experience sharp declines in its NAV.

Other Investment Companies Risk. By investing in other investment companies (including ETFs) indirectly through the Fund, investors will incur a proportionate share of the expenses of the other investment companies held by the Fund (including operating costs and investment management fees) in addition to the fees regularly borne by the Fund. In addition, the Fund will be affected by the investment policies, practices and performance of such investment companies in direct proportion to the amount of assets the Fund invests therein.

Seed Investor Risk. GSAM and/or its affiliates may make payments to one or more investors that contribute seed capital to the Fund. Such payments may continue for a specified period of time and/or until a specified dollar amount is reached. Those payments will be made from the assets of GSAM and/or such affiliates (and not the Fund). Seed investors may contribute all or a majority of the assets in the Fund. There is a risk that such seed investors may redeem their investments in the Fund, particularly after payments from GSAM and/or its affiliates have ceased. As with redemptions by other large shareholders, such redemptions could have a significant negative impact on the Fund, including on the Fund’s liquidity and the market price of the Fund’s shares.

Stock Risk. Stock prices have historically risen and fallen in periodic cycles. U.S. and foreign stock markets have experienced periods of substantial price volatility in the past and may do so again in the future.

Strategy Risk. While the Fund seeks to provide monthly distributions, there is no guarantee that distributions will always be paid or will be paid at a relatively stable rate. Because the Fund seeks to provide monthly distributions at a relatively stable rate, shareholders may receive distributions which constitute a return of capital for tax purposes. A return of capital is not taxable, but it reduces the shareholder’s basis in its shares, which reduces the loss (or increases the gain) on a subsequent taxable distribution by such shareholder of the shares. The Fund’s option writing strategy is expected to eliminate the tax holding periods for the Fund’s investment portfolio, minimizing the likelihood of the Fund distributing long-term capital gains to shareholders. Dividends from the Fund are not expected to qualify as qualified dividend income eligible for taxation at the lowest capital gains tax rates.

Tracking Error/Index Risk. Tracking error is the divergence of the Fund’s performance (without regard to the options overwrite strategy) from that of the benchmark. The performance of the Fund’s equity investments may diverge from that of the benchmark for a number of reasons. Tracking error may occur because of transaction costs, the Fund’s holding of cash, differences in accrual of dividends, changes to the benchmark or the need to meet new or existing regulatory requirements. Unlike the Fund, the returns of the benchmark are not reduced by investment and other operating expenses, including the trading costs associated with implementing changes to its portfolio of investments. Tracking error risk may be heightened during times of market volatility or other unusual market conditions. The Fund will be negatively affected by general declines in the securities and asset classes represented in the benchmark. In addition, unless a specific security is removed from the benchmark, the Fund generally would not sell a security because the security’s issuer was in financial trouble.

Valuation Risk. The sale price the Fund could receive for a security may differ from the Fund’s valuation of the security, particularly for securities that trade in low volume or volatile markets or that are valued using a fair value methodology. Because non-U.S. exchanges may be open on days when the Fund does not price its Shares, the value of foreign securities or assets in the Fund’s portfolio may change on days when investors will not be able to purchase or sell the Fund’s Shares. The Fund relies on various sources to

calculate its NAV. The information may be provided by third parties that are believed to be reliable, but the information may not be accurate due to errors by such pricing sources, technological issues or otherwise. NAV calculation may also be impacted by operational risks arising from factors such as failures in systems and technology.

PERFORMANCE

As the Fund had not operated for a full calendar year as of the date of the Prospectus, there is no performance information quoted for the Fund. Updated performance information is available at no cost at www.gsamfunds.com/performance or by calling the appropriate phone number on the back cover of the Prospectus.

PORTFOLIO MANAGEMENT

Goldman Sachs Asset Management, L.P. is the investment adviser for the Fund (the “Investment Adviser” or “GSAM”).

Portfolio Managers: Raj Garigipati, Managing Director; and William Helm, CFA, Vice President, have each managed the Fund since October 2023.

BUYING AND SELLING FUND SHARES

Individual Shares of the Fund may only be purchased and sold in secondary market transactions through a broker or dealer at market price. Because Shares trade at market prices, rather than NAV, Shares of the Fund may trade at a price greater than NAV (*i.e.*, a premium) or less than NAV (*i.e.*, a discount).

You may incur costs attributable to the difference between the highest price a buyer is willing to pay for Shares (bid) and the lowest price a seller is willing to accept for Shares (ask) (the “bid-ask spread”) when buying or selling Shares in the secondary market.

Recent information, including information about the Fund’s NAV, market price, premiums and discounts, and bid-ask spreads, is included on the Fund’s website at www.gsamfunds.com.

TAX INFORMATION

For important tax information, please see “Tax Information” on page 9 of the Prospectus.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

For important information about financial intermediary compensation, please see “Payments to Broker-Dealers and Other Financial Intermediaries” on page 9 of the Prospectus.

Goldman Sachs Core Premium Income ETFs – Additional Summary Information

TAX INFORMATION

The Funds' distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. Investments made through tax-deferred arrangements may become taxable upon withdrawal from such arrangements.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase Shares of a Fund through a broker-dealer or other financial intermediary (such as a bank), GSAM or other related companies may pay the intermediary for the sale of Fund Shares or related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend a Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Investment Management Approach

INVESTMENT OBJECTIVE

Each Fund seeks to provide current income while maintaining prospects for capital appreciation. A Fund's investment objective may be changed without shareholder approval.

PRINCIPAL INVESTMENT STRATEGIES

Each Fund invests, under normal circumstances, at least 80% of its Net Assets in equity investments of companies that are included in the Fund's benchmark. Equity investments may include common stock, preferred stock, warrants and other rights to acquire stock, and options and other instruments with similar economic exposures. Shareholders will be provided with 60 days' notice in the manner prescribed by the Securities and Exchange Commission before any change in a Fund's policy to invest at least 80% of its assets in equity investments of companies that are included in the Fund's benchmark.

Each Fund seeks to achieve its objective by investing primarily in a portfolio of stocks comprised significantly of those included in the Fund's benchmark and selling call options with exposure to the benchmark. Each Fund will generally seek to maintain style, capitalization and industry characteristics similar to its benchmark. The equity portion of each Fund's portfolio will generally be invested in the benchmark components in approximately the same weighting that such components have within the benchmark at the applicable time. However, under various circumstances, it may not be possible or practicable to purchase all of the securities in the benchmark in the approximate benchmark weight. Each Fund may also invest in pooled investment vehicles, including exchange-traded funds ETFs and UITs for cash management purposes. Each Fund is managed in a way that seeks, under normal circumstances, to provide monthly distributions at a relatively stable rate with performance that captures the majority of the returns (and risk) associated with the benchmark. The Goldman Sachs Nasdaq-100 Core Premium Income ETF's benchmark index is the Nasdaq-100 Index. The Goldman Sachs S&P 500 Core Premium Income ETF's benchmark index is the S&P 500[®] Index.

To generate income, the Fund employs a dynamic options "overwrite" strategy whereby the Fund sells (writes) on a varying percentage of the market value of the equity investments in the Fund's portfolio. The overwrite level (i.e., the ratio of the notional value of call options sold by a Fund to the market value of the equity investments in the Fund's portfolio) is generally revised each month and the Fund expects that, under normal circumstances, it will sell call options in an amount that is between 25% and 75% of the value of the equity investments in the Fund's portfolio. Each Fund generally expects to sell call options on underliers that provide economic exposure to the Fund's benchmark, such as an ETF that seeks to track such index, and not on securities of issuers included in such index and held by the Fund. Each Fund is an actively managed ETF, which is a fund that trades like other publicly-traded securities. Each Fund is not an index fund and does not seek to replicate the performance of a specified index.

Each Fund may invest in FLEX Options, other types of listed options and OTC options. FLEX Options are customized exchange-traded option contracts available through the Chicago Board Option Exchange. Through FLEX Options, each Fund could customize key contract terms such as exercise prices and expiration dates.

Additional sources of distributions may include but are not limited to income received from investments that provide exposure to equity securities of companies that pay dividends.

During periods in which the equity markets are generally unchanged or falling, or in a modestly rising market where the income from premiums exceeds the aggregate appreciation of the underlying index over its exercise price, a portfolio receiving premiums from its call option writing strategy may outperform the same portfolio without such an options strategy. However, in rising markets where the aggregate appreciation of the underlying index over its exercise price exceeds the income from premiums, a portfolio with a call writing strategy could underperform the same portfolio without the options.

Additionally, the Fund's investment strategies may involve active and frequent trading resulting in high portfolio turnover.

Each Fund will rebalance the portion of its portfolio that invests in companies included in that Fund's benchmark index in accordance with the rebalance schedule of that index.

Each Fund may also invest up to 20% of its Net Assets in securities and other instruments that are not part of a Fund's principal investment strategies described above. Each Fund's investments in fixed income securities are limited to cash equivalents (including money market funds) and U.S. Treasury Securities.

The Funds may, from time to time, temporarily use a different investment strategy. **When a Fund does so, the Fund may not be achieving its investment objective.**

GSAM serves as investment adviser to the Funds. GSAM is referred to in the Prospectus as the "Investment Adviser."

References in the Prospectus to a Fund's benchmark are for informational purposes only, and unless otherwise noted, are not an indication of how the Fund is managed.

Goldman Sachs Nasdaq-100 Core Premium Income ETF

The Fund concentrates its investments (i.e., holds more than 25% of its total assets) in securities of issuers in the information technology industries. Therefore, under normal circumstances, the Fund will invest at least 25% of its total assets in securities of issuers in these industries. The Fund may, however, invest less than 25% of its total assets in securities of issuers in these industries as a temporary defensive position.

THE FUND IS NON-DIVERSIFIED UNDER THE INVESTMENT COMPANY ACT, AND MAY INVEST A LARGER PERCENTAGE OF ITS ASSETS IN FEWER ISSUERS THAN DIVERSIFIED FUNDS.

OTHER INVESTMENT PRACTICES AND SECURITIES

Although each Fund's principal investment strategies are described in each Fund's Summary—Principal Investment Strategies and Investment Management Approach—Principal Investment Strategies sections of the Prospectus, the following tables identify some of the investment techniques that may (but are not required to) be used by the Funds in seeking to achieve their investment objectives.

The Funds may be subject to additional limitations on its investments not shown here. Numbers in these tables show allowable usage only; for actual usage, consult the Funds' annual/semi-annual reports (when available). For more information about these and other investment practices and securities, see Appendix A.

On each business day, before commencement of trading in Fund Shares on the Exchange, each Fund will disclose on its website (<http://www.gsamfunds.com>) the identities and quantities of the portfolio securities and other assets held by the Fund that will form the basis for the Funds' calculation of NAV at the end of the business day. In addition, a description of the Fund's policies and procedures with respect to the disclosure of the Funds' portfolio holdings is available in the Funds' Statement of Additional Information ("SAI").

Risks of the Funds

Loss of money is a risk of investing in the Fund (which, for the remainder of this Prospectus, refers to one or more of the Funds offered in this Prospectus). An investment in the Fund is not a bank deposit and is not insured or guaranteed by the FDIC or any other governmental agency. The principal risks of the Fund are discussed in the Summary sections of the Prospectus. The following section provides additional information on the risks that apply to the Fund, which may result in a loss of your investment. The risks applicable to the Fund are presented below in alphabetical order, and not in the order of importance or potential exposure. The Fund should not be relied upon as a complete investment program. There can be no assurance that the Fund will achieve its investment objective. Investments in the Fund involve substantial risks which prospective investors should consider carefully before investing.

The Fund is an actively managed ETF, which is a fund that trades like other publicly-traded securities. The Fund is not an index fund and does not seek to replicate the performance of a specified index.

- **Absence of Active Market Risk**—There can be no assurance that active trading markets for the Shares will develop or be maintained by market makers or authorized participants, and there are no obligations of market makers to make a market in the Fund’s Shares or of authorized participants to submit purchase or redemption orders for Creation Units. ALPS Distributors, Inc., the distributor of the Shares (the “Distributor”), does not maintain a secondary market in the Shares.

Although market makers will generally take advantage of differences between the NAV and the trading price of Fund Shares through arbitrage opportunities, there is no guarantee that they will do so. Decisions by market makers or authorized participants to reduce their role or “step away” from market making or creation/redemption activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying value of the Fund’s portfolio securities and the Fund’s market price. This reduced effectiveness could result in Shares trading at a discount to NAV and also in greater than normal intraday bid/ask spreads for Shares. Market makers and authorized participants may be less willing to create or redeem Fund Shares if there is a lack of an active market for the Shares or its underlying investments, which may also contribute to the Fund’s Shares trading at a premium or discount to NAV.

- **Authorized Participant Concentration Risk**—Only an authorized participant may engage in creation or redemption transactions directly with the Fund, and the Fund may have a limited number of financial institutions that act as authorized participants. None of those authorized participants is obligated to engage in creation and/or redemption transactions. To the extent that those authorized

participants exit the business or are unable to or choose not to process creation and/or redemption orders, and no other authorized participant is able to step forward to create and redeem Shares, there may be a significantly diminished trading market for Shares. As a result, Shares may trade at a discount (or premium) to NAV and possibly face trading halts and/or de-listing.

- **Credit/Default Risk**—An issuer or guarantor of fixed income securities or instruments held by a Fund may default on its obligation to pay interest and repay principal or default on any other obligation. The credit quality of the Fund’s portfolio securities or instruments may meet the Fund’s credit quality requirements at the time of purchase but then deteriorate thereafter, and such a deterioration can occur rapidly. In certain instances, the downgrading or default of a single holding or guarantor of the Fund’s holdings may impair the Fund’s liquidity and have the potential to cause significant NAV deterioration. These risks are heightened in market environments where interest rates are rising as well as in connection with a Fund’s investments in non-investment grade fixed income securities.
- **Cybersecurity Risk**—The Fund may be susceptible to operational and information security risks resulting from cyber-attacks. Cyber-attacks include, among others, stealing or corrupting confidential information and other data that is maintained online or digitally for financial gain, denial-of-service attacks on websites causing operational disruption, and the unauthorized release of confidential information and other data. Cyber-attacks have the ability to cause significant disruptions and impact business operations; to result in financial losses; to prevent shareholders from transacting business; to interfere with the Fund’s calculation of NAV; and to lead to violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs and/or additional compliance costs. Cyber-attacks affecting the Fund or its Investment Adviser, custodian, Transfer Agent, or other third-party service providers may adversely impact the Fund and its shareholders.
- **Derivatives Risk**—The Fund’s use of options, futures, forwards, swaps, options on swaps, structured securities and others and similar instruments (collectively referred to in this paragraph as “derivatives”) may result in losses, including due to adverse market movements. Derivatives, which may pose risks in addition to and greater than those associated with investing directly in securities, currencies or other instruments, may increase market exposure and be illiquid or less liquid, volatile, difficult to price and leveraged so that small changes in the value of the underlying assets or instruments may produce disproportionate losses to the Fund. Certain derivatives are also subject to counterparty risk, which is the risk that the other party in the transaction will not fulfill, or lacks the capacity or authority to fulfill, its contractual obligations, liquidity risk, which includes the risk that the Fund will not be able to close its derivatives position when it is advantageous to do so, and risks arising from margin requirements, which include the risk that the Fund will be required to pay additional margin or set aside additional collateral to maintain open derivative positions. Derivatives may be used for both hedging and non-hedging purposes.

The use of derivatives is a highly specialized activity that involves investment techniques and risks different from those associated with investments in more traditional securities and instruments, and there is no guarantee that the use of derivatives will achieve their intended result. If the Investment Adviser is incorrect in its expectation of the timing or level of fluctuation in securities prices, interest rates, currency prices or other variables, the use of derivatives could result in losses, which in some cases may be significant. A lack of correlation between changes in the value of derivatives and the value of the portfolio assets (if any) being hedged could also result in losses. In addition, there is a risk that the performance of the derivatives or other instruments used by the Investment Adviser to replicate the performance of a particular asset class may not accurately track the performance of that asset class.

The use of derivatives is also subject to operational and legal risks. Operational risks generally refer to risks related to potential operational issues, including documentation issues, settlement issues, system failures, inadequate controls, and human error. Legal risks generally refer to risks of loss resulting from insufficient documentation or legality or enforceability of a contract.

- **Foreign Risk**—When the Fund invests in foreign securities, it may be subject to risk of loss not typically associated with U.S. issuers. Loss may result because of more or less foreign government regulation; less public information; less stringent investor protections; less stringent accounting, corporate governance, financial reporting and disclosure standards; less liquid, developed or efficient trading markets; greater volatility; and less economic, political and social stability in the countries in which the Fund invests. Loss may also result from, among other things, deteriorating economic and business conditions in other countries, including the United States, regional and global conflicts, the imposition of sanctions, exchange controls (including repatriation restrictions), foreign taxes, confiscation of assets and property, trade restrictions (including tariffs), expropriations and other government restrictions by the United States and other governments, higher transaction costs, difficulty enforcing contractual obligations or from problems in share registration, settlement or custody. The type and severity of sanctions and other similar measures, including counter sanctions and other retaliatory actions, that may be imposed could vary broadly in scope, and their impact is impossible to predict. These types of measures may include, but are not limited to, banning a sanctioned country from global payment systems that facilitate cross-border payments, restricting the settlement of securities transactions by certain investors, and freezing the assets of particular countries, entities, or persons. The imposition of sanctions and other similar measures could, among other things, cause a decline in the value and/or liquidity of securities issued by the sanctioned country or companies located in or economically tied to the sanctioned country, downgrades in the credit ratings of the sanctioned country or companies located in or economically tied to the sanctioned country, devaluation of the sanctioned country’s currency, and

increased market volatility and disruption in the sanctioned country and throughout the world. Sanctions and other similar measures could limit or prevent the Fund from buying and selling securities (in the sanctioned country and other markets), significantly delay or prevent the settlement of securities transactions, and significantly impact the Fund's liquidity and performance. The Fund or the Investment Adviser may determine not to invest in, or may limit its overall investment in, a particular issuer, country or geographic region due to, among other things, heightened risks regarding sanctions, repatriation restrictions, confiscation of assets and property, expropriation or nationalization. Geopolitical developments in certain countries in which the Fund may invest have caused, or may in the future cause, significant volatility in financial markets. These and other geopolitical developments, including ongoing regional armed conflict in Europe and elsewhere, could negatively impact the value of a Fund's investments.

The Fund's investments in foreign securities may also be subject to foreign currency risk, as described above, the risk of negative foreign currency rate fluctuations, which may cause the value of securities denominated in such foreign currency (or other instruments through which the Fund may have exposure to foreign currencies) to decline in value. Currency exchange rates may fluctuate significantly over short periods of time. Foreign risks will normally be greatest when the Fund invests in securities of issuers located in emerging countries. For more information about these risks, see Appendix A.

- **Industry Concentration Risk**—The Fund concentrates its investments in specific industries or groups of industries that have historically experienced substantial price volatility. The Fund is subject to greater risk of loss as a result of adverse economic, business, political, environmental or other developments than if its investments were diversified across different industries or groups of industries. Securities of issuers held by the Fund may lack sufficient market liquidity to enable the Fund to sell the securities at an advantageous time or without a substantial drop in price.
- **Information Technology Industry Group Risk**—The stock prices of technology and technology-related companies and therefore the value of the Fund may experience significant price movements as a result of intense market volatility, worldwide competition, consumer preferences, product compatibility, product obsolescence, government regulation, excessive investor optimism or pessimism, or other factors. Many of the products and services offered by technology companies are subject to the risk of short product cycles. Certain technology-related companies may face special risks that their products or services may not prove to be commercially successful. Such companies also may be subject to risks relating to research and development costs and the availability and price of components. As product cycles shorten and manufacturing capacity increases, these companies could become increasingly subject to aggressive pricing and competition, which hampers profitability.
- **Large Shareholder Transactions Risk**—Certain large shareholders, including other funds advised by the Investment Adviser, may from time to time own a substantial amount of the Fund's Shares. In addition, a third party investor, the Investment Adviser or an affiliate of the Investment Adviser, an authorized participant, a lead market maker, or another entity (*i.e.*, a seed investor) may invest in the Fund and hold its investment solely to facilitate commencement of the Fund or to facilitate the Fund's achieving a specified size or scale. Any such investment may be held for a limited period of time. There can be no assurance that any large shareholder would not redeem its investment. Dispositions of a large number of Shares by these shareholders, which may occur rapidly or unexpectedly, may adversely affect the Fund's liquidity and net assets to the extent such transactions are executed directly with the Fund in the form of redemptions through an authorized participant, rather than executed in the secondary market. To the extent effected in cash, these redemptions may also force the Fund to sell portfolio securities when it might not otherwise do so, which may negatively impact the Fund's NAV and increase the Fund's brokerage costs. Such cash redemptions may also accelerate the realization of taxable income to shareholders, which could make investments in Shares less tax-efficient than an investment in an ETF that is able to effect redemptions in-kind. Similarly, large Fund share purchases through an authorized participant may adversely affect the performance of the Fund to the extent that the Fund is delayed in investing new cash or otherwise maintains a larger cash position than it ordinarily would. To the extent these large shareholders transact in Shares on the secondary market, such transactions may account for a large percentage of the trading volume on the Exchange and may, therefore, have a material upward or downward effect on the market price of the Shares.
- **Liquidity Risk**—The Fund may invest in securities or instruments that trade in lower volumes, that are less liquid than other investments and/or that may become illiquid or less liquid in response to market developments or adverse investor perceptions. Investments that are illiquid or that trade in lower volumes may be more difficult to value. When there is no willing buyer and investments cannot be readily sold at the desired time or price, the Fund may have to accept a lower price or may not be able to sell the security or instrument at all. An inability to sell one or more portfolio positions can adversely affect the Fund's value. Illiquidity can be caused by a drop in overall market trading volume, an inability to find a willing buyer, or legal restrictions on the securities' resale. To the extent the Fund engages in cash redemptions, then liquidity risk may also refer to the risk that the Fund will not be able to pay redemption proceeds within the allowable time period or without significant dilution to remaining investors' interests because of unusual market conditions, an unusually high volume of redemption requests, a redemption request by a large shareholder (such as a seed investor) or other reasons. If the Fund is forced to sell securities at an unfavorable time and/or under unfavorable conditions, such sales may adversely affect the Fund's NAV and dilute remaining investors' interests.
- **Management Risk**—A strategy used by the Investment Adviser may fail to produce the intended results.

- **Market Risk**—The value of the securities in which the Fund invests may go up or down in response to the prospects of individual companies, particular sectors or governments and/or general economic conditions throughout the world. Price changes may be temporary or last for extended periods. The Fund’s investments may be overweighted from time to time in one or more sectors or countries, which will increase the Fund’s exposure to risk of loss from adverse developments affecting those sectors or countries.

Global economies and financial markets are becoming increasingly interconnected, and conditions and events in one country, region or financial market may adversely impact issuers in a different country, region or financial market. Furthermore, local, regional and global events such as war, military conflict, acts of terrorism, social unrest, natural disasters, recessions, inflation, rapid interest rate changes, supply chain disruptions, sanctions, the spread of infectious illness or other public health threats could also adversely impact issuers, markets and economies, including in ways that cannot necessarily be foreseen. The Fund could be negatively impacted if the value of a portfolio holding were harmed by such political or economic conditions or events. In addition, governmental and quasi-governmental organizations have taken a number of unprecedented actions designed to support the markets. Such conditions, events and actions may result in greater market risk.

- **Market Trading Risk**—The NAV of the Fund and the value of your investment may fluctuate. Market prices of Shares may fluctuate, in some cases significantly, in response to the Fund’s NAV, the intraday value of the Fund’s holdings and supply and demand for Shares. The Fund faces numerous market trading risks, including disruptions to creations and redemptions, the existence of extreme market volatility or potential lack of an active trading market for Shares. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may pay more for, or receive less than, the underlying value of the Shares, respectively. The Investment Adviser cannot predict whether Shares will trade below, at or above their NAV. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the securities in the Fund’s portfolio trading individually or in the aggregate at any point in time. While the creation/redemption feature is designed to make it more likely that the Fund’s Shares normally will trade on stock exchanges at prices close to the Fund’s next calculated NAV, exchange prices are not expected to correlate exactly with the Fund’s NAV due to timing reasons, supply and demand imbalances, perception of unreliability of disclosed NAV, and other factors. Any of these factors, among others, may result in Shares trading at a significant premium or discount to NAV, which will be reflected in the intraday bid/ask spreads and/or the closing price of Shares as compared to NAV. In addition, because liquidity in certain underlying securities may fluctuate, Shares may trade at a larger premium or discount to NAV than Shares of other kinds of ETFs. Additionally, in stressed market conditions, the market for Shares may become less liquid in response to deteriorating liquidity in the markets for the Fund’s underlying portfolio holdings. There are various methods by which investors can purchase and sell Shares and various orders that may be placed. Investors should consult their financial intermediary before purchasing or selling Shares of the Fund.

An investor that buys or sells Shares through a broker will likely incur a brokerage commission or other charge imposed by the broker. In addition, the market price of Shares, like other exchange-traded securities, includes a “bid-ask spread” (the difference between the price at which investors are willing to buy Shares and the price at which investors are willing to sell Shares). The bid-ask spread will vary over time based on the Fund’s trading volume and market liquidity and may increase as a result of a decrease in the Fund’s trading volume, the spread of the Fund’s underlying securities, or market liquidity. The bid-ask spread may increase significantly in times of market disruption, meaning that Shares may trade at a discount to the Fund’s NAV and that discount is likely to be greatest during significant market volatility. During such periods, you may be unable to sell your Shares or may incur significant losses if you sell your Shares.

Shares of the Fund, like other publicly-traded securities, may be sold short. Shares are therefore subject to the risk of price decreases and increased volatility associated with being sold short.

- **Mid-Cap and Small-Cap Risk**—The securities of mid-capitalization and small-capitalization companies involve greater risks than those associated with larger, more established companies and may be subject to more abrupt or erratic price movements. Securities of such issuers may lack sufficient market liquidity to enable the Fund to effect sales at an advantageous time or without a substantial drop in price. Both mid-capitalization and small-capitalization companies often have narrower markets and more limited managerial and financial resources than larger, more established companies. As a result, their performance can be more volatile and they face greater risk of business failure, which could increase the volatility of the Fund’s portfolio. Generally, the smaller the company size, the greater these risks become.
- **Non-Diversification Risk**—The Fund is non-diversified, meaning that it is permitted to invest a larger percentage of its assets in one or more issuers or in fewer issuers than diversified funds. Thus, the Fund may be more susceptible to adverse developments affecting any single issuer held in its portfolio, and may be more susceptible to greater losses because of these developments.
- **Option Writing Risk**—Writing (selling) call options limits the opportunity to profit from an increase in the market value of stocks in exchange for up-front cash (premium) at the time of selling the call option. When the Fund writes (sells) stock index (or related ETF) call options, it receives cash but limits its opportunity to profit from an increase in the market value of the index beyond the

exercise price (plus the premium received) of the option. In a sharp rising market, the Fund could significantly underperform the market. The premium received from the Fund's option strategies may not fully protect it against declines in the value of the market. Cash received from premiums will enhance return in moderately declining markets, but the Fund will continue to bear the risk of a decline in the value of the securities held in its portfolio and in a period of a sharply falling equity market, the Fund will likely also experience sharp declines in its net asset value. A put option written by the Fund obligates the Fund to purchase a specified investment from the option holder at a specified price if the put option is exercised before the expiration date. If the put option's specified price is above the market price of the investment at the time the put option is exercised, the Fund would incur losses, which may exceed the up-front cash (premium) received from writing the put option.

- **Other Investment Companies Risk**—By investing in other investment companies (including ETFs) indirectly through the Fund, investors will incur a proportionate share of the expenses of the other investment companies held by the Fund (including operating costs and investment management fees) in addition to the fees regularly borne by the Fund. In addition, the Fund will be affected by the investment policies, practices and performance of such investment companies in direct proportion to the amount of assets the Fund invests therein.
- **Secondary Listing Risk**—The Fund's Shares may be listed or traded on U.S. and non-U.S. stock exchanges other than the U.S. stock exchange where the Fund's primary listing is maintained. There can be no assurance that the Fund's Shares will continue to trade on any such stock exchange or in any market or that the Fund's Shares will continue to meet the requirements for listing or trading on any exchange or in any market. The Fund's Shares may be less actively traded in certain markets than in others, and investors are subject to the execution and settlement risks and market standards of the market where they or their broker direct their trades for execution. Certain information available to investors who trade Fund Shares on a U.S. stock exchange during regular U.S. market hours may not be available to investors who trade in other markets, which may result in secondary market prices in such markets being less efficient. Shares of the Fund may trade in the secondary market outside of the trading hours of the Fund's primary exchange. At such times, Shares may trade with more significant premiums or discounts than might be experienced otherwise.
- **Seed Investor Risk**—GSAM and/or its affiliates may make payments to one or more investors that contribute seed capital to the Fund. Such payments may continue for a specified period of time and/or until a specified dollar amount is reached. Those payments will be made from the assets of GSAM and/or such affiliates (and not the Fund). Seed investors may contribute all or a majority of the assets in the Fund. There is a risk that such seed investors may redeem all or part of their investments in the Fund, particularly after payments from GSAM and/or its affiliates have ceased. The timing of a redemption by a seed investor could benefit the seed investor. As with redemptions by other large shareholders, such redemptions could have a significant negative impact on the Fund, including by reducing the Fund's liquidity, causing the Fund to realize gains that will be distributed and taxable to remaining shareholders and increasing the Fund's transaction costs. A large redemption may also have a material upward or downward effect on the market price of the Fund's Shares.
- **Stock Risk**—Stock prices have historically risen and fallen in periodic cycles. U.S. and foreign stock markets have experienced periods of substantial price volatility in the past and may do so again in the future. Stock prices may fluctuate from time to time in response to the activities of individual companies and in response to general market and economic conditions. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments, and the stock prices of such companies may suffer a decline in response.
- **Strategy Risk**—While each Fund seeks to provide monthly distributions at a relatively stable rate, there is no guarantee that distributions will always be paid or will be paid at a relatively stable rate. Because each Fund seeks to provide monthly distributions at a relatively stable rate, shareholders may receive distributions which constitute a return of capital for tax purposes. A return of capital is not taxable, but it reduces the shareholder's basis in its shares, which reduces the loss (or increases the gain) on a subsequent taxable distribution by such shareholder of the shares. Each Fund's option writing strategy is expected to eliminate the tax holding periods for the Fund's investment portfolio, minimizing the likelihood of the Fund distributing long-term capital gains to shareholders. Dividends from each Fund are not expected to qualify as qualified dividend income eligible for taxation at the lowest capital gains tax rates.
- **Tracking Error/Index Risk**—Tracking error is the divergence of the Fund's performance (without regard to the options overwrite strategy) from that of the benchmark. The performance of the Fund may diverge from that of the benchmark for a number of reasons. Tracking error may occur because of transaction costs, the Fund's holding of cash, differences in accrual of dividends, changes to its benchmark or the need to meet new or existing regulatory requirements. Unlike the Fund, the returns of the benchmark are not reduced by investment and other operating expenses, including the trading costs associated with implementing changes to its portfolio of investments. The frequency at which the benchmark is rebalanced may result in higher trading costs for the Fund and, as a result, greater tracking error. Tracking error risk may be heightened during times of market volatility or other unusual market conditions. To the extent that the Fund calculates its NAV based on fair value prices and the value of the benchmark is based on securities' closing prices (i.e., the value of the benchmark is not based on fair value prices), the Fund's ability to track the benchmark may be adversely affected. The Fund may be required to deviate its investments from the securities and relative weightings of the benchmark to comply with the Investment Company Act, to meet the issuer diversification requirements of the

Code applicable to regulated investment companies, or as a result of market restrictions or other legal reasons. The Fund's investments may vary from the securities of the benchmark due to the Fund's inability to invest in certain securities as a result of legal and compliance restrictions applicable to the Fund and/or the Investment Adviser and regulatory limits or other restrictions on securities that may be purchased by the Investment Adviser and its affiliates. For tax efficiency purposes, the Fund may sell certain securities to realize losses, which will result in a deviation from the benchmark.

- The Fund will be negatively affected by general declines in the securities and asset classes represented in its benchmark. In addition, unless a specific security is removed from the benchmark, the Fund generally would not sell a security because the security's issuer was in financial trouble. The Fund's performance could be lower than funds that may shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers.
- **Trading Issues Risk**—Trading in ETF Shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the exchange, make trading in ETF Shares inadvisable. In addition, trading in ETF Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to the Exchange's "circuit breaker" rules. If a trading halt or unanticipated closing of the exchange occurs, a shareholder may be unable to purchase or sell ETF Shares. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund, including the required number of shareholders, will continue to be met or will remain unchanged, which may cause the Fund to be delisted from the Exchange. If the Fund were delisted from the Exchange, the value of the Fund may decline and performance may be negatively impacted. Any resulting liquidation of the Fund may cause the Fund to incur elevated transaction costs and result in negative tax consequences for its shareholders.
- **Valuation Risk**—The sale price the Fund could receive for a security may differ from the Fund's valuation of the security, particularly for securities that trade in low volume or volatile markets or that are valued using a fair value methodology. Because non-U.S. exchanges may be open on days when the Fund does not price its Shares, the value of foreign securities or assets in the Fund's portfolio may change on days when investors will not be able to purchase or sell the Fund's Shares. The Fund relies on various sources to calculate its NAV. The information may be provided by third parties that are believed to be reliable, but the information may not be accurate due to errors by such pricing sources, technological issues or otherwise. NAV calculation may also be impacted by operational risks arising from factors such as failures in systems and technology.

More information about the Fund's portfolio securities and investment techniques, and their associated risks, is provided in Appendix A. You should consider the investment risks discussed in this section and in Appendix A. Both are important to your investment choice.

Tax Advantaged Product Structure

Unlike many conventional mutual funds which are only bought and sold at closing NAVs, the Shares of the Fund, like Shares of certain other ETFs, have been designed to be redeemed principally in-kind in Creation Units at each day's market close. These in-kind arrangements are designed to mitigate adverse effects on the Fund's portfolio that could arise from frequent cash redemption transactions that affect the NAV of the Fund. Moreover, in contrast to conventional mutual funds, where frequent redemptions can have an adverse tax impact on taxable shareholders because of the need to sell portfolio securities which, in turn, may generate taxable gain, the in-kind redemption mechanism of the Fund to the extent used, generally is not expected to lead to a tax event for shareholders whose Shares are not being redeemed. There is no guarantee that these tax advantages will be realized or will materially reduce the amount of taxable capital gains distributed by the Fund to shareholders.

Service Providers

INVESTMENT ADVISER

Investment Adviser	Fund
Goldman Sachs Asset Management, L.P. ("GSAM") 200 West Street New York, NY 10282	Goldman Sachs Nasdaq-100 Core Premium Income ETF Goldman Sachs S&P 500 Core Premium Income ETF

GSAM has been registered as an investment adviser with the SEC since 1990 and is an indirect, wholly-owned subsidiary of The Goldman Sachs Group, Inc. and an affiliate of Goldman Sachs & Co. LLC ("Goldman Sachs"). Founded in 1869, The Goldman Sachs Group, Inc. is a publicly-held financial holding company and a leading global investment banking, securities and investment management firm. As of September 30, 2023, GSAM, including its investment advisory affiliates, had assets under supervision of approximately \$2.42 trillion.

The Investment Adviser is responsible for the day-to-day management of the Fund and places purchase and sale orders for the Fund's portfolio transactions in U.S. and foreign markets. As permitted by applicable law, these orders may be directed to any executing brokers, dealers, futures commission merchants ("FCMs") or other counterparties, including Goldman Sachs and its affiliates. While the Investment Adviser is ultimately responsible for the management of the Fund, it is able to draw upon the research and expertise of its asset management affiliates with respect to managing certain portfolio securities. In addition, the Investment Adviser has access to proprietary tools developed by Goldman Sachs (subject to legal, internal, regulatory and Chinese wall restrictions), and will apply quantitative and qualitative analysis in determining the appropriate allocations among categories of issuers and types of securities.

The Investment Adviser also performs the following additional services for the Funds, to the extent such services are not required to be performed by others pursuant to the fund administration and accounting agreement, the custodian agreement, the transfer agency agreement, distribution agreement or such other agreements with service providers to the Funds that the Board has approved:

- Supervises non-advisory operations of the Funds, including oversight of vendors hired by the Funds, oversight of Fund liquidity and risk management, oversight of regulatory inquiries and requests with respect to the Funds made to the Investment Adviser, valuation and accounting oversight and oversight of ongoing compliance with federal and state securities laws, tax regulations, and other applicable law
- Provides personnel to perform such executive, administrative and clerical services as are reasonably necessary to provide effective administration of the Funds
- Arranges for: (a) the preparation of all required tax returns, (b) the preparation and submission of reports to existing shareholders, (c) the periodic updating of prospectuses and statements of additional information and (d) the preparation of reports to be filed with the SEC and other regulatory authorities
- Maintains the records of the Fund
- Provides office space and necessary office equipment and services for the Investment Adviser
- Markets the Funds

An investment in the Fund may be negatively impacted because of the operational risks arising from factors such as processing errors and human errors, inadequate or failed internal or external processes, failures in systems and technology, changes in personnel, and errors caused by third-party service providers or trading counterparties. Although the Fund attempts to minimize such failures through controls and oversight, it is not possible to identify all of the operational risks that may affect the Fund or to develop processes and controls that completely eliminate or mitigate the occurrence of such failures. The Fund and its shareholders could be negatively impacted as a result.

GSAM may manage other funds, accounts, additional pooled vehicles and/or separate accounts that have similar investment strategies to those of the Funds. These funds, pooled vehicles or accounts may perform differently than the Fund despite their similar strategies. Because the pooled vehicles may not be registered under the Investment Company Act, they are subject to fewer regulatory restraints than the Funds (e.g., fewer trading constraints) and may employ strategies that are not subject to the same constraints as the Funds.

GSAM and/or its affiliates expect to make payments to one or more investors that contribute seed capital to the Fund for so long as such capital remains invested in the Fund. Such payments will be made from the assets of GSAM and/or such affiliates and will be based on revenues generated by GSAM in providing services to one or more ETFs for which it serves as investment adviser. Seed investors may contribute all or a majority of the assets in the Fund. There is a risk that such seed investors may redeem their investments in the Fund. As with redemptions by other large shareholders, such redemptions could have a significant negative impact on the Fund.

From time to time, Goldman Sachs or any of its affiliates may purchase and hold Shares of the Funds. Goldman Sachs and its affiliates reserve the right to redeem or sell at any time some or all of the Shares acquired for their own accounts.

MANAGEMENT FEE AND OTHER EXPENSES

Pursuant to the Fund's Management Agreement, as compensation for its services to the Fund, the Investment Adviser is entitled to a management fee, computed daily and payable monthly, at an annual rate listed below (as a percentage of the Fund's average daily net assets). Under the Management Agreement, the Investment Adviser is responsible for substantially all the expenses of the Fund, excluding payments under the Fund's 12b-1 plan (if any), interest expenses, taxes, acquired fund fees and expenses, brokerage fees, costs of holding shareholder meetings and litigation, indemnification and extraordinary expenses.

Fund	Fee as a Percentage of Average Daily Net Assets
Goldman Sachs Nasdaq-100 Core Premium Income ETF	0.35%
Goldman Sachs S&P 500 Core Premium Income ETF	0.35%

The Investment Adviser has agreed to waive a portion of its management fee in order to achieve an effective net management fee rate of 0.29% for each of the Funds through at least December 29, 2024, and prior to such date the Investment Adviser may not terminate the arrangement without the approval of the Board of Trustees. In addition to the management fee waivers described above, the Investment Adviser may waive a portion of its management fee, including fees earned as the Investment Adviser to any of the affiliated funds in which the Fund invests, except those management fees it earns from the Fund's investments of cash collateral received in connection with securities lending transactions in affiliated funds, from time to time, and may discontinue or modify any such waivers in the future, consistent with the terms of any fee waiver arrangements that may be in place.

A discussion regarding the basis for the Board of Trustees' approval of the Management Agreement for the Funds will be available in the Funds' semi-annual report dated February 29, 2024.

FUND MANAGERS

The individuals jointly and primarily responsible for the day-to-day management of the Fund are listed below. The Fund's portfolio managers' individual responsibilities may differ and may include, among other things, security selection, asset allocation, risk budgeting, selecting the composition of creation and redemption baskets, general oversight of the implementation processes and management of the Fund's portfolio.

Name and Title	Fund Responsibility	Years Primarily Responsible	Five Year Employment History
Raj Garigipati Managing Director	Co-Portfolio Manager— Nasdaq-100 Core Premium Income ETF	Since 2023	Mr. Garigipati joined the ETF Portfolio Management team within the QIS team in 2015. Prior to joining the ETF Portfolio Management team, he had been the Chief Risk Officer of the QIS team since 2011.
	S&P 500 Core Premium Income ETF	2023	
William Helm, CFA Vice President	Co-Portfolio Manager— Nasdaq-100 Core Premium Income ETF	Since 2023	Mr. Helm joined the ETF Portfolio Management team in 2022. Prior to joining the ETF Portfolio Management team, he worked for Global X Management Company, LLC and The Vanguard Group, Inc.
	S&P 500 Core Premium Income ETF	2023	

For information about portfolio manager compensation, other accounts managed by a portfolio manager and portfolio manager ownership of securities in the Fund, see the SAI.

DISTRIBUTOR

ALPS Distributors, Inc., 1290 Broadway, Suite 1000, Denver, Colorado 80203, serves as the exclusive distributor of Creation Units of Shares of the Funds pursuant to a “best efforts” arrangement as provided by a distribution agreement with the Trust on behalf of the Funds. Shares of the Funds are offered and sold on a continuous basis by the Distributor, acting as agent. The Distributor does not maintain a secondary market in the Fund’s Shares.

TRANSFER AGENT, CUSTODIAN AND PROVIDER OF ADMINISTRATIVE SERVICES

The Bank of New York Mellon (“BNYM”), 240 Greenwich Street, New York, New York 10286, serves as the Trust’s transfer and dividend disbursing agent. Under its transfer agency agreement with the Trust, BNYM has undertaken with the Trust to provide the following services with respect to the Fund: (i) perform and facilitate the performance of purchases and redemptions of Creation Units, (ii) prepare and transmit by means of Depository Trust Company’s (“DTC”) book-entry system payments for dividends and distributions on or with respect to the Shares declared by the Trust on behalf of the Fund, (iii) prepare and deliver reports, information and documents as specified in the transfer agency agreement, (iv) perform the customary services of a transfer agent and dividend disbursing agent, and (v) render certain other miscellaneous services as specified in the transfer agency agreement or as otherwise agreed upon.

BNYM is the custodian of the Trust’s portfolio securities and cash. The custodian of the Trust may change from time to time. BNYM also maintains the Trust’s accounting records. BNYM may appoint domestic and foreign sub-custodians and use depositories from time to time to hold securities and other instruments purchased by the Trust in foreign countries and to hold cash and currencies for the Trust.

BNYM provides administrative services pursuant to a fund administration agreement with the Trust (the “Fund Administration and Accounting Agreement”) pursuant to which BNYM provides certain services, including, among others, (i) preparation of certain shareholder reports and communications; (ii) preparation of certain reports and filings with the SEC; (iii) certain NAV computation services; and (iv) such other services for the Trust as may be mutually agreed upon between the Trust and BNYM. For its services under the Fund Administration and Accounting Agreement, BNYM receives such fees based on a stated percentage of net assets as are agreed upon from time to time between the parties. In addition, BNYM is reimbursed for reasonable out-of-pocket expenses incurred in connection with the Fund Administration and Accounting Agreement. In addition, an affiliate of BNYM will also provide certain other services for the Trust, including, (i) providing foreign exchange transaction services and (ii) executing trades in connection with certain creation and redemption transactions effected partially in cash. For these services, the BNYM affiliate will receive compensation based on levels that are negotiated with the Trust and/or the Investment Adviser. BNYM also provides certain middle office services to GSAM pursuant to a service agreement.

ACTIVITIES OF GOLDMAN SACHS AND ITS AFFILIATES AND OTHER ACCOUNTS MANAGED BY GOLDMAN SACHS

The involvement of the Investment Adviser, Goldman Sachs and their affiliates in the management of, or their interest in, other accounts and other activities of Goldman Sachs will present conflicts of interest with respect to the Fund and will, under certain circumstances, limit the Fund’s investment activities. Goldman Sachs is a worldwide, full service investment banking, broker dealer, asset management and financial services organization and a major participant in global financial markets that provides a wide range of financial services to a substantial and diversified client base that includes corporations, financial institutions, governments and individuals. As such, it acts as a broker-dealer, investment adviser, investment banker, underwriter, research provider, administrator, financier, adviser, market maker, trader, prime broker, derivatives dealer, clearing agent, lender, counterparty, agent, principal, distributor, investor or in other commercial capacities for accounts or companies or affiliated or unaffiliated investment funds (including pooled investment vehicles and private funds) in which one or more accounts, including the Fund, invest. In those and other capacities, Goldman Sachs and its affiliates advise and deal with clients and third parties in all markets and transactions and purchase, sell, hold and recommend a broad array of investments, including securities, derivatives, loans, commodities, currencies, credit default swaps, indices, baskets and other financial instruments and products for their own accounts or for the accounts of their customers and have other direct and indirect interests in the global fixed income, currency, commodity, equities, bank loans and other markets in which the Fund directly and indirectly invests. Thus, it is expected that the Fund will have multiple business relationships with and will invest in, engage in transactions with, make voting decisions with respect to, or obtain services from entities for which Goldman Sachs and its affiliates perform or seek to perform investment banking or other services. The Investment Adviser and/or certain of its affiliates are the managers of the Goldman Sachs Funds. The Investment Adviser and its affiliates earn fees from this and other relationships with the Fund. Although management fees paid by the Fund to the Investment Adviser and certain other fees paid to the Investment Adviser’s affiliates are based on asset levels, the fees are not directly contingent on Fund performance, and the Investment Adviser and its affiliates will still receive significant compensation from the Fund even if shareholders lose money. Goldman Sachs

and its affiliates engage in proprietary trading and advise accounts and funds which have investment objectives, principal investment strategies and/or policies similar or substantially similar to those of the Fund and/or engage in and compete for transactions in the same types of securities, currencies and instruments as the Fund. Due to differences in tax management considerations and implementation techniques, trades of the Fund's portfolio holdings may be executed on a delayed basis relative to such accounts and funds advised by Goldman Sachs and its affiliates with investment objectives, principal investment strategies and/or policies substantially similar to those of the Fund. This may cause trades of the Fund's portfolio holdings to be executed at inopportune times and/or prices. In addition, Goldman Sachs and its affiliates will not have any obligation to make available any information regarding their proprietary activities or strategies, or the activities or strategies used for other accounts managed by them, for the benefit of the management of the Fund. The results of the Fund's investment activities, therefore, will likely differ from those of Goldman Sachs, its affiliates and other accounts managed by Goldman Sachs, and it is possible that the Fund could sustain losses during periods in which Goldman Sachs and its affiliates and other accounts achieve significant profits on their trading for proprietary or other accounts. In addition, the Fund may enter into transactions in which Goldman Sachs and its affiliates or their other clients have an adverse interest. For example, the Fund may take a long position in a security at the same time that Goldman Sachs and its affiliates or other accounts managed by the Investment Adviser or its affiliates take a short position in the same security (or vice versa). These and other transactions undertaken by Goldman Sachs, its affiliates or Goldman Sachs-advised clients may, individually or in the aggregate, adversely impact the Fund. Transactions by one or more Goldman Sachs-advised clients or the Investment Adviser may have the effect of diluting or otherwise disadvantaging the values, prices or investment strategies of the Fund. The Fund's activities will, under certain circumstances, be limited because of regulatory restrictions applicable to Goldman Sachs and its affiliates, and/or their internal policies designed to comply with such restrictions. As a global financial services firm, Goldman Sachs and its affiliates also provide a wide range of investment banking and financial services to issuers of securities and investors in securities. Goldman Sachs, its affiliates and others associated with it are expected to create markets or specialize in, have positions in and/or effect transactions in, securities of issuers held by the Fund, and will likely also perform or seek to perform investment banking and financial services for one or more of those issuers. Goldman Sachs and its affiliates are expected to have business relationships with and purchase or distribute or sell services or products from or to distributors, consultants or others who recommend the Fund or who engage in transactions with or for the Fund.

For more information about conflicts of interest, see the section entitled "Potential Conflicts of Interest" in the SAI.

The Fund will, from time to time, make brokerage and other payments to Goldman Sachs and its affiliates in connection with the Fund's portfolio investment transactions, in accordance with applicable law.

The Fund's Board of Trustees may approve a securities lending program where an affiliate of the Investment Adviser is retained to serve as the securities lending agent for the Fund to the extent that the Fund engages in the securities lending program. For these services, the lending agent would receive a fee from the Fund, including a fee based on the returns earned on the Fund's investment of the cash received as collateral for the loaned securities.

Distributions

Each Fund pays distributions from its investment income and from net realized capital gains.

Distributions from net investment income, if any, are normally declared and paid monthly. Distributions from net capital gains, if any, are normally declared and paid annually.

In addition to the net investment income dividends paid monthly, the Fund may also earn additional net investment income throughout the year. Any additional net investment income will be distributed annually as a declared event and paid to shareholders of record for such events.

From time to time a portion of the Fund's distributions may constitute a return of capital for tax purposes, and/or may include amounts in excess of the Fund's net investment income for the period calculated in accordance with generally accepted accounting principles ("GAAP").

Dividends and other distributions on Shares of the Fund are distributed on a pro rata basis to beneficial owners of such Shares. Dividend payments are made through DTC Participants and Indirect Participants (each as described in the Book Entry section below) to beneficial owners then of record with proceeds received from the Fund.

No dividend reinvestment service is provided by the Fund. Broker-dealers may make available the DTC book-entry dividend reinvestment service for use by beneficial owners of the Fund for reinvestment of their dividend distributions. Beneficial owners should contact their broker to determine the availability and costs of the service and the details of participation therein. Brokers may require beneficial owners to adhere to specific procedures and timetables. If this service is available and used, dividend distributions of both income and realized gains will be automatically reinvested in additional whole Shares of the Fund purchased in the secondary market.

Shareholder Guide

BUYING AND SELLING SHARES

Shares of the Fund may be acquired or redeemed directly from the Fund at NAV only in Creation Units or multiples thereof, as discussed in the Creations and Redemptions section of the Prospectus. Only an Authorized Participant (as defined in the Creations and Redemptions section below) may engage in creation or redemption transactions directly with the Fund. Once created, Shares of the Fund generally trade in the secondary market in amounts less than a Creation Unit.

Shares of the Fund are listed for trading on a national securities exchange during the trading day. Shares can be bought and sold throughout the trading day at market price like shares of other publicly traded companies. However, there can be no guarantee that an active trading market will develop or be maintained, or that the Fund Shares listing will continue or remain unchanged. The Trust does not impose any minimum investment for Shares of the Fund purchased on an exchange. Buying or selling the Fund's Shares involves certain costs that apply to all securities transactions. When buying or selling Shares of the Fund through a financial intermediary, you may incur a brokerage commission or other charges determined by your financial intermediary. Due to these brokerage costs, if any, frequent trading may detract significantly from investment returns. In addition, you may also incur the cost of the spread (the difference between the bid price and the ask price). The commission is frequently a fixed amount and may be a significant cost for investors seeking to buy or sell small amounts of Shares. The spread varies over time for Shares of the Fund based on its trading volume and market liquidity, and is generally less if the Fund has more trading volume and market liquidity and more if the Fund has less trading volume and market liquidity.

The Fund's primary listing exchange is The NASDAQ Stock Market LLC. The Exchange is open for trading Monday through Friday and is closed on the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

A "business day" with respect to the Fund is each day the New York Stock Exchange, the Exchange, and the Trust are open and includes any day that the Fund is required to be open under Section 22(e) of the Investment Company Act. Orders from Authorized Participants to create or redeem Creation Units will only be accepted on a business day. On days when the Exchange closes earlier than normal, the Fund may require orders to create or redeem Creation Units to be placed earlier in the day. See the SAI for more information.

The Trust's Board of Trustees has not adopted a policy of monitoring for frequent purchases and redemptions of Fund Shares ("frequent trading") that appear to attempt to take advantage of potential arbitrage opportunities presented by a lag between a change in the value of the Fund's portfolio securities after the close of the primary markets for the Fund's portfolio securities and the reflection of that change in the Fund's NAV ("market timing"). The Trust believes this is appropriate because ETFs, such as the Fund, are intended to be attractive to arbitrageurs, as trading activity is critical to ensuring that the market price of Fund Shares remains at or close to NAV. Since the Fund issues and redeems Creation Units at NAV plus applicable transaction fees, and the Fund's Shares may be purchased and sold on the Exchange at prevailing market prices, the risks of frequent trading are limited.

Section 12(d)(1) of the Investment Company Act restricts investments by registered investment companies and companies relying on Sections 3(c)(1) or 3(c)(7) of the Investment Company Act in the securities of other investment companies. Registered investment companies are permitted to invest in the Fund beyond the limits set forth in Section 12(d)(1), subject to certain terms and conditions, including that such investment companies enter into an agreement with the Trust.

The Fund and the Distributor will have the sole right to accept orders to purchase Shares and reserve the right to reject any purchase order in whole or in part.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

GSAM and/or the Distributor (upon direction of the Fund) may make payments to broker-dealers, registered investment advisers or other financial intermediaries (each, a "Financial Intermediary") related to activities that are designed to make registered representatives, other professionals and individual investors more knowledgeable about the Fund or for other activities, such as participation in marketing activities and presentations, educational training programs, the support or purchase of technology platforms/software and/or reporting systems. GSAM and/or the Distributor (upon direction of the Fund) may also make payments to Financial Intermediaries for certain printing, publishing and mailing costs associated with the Fund or materials relating to exchange-traded funds in general and/or for the provision of analytical or other data to GSAM or its affiliates relating to marketing of the Fund mailing costs associated with the Fund or materials relating to exchange-traded funds in general and/or for the provision of analytical or other data to GSAM or its affiliates relating to the sales of Fund Shares. In addition, GSAM and/or the Distributor may make payments to Financial Intermediaries that make Fund Shares available to their clients or for otherwise promoting the Fund, including through provision of consultative services to GSAM or its affiliates relating to marketing of the Fund and/or sale of Fund Shares. Such

payments, which may be significant to the Financial Intermediary, are not made by the Fund. Rather, such payments are made by GSAM and/or the Distributor from their own resources, which may come directly or indirectly in part from management fees paid by the Fund. Payments of this type are sometimes referred to as marketing support or revenue-sharing payments. A Financial Intermediary may make decisions about which investment options it recommends or makes available, or the level of services provided, to its customers based on the marketing support payments it is eligible to receive. Therefore, such payments to a Financial Intermediary create conflicts of interest between the Financial Intermediary and its customers and may cause the Financial Intermediary to recommend the Fund over another investment. More information regarding these payments is contained in the SAI. A shareholder should contact his or her Financial Intermediary's salesperson or other investment professional for more information regarding any such payments the Financial Intermediary firm may receive from GSAM and/or the Distributor.

NET ASSET VALUE

The Fund generally calculates its NAV as follows:

$$\text{NAV} = \frac{\begin{array}{l} \text{(Value of Assets of the Fund)} \\ - \text{(Liabilities of the Fund)} \end{array}}{\text{Number of Outstanding Shares of the Fund}}$$

The Fund's NAV per share is generally calculated by the Fund's provider of administrative services on each business day as of the close of regular trading on the New York Stock Exchange (normally 4:00 p.m. Eastern time) or such other times as the New York Stock Exchange or NASDAQ market may officially close. The Fund's investments for which market quotations are readily available are valued at market value on the basis of quotations provided by pricing sources. If accurate quotations are not readily available, if the Fund's provider of administrative services is unable for other reasons to facilitate pricing of individual securities or calculate the Fund's NAV, or if the Investment Adviser believes that such quotations do not accurately reflect fair value, the fair value of the Fund's investments may be determined in good faith under valuation procedures approved by the Board of Trustees. Thus, such pricing may be based on subjective judgments and it is possible that the prices resulting from such valuation procedures may differ materially from the value realized on a sale. Cases where there is no clear indication of the value of the Fund's investments include, among others, situations where a security or other asset or liability does not have a price source or a price is unavailable.

Equity securities listed on an exchange are generally valued at the last available sale price on the exchange on which they are principally traded.

Fixed income securities are generally valued on the basis of prices (including evaluated prices) and quotations provided by pricing services or securities dealers. Pricing services may use matrix pricing or valuation models, which utilize certain inputs and assumptions, including, but not limited to, yield or price with respect to comparable fixed income securities, to determine current value. Pricing services generally value fixed income securities assuming orderly transactions of an institutional round lot size, but the Fund may hold or transact in such securities in smaller odd lot sizes. Odd lots may trade at lower prices than institutional round lots.

Investments in other open-end registered investment companies (if any), excluding investments in ETFs, are valued based on the NAV of those open-end registered investment companies (which may use fair value pricing as discussed in their prospectuses). Investments in ETFs will generally be valued at the last sale price or official closing price on the exchange on which they are principally traded.

In addition, the Investment Adviser, consistent with its procedures and applicable regulatory guidance, may (but need not) determine to make an adjustment to the previous closing prices of securities in light of significant events, to reflect what it believes to be the fair value of the securities at the time of determining the Fund's NAV. Significant events that could affect a large number of securities in a particular market may include, but are not limited to: situations relating to one or more single issuers in a market sector; significant fluctuations in U.S. or foreign markets; market dislocations; market disruptions or unscheduled market closings; equipment failures; natural or man-made disasters or acts of God; armed conflicts; governmental actions or other developments; as well as the same or similar events which may affect specific issuers or the securities markets even though not tied directly to the securities markets. Other significant events that could relate to a single issuer may include, but are not limited to: corporate actions such as reorganizations, mergers and buy-outs; corporate announcements, including those relating to earnings, products and regulatory news; significant litigation; ratings downgrades; bankruptcies; and trading limits or suspensions.

Fair valuation involves the risk that the values used by the Fund to price its investments may be different from those used by other investment companies and investors to price the same investments.

Foreign securities may trade in their local markets on days the Fund is closed. As a result, if the Fund holds foreign securities, its NAV may be impacted on days when investors may not purchase or sell Fund Shares on the secondary market or purchase or redeem Creation Units through the Fund.

The Fund relies on various sources to calculate its NAV. The ability of the Fund's provider of administrative services to calculate the NAV per share of the Fund is subject to operational risks associated with processing or human errors, systems or technology failures, cyber attacks and errors caused by third party service providers, data sources, or trading counterparties. Such failures may result in delays in the calculation of the Fund's NAV and/or the inability to calculate NAV over extended time periods. The Fund may be unable to recover any losses associated with such failures. In addition, if the third party service providers and/or data sources upon which the Fund directly or indirectly relies to calculate its NAV or price individual securities are unavailable or otherwise unable to calculate the NAV correctly, it may be necessary for alternative procedures to be utilized to price the securities at the time of determining the Fund's NAV.

BOOK ENTRY

DTC serves as securities depository for the Shares. (The Shares may be held only in book-entry form; stock certificates will not be issued.) DTC, or its nominee, is the record or registered owner of all outstanding Shares. Beneficial ownership of Shares will be shown on the records of DTC or its participants (described below). Beneficial owners of Shares are not entitled to have Shares registered in their names, will not receive or be entitled to receive physical delivery of certificates in definitive form and are not considered the registered holder thereof. Accordingly, to exercise any rights of a holder of Shares, each beneficial owner must rely on the procedures of: (i) DTC; (ii) "DTC Participants," i.e., securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations, some of whom (and/or their representatives) own DTC; and (iii) "Indirect Participants," i.e., brokers, dealers, banks and trust companies that clear through or maintain a custodial relationship with a DTC Participant, either directly or indirectly, through which such beneficial owner holds its interests. The Trust understands that under existing industry practice, in the event the Trust requests any action of holders of Shares, or a beneficial owner desires to take any action that DTC, as the record owner of all outstanding Shares, is entitled to take, DTC would authorize the DTC Participants to take such action and that the DTC Participants would authorize the Indirect Participants and beneficial owners acting through such DTC Participants to take such action and would otherwise act upon the instructions of beneficial owners owning through them. As described above, the Trust recognizes DTC or its nominee as the owner of all Shares for all purposes.

CREATIONS AND REDEMPTIONS

Prior to trading in the secondary market, Shares of the Fund are "created" at NAV by market makers, large investors and institutions only in block-size Creation Units or multiples thereof. Each "creator" or "Authorized Participant" enters into an authorized participant agreement with the Fund's Distributor.

A creation transaction, which is subject to acceptance by BNYM, as the Trust's transfer agent, generally takes place when an Authorized Participant deposits into the Fund a designated portfolio of securities (including any portion of such securities for which cash may be substituted) and a specified amount of cash in exchange for a specified number of Creation Units.

Similarly, Shares can be redeemed only in Creation Units, generally for a designated portfolio of securities (including any portion of such securities for which cash may be substituted) held by the Fund and a specified amount of cash. Except when aggregated in Creation Units, Shares are not redeemable by the Fund.

The prices at which creations and redemptions occur are based on the next calculation of NAV after a creation or redemption order is received in an acceptable form under the authorized participant agreement.

Please note the following with respect to the price at which transactions are processed:

- NAV per Share is generally calculated by the Fund's fund accounting agent on each business day as of the close of regular trading on the New York Stock Exchange (normally 4:00 p.m. Eastern time) or such other times as the New York Stock Exchange or NASDAQ market may officially close. Fund Shares will generally not be priced on any day the New York Stock Exchange is closed.
- The Trust reserves the right to reprocess creation and redemption transactions that were processed at a NAV that is subsequently adjusted, and to recover amounts from (or distribute amounts to) Authorized Participants accordingly based on the official closing NAV, as adjusted.
- The Trust reserves the right to advance the time by which creation and redemption orders must be received for same business day credit, as otherwise permitted by the SEC.
- Consistent with industry practice, investment transactions not settling on the same day are recorded and factored into the Fund's NAV on the business day following trade date (T+1). The use of T+1 accounting generally does not, but may, result in a NAV that differs materially from the NAV that would result if all transactions were reflected on their trade dates.

Note: The time at which transactions and Shares are priced and the time by which orders must be received may be changed in case of an emergency or if regular trading on the New York Stock Exchange is stopped at a time other than its regularly scheduled closing time. In the event the New York Stock Exchange does not open for business, the Trust may, but is not required to, open the Fund for creation and redemption transactions if the Federal Reserve wire payment system is open. To learn whether the Fund is open for business during this situation, please call the appropriate phone number located on the back cover of the Prospectus.

Only an Authorized Participant may create or redeem Creation Units directly with the Fund.

In the event of a system failure or other interruption, including disruptions at market makers or Authorized Participants, orders to purchase or redeem Creation Units either may not be executed according to the Fund's instructions or may not be executed at all, or the Fund may not be able to place or change orders.

To the extent the Fund engages in in-kind transactions, the Fund intends to comply with the U.S. federal securities laws in accepting securities for deposit and satisfying redemptions with redemption securities by, among other means, assuring that any securities accepted for deposit and any securities used to satisfy redemption requests will be sold in transactions that would be exempt from registration under the Securities Act of 1933, as amended (the "Securities Act"). Further, an Authorized Participant that is not a "qualified institutional buyer," as such term is defined under Rule 144A of the Securities Act, will not be able to receive restricted securities eligible for resale under Rule 144A.

Creations and redemptions must be made through a firm that is either a member of the Continuous Net Settlement System of the National Securities Clearing Corporation or a DTC Participant and has executed an agreement with the Distributor with respect to creations and redemptions of Creation Unit aggregations. Information about the procedures regarding creation and redemption of Creation Units (including the cut-off times for receipt of creation and redemption orders) and the applicable transaction fees is included in the Fund's SAI.

Taxation

Unlike many conventional mutual funds which are only bought and sold at closing NAVs, the Shares of the Fund, like Shares of certain other ETFs, have been designed to be redeemed principally in-kind in Creation Units at each day's market close. These in-kind arrangements are designed to mitigate adverse effects on the Fund's portfolio that could arise from frequent cash redemption transactions that affect the NAV of the Fund. Moreover, in contrast to conventional mutual funds, where frequent redemptions can have an adverse tax impact on taxable shareholders because of the need to sell portfolio securities which, in turn, may generate taxable gain, the in-kind redemption mechanism of the Fund to the extent used, generally is not expected to lead to a tax event for shareholders whose Shares are not being redeemed. There is no guarantee that these tax advantages will be realized or will materially reduce the amount of taxable capital gains distributed by the Fund to shareholders.

DISTRIBUTIONS

The Fund contemplates declaring as dividends each year all or substantially all of its taxable income. Distributions you receive from the Fund are generally subject to federal income tax and may also be subject to state or local taxes. This is true whether you reinvest your distributions in additional Fund Shares or receive them in cash. For federal tax purposes, the Fund's distributions attributable to net investment income and short-term capital gains are taxable to you as ordinary income while distributions of long-term capital gains are taxable to you as long-term capital gains, no matter how long you have owned your Fund Shares.

The Fund's transactions in derivatives (such as options, straddles, futures contracts and swaps) will be subject to special tax rules, the effect of which is expected to accelerate income to the Fund, defer losses to the Fund, cause adjustments in the holding periods of the Fund's securities, convert long-term capital gain into short-term capital gain, and convert short-term capital losses into long-term capital losses. These rules could therefore affect the amount, timing and character of distributions to you. The Fund's use of derivatives is expected to result in the Fund realizing more short-term capital gains and ordinary income subject to tax at ordinary income tax rates than it would if it did not use derivatives.

Because the Fund seeks to provide monthly distributions at a relatively stable rate, shareholders may receive distributions which constitute a return of capital for tax purposes. A return of capital is not taxable, but it reduces the shareholder's basis in its shares, which reduces the loss (or increases the gain) on a subsequent taxable disposition by such shareholder of the shares.

Under current provisions of the Code, the maximum individual rate applicable to long-term capital gains is generally either 15% or 20%, depending on whether the individual's income exceeds certain threshold amounts. Fund distributions to non-corporate shareholders attributable to dividends received by the Fund from U.S. and certain qualified foreign corporations will be reported as subject to the long-term capital gain rate as long as certain holding period and other requirements are met. For these lower rates to apply, if any such dividends are so reported, the non-corporate shareholder must own their Fund Shares for at least 61 days during the 121-day period beginning 60 days before the Fund's ex-dividend date.

Distributions in excess of the Fund's current and accumulated earnings and profits are treated as a tax-free return of your investment to the extent of your basis in the Shares, and generally as capital gain thereafter. A return of capital, which for tax purposes is treated as a return of your investment, reduces your basis in Shares, thus reducing any loss or increasing any gain on a subsequent taxable disposition of Shares. A distribution will reduce the Fund's NAV per share and may be taxable to you as ordinary income or capital gain even though, from an economic standpoint, the distribution may constitute a return of capital.

An additional 3.8% Medicare tax is imposed on certain net investment income (including ordinary dividends and capital gain distributions received from the Fund and net gains from redemptions or other taxable dispositions of Fund Shares) of U.S. individuals, estates and trusts to the extent that such person's "modified adjusted gross income" (in the case of an individual) or "adjusted gross income" (in the case of an estate or trust) exceeds certain threshold amounts.

Although distributions are generally treated as taxable to you in the year they are paid, distributions declared in October, November or December but paid in January are taxable as if they were paid in December. A percentage of the Fund's dividends paid to corporate shareholders may be eligible for the corporate dividends-received deduction. This percentage may, however, be reduced as a result of the Fund's securities lending activities or high portfolio turnover rate. Character and tax status of all distributions will be available to shareholders after the close of each calendar year.

The Fund may be subject to foreign withholding or other foreign taxes on income or gain from certain foreign securities. In general, the Fund may deduct these taxes in computing its taxable income.

If you buy Shares of the Fund before it makes a distribution, the distribution will be taxable to you even though it may actually be a return of a portion of your investment. This is known as "buying into a dividend."

TAXES ON CREATIONS AND REDEMPTIONS OF CREATION UNITS

A person who exchanges securities for Creation Units generally will recognize a gain or loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time of exchange and the sum of the exchanger's aggregate basis in the securities surrendered and the amount of any cash paid for such Creation Units. A person who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the sum of the aggregate market value of the securities received. The Internal Revenue Service, however, may assert that a loss realized upon an exchange of primarily securities for Creation Units cannot be deducted currently under the rules governing "wash sales," or on the basis that there has been no significant change in economic position. Persons exchanging securities for Creation Units or redeeming Creation Units should consult their own tax adviser with respect to whether wash sale rules apply and when a loss might be deductible and the tax treatment of any creation or redemption transaction.

Under current U.S. federal income tax laws, any capital gain or loss realized upon a redemption (or creation) of Creation Units is generally treated as long-term capital gain or loss if the Shares (or securities surrendered) have been held for more than one year and as a short-term capital gain or loss if the Shares (or securities surrendered) have been held for one year or less.

SALES OF FUND SHARES

Your sale of Fund Shares is a taxable transaction for federal income tax purposes, and may also be subject to state and local taxes. When you sell your Shares, you will generally recognize a capital gain or loss in an amount equal to the difference between your adjusted tax basis in the Shares and the amount received. Generally, this capital gain or loss is long-term or short-term depending on whether your holding period exceeds one year, except that any loss realized on Shares held for six months or less will be treated as a long-term capital loss to the extent of any long-term capital gain dividends that were received on the Shares. Additionally, any loss realized on a sale, exchange or redemption of Shares of the Fund may be disallowed under "wash sale" rules to the extent the Shares disposed of are replaced with other Shares of that Fund within a period of 61 days beginning 30 days before and ending 30 days after the date of disposition (such as pursuant to a dividend reinvestment in Shares of the Fund). If disallowed, the loss will be reflected in an adjustment to the basis of the Shares acquired.

OTHER INFORMATION

You may be subject to backup withholding at a rate of 24% with respect to taxable distributions if you do not provide your correct taxpayer identification number, or certify that it is correct, or if you have been notified by the IRS that you are subject to backup withholding.

Non-U.S. investors are generally subject to U.S. withholding tax and may be subject to estate tax with respect to their Fund Shares. However, withholding is generally not required on properly reported distributions to non-U.S. investors of long-term capital gains. Non-U.S. investors generally are not subject to U.S. federal income tax withholding on certain distributions of interest income and/or short-term capital gains that are reported by the Fund. It is expected that the Fund will generally make reports of short-term gains, to the extent permitted, but the Fund does not intend to report any distributions attributable to interest income. Therefore, all distributions of interest income will be subject to withholding when paid to non-U.S. investors.

Withholding of U.S. tax (at a 30% rate) is required with respect to payments of taxable dividends made to certain non-U.S. entities that fail to comply (or be deemed compliant) with extensive reporting and withholding requirements designed to inform the U.S. Department of the Treasury of U.S.-owned foreign investment accounts. Shareholders may be requested to provide additional information to enable the applicable withholding agent to determine whether withholding is required.

Reporting to you and the IRS is required annually on Form 1099-B not only with respect to the gross proceeds of Fund Shares you sell or redeem but also their cost basis. Shareholders should contact their intermediaries with respect to reporting of cost basis and available elections with respect to their accounts. You should carefully review the cost basis information provided by the applicable intermediary and make any additional basis, holding period or other adjustments that are required when reporting these amounts on your federal income tax returns.

Other Information

PREMIUM/DISCOUNT INFORMATION

Information regarding how often Shares of a Fund traded on the Exchange at a premium or discount during the most recently completed calendar year and the most recently completed calendar quarter(s) since that year (or the life of the Fund, if shorter), can be found at www.gsamfunds.com.

CONTINUOUS OFFERING

The method by which Creation Units are created and traded may raise certain issues under applicable securities laws. Because new Creation Units are issued and sold by the Trust on an ongoing basis, a “distribution,” as such term is used in the Securities Act, may occur at any point. Broker dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery and liability provisions of the Securities Act.

For example, a broker dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into constituent Shares, and sells such Shares directly to customers, or if it chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary market demand for Shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a categorization as an underwriter.

Broker dealers who are not “underwriters” but are participating in a distribution (as contrasted to ordinary secondary trading transactions), and thus dealing with Shares that are part of an “unsold allotment” within the meaning of Section 4(a)(3)(C) of the Securities Act, would be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3) of the Securities Act. This is because the prospectus delivery exemption in Section 4(a)(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the Investment Company Act. As a result, broker dealer firms should note that dealers who are not underwriters but are participating in a distribution (as contrasted with ordinary secondary market transactions) and thus dealing with the Shares that are part of an overallotment within the meaning of Section 4(a)(3)(A) of the Securities Act would be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3) of the Securities Act. Firms that incur a prospectus delivery obligation with respect to Shares are reminded that, under Rule 153 of the Securities Act, a prospectus delivery obligation under Section 5(b)(2) of the Securities Act owed to an exchange member in connection with a sale on the Exchange is satisfied by the fact that the prospectus is available at the Exchange upon request. The prospectus delivery mechanism provided in Rule 153 is only available with respect to transactions on an exchange.

In addition, certain affiliates of the Fund and the Investment Adviser may purchase and resell Fund Shares pursuant to the Prospectus.

DISTRIBUTION AND SERVICE PLAN

The Board of Trustees of the Trust has adopted a distribution and service plan (“Plan”) pursuant to Rule 12b-1 under the Investment Company Act. Under the Plan, the Fund is authorized to pay distribution fees in connection with the sale and distribution of its Shares and pay service fees in connection with the provision of ongoing services to shareholders of the Fund and the maintenance of shareholder accounts in an amount up to 0.25% of its average daily net assets each year.

No Rule 12b-1 fees are currently paid by the Fund, and there are no current plans to impose these fees. However, in the event Rule 12b-1 fees are charged in the future, because these fees are paid out of the Fund’s assets on an ongoing basis, these fees will increase the cost of your investment in the Fund. By purchasing Shares subject to distribution fees and service fees, you may pay more over time than you would by purchasing Shares with other types of sales charge arrangements. Long-term shareholders may pay more than the economic equivalent of the maximum front-end sales charge permitted by the rules of FINRA. The net income attributable to Shares will be reduced by the amount of distribution fees and service fees and other expenses of the Fund.

Index Providers

Goldman Sachs Nasdaq-100 Core Premium Income ETF

The Goldman Sachs Nasdaq-100 Core Premium Income ETF (the “Product”) is not sponsored, endorsed, sold or promoted by Nasdaq, Inc. or its affiliates (Nasdaq, with its affiliates, are referred to as the “Corporations”). The Corporations have not passed on the legality or suitability of, or the accuracy or adequacy of descriptions and disclosures relating to, the Product. The Corporations make no representation or warranty, express or implied to the owners of the Product or any member of the public regarding the advisability of investing in securities generally or in the Product particularly, or the ability of the Nasdaq-100 Index to track general stock market performance. The Corporations’ only relationship to Goldman Sachs Asset Management, L.P. (“Licensee”) is in the licensing of the Nasdaq[®], and certain trade names of the Corporations and the use of the Nasdaq-100 Index which is determined, composed and calculated by Nasdaq without regard to Licensee or the Product. Nasdaq has no obligation to take the needs of the Licensee or the owners of the Product into consideration in determining, composing or calculating the Nasdaq-100 Index. The Corporations are not responsible for and have not participated in the determination of the timing of, prices at, or quantities of the Product to be issued or in the determination or calculation of the equation by which the Product is to be converted into cash. The Corporations have no liability in connection with the administration, marketing or trading of the Product.

THE CORPORATIONS DO NOT GUARANTEE THE ACCURACY AND/OR UNINTERRUPTED CALCULATION OF THE NASDAQ-100 INDEX OR ANY DATA INCLUDED THEREIN. THE CORPORATIONS MAKE NO WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY LICENSEE, OWNERS OF THE PRODUCT, OR ANY OTHER PERSON OR ENTITY FROM THE USE OF THE NASDAQ-100 INDEX OR ANY DATA INCLUDED THEREIN. THE CORPORATIONS MAKE NO EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE WITH RESPECT TO THE NASDAQ-100 INDEX OR ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL THE CORPORATIONS HAVE ANY LIABILITY FOR ANY LOST PROFITS OR SPECIAL, INCIDENTAL, PUNITIVE, INDIRECT, OR CONSEQUENTIAL DAMAGES, EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

Goldman Sachs S&P 500 Core Premium Income ETF

The “S&P 500[®]” Index is a product of S&P Dow Jones Indices LLC or its affiliates (“SPDJI”), and has been licensed for use by Goldman Sachs Asset Management, L.P. Appendix A

Additional Information on Portfolio Risks, Securities and Techniques

A. GENERAL PORTFOLIO RISKS

The Fund will be subject to the risks associated with equity investments. “Equity investments” may include common stocks, preferred stocks, interests in REITs, convertible debt obligations, convertible preferred stocks, equity interests in trusts, partnerships, joint ventures, limited liability companies and similar enterprises, other investment companies (including ETFs), warrants, stock purchase rights and synthetic and derivative instruments (such as swaps and futures contracts) that have economic characteristics similar to equity securities.

In general, the values of equity investments fluctuate in response to the activities of individual companies and in response to general market and economic conditions. Accordingly, the values of the equity investments that the Fund holds may decline over short or extended periods. The stock markets tend to be cyclical, with periods when stock prices generally rise and periods when prices generally decline. This volatility means that the value of your investment in the Fund may increase or decrease. In recent years, certain stock markets have experienced substantial price volatility. To the extent the Fund’s net assets decrease or increase in the future due to price volatility or share redemption or purchase activity, the Fund’s expense ratio may correspondingly increase or decrease from the expense ratio disclosed in the Prospectus.

To the extent the Fund invests in pooled investment vehicles (including investment companies and ETFs), partnerships and REITs, the Fund will be affected by the investment policies, practices and performance of such entities in direct proportion to the amount of assets the Fund invests therein.

To the extent that the Fund invests in fixed income securities, the Fund will also be subject to the risks associated with its fixed income securities. These risks include interest rate risk, credit/default risk and call/extension risk. In general, interest rate risk involves the risk that when interest rates decline, the market value of fixed income securities tends to increase (although many mortgage-related securities will have less potential than other debt securities for capital appreciation during periods of declining rates). Conversely, when interest rates increase, the market value of fixed income securities tends to decline. Credit/default risk involves the risk that an issuer or guarantor could default on its obligations, and the Fund will not recover its investment. A rising interest rate environment could cause the value of the Fund’s fixed income securities, if any, to decrease, and fixed income markets to experience increased volatility in addition to heightened levels of liquidity risk. Additionally, decreases in the value of fixed income securities could lead to increased shareholder redemptions, which could impair the Fund’s ability to achieve its investment objective. The risks associated with increasing rates are heightened given that interest rates are near historic lows, but may be expected to increase in the future with unpredictable effects on the markets and the Fund’s investments. Call risk and extension risk are normally present in mortgage-backed securities and asset-backed securities. For example, homeowners have the option to prepay their mortgages. Therefore, the duration of a security backed by home mortgages can either shorten (call risk) or lengthen (extension risk). In general, if interest rates on new mortgage loans fall sufficiently below the interest rates on existing outstanding mortgage loans, the rate of prepayment would be expected to increase. Conversely, if mortgage loan interest rates rise above the interest rates on existing outstanding mortgage loans, the rate of prepayment would be expected to decrease. In either case, a change in the prepayment rate can result in losses to investors. The same would be true of asset-backed securities such as securities backed by car loans.

The Investment Adviser will not consider the portfolio turnover rate a limiting factor in making investment decisions for the Fund. A high rate of portfolio turnover (100% or more) involves correspondingly greater expenses which must be borne by the Fund and its shareholders and is also likely to result in higher short-term capital gains for taxable shareholders. The portfolio turnover rate is calculated by dividing the lesser of the dollar amount of sales or purchases of portfolio securities by the average monthly value of the Fund’s portfolio securities, excluding securities having a maturity at the date of purchase of one year or less. See “Financial Highlights” in Appendix B for a statement of the Fund’s historical portfolio turnover rates.

The Fund may, from time to time, enter into arrangements with certain brokers or other counterparties that require the segregation of collateral. For operational, cost or other reasons, when setting up arrangements relating to the execution/clearing of trades, the Fund may choose to select a segregation model which may not be the most protective option available in the case of a default by a broker or counterparty.

The following sections provide further information on certain types of securities and investment techniques that may be used by the Fund, including their associated risks. Additional information is provided in the SAI, which is available upon request. Among other things, the SAI describes certain fundamental investment restrictions that cannot be changed without shareholder approval. You should

note, however, that all investment objectives and all investment policies not specifically designated as fundamental are non-fundamental, and may be changed without shareholder approval. If there is a change in the Fund's investment objective, you should consider whether the Fund remains an appropriate investment in light of your then current financial position and needs.

B. OTHER PORTFOLIO RISKS

Risks of Writing Index Call Options. When the Funds write (sell) index or related ETF call options, respectively, they forego the opportunity to benefit from an increase in the value of the relevant index above the exercise price (plus the premium received) of the option, but each Fund continues to bear the risk of a decline in the value of the relevant index. As the seller of the index call options, the Funds receive cash (the “premium”) from the purchaser. Depending upon the type of call option, the purchaser of an index call option either (i) has the right to any appreciation in the value of the index over a fixed price (the “exercise price”) on a certain date in the future (the “expiration date”) or (ii) has the right to any appreciation in the value of the index over the exercise price at any time prior to the expiration of the option. If the purchaser does not exercise the option, the Fund retains the premium and makes no payments to the purchaser. If the purchaser exercises the option, the Fund pays the purchaser the difference between the price of the index and the exercise price of the option. The premium, the exercise price and the market value of the index determine the gain or loss realized by a Fund as the seller of the index call option. The Funds can also repurchase the call option prior to the expiration date, ending its obligation. In this case, the cost of entering into closing purchase transactions will determine the gain or loss realized by a Fund.

There is no assurance that a liquid market will be available at all times for the Fund to write call options or to enter into closing purchase transactions. In addition, the premiums the Funds receive for writing call options may decrease as a result of a number of factors, including a reduction in interest rates generally, a decline in stock market volumes or a decrease in the price volatility of the underlying securities. For more information see “Portfolio Securities and Techniques—Options on Securities, Securities Indices and Foreign Currencies.”

Risks of Investing in Mid-Capitalization and Small-Capitalization Companies. The Fund may, to the extent consistent with its investment policies, invest in mid- and small-capitalization companies. Investments in mid- and small-capitalization companies involve greater risk and portfolio price volatility than investments in larger capitalization stocks. Among the reasons for the greater price volatility of these investments are the less certain growth prospects of smaller firms and the lower degree of liquidity in the markets for such securities. Mid- and small-capitalization companies may be thinly traded and may have to be sold at a discount from current market prices or in small lots over an extended period of time. In addition, these securities are subject to the risk that during certain periods the liquidity of particular issuers or industries, or all securities in particular investment categories, will shrink or disappear suddenly and without warning as a result of adverse economic or market conditions, or adverse investor perceptions whether or not accurate. Because of the lack of sufficient market liquidity, the Fund may incur losses because it will be required to effect sales at a disadvantageous time and only then at a substantial drop in price. Mid- and small-capitalization companies include “unseasoned” issuers that do not have an established financial history; often have limited product lines, markets or financial resources; may depend on or use a few key personnel for management; and may be susceptible to losses and risks of bankruptcy. Mid- and small-capitalization companies may be operating at a loss or have significant variations in operating results; may be engaged in a rapidly changing business with products subject to a substantial risk of obsolescence; may require substantial additional capital to support their operations, to finance expansion or to maintain their competitive position; and may have substantial borrowings or may otherwise have a weak financial condition. In addition, these companies may face intense competition, including competition from companies with greater financial resources, more extensive development, manufacturing, marketing, and other capabilities, and a larger number of qualified managerial and technical personnel. Transaction costs for these investments are often higher than those of larger capitalization companies. Investments in mid- and small-capitalization companies may be more difficult to price precisely than other types of securities because of their characteristics and lower trading volumes.

Risks of Foreign Investments. The Funds may make foreign investments. Foreign investments involve special risks that are not typically associated with U.S. dollar denominated or quoted securities of U.S. issuers. Foreign investments may be affected by changes in currency rates, changes in foreign or U.S. laws or restrictions applicable to such investments and changes in exchange control regulations (e.g., currency blockage). A decline in the exchange rate of the currency (i.e., weakening of the currency against the U.S. dollar) in which a portfolio security is quoted or denominated relative to the U.S. dollar would reduce the value of the portfolio security. In addition, if the currency in which a Fund receives dividends, interest or other payments declines in value against the U.S. dollar before such income is distributed as dividends to shareholders or converted to U.S. dollars, the Fund may have to sell portfolio securities to obtain sufficient cash to pay such dividends.

Certain foreign markets may rely heavily on particular industries or foreign capital and are more vulnerable to diplomatic developments, the imposition of economic sanctions against a particular country or countries, organizations, entities and/or individuals, changes in international trading patterns, trade barriers, and other protectionist or retaliatory measures. International trade barriers or economic sanctions against foreign countries, organizations, entities and/or individuals may adversely affect a Fund's foreign holdings or exposures. The type and severity of sanctions and other similar measures, including counter sanctions and other

retaliatory actions, that may be imposed could vary broadly in scope, and their impact is impossible to predict. These types of measures may include, but are not limited to, banning a sanctioned country from global payment systems that facilitate cross-border payments, restricting the settlement of securities transactions by certain investors, and freezing the assets of particular countries, entities, or persons. The imposition of sanctions and other similar measures could, among other things, cause a decline in the value and/or liquidity of securities issued by the sanctioned country or companies located in or economically tied to the sanctioned country, downgrades in the credit ratings of the sanctioned country or companies located in or economically tied to the sanctioned country, devaluation of the sanctioned country's currency, and increased market volatility and disruption in the sanctioned country and throughout the world. Sanctions and other similar measures could limit or prevent the Fund from buying and selling securities (in the sanctioned country and other markets), significantly delay or prevent the settlement of securities transactions, and significantly impact the Fund's liquidity and performance.

Brokerage commissions, custodial services and other costs relating to investment in international securities markets generally are more expensive than in the United States. In addition, clearance and settlement procedures may be different in foreign countries and, in certain markets, such procedures have been unable to keep pace with the volume of securities transactions, thus making it difficult to conduct such transactions.

Foreign issuers are not generally subject to uniform accounting, auditing and financial reporting standards comparable to those applicable to U.S. issuers. There may be less publicly available information about a foreign issuer than about a U.S. issuer. In addition, there is generally less government regulation of foreign markets, companies and securities dealers than in the United States and the legal remedies for investors may be more limited than the remedies available in the United States. Foreign securities markets may have substantially less volume than U.S. securities markets and securities of many foreign issuers are less liquid and more volatile than securities of comparable domestic issuers. Furthermore, with respect to certain foreign countries, there is a possibility of nationalization, expropriation or confiscatory taxation, imposition of withholding or other taxes on dividend or interest payments (or, in some cases, capital gains distributions), limitations on the removal of funds or other assets from such countries, and risks of political or social instability or diplomatic developments which could adversely affect investments in those countries.

Certain foreign investments may become less liquid in response to social, political or market developments or adverse investor perceptions, or become illiquid after purchase by a Fund, particularly during periods of market turmoil. Certain foreign investments may become illiquid when, for instance, there are few, if any, interested buyers and sellers or when dealers are unwilling to make a market for certain securities. When a Fund holds illiquid investments, its portfolio may be harder to value, especially in changing markets.

If a Fund focuses its investments in one or a few countries and currencies, the Fund may be subjected to greater risks than if a Fund's assets were not geographically focused.

Investments in foreign securities may take the form of sponsored and unsponsored American Depositary Receipts ("ADRs"), Global Depositary Receipts ("GDRs"), European Depositary Receipts ("EDRs") or other similar instruments representing securities of foreign issuers. ADRs, GDRs and EDRs represent the right to receive securities of foreign issuers deposited in a bank or other depository. ADRs and certain GDRs are traded in the United States. GDRs may be traded in either the United States or in foreign markets. EDRs are traded primarily outside the United States. Prices of ADRs are quoted in U.S. dollars. EDRs and GDRs are not necessarily quoted in the same currency as the underlying security.

Foreign Custody Risk. The Fund may hold foreign securities and cash with foreign banks, agents and securities depositories appointed by the Fund's custodian (each a "Foreign Custodian"). Some Foreign Custodians may be recently organized or new to the foreign custody business. In some countries, Foreign Custodians may be subject to little or no regulatory oversight over or independent evaluation of their operations. Further, the laws of certain countries may place limitations on the Fund's ability to recover its assets if a Foreign Custodian enters bankruptcy. Investments in emerging markets may be subject to even greater custody risks than investments in more developed markets. Custody services in emerging market countries are very often undeveloped and may be considerably less well regulated than in more developed countries, and thus may not afford the same level of investor protection as would apply in developed countries.

Risks of Derivative Investments. The Fund may, to the extent consistent with its investment policy, invest in derivative instruments, including without limitation, options, futures, options on futures, swaps, structured securities and forward contracts and other derivatives relating to foreign currency transactions. Derivatives may be used for both hedging and non-hedging purposes (that is, to seek to increase total return), although suitable derivative instruments may not always be available to the Investment Adviser for these purposes. Losses from derivative instruments can result from a lack of correlation between changes in the value of derivative instruments and the portfolio assets (if any) being hedged, the potential illiquidity of the markets for derivative instruments, the failure of the counterparty to perform its contractual obligations, or the risks related to leverage factors associated with such transactions. Derivatives are also subject to risks arising from margin requirements, which include the risk that the Fund will be required to pay additional margin or set aside additional collateral to maintain open derivative positions and the risk of loss by the Fund of margin deposits in the event of the bankruptcy or other similar insolvency with respect to a broker or counterparty with whom the Fund has an

open derivative position. Losses may also arise if the Fund receives cash collateral under the transactions and some or all of that collateral is invested in the market. To the extent that cash collateral is so invested, such collateral will be subject to market depreciation or appreciation, and the Fund may be responsible for any loss that might result from its investment of the counterparty's cash collateral. If cash collateral is not invested, the Fund may be exposed to additional risk of loss in the event of the insolvency of its custodian holding such collateral. The use of these management techniques also involves the risk of loss if the Investment Adviser is incorrect in its expectation of the timing or level of fluctuations in securities prices, interest rates, currency prices or other variables.

Derivative instruments may be harder to value, subject to greater volatility and more likely subject to changes in tax treatment than other investments. For these reasons, the Investment Adviser's attempts to hedge portfolio risks through the use of derivative instruments may not be successful, and the Investment Adviser may choose not to hedge portfolio risks. Using derivatives for non-hedging purposes is considered a speculative practice and presents greater risk of loss than derivatives used for hedging purposes.

Risks of Illiquid Investments. The Fund may not acquire any "illiquid investment" if, immediately after the acquisition, the Fund would have invested more than 15% of its net assets in illiquid investments that are assets. An "illiquid investment" is any investment that the Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment. In determining whether an investment is an illiquid investment, the Investment Adviser will take into account actual or estimated daily transaction volume of an investment, group of related investments or asset class and other relevant market, trading, and investment-specific considerations. In addition, in determining the liquidity of an investment, the Investment Adviser must determine whether trading varying portions of a position in a particular portfolio investment or asset class, in sizes that the Fund would reasonably anticipate trading, is reasonably expected to significantly affect its liquidity, and if so, the Fund must take this determination into account when classifying the liquidity of that investment or asset class.

Investments purchased by the Fund that are liquid at the time of purchase may subsequently become illiquid. If one or more investments in the Fund's portfolio become illiquid, the Fund may exceed the 15 percent limitation in illiquid investments. In the event that changes in the portfolio or other external events cause the Fund to exceed this limit, the Fund must take steps to bring its illiquid investments that are assets to or below 15% of its net assets within a reasonable period of time. This requirement would not force the Fund to liquidate any portfolio instrument where the Fund would suffer a loss on the sale of that instrument.

In cases where no clear indication of the value of the Fund's portfolio instruments is available, the portfolio instruments may be valued at their fair value according to the valuation procedures approved by the Fund's Board of Trustees. These cases include, among others, situations where a security or other asset or liability does not have a price source, or the secondary markets on which an investment has previously been traded are no longer viable, due to its lack of liquidity. For more information on fair valuation, please see "Shareholder Guide—Net Asset Value."

Credit/Default Risks. Debt securities purchased by the Fund may include securities issued or guaranteed by the U.S. government, its agencies, instrumentalities or sponsored enterprises ("U.S. Government Securities") (including zero coupon bonds) and securities issued by foreign governments, domestic and foreign corporations, banks and other issuers. Some of these fixed income securities are described in the next section below. Further information is provided in the SAI.

Debt securities rated BBB— or higher by Standard & Poor's or Baa3 or higher by Moody's or having a comparable credit rating by another NRSRO are considered "investment grade." Securities rated BBB— or Baa3 are considered medium-grade obligations with speculative characteristics, and adverse economic conditions or changing circumstances may weaken their issuers' capacity to pay interest and repay principal. For the purpose of determining compliance with any credit rating requirement, the Fund assigns a security, at the time of purchase, the highest rating by an NRSRO if the security is rated by more than one NRSRO. Therefore, a security will be deemed to have met a rating requirement if it receives the minimum required rating from at least one such rating organization even though it has been rated below the minimum rating by one or more other rating organizations, or if unrated by such rating organizations, the security is determined by the Investment Adviser to be of comparable credit quality.

A security satisfies the Fund's minimum rating requirement regardless of its relative ranking (for example, plus or minus) within a designated major rating category (for example, BBB or Baa). If a security satisfies the Fund's minimum rating requirement at the time of purchase and is subsequently downgraded below that rating, the Fund will not be required to dispose of the security. If a downgrade occurs, the Investment Adviser will consider which action, including the sale of the security, is in the best interest of the Fund and its shareholders.

In some cases, junk bonds may be highly speculative, have poor prospects for reaching investment grade standing and be in default. As a result, investment in such bonds will present greater speculative risks than those associated with investment in investment grade bonds. Also, to the extent that the rating assigned to a security in the Fund's portfolio is downgraded by a rating organization, the market price and liquidity of such security may be adversely affected.

Temporary Investment Risks. The Fund may, for temporary defensive purposes, invest up to 100% of its total assets in:

- U.S. Government Securities

- Commercial paper rated at least A-2 by Standard & Poor's Global Ratings, P-2 by Moody's or having a comparable credit rating by another NRSRO (or, if unrated, determined by the Investment Adviser to be of comparable credit quality)
- Certificates of deposit
- Bankers' acceptances
- Repurchase agreements
- Non-convertible preferred stocks and non-convertible corporate bonds with a remaining maturity of less than one year
- ETFs
- Other investment companies
- Cash items

When the Fund's assets are invested in such instruments, the Fund may not be achieving its investment objective.

C. PORTFOLIO SECURITIES AND TECHNIQUES

This section provides further information on certain types of securities and investment techniques that may be used by the Fund, including their associated risks.

The Fund may purchase other types of securities or instruments similar to those described in this section if otherwise consistent with the Fund's investment objective and policies. Further information is provided in the SAI, which is available upon request.

Convertible Securities. The Fund may invest in convertible securities. Convertible securities are preferred stock or debt obligations that are convertible into common stock. Convertible securities generally offer lower interest or dividend yields than nonconvertible securities of similar quality. Convertible securities have both equity and fixed income risk characteristics. Like all fixed income securities, the value of convertible securities is susceptible to the risk of market losses attributable to changes in interest rates. Generally, the market value of convertible securities tends to decline as interest rates increase and, conversely, to increase as interest rates decline. However, when the market price of the common stock underlying a convertible security exceeds the conversion price of the convertible security, the convertible security tends to reflect the market price of the underlying common stock. As the market price of the underlying common stock declines, the convertible security, like a fixed income security, tends to trade increasingly on a yield basis, and thus may not decline in price to the same extent as the underlying common stock.

REITs. The Fund may invest in REITs. REITs are pooled investment vehicles that invest primarily in either real estate or real estate related loans. The value of a REIT is affected by changes in the value of the properties owned by the REIT or securing mortgage loans held by the REIT. REITs are dependent upon the ability of the REITs' managers, and are subject to heavy cash flow dependency, default by borrowers and the qualification of the REITs under applicable regulatory requirements for favorable income tax treatment. REITs are also subject to risks generally associated with investments in real estate including possible declines in the value of real estate, general and local economic conditions, environmental problems and changes in interest rates. To the extent that assets underlying a REIT are concentrated geographically, by property type or in certain other respects, these risks may be heightened. The Fund will indirectly bear its proportionate share of any expenses, including management fees, paid by a REIT in which it invests.

Options on Securities, Securities Indices and Foreign Currencies. A put option gives the purchaser of the option the right to sell, and the writer (seller) of the option the obligation to buy, the underlying instrument during the option period. A call option gives the purchaser of the option the right to buy, and the writer (seller) of the option the obligation to sell, the underlying instrument during the option period. The Fund may write (sell) call and put options and purchase put and call options on any securities and other instruments in which the Fund may invest or any index consisting of securities or other instruments in which it may invest. The Fund may also, to the extent consistent with its investment policies, purchase and write (sell) put and call options on foreign currencies.

The writing and purchase of options is a highly specialized activity which involves special investment risks. Options may be used for either hedging or cross-hedging purposes, or to seek to increase total return (which presents additional risk). The successful use of options depends in part on the ability of the Investment Adviser to anticipate future price fluctuations and the degree of correlation between the options and securities (or currency) markets. If the Investment Adviser is incorrect in its expectation of changes in market prices or determination of the correlation between the instruments or indices on which options are written and purchased and the instruments in the Fund's investment portfolio, the Fund may incur losses that it would not otherwise incur. The use of options can also increase the Fund's transaction costs. Options written or purchased by the Fund may be traded on either U.S. or foreign exchanges or over-the-counter. Foreign and over-the-counter options will present greater possibility of loss because of their greater illiquidity and credit risks.

Futures Contracts and Options and Swaps on Futures Contracts. Futures contracts are standardized, exchange-traded contracts that provide for the sale or purchase of a specified financial instrument or currency at a future time at a specified price. An option on a futures contract gives the purchaser the right (and the writer of the option the obligation) to assume a position in a futures contract at a specified exercise price within a specified period of time. A swap on a futures contract provides an investor with the ability to gain economic exposure to a particular futures market. A futures contract may be based on particular securities, foreign currencies, securities indices and other financial instruments and indices. The Fund may engage in futures transactions on both U.S. and foreign exchanges.

The Fund may purchase and sell futures contracts, purchase and write call and put options on futures contracts, and enter into swaps on futures contracts, in order to seek to increase total return or to hedge against changes in interest rates, securities prices or currency exchange rates, or to otherwise manage its term structure, sector selections and duration in accordance with its investment objective and policies. The Fund may also enter into closing purchase and sale transactions with respect to such contracts and options.

Futures contracts and related options and swaps present the following risks:

- While the Fund may benefit from the use of futures and options and swaps on futures, unanticipated changes in interest rates, securities prices or currency exchange rates may result in poorer overall performance than if the Fund had not entered into any futures contracts, options transactions or swaps.
- Because perfect correlation between a futures position and a portfolio position that is intended to be protected is impossible to achieve, the desired protection may not be obtained and the Fund may be exposed to additional risk of loss.
- The loss incurred by the Fund in entering into futures contracts and in writing call options and entering into swaps on futures is potentially unlimited and may exceed the amount of the premium received.
- Futures markets are highly volatile and the use of futures may increase the volatility of the Fund's NAV.
- As a result of the low margin deposits normally required in futures trading, a relatively small price movement in a futures contract may result in substantial losses to the Fund.
- Futures contracts and options and swaps on futures may be illiquid, and exchanges may limit fluctuations in futures contract prices during a single day.
- Foreign exchanges may not provide the same protection as U.S. exchanges.

Equity Swaps and Index Swaps. The Fund may invest in equity swaps and index swaps. Equity swaps allow the parties to a swap agreement to exchange the dividend income or other components of return on an equity investment (for example, a group of equity securities or an index) for another payment stream. An equity swap may be used by the Fund to invest in a market without owning or taking physical custody of securities in circumstances in which direct investment may be restricted for legal reasons or is otherwise deemed impractical or disadvantageous. Index swaps allow one party or both parties to a swap agreement to receive one or more payments based off of the return, performance or volatility of an index or of certain securities which comprise the index. Under an equity swap, payments may be made at the conclusion of the equity swap or periodically during its term. Sometimes, however, the Investment Adviser may be able to terminate a swap contract prior to its term, subject to any potential termination fee that is in addition to the Fund's accrued obligations under the swap.

Equity swaps may be structured in different ways. For example, when the Fund takes a long position, a counterparty may agree to pay the Fund the amount, if any, by which the notional amount of the equity swap would have increased in value had it been invested in a particular stock (or group of stocks), plus the dividends that would have been received on the stock. In these cases, the Fund may agree to pay to the counterparty interest on the notional amount of the equity swap plus the amount, if any, by which that notional amount would have decreased in value had it been invested in such stock (or group of stocks). Therefore, in this case the return to the Fund on the equity swap should be the gain or loss on the notional amount plus dividends on the stock less the interest paid by the Fund on the notional amount. In other cases, when the Fund takes a short position, a counterparty may agree to pay the Fund the amount, if any, by which the notional amount of the equity swap would have decreased in value had the Fund sold a particular stock (or group of stocks) short, less the dividend expense that the Fund would have paid on the stock (or group of stocks), as adjusted for interest payments or other economic factors.

The value of swaps can be very volatile. To the extent that the Investment Adviser does not accurately analyze and predict the potential relative fluctuation of the components swapped with another party, future market trends, the values of assets or economic factors, or the creditworthiness of the counterparty, the Fund may suffer a loss, which may be substantial. The value of some components of a swap (such as the dividends on a common stock) may also be sensitive to changes in interest rates. Furthermore, swaps may be illiquid, and the Fund may be unable to terminate its obligations when desired.

Currently, certain standardized swap transactions are subject to mandatory central clearing and exchange trading. Although central clearing and exchange trading is expected to decrease counterparty risk and increase liquidity compared to bilaterally negotiated swaps, central clearing and exchange trading does not eliminate counterparty risk or illiquidity risk entirely. Depending on the size of the Fund and other factors, the margin required under the rules of a clearinghouse and by a clearing member may be in excess of the collateral required to be posted by the Fund to support its obligations under a similar bilateral, uncleared swap. However, certain applicable regulators have adopted rules imposing certain margin requirements, including minimums, on uncleared swaps which may result in the Fund and its counterparties posting higher amounts for uncleared swaps.

When-Issued Securities and Forward Commitments. The Fund may purchase when-issued securities and make contracts to purchase or sell securities for a fixed price at a future date beyond customary settlement time. When-issued securities are securities that have been authorized, but not yet issued. When-issued securities are purchased in order to secure what is considered to be an advantageous price and yield to the Fund at the time of entering into the transaction. A forward commitment involves the entering into a contract to purchase or sell securities for a fixed price at a future date beyond the customary settlement period.

The purchase of securities on a when-issued or forward commitment basis involves a risk of loss if the value of the security to be purchased declines before the settlement date. Conversely, the sale of securities on a forward commitment basis involves the risk that the value of the securities sold may increase before the settlement date. Although the Fund will generally purchase securities on a when-issued or forward commitment basis with the intention of acquiring the securities for its portfolio, the Fund may dispose of when-issued securities or forward commitments prior to settlement if the Investment Adviser deems it appropriate.

Repurchase Agreements. Repurchase agreements involve the purchase of securities subject to the seller's agreement to repurchase them at a mutually agreed upon date and price. The Fund may enter into repurchase agreements with counterparties approved by the Investment Adviser pursuant to procedures approved by the Board of Trustees that furnish collateral at least equal in value or market price to the amount of their repurchase obligation. The collateral may consist of any type of security (government or corporate) of any or no credit rating. Repurchase agreements involving obligations other than U.S. Government Securities may be subject to additional risks.

If the other party or "seller" defaults, the Fund might suffer a loss to the extent that the proceeds from the sale of the underlying securities and other collateral held by the Fund are less than the repurchase price and the Fund's costs associated with delay and enforcement of the repurchase agreement. In addition, in the event of bankruptcy of the seller, the Fund could suffer additional losses if a court determines that the Fund's interest in the collateral is not enforceable.

The Fund, together with other registered investment companies having advisory agreements with the Investment Adviser or any of its affiliates, may transfer uninvested cash balances into a single joint account, the daily aggregate balance of which will be invested in one or more repurchase agreements.

Short Sales Against-the-Box. The Fund may make short sales against-the-box. A short sale against-the-box means that at all times when a short position is open the Fund will own an equal amount of securities sold short, or securities convertible into or exchangeable for, without payment of any further consideration, an equal amount of the securities of the same issuer as the securities sold short.

Preferred Stock, Warrants and Stock Purchase Rights. The Fund may invest in preferred stock, warrants and stock purchase rights (or "rights"). Preferred stocks are securities that represent an ownership interest providing the holder with claims on the issuer's earnings and assets before common stock owners but after bond owners. Unlike debt securities, the obligations of an issuer of preferred stock, including dividend and other payment obligations, may not typically be accelerated by the holders of such preferred stock on the occurrence of an event of default or other non-compliance by the issuer of the preferred stock.

Warrants and other rights are options to buy a stated number of shares of common stock at a specified price at any time during the life of the warrant or right. The holders of warrants and rights have no voting rights, receive no dividends and have no rights with respect to the assets of the issuer.

Other Investment Companies. The Fund may invest in securities of other investment companies, including ETFs and money market funds, subject to statutory limitations prescribed by the Investment Company Act or rules, regulations or exemptive relief thereunder. These statutory limitations include in certain circumstances a prohibition on the Fund acquiring more than 3% of the voting shares of any other investment company, and a prohibition on investing more than 5% of the Fund's total assets in securities of any one investment company or more than 10% of total assets in securities of all investment companies.

Subject to applicable law and/or pursuant to an exemptive order obtained from the SEC or under an exemptive rule adopted by the SEC, the Fund may invest in certain other investment companies (including ETFs and money market funds) and business development companies beyond the statutory limits described above or otherwise provided that certain conditions are met. Some of those investment companies may be funds for which the Investment Adviser or any of its affiliates serves as investment adviser, administrator or distributor.

Additionally, to the extent that any Fund serves as an “acquired fund” to another Goldman Sachs Fund or unaffiliated investment company, the Fund’s ability to invest in other investment companies and private funds may be limited and, under these circumstances, the Fund’s investments in other investment companies and private funds will be consistent with applicable law and/or exemptive rules adopted by or exemptive orders obtained from the SEC. For example, to the extent the Fund serves as an acquired fund in a fund of funds arrangement in reliance on Rule 12d1-4 under the Investment Company Act, the Fund would be prohibited from purchasing or otherwise acquiring the securities of an investment company or private fund if, after such purchase or acquisition, the aggregate value of the Fund’s investments in such investment companies and private funds would exceed 10% of the value of the Fund’s total assets, subject to limited exceptions (including for investments in money market funds).

The use of ETFs is generally intended to help a Fund match the total return of the particular market segments or indices represented by those ETFs, although that may not be the result. Most ETFs are passively managed investment companies whose shares are purchased and sold on a securities exchange. An ETF generally represents a portfolio of securities designed to track a particular market segment or index. An investment in an ETF generally presents the same primary risks as an investment in a conventional fund (i.e., one that is not exchange-traded) that has the same investment objectives, strategies and policies. In addition, an ETF may fail to accurately track the market segment or index that underlies its investment objective. The price of an ETF can fluctuate, and a Fund could lose money investing in an ETF. Moreover, ETFs are subject to the following risks that do not apply to conventional funds: (i) the market price of the ETF’s shares may trade at a premium or a discount to their NAV; (ii) an active trading market for an ETF’s shares may not develop or be maintained; and (iii) there is no assurance that the requirements of the exchange necessary to maintain the listing of an ETF will continue to be met or remain unchanged.

The Fund will indirectly bear its proportionate share of any management fees and other expenses paid by such other investment companies, in addition to the fees and expenses regularly borne by the Fund. Although the Fund do not expect to do so in the foreseeable future, the Fund is authorized to invest substantially all of its assets in a single open-end investment company or series thereof that has substantially the same investment objective, policies and fundamental restrictions as the Fund.

Unseasoned Companies. The Fund may invest in companies which (together with their predecessors) have operated less than three years. The securities of such companies may have limited liquidity, which can result in their being priced higher or lower than might otherwise be the case. In addition, investments in unseasoned companies are more speculative and entail greater risk than investments in companies with an established operating record.

Corporate Debt Obligations. Corporate debt obligations include bonds, notes, debentures, commercial paper and other obligations of corporations to pay interest and repay principal. The Fund may invest in corporate debt obligations issued by U.S. and certain non-U.S. issuers which issue securities denominated in the U.S. dollar (including Yankee and Euro obligations). In addition to obligations of corporations, corporate debt obligations include securities issued by banks and other financial institutions and supranational entities (i.e., the World Bank, the International Monetary Fund, etc.).

Bank Obligations. The Fund may invest in obligations issued or guaranteed by U.S. or foreign banks. Bank obligations, including without limitation, time deposits, bankers’ acceptances and certificates of deposit, may be general obligations of the parent bank or may be limited to the issuing branch by the terms of the specific obligations or by government regulations. Banks are subject to extensive but different governmental regulations which may limit both the amount and types of loans which may be made and interest rates which may be charged. In addition, the profitability of the banking industry is largely dependent upon the availability and cost of funds for the purpose of financing lending operations under prevailing money market conditions. General economic conditions as well as exposure to credit losses arising from possible financial difficulties of borrowers play an important part in the operation of this industry.

U.S. Government Securities. The Fund may invest in U.S. Government Securities. U.S. Government Securities include U.S. Treasury obligations and obligations issued or guaranteed by U.S. government agencies, instrumentalities or sponsored enterprises.

U.S. Government Securities may be supported by (i) the full faith and credit of the U.S. Treasury; (ii) the right of the issuer to borrow from the U.S. Treasury; (iii) the discretionary authority of the U.S. government to purchase certain obligations of the issuer; or (iv) only the credit of the issuer. U.S. Government Securities also include Treasury receipts, zero coupon bonds and other stripped U.S. Government Securities, where the interest and principal components are traded independently.

U.S. Government Securities may also include Treasury inflation-protected securities whose principal value is periodically adjusted according to the rate of inflation.

U.S. Government Securities are deemed to include (i) securities for which the payment of principal and interest is backed by an irrevocable letter of credit issued by the U.S. government, its agencies, authorities or instrumentalities; and (ii) participations in loans made to foreign governments or their agencies that are so guaranteed. Certain of these participations may be regarded as illiquid.

U.S. Government Securities have historically involved little risk of loss of principal if held to maturity. However, no assurance can be given that the U.S. government will be able or willing to repay the principal or interest when due, or provide financial support to U.S. government agencies, authorities, instrumentalities or sponsored enterprises if it is not obligated to do so by law.

Custodial Receipts and Trust Certificates. The Fund may invest in custodial receipts and trust certificates representing interests in securities held by a custodian or trustee. The securities so held may include U.S. Government Securities or other types of securities in which the Fund may invest. The custodial receipts or trust certificates may evidence ownership of future interest payments, principal payments or both on the underlying securities, or, in some cases, the payment obligation of a third party that has entered into an interest rate swap or other arrangement with the custodian or trustee. For certain securities laws purposes, custodial receipts and trust certificates may not be considered obligations of the U.S. government or other issuer of the securities held by the custodian or trustee. If for tax purposes the Fund is not considered to be the owner of the underlying securities held in the custodial or trust account, the Fund may suffer adverse tax consequences. As a holder of custodial receipts and trust certificates, the Fund will bear its proportionate share of the fees and expenses charged to the custodial account or trust. The Fund may also invest in separately issued interests in custodial receipts and trust certificates.

Borrowings. The Fund can borrow money from banks and other financial institutions in amounts not exceeding one-third of its total assets (including the amount borrowed or received), for temporary or emergency purposes.

Mortgage Dollar Rolls. The Fund may enter into mortgage dollar rolls. A mortgage dollar roll involves the sale by the Fund of securities for delivery in the current month. The Fund simultaneously contracts with the same counterparty to repurchase substantially similar (same type, coupon and maturity) but not identical securities on a specified future date. During the roll period, the Fund loses the right to receive principal and interest paid on the securities sold. However, the Fund benefits to the extent of any difference between (a) the price received for the securities sold and (b) the lower forward price for the future purchase and/or fee income plus the interest earned on the cash proceeds of the securities sold. Unless the benefits of a mortgage dollar roll exceed the income, capital appreciation and gain or loss due to mortgage prepayments that would have been realized on the securities sold as part of the roll, the use of this technique will diminish the Fund's performance.

Successful use of mortgage dollar rolls depends upon the Investment Adviser's ability to predict correctly interest rates and mortgage prepayments. If the Investment Adviser is incorrect in its prediction, the Fund may experience a loss. The Fund does not currently intend to enter into mortgage dollar rolls for financing and does not treat them as borrowings.

Lending of Portfolio Securities. The Fund may engage in securities lending. Securities lending involves the lending of securities owned by the Fund to financial institutions such as certain broker-dealers. The borrowers are required to secure their loans continuously with cash, cash equivalents, U.S. government securities or letters of credit in an amount at least equal to the market value of the securities loaned. Cash collateral may be invested by the Fund in short-term investments, including registered and unregistered investment pools managed by the Investment Adviser or its affiliates and from which the Investment Adviser or its affiliates may receive fees. To the extent that cash collateral is so invested, such collateral will be subject to market depreciation or appreciation, and the Fund will be responsible for any loss that might result from its investment of the borrowers' collateral. If the Investment Adviser determines to make securities loans, the value of the securities loaned may not exceed 331/3% of the value of the total assets of the Fund (including the loan collateral). Loan collateral (including any investment of that collateral) is not subject to the percentage limitations regarding the Fund's investments described in its prospectus. The Fund may lend its securities to increase its income. The Fund may, however, experience delay in the recovery of its securities or incur a loss if the institution with which it has engaged in a portfolio loan transaction breaches its agreement with the Fund or its agent, or becomes insolvent.

Foreign Currency Transactions. The Fund may, to the extent consistent with its investment policies, purchase or sell foreign currencies on a cash basis or through forward contracts. A forward contract involves an obligation to purchase or sell a specific currency at a future date at a price set at the time of the contract. The Fund may engage in foreign currency transactions for hedging purposes and to seek to protect against anticipated changes in future foreign currency exchange rates. In addition, the Fund may enter into foreign currency transactions to seek a closer correlation between the Fund's overall currency exposures and the currency exposures of the Fund's performance benchmark. The Fund may also enter into such transactions to seek to increase total return, which presents additional risk.

The Fund may also engage in cross-hedging by using forward contracts in a currency different from that in which the hedged security is denominated or quoted. The Fund may hold foreign currency received in connection with investments in foreign securities when, in the judgment of the Investment Adviser, it would be beneficial to convert such currency into U.S. dollars at a later date (e.g., the Investment Adviser may anticipate the foreign currency to appreciate against the U.S. dollar).

The Fund may, from time to time, engage in non-deliverable forward transactions to manage currency risk or to gain exposure to a currency without purchasing securities denominated in that currency. A non-deliverable forward is a transaction that represents an agreement between the Fund and a counterparty (usually a commercial bank) to pay the other party the amount that it would cost based on current market rates as of the termination date to buy or sell a specified (notional) amount of a particular currency at an agreed upon foreign exchange rate on an agreed upon future date. If the counterparty defaults, the Fund will have contractual remedies pursuant to the agreement related to the transaction, but the Fund may be delayed or prevented from obtaining payments owed to it pursuant to non-deliverable forward transactions. Such non-deliverable forward transactions will be settled in cash.

Currency exchange rates may fluctuate significantly over short periods of time, causing, along with other factors, the Fund's NAV to fluctuate (when the Fund's NAV fluctuates, the value of your shares may go up or down). Currency exchange rates also can be affected unpredictably by the intervention of U.S. or foreign governments or central banks, or the failure to intervene, or by currency controls or political developments in the United States or abroad.

Certain forward foreign currency exchange contracts and other currency transactions are not exchange-traded or cleared. The market in such forward foreign currency exchange contracts, currency swaps and other privately negotiated currency instruments offers less protection against defaults by the other party to such instruments than is available for currency instruments traded on an exchange. Such contracts are subject to the risk that the counterparty to the contract will default on its obligations. Because these contracts are not guaranteed by an exchange or clearinghouse, a default on a contract would deprive the Fund of unrealized profits, transaction costs or the benefits of a currency hedge or could force the Fund to cover its purchase or sale commitments, if any, at the current market price.

The Fund is not required to post cash collateral with its counterparties in certain foreign currency transactions. Accordingly, the Fund may remain more fully invested (and more of the Fund's assets may be subject to investment and market risk) than if it were required to post collateral with its counterparties (which is the case with certain transactions). Where the Fund's counterparties are not required to post cash collateral with the Fund, the Fund will be subject to additional counterparty risk.

Appendix B

Financial Highlights

Because the Funds had not commenced investment operations as of the end of the Funds' fiscal year, financial highlights are not available.
