

GOLDMAN SACHS TRUST

Goldman Sachs Fundamental Emerging Markets Equity Funds

Class A, Class C, Institutional, Service, Investor, Class R, Class R6 and Class P Shares, as applicable, of the

**Goldman Sachs Emerging Markets Equity Fund,
Goldman Sachs ESG Emerging Markets Equity Fund,
Goldman Sachs Emerging Markets Equity ex. China Fund and
Goldman Sachs China Equity Fund
(the “Funds”)**

*Supplement dated May 13, 2025, to the
Summary Prospectuses, Prospectuses and Statement of Additional Information (“SAI”),
each dated February 28, 2025, as supplemented to date*

Effective June 30, 2025, Hiren Dasani will no longer serve as a portfolio manager for the Funds. Basak Yavuz will continue to serve as portfolio manager for the Funds.

Christine Pu and Nathan Lin will continue to serve as portfolio managers for the Goldman Sachs China Equity Fund.

Accordingly, effective June 30, 2025, the Funds’ disclosures are modified as follows:

All references to Mr. Dasani in the Summary Prospectuses, Prospectuses and SAI are deleted in their entirety.

This Supplement should be retained with your Summary Prospectuses, Prospectuses and SAI for future reference.

GOLDMAN SACHS TRUST

Supplement dated March 27, 2025

to the current Prospectus for each applicable Goldman Sachs Fund
that offers Class A Shares and/or Class C Shares (each, a “Fund”)

Effective immediately, the following is added at the end of the “Appendix C—Additional Information About Sales Charge Variations, Waivers and Discounts” section of each Fund’s Prospectus:

STIFEL, NICOLAUS & COMPANY, INC. (“Stifel”)

Effective March 30, 2025, shareholders purchasing or holding Fund shares, including existing fund shareholders, through a Stifel or affiliated platform that provides trade execution, clearance, and/or custody services, will be eligible for the following sales charge load waivers (including front-end sales charge waivers and contingent deferred, or back-end, (CDSC) sales charge waivers) and discounts, which may differ from those disclosed elsewhere in this prospectus or the Fund’s SAI.

CLASS A SHARES

As described elsewhere in this prospectus, Stifel may receive compensation out of the front-end sales charge if you purchase Class A shares through Stifel.

Rights of accumulation

Rights of accumulation (ROA) that entitle shareholders to breakpoint discounts on front-end sales charges will be calculated by Stifel based on the aggregated holding of eligible assets in the Fund held by accounts within the purchaser’s household at Stifel. Ineligible assets include Class A Shares of the Goldman Sachs Money Market Funds not assessed a sales charge. Fund assets not held at Stifel may be included in the calculation of ROA only if the shareholder notifies his or her financial advisor about such assets.

The employer maintaining a SEP IRA plan and/or SIMPLE IRA plan may elect to establish or change ROA for the IRA accounts associated with the plan to a plan-level grouping as opposed to including all share classes at a shareholder or pricing group level.

Front-end sales charge waivers on Class A shares available at Stifel

- Class C shares that have been held for more than seven (7) years may be converted to Class A shares or other front-end share class(es) of the same fund pursuant to Stifel’s policies and procedures. To the extent that this prospectus elsewhere provides for a waiver with respect to the exchange or conversion of such shares following a shorter holding period, those provisions shall continue to apply.
- Shares purchased by employees and registered representatives of Stifel or its affiliates and their family members as designated by Stifel.
- Shares purchased in a Stifel fee-based advisory program, often referred to as a “wrap” program.
- Shares purchased through reinvestment of capital gains, distributions and dividend reinvestment when purchasing shares of the same or other fund within the fund family.
- Shares purchased from the proceeds of redeemed shares of the fund family so long as the proceeds are from the sale of shares from an account with the same owner/beneficiary within 90 days of the purchase. For the absence of doubt, automated transactions (i.e. systematic purchases, including salary deferral transactions and withdrawals) and purchases made after shares are sold to cover Stifel Nicolaus’ account maintenance fees are not eligible for rights of reinstatement.
- Shares from rollovers into Stifel from retirement plans to IRAs.
- Shares exchanged into Class A shares from another share class so long as the exchange is into the same fund and was initiated at the direction of Stifel. Stifel is responsible for any remaining CDSC due to the fund company, if applicable. Any future purchases are subject to the applicable sales charge as disclosed in this prospectus.
- Employer-sponsored retirement plans (e.g., 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans). For purposes of this provision, employer sponsored retirement plans do not include SEP IRAs, Simple IRAs or SAR-SEPs.
- Charitable organizations and foundations, notably 501(c)(3) organizations.

Contingent Deferred Sales Charges Waivers on Class A and C Shares

- Death or disability of the shareholder.
- Shares sold as part of a systematic withdrawal plan not to exceed 12% annually.
- Return of excess contributions from an IRA Account.
- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the shareholder reaching the qualified age based on applicable IRS regulations.
- Shares acquired through a right of reinstatement.
- Shares sold to pay Stifel fees or costs in such cases where the transaction is initiated by Stifel.
- Shares exchanged or sold in a Stifel fee-based program.

Share Class Conversions in Advisory Accounts

- Stifel continually looks to provide our clients with the lowest cost share class available based on account type. Stifel reserves the right to convert shares to the lowest cost share class available at Stifel upon transfer of shares into an advisory program.

This Supplement should be retained with your Prospectus for future reference.

Goldman Sachs China Equity Fund—Summary

INVESTMENT OBJECTIVE

The Goldman Sachs China Equity Fund (the "Fund") seeks long-term capital appreciation.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.** You may qualify for sales charge discounts on purchases of Class A Shares if you invest at least \$50,000 in Goldman Sachs Funds. More information about these and other discounts is available from your financial professional and in "Shareholder Guide—Common Questions Applicable to the Purchase of Class A Shares" beginning on page 53 and in Appendix C—Additional Information About Sales Charge Variations, Waivers and Discounts on page 105 of the Prospectus and "Other Information Regarding Maximum Sales Charge, Purchases, Redemptions, Exchanges and Dividends" beginning on page B-167 of the Fund's Statement of Additional Information ("SAI").

Shareholder Fees

(fees paid directly from your investment)

	Class A	Class C	Institutional	Investor	Class R6
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	5.50%	None	None	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of the lower of original purchase price or sale proceeds) ¹	None	1.00%	None	None	None

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Institutional	Investor	Class R6
Management Fees	1.00%	1.00%	1.00%	1.00%	1.00%
Distribution and/or Service (12b-1) Fees	0.25%	0.75%	None	None	None
Other Expenses ²	1.05%	1.30%	0.94%	1.05%	0.93%
Service Fees	None	0.25%	None	None	None
All Other Expenses	1.05%	1.05%	0.94%	1.05%	0.93%
Total Annual Fund Operating Expenses	2.30%	3.05%	1.94%	2.05%	1.93%
Expense Limitation ³	(0.84)%	(0.84)%	(0.84)%	(0.84)%	(0.84)%
Total Annual Fund Operating Expenses After Expense Limitation	1.46%	2.21%	1.10%	1.21%	1.09%

¹ A contingent deferred sales charge ("CDSC") of 1% is imposed on Class C Shares redeemed within 12 months of purchase.

² The "Other Expenses" for Investor Shares have been restated to reflect expenses expected to be incurred during the current fiscal year.

³ The Investment Adviser has agreed to reduce or limit "Other Expenses" (excluding acquired fund fees and expenses, transfer agency fees and expenses, service fees, taxes, interest, brokerage fees, expenses of shareholder meetings, litigation and indemnification, and extraordinary expenses) to 0.054% of the Fund's average daily net assets through at least February 28, 2026, and prior to such date the Investment Adviser may not terminate the arrangement without the approval of the Board of Trustees.

EXPENSE EXAMPLE

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in Class A, Class C, Institutional, Investor and/or Class R6 Shares of the Fund for the time periods indicated and then redeem all of your Class A, Class C, Institutional, Investor and/or Class R6 Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same (except that the Example incorporates any applicable fee waiver and/or expense limitation arrangements for only the first year). Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$690	\$1,153	\$1,640	\$2,979
Class C Shares	\$324	\$863	\$1,528	\$3,306
Institutional Shares	\$112	\$528	\$969	\$2,196
Investor Shares	\$123	\$561	\$1,026	\$2,312
Class R6 Shares	\$111	\$525	\$964	\$2,186
Class C Shares – Assuming no redemption	\$224	\$863	\$1,528	\$3,306

PORTFOLIO TURNOVER

The Fund pays transaction costs when it buys and sells securities or instruments (*i.e.*, “turns over” its portfolio). A high rate of portfolio turnover may result in increased transaction costs, including brokerage commissions, which must be borne by the Fund and its shareholders, and is also likely to result in higher short-term capital gains for taxable shareholders. These costs are not reflected in the annual fund operating expenses or in the expense example above, but are reflected in the Fund's performance. The Fund's portfolio turnover rate for the fiscal year ended October 31, 2024 was 70% of the average value of its portfolio.

PRINCIPAL STRATEGY

The Fund invests, under normal circumstances, at least 80% of its net assets plus any borrowings for investment purposes (measured at the time of purchase) (“Net Assets”) in a diversified portfolio of equity investments in issuers economically tied to China. For purposes of the 80% investment policy, China includes Mainland China and China's special administrative regions, such as Hong Kong. The Fund expects to invest primarily in common stocks, but may also invest in depositary receipts. This may include securities that trade in local Chinese, Hong Kong, or other foreign exchanges and securities that trade in Renminbi (“RMB”), the official currency of China. The Fund may invest in the securities of Chinese companies, normally restricted to residents of Mainland China (commonly known as “A Shares” or “China A Shares”), through the China Stock Connect program or other channels. The Fund may also invest in other investments including, but not limited to, “B Shares” of companies listed on the Shanghai and Shenzhen Stock Exchanges, “H Shares” of companies incorporated in Mainland China and listed on the Hong Kong Stock Exchange and other foreign exchanges, shares of “Red Chip” and “P-Chip” companies with controlling Chinese shareholders that are incorporated outside of Mainland China and listed on the Hong Kong Stock Exchange, and shares of companies listed on the Hong Kong Stock Exchange that generate the majority of their value and revenue from doing business in China. “Red Chip” companies are controlled, either directly or indirectly, by Mainland China state entities. “P-Chip” companies are controlled by Mainland Chinese companies or individuals.

While the Fund may invest in companies of any market capitalization, it expects to primarily invest in large- and mid-capitalization companies. As of February 1, 2025, the Fund generally considers issuers with public stock market capitalizations of approximately \$2.5 billion to \$10 billion to be mid-capitalization companies, and issuers with public stock market capitalizations of approximately \$10 billion or more to be large-capitalization companies. The Fund may also invest in futures, exchange-traded funds (“ETFs”) and other instruments with similar economic exposures.

Allocation of the Fund's investments is determined by the Investment Adviser's assessment of a company's upside potential and downside risk, how attractive it appears relative to other holdings, and how the addition will impact sector and industry weightings. The largest weightings in the Fund's portfolio relative to the benchmark of the Fund are given to companies the Investment Adviser believes have the most upside return potential relative to their contribution to overall portfolio risk.

The Investment Adviser employs a fundamental investment process that may integrate environmental, social and governance (“ESG”) factors alongside traditional fundamental factors. No one factor or consideration is determinative in the stock selection process.

The Fund may invest in the aggregate up to 20% of its Net Assets in: (i) equity investments in issuers that are not economically tied to China; and (ii) fixed income securities, such as government, corporate and bank debt obligations.

The Investment Adviser measures the Fund's performance against the Morgan Stanley Capital International (MSCI) China All Shares Index (Net, USD, Unhedged).

PRINCIPAL RISKS OF THE FUND

Loss of money is a risk of investing in the Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation (“FDIC”) or any government agency. The Fund should not be relied upon as a complete investment program. There can be no assurance that the Fund will achieve its investment objective. Investments in the Fund involve substantial risks which prospective investors should consider carefully before investing. The Fund's principal risks are presented below in alphabetical order, and not in the order of importance or potential exposure.

Currency Risk. Indirect and direct exposure to foreign currencies subjects the Fund to the risk that those currencies will decline in value relative to the U.S. dollar, which would cause a decline in the U.S. value of the holdings of the Fund. Currency rates in foreign countries may fluctuate significantly over short periods of time for a number of reasons, including changes in interest rates and the imposition of currency controls or other political, economic and tax developments in the U.S. or abroad. To the extent the Fund seeks exposure to foreign currencies through foreign currency contracts and related transactions, the Fund becomes particularly susceptible to foreign currency value fluctuations, which may be sudden and significant, and investment decisions tied to currency markets. In addition, these investments are subject to the risks associated with derivatives and hedging and the impact on the Fund of fluctuations in the value of currencies may be magnified.

Depository Receipts Risk. Foreign securities may trade in the form of depository receipts, which include American Depositary Receipts (“ADRs”) and Global Depositary Receipts (“GDRs”) (collectively “Depository Receipts”). To the extent the Fund acquires Depository Receipts through banks which do not have a contractual relationship with the foreign issuer of the security underlying the Depository Receipts to issue and service such unsponsored Depository Receipts, there may be an increased possibility that the Fund would not become aware of and be able to respond to corporate actions such as stock splits or rights offerings involving the foreign issuer in a timely manner. In addition, the lack of information may result in inefficiencies in the valuation of such instruments. Investment in Depository Receipts does not eliminate all the risks inherent in investing in securities of non-U.S. issuers. The market value of Depository Receipts is dependent upon the market value of the underlying securities and fluctuations in the relative value of the currencies in which the Depository Receipts and the underlying securities are quoted. The issuers of Depository Receipts may discontinue issuing new Depository Receipts and withdraw existing Depository Receipts at any time, which may result in costs and delays in the distribution of the underlying assets to the Fund and may negatively impact the Fund’s performance.

Foreign and Emerging Countries Risk. Foreign securities may be subject to risk of loss because of more or less foreign government regulation; less public information; less stringent investor protections; less stringent accounting, corporate governance, financial reporting and disclosure standards; and less economic, political and social stability in the countries in which the Fund invests. The imposition of sanctions, exchange controls (including repatriation restrictions), confiscations, trade restrictions (including tariffs) and other government restrictions by the United States and other governments, or from problems in share registration, settlement or custody, may also result in losses. The type and severity of sanctions and other similar measures, including counter sanctions and other retaliatory actions, that may be imposed could vary broadly in scope, and their impact is impossible to predict. For example, the imposition of sanctions and other similar measures could, among other things, cause a decline in the value and/or liquidity of securities issued by the sanctioned country or companies located in or economically tied to the sanctioned country and increase market volatility and disruption in the sanctioned country and throughout the world. Sanctions and other similar measures could limit or prevent the Fund from buying and selling securities (in the sanctioned country and other markets), significantly delay or prevent the settlement of securities transactions, and significantly impact the Fund’s liquidity and performance. Foreign risk also involves the risk of negative foreign currency exchange rate fluctuations, which may cause the value of securities denominated in such foreign currency (or other instruments through which the Fund has exposure to foreign currencies) to decline in value. Currency exchange rates may fluctuate significantly over short periods of time. These risks are more pronounced in connection with the Fund’s investments in securities of issuers located in, or otherwise economically tied to, emerging countries.

Greater China Risk. Investing in Greater China involves a higher degree of risk and special considerations not typically associated with investing in other more established economies or securities markets. The Fund’s investment exposure to Greater China may subject the Fund, to a greater extent than if investments were made in developed countries, to the risks of adverse securities markets, exchange rates and social, political, regulatory, economic or environmental events and natural disasters which may occur in the China region. The economy, industries, and securities and currency markets of Greater China are particularly vulnerable to the region’s dependence on exports and international trade, increasing competition from Asia’s other low-cost emerging economies and territorial and other disputes with other countries. The imposition of tariffs or other trade barriers by the U.S. or foreign governments on exports from Mainland China may also have an adverse impact on Chinese issuers. There is also the risk that the U.S. government or other governments may sanction Chinese issuers or otherwise prohibit U.S. persons (such as the Fund) from investing in certain Chinese issuers which may negatively affect the liquidity and price of their securities and cause the government of the People’s Republic of China (“PRC”) to take retaliatory measures. In addition, currency fluctuations, currency convertibility, interest rate fluctuations and higher rates of inflation as a result of internal social unrest or conflicts with other countries have had, and may continue to have, negative effects on the economies and securities markets of Greater China. The government of the PRC exercises significant control over the economy in Mainland China, and may at any time alter or discontinue economic reforms. The willingness and ability of the Chinese government to support freer markets is uncertain. Investments in Greater China are subject to the risk of confiscatory taxation, nationalization or expropriation of assets, potentially frequent changes in the law, intervention by the PRC in contractual arrangements, and imperfect information because companies in the China region may not be subject to the same disclosure, accounting, auditing and financial reporting standards and practices as U.S. companies. Taiwan and Hong Kong do not exercise the same level of control over their economies as does the PRC with respect to Mainland China, but changes to their political and economic relationships with the PRC could adversely impact the Fund’s investments in Taiwan and Hong Kong.

Investing Through Stock Connect Risk. Investing in China A Shares through the Shanghai-Hong Kong and Shenzhen-Hong Kong Stock Connect (“Stock Connect”) program is subject to trading, clearance, settlement, and other procedures, which could pose risks to the Fund. Trading through Stock Connect is subject to market-wide trading volume and market cap quota limitations, each of which may restrict or preclude the Fund’s ability to invest in A Shares through Stock Connect. A primary feature of Stock Connect is the application of the home market’s laws and rules applicable to investors in A Shares. Therefore, the Fund’s investments in Stock Connect A Shares are generally subject to securities regulations and listing rules, among other restrictions, of the government of the

PRC. Additionally, restrictions on the timing of permitted trading activity in A Shares, including the imposition of local holidays in either Hong Kong or Mainland China and restrictions on purchasing and selling the same security on the same day, may subject the Fund to the risk of price fluctuations of China A Shares at times when the Fund is unable to add to or exit its position.

Large Shareholder Transactions Risk. The Fund may experience adverse effects when certain large shareholders purchase or redeem large amounts of shares of the Fund. Such large shareholder redemptions, which may occur rapidly or unexpectedly, may cause the Fund to sell portfolio securities at times when it would not otherwise do so, which may negatively impact the Fund's net asset value ("NAV") and liquidity. Similarly, large Fund share purchases may adversely affect the Fund's performance to the extent that the Fund is delayed in investing new cash or otherwise maintains a larger cash position than it ordinarily would. These transactions may also accelerate the realization of taxable income to shareholders if such sales of investments resulted in gains, and may also increase transaction costs. In addition, a large redemption could result in the Fund's current expenses being allocated over a smaller asset base, leading to an increase in the Fund's expense ratio.

Liquidity Risk. The Fund may make investments that are illiquid or that may become less liquid in response to market developments or adverse investor perceptions. Illiquid investments may be more difficult to value and more difficult to sell at the desired times and prices. Liquidity risk may also refer to the risk that the Fund will not be able to pay redemption proceeds within the allowable time period because of unusual market conditions, declining prices of the securities sold, an unusually high volume of redemption requests or other reasons. To meet redemption requests, the Fund may be forced to sell securities at an unfavorable time and/or under unfavorable conditions and prices. These risks may be more pronounced in connection with the Fund's investments in securities of issuers located in emerging market countries. Redemptions by large shareholders may have a negative impact on the Fund's liquidity.

Market Risk. The value of the securities in which the Fund invests may go up or down in response to the prospects of individual companies, particular sectors, governments or countries and/or general economic conditions throughout the world due to increasingly interconnected global economies and financial markets. Events such as war, military conflict, geopolitical disputes, acts of terrorism, social or political unrest, natural disasters, recessions, inflation, rapid interest rate changes, supply chain disruptions, tariffs and other restrictions on trade, sanctions or the spread of infectious illness or other public health threats, or the threat or potential of one or more such events and developments, could also significantly impact the Fund and its investments.

Mid-Cap and Small-Cap Risk. Investments in mid-capitalization and small-capitalization companies involve greater risks than those associated with larger, more established companies. These securities may be subject to more abrupt or erratic price movements and may lack sufficient market liquidity, and these issuers often face greater business risks.

RMB Risk. There is no assurance that there will always be sufficient amounts of RMB available for the Fund to remain fully invested in Chinese equities. The Chinese government heavily regulates the domestic exchange of foreign currencies and RMB exchange rates in China, which may adversely affect the operations and financial results of the Fund's investments in China.

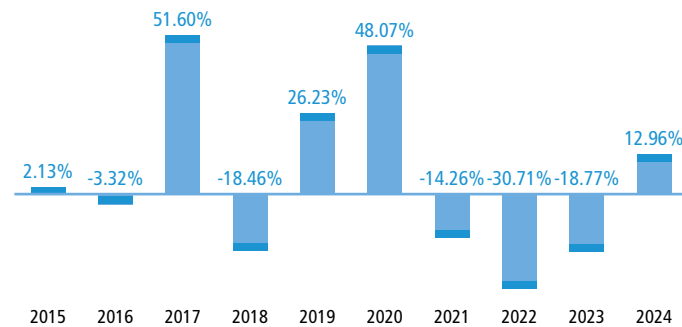

Stock Risk. Stock prices have historically risen and fallen in periodic cycles. U.S. and foreign stock markets have experienced periods of substantial price volatility in the past and may do so again in the future.

PERFORMANCE

The bar chart and table below provide an indication of the risks of investing in the Fund by showing: (a) changes in the performance of the Fund's Class A Shares from year to year; and (b) how the average annual total returns of the Fund's Class A, Class C, Institutional, Investor and Class R6 Shares compare to those of a broad-based securities market index. Through November 20, 2019, the Fund had been known as the Goldman Sachs Asia Equity Fund, and certain of its strategies differed. Performance information set forth below reflects the Fund's former strategies prior to the close of business on November 20, 2019. The Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available at no cost at am.gs.com or by calling the appropriate phone number on the back cover of the Prospectus.

The bar chart (including "Best quarter" and "Worst Quarter" information) does not reflect the sales loads applicable to Class A Shares. If the sales loads were reflected, returns would be less. Performance reflects applicable fee waivers and/or expense limitations in effect during the periods shown.

CALENDAR YEAR (CLASS A)

During the periods shown in the chart above:	Returns	Quarter ended
Best Quarter Return	24.68%	June 30, 2020
Worst Quarter Return	-25.61%	September 30, 2022

AVERAGE ANNUAL TOTAL RETURN

For the period ended December 31, 2024	1 Year	5 Years	10 Years	Inception Date
Class A Shares				7/8/1994
Returns Before Taxes	6.78%	-5.24%	1.64%	
Returns After Taxes on Distributions	6.58%	-5.77%	1.20%	
Returns After Taxes on Distributions and Sale of Fund Shares	4.42%	-3.58%	1.51%	
Class C Shares				8/15/1997
Returns Before Taxes	11.10%	-4.88%	1.45%*	
Institutional Shares				2/2/1996
Returns Before Taxes	13.34%	-3.85%	2.58%	
Investor Shares				2/28/2014
Returns Before Taxes	13.26%	-3.92%	2.48%	
Class R6 Shares				2/28/2018
Returns Before Taxes	13.36%	-3.84%	2.59%**	
MSCI China All Shares Index (Net, USD, Unhedged)	16.34%	-1.78%	1.22%	

Benchmark returns do not reflect any deductions for fees or expenses.

* Class C Shares automatically convert into Class A Shares eight years after the purchase date. The 10-Year performance for Class C Shares does not reflect the conversion to Class A Shares after the first eight years of performance.

** Class R6 Shares commenced operations on February 28, 2018. Prior to that date, the performance of Class R6 Shares shown in the table above is that of Institutional Shares. Performance has not been adjusted to reflect the lower expenses of Class R6 Shares. Class R6 Shares would have had higher returns because: (i) Institutional Shares and Class R6 Shares represent interests in the same portfolio of securities; and (ii) Class R6 Shares have lower expenses.

The after-tax returns are for Class A Shares only. The after-tax returns for Class C, Institutional, Investor and Class R6 Shares will vary. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. In addition, the after-tax returns shown are not relevant to investors who hold Fund Shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

PORTFOLIO MANAGEMENT

Goldman Sachs Asset Management, L.P. is the investment adviser for the Fund (the "Investment Adviser" or "GSAM").

Portfolio Managers: Basak Yavuz, Managing Director, has managed the Fund since 2019; Hiren Dasani, CFA, Managing Director, has managed the Fund since 2019; Christine Pu, CFA, Vice President, has managed the Fund since 2019; and Nathan Lin, Managing Director, has managed the Fund since 2023.

BUYING AND SELLING FUND SHARES

The minimum initial investment for Class A and Class C Shares is, generally, \$1,000. The minimum initial investment for Institutional Shares is, generally, \$1,000,000 for individual or certain institutional investors, alone or in combination with other assets under the management of the Investment Adviser and its affiliates. There is no minimum for initial purchases of Investor and Class R6 Shares, except for certain institutional investors who purchase Class R6 Shares directly with the Fund's transfer agent for which the minimum initial investment is \$5,000,000. Those share classes with a minimum initial investment requirement do not impose it on certain employee benefit plans, and Institutional Shares do not impose it on certain investment advisers investing on behalf of other accounts.

The minimum subsequent investment for Class A and Class C shareholders is \$50, except for certain employee benefit plans, for which there is no minimum. There is no minimum subsequent investment for Institutional, Investor or Class R6 shareholders.

You may purchase and redeem (sell) shares of the Fund on any business day through certain intermediaries that have a relationship with Goldman Sachs, including banks, trust companies, brokers, registered investment advisers and other financial institutions (“Intermediaries”).

TAX INFORMATION

For important tax information, please see “Tax Information” on page 23 of the Prospectus.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

For important information about financial intermediary compensation, please see “Payments to Broker-Dealers and Other Financial Intermediaries” on page 23 of the Prospectus.

Goldman Sachs Emerging Markets Equity Fund—Summary

INVESTMENT OBJECTIVE

The Goldman Sachs Emerging Markets Equity Fund (the "Fund") seeks long-term capital appreciation.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.** You may qualify for sales charge discounts on purchases of Class A Shares if you invest at least \$50,000 in Goldman Sachs Funds. More information about these and other discounts is available from your financial professional and in "Shareholder Guide—Common Questions Applicable to the Purchase of Class A Shares" beginning on page 53 and in Appendix C—Additional Information About Sales Charge Variations, Waivers and Discounts on page 105 of the Prospectus and "Other Information Regarding Maximum Sales Charge, Purchases, Redemptions, Exchanges and Dividends" beginning on page B-167 of the Fund's Statement of Additional Information ("SAI").

Shareholder Fees

(fees paid directly from your investment)

	Class A	Class C	Institutional	Service	Investor	Class R6
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	5.50%	None	None	None	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of the lower of original purchase price or sale proceeds) ¹	None	1.00%	None	None	None	None

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Institutional	Service	Investor	Class R6
Management Fees	0.99%	0.99%	0.99%	0.99%	0.99%	0.99%
Distribution and/or Service (12b-1) Fees	0.25%	0.75%	None	0.25%	None	None
Other Expenses	0.25%	0.50%	0.14%	0.39%	0.25%	0.13%
Service Fees	None	0.25%	None	0.25%	None	None
All Other Expenses	0.25%	0.25%	0.14%	0.14%	0.25%	0.13%
Total Annual Fund Operating Expenses	1.49%	2.24%	1.13%	1.63%	1.24%	1.12%
Fee Waiver ²	(0.15)%	(0.15)%	(0.09)%	(0.09)%	(0.15)%	(0.09)%
Total Annual Fund Operating Expenses After Fee Waiver	1.34%	2.09%	1.04%	1.54%	1.09%	1.03%

¹ A contingent deferred sales charge ("CDSC") of 1% is imposed on Class C Shares redeemed within 12 months of purchase.

² The Investment Adviser has agreed to waive a portion of its management fee payable by the Fund in order to achieve an effective net management fee rate of 0.90% as an annual percentage of the Fund's average daily net assets. Additionally, Goldman Sachs & Co. LLC ("Goldman Sachs"), the Fund's transfer agent, has agreed to waive a portion of its transfer agency fee (a component of "Other Expenses") equal to 0.06% as an annual percentage rate of the average daily net assets attributable to Class A, Class C, and Investor Shares of the Fund. These arrangements will remain in effect through at least February 28, 2026, and prior to such date, the Investment Adviser and Goldman Sachs (as applicable) may not terminate the arrangements without the approval of the Board of Trustees.

EXPENSE EXAMPLE

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in Class A, Class C, Institutional, Service, Investor and/or Class R6 Shares of the Fund for the time periods indicated and then redeem all of your Class A, Class C, Institutional, Service, Investor and/or Class R6 Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same (except that the Example incorporates any applicable fee waiver and/or expense limitation arrangements for only the first year). Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$679	\$981	\$1,305	\$2,220
Class C Shares	\$312	\$686	\$1,186	\$2,563
Institutional Shares	\$106	\$350	\$614	\$1,367
Service Shares	\$157	\$505	\$878	\$1,925
Investor Shares	\$111	\$379	\$667	\$1,487
Class R6 Shares	\$105	\$347	\$608	\$1,355
Class C Shares – Assuming no redemption	\$212	\$686	\$1,186	\$2,563

PORTFOLIO TURNOVER

The Fund pays transaction costs when it buys and sells securities or instruments (*i.e.*, “turns over” its portfolio). A high rate of portfolio turnover may result in increased transaction costs, including brokerage commissions, which must be borne by the Fund and its shareholders, and is also likely to result in higher short-term capital gains for taxable shareholders. These costs are not reflected in the annual fund operating expenses or in the expense example above, but are reflected in the Fund's performance. The Fund's portfolio turnover rate for the fiscal year ended October 31, 2024 was 36% of the average value of its portfolio.

PRINCIPAL STRATEGY

The Fund invests, under normal circumstances, at least 80% of its net assets plus any borrowings for investment purposes (measured at the time of purchase) (“Net Assets”) in a portfolio of equity investments in emerging country issuers. Such equity investments may include exchange-traded funds (“ETFs”), futures and other instruments with similar economic exposures. The Investment Adviser may consider classifications by the World Bank, the International Finance Corporation, the United Nations (and its agencies) or the Fund's benchmark index provider in determining whether a country is emerging or developed. Emerging countries are generally located in Africa, Asia, the Middle East, Central and Eastern Europe and Central and South America.

Under normal circumstances, the Fund maintains investments in at least six emerging countries. Allocation of the Fund's investments is determined by the Investment Adviser's assessment of a company's upside potential and downside risk, how attractive it appears relative to other holdings, and how the addition will impact sector and industry weightings. The largest weightings in the Fund's portfolio relative to the benchmark of the Fund are given to companies the Investment Adviser believes have the most upside return potential relative to their contribution to overall portfolio risk. The Fund's investments are selected using a strong valuation discipline to purchase what the Investment Adviser believes are well-positioned, cash-generating businesses run by shareholder-oriented management teams.

The Investment Adviser employs a fundamental investment process that may integrate environmental, social and governance (“ESG”) factors alongside traditional fundamental factors. No one factor or consideration is determinative in the stock selection process.

The Fund may invest in the aggregate up to 20% of its Net Assets in: (i) fixed income securities of private and government emerging country issuers; and (ii) equity and fixed income securities, such as government, corporate and bank debt obligations, of developed country issuers.

The Investment Adviser measures the Fund's performance against the Morgan Stanley Capital International (MSCI) Emerging Markets Index (Net, USD, Unhedged).

THE FUND IS NON-DIVERSIFIED UNDER THE INVESTMENT COMPANY ACT OF 1940, AS AMENDED (“INVESTMENT COMPANY ACT”), AND MAY INVEST A LARGER PERCENTAGE OF ITS ASSETS IN ONE OR MORE ISSUERS OR IN FEWER ISSUERS THAN DIVERSIFIED MUTUAL FUNDS.

PRINCIPAL RISKS OF THE FUND

Loss of money is a risk of investing in the Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation (“FDIC”) or any government agency. The Fund should not be relied upon as a complete investment program. There can be no assurance that the Fund will achieve its investment objective. Investments in the Fund involve substantial risks which prospective investors should consider carefully before investing. The Fund's principal risks are presented below in alphabetical order, and not in the order of importance or potential exposure.

Foreign and Emerging Countries Risk. Foreign securities may be subject to risk of loss because of more or less foreign government regulation; less public information; less stringent investor protections; less stringent accounting, corporate governance, financial reporting and disclosure standards; and less economic, political and social stability in the countries in which the Fund invests. The

imposition of sanctions, exchange controls (including repatriation restrictions), confiscations, trade restrictions (including tariffs) and other government restrictions by the United States and other governments, or from problems in share registration, settlement or custody, may also result in losses. The type and severity of sanctions and other similar measures, including counter sanctions and other retaliatory actions, that may be imposed could vary broadly in scope, and their impact is impossible to predict. For example, the imposition of sanctions and other similar measures could, among other things, cause a decline in the value and/or liquidity of securities issued by the sanctioned country or companies located in or economically tied to the sanctioned country and increase market volatility and disruption in the sanctioned country and throughout the world. Sanctions and other similar measures could limit or prevent the Fund from buying and selling securities (in the sanctioned country and other markets), significantly delay or prevent the settlement of securities transactions, and significantly impact the Fund's liquidity and performance. Foreign risk also involves the risk of negative foreign currency exchange rate fluctuations, which may cause the value of securities denominated in such foreign currency (or other instruments through which the Fund has exposure to foreign currencies) to decline in value. Currency exchange rates may fluctuate significantly over short periods of time. These risks are more pronounced in connection with the Fund's investments in securities of issuers located in, or otherwise economically tied to, emerging countries.

Greater China Risk. Investing in Greater China involves a higher degree of risk and special considerations not typically associated with investing in other more established economies or securities markets. The Fund's investment exposure to Greater China may subject the Fund, to a greater extent than if investments were made in developed countries, to the risks of adverse securities markets, exchange rates and social, political, regulatory, economic or environmental events and natural disasters which may occur in the China region. The economy, industries, and securities and currency markets of Greater China are particularly vulnerable to the region's dependence on exports and international trade, increasing competition from Asia's other low-cost emerging economies and territorial and other disputes with other countries. The imposition of tariffs or other trade barriers by the U.S. or foreign governments on exports from Mainland China may also have an adverse impact on Chinese issuers. There is also the risk that the U.S. government or other governments may sanction Chinese issuers or otherwise prohibit U.S. persons (such as the Fund) from investing in certain Chinese issuers which may negatively affect the liquidity and price of their securities and cause the government of the People's Republic of China ("PRC") to take retaliatory measures. In addition, currency fluctuations, currency convertibility, interest rate fluctuations and higher rates of inflation as a result of internal social unrest or conflicts with other countries have had, and may continue to have, negative effects on the economies and securities markets of Greater China. The government of the PRC exercises significant control over the economy in Mainland China, and may at any time alter or discontinue economic reforms. The willingness and ability of the Chinese government to support freer markets is uncertain. Investments in Greater China are subject to the risk of confiscatory taxation, nationalization or expropriation of assets, potentially frequent changes in the law, intervention by the PRC in contractual arrangements, and imperfect information because companies in the China region may not be subject to the same disclosure, accounting, auditing and financial reporting standards and practices as U.S. companies. Taiwan and Hong Kong do not exercise the same level of control over their economies as does the PRC with respect to Mainland China, but changes to their political and economic relationships with the PRC could adversely impact the Fund's investments in Taiwan and Hong Kong.

Large Shareholder Transactions Risk. The Fund may experience adverse effects when certain large shareholders purchase or redeem large amounts of shares of the Fund. Such large shareholder redemptions, which may occur rapidly or unexpectedly, may cause the Fund to sell portfolio securities at times when it would not otherwise do so, which may negatively impact the Fund's net asset value ("NAV") and liquidity. Similarly, large Fund share purchases may adversely affect the Fund's performance to the extent that the Fund is delayed in investing new cash or otherwise maintains a larger cash position than it ordinarily would. These transactions may also accelerate the realization of taxable income to shareholders if such sales of investments resulted in gains, and may also increase transaction costs. In addition, a large redemption could result in the Fund's current expenses being allocated over a smaller asset base, leading to an increase in the Fund's expense ratio.

Liquidity Risk. The Fund may make investments that are illiquid or that may become less liquid in response to market developments or adverse investor perceptions. Illiquid investments may be more difficult to value and more difficult to sell at the desired times and prices. Liquidity risk may also refer to the risk that the Fund will not be able to pay redemption proceeds within the allowable time period because of unusual market conditions, declining prices of the securities sold, an unusually high volume of redemption requests or other reasons. To meet redemption requests, the Fund may be forced to sell securities at an unfavorable time and/or under unfavorable conditions and prices. These risks may be more pronounced in connection with the Fund's investments in securities of issuers located in emerging market countries. Redemptions by large shareholders may have a negative impact on the Fund's liquidity.

Market Risk. The value of the securities in which the Fund invests may go up or down in response to the prospects of individual companies, particular sectors, governments or countries and/or general economic conditions throughout the world due to increasingly interconnected global economies and financial markets. Events such as war, military conflict, geopolitical disputes, acts of terrorism, social or political unrest, natural disasters, recessions, inflation, rapid interest rate changes, supply chain disruptions, tariffs and other restrictions on trade, sanctions or the spread of infectious illness or other public health threats, or the threat or potential of one or more such events and developments, could also significantly impact the Fund and its investments.

Mid-Cap and Small-Cap Risk. Investments in mid-capitalization and small-capitalization companies involve greater risks than those associated with larger, more established companies. These securities may be subject to more abrupt or erratic price movements and may lack sufficient market liquidity, and these issuers often face greater business risks.

Non-Diversification Risk. The Fund is non-diversified, meaning that it is permitted to invest a larger percentage of its assets in one or more issuers or in fewer issuers than diversified mutual funds. Thus, the Fund may be more susceptible to adverse developments affecting any single issuer held in its portfolio, and may be more susceptible to greater losses because of these developments.

Sector Risk. To the extent the Fund focuses its investments in securities of issuers in one or more sectors (such as the financial services or telecommunications sectors), the Fund will be subject, to a greater extent than if its investments were diversified across different sectors, to the risks of volatile economic cycles and/or conditions and developments that may be particular to that sector, such as: adverse economic, business, political, environmental or other developments.

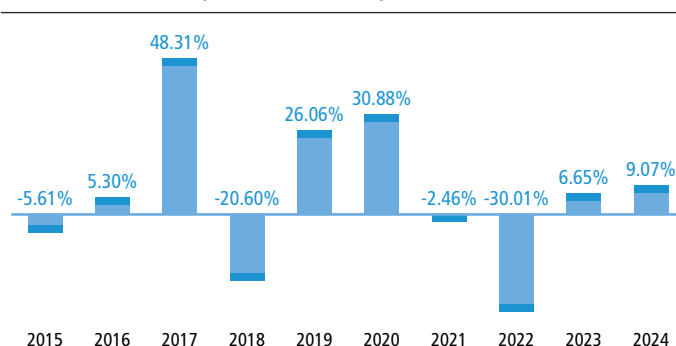

Stock Risk. Stock prices have historically risen and fallen in periodic cycles. U.S. and foreign stock markets have experienced periods of substantial price volatility in the past and may do so again in the future.

PERFORMANCE

The bar chart and table below provide an indication of the risks of investing in the Fund by showing: (a) changes in the performance of the Fund's Institutional Shares from year to year; and (b) how the average annual total returns of the Fund's Class A, Class C, Institutional, Service, Investor and Class R6 Shares compare to those of a broad-based securities market index. The Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available at no cost at am.gs.com or by calling the appropriate phone number on the back cover of the Prospectus.

Performance reflects applicable fee waivers and/or expense limitations in effect during the periods shown.

CALENDAR YEAR (INSTITUTIONAL)

During the periods shown in the chart above:	Returns	Quarter ended
Best Quarter Return	23.46%	June 30, 2020
Worst Quarter Return	-21.88%	March 31, 2020

AVERAGE ANNUAL TOTAL RETURN

For the period ended December 31, 2024	1 Year	5 Years	10 Years	Inception Date
Class A Shares				12/15/1997
Returns Before Taxes	2.82%	-0.65%	3.42%	
Returns After Taxes on Distributions	3.01%	-0.50%	3.50%	
Returns After Taxes on Distributions and Sale of Fund Shares	2.22%	-0.22%	2.91%	
Class C Shares				12/15/1997
Returns Before Taxes	6.96%	-0.26%	3.24%*	
Institutional Shares				12/15/1997
Returns Before Taxes	9.07%	0.79%	4.38%	
Service Shares				12/15/1997
Returns Before Taxes	8.53%	0.29%	3.86%	
Investor Shares				8/31/2010
Returns Before Taxes	9.07%	0.74%	4.27%	
Class R6 Shares				7/31/2015
Returns Before Taxes	9.14%	0.81%	4.40%**	
MSCI Emerging Markets Index (Net, USD, Unhedged)	7.48%	1.70%	3.63%	

Benchmark returns do not reflect any deductions for fees or expenses.

* Class C Shares automatically convert into Class A Shares eight years after the purchase date. The 10-Year performance for Class C Shares does not reflect the conversion to Class A Shares after the first eight years of performance.

** Class R6 Shares commenced operations on July 31, 2015. Prior to that date, the performance of Class R6 Shares shown in the table above is that of Institutional Shares. Performance has not been adjusted to reflect the lower expenses of Class R6 Shares. Class R6 Shares would have had higher returns because: (i) Institutional Shares and Class R6 Shares represent interests in the same portfolio of securities; and (ii) Class R6 Shares have lower expenses.

The after-tax returns are for Class A Shares only. The after-tax returns for Class C, Institutional, Service, Investor and Class R6 Shares will vary. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. In addition, the after-tax returns shown are not relevant to investors who hold Fund Shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

PORTFOLIO MANAGEMENT

Goldman Sachs Asset Management, L.P. is the investment adviser for the Fund (the "Investment Adviser" or "GSAM").

Portfolio Managers: Basak Yavuz, Managing Director, has managed the Fund since 2015; and Hiren Dasani, CFA, Managing Director, has managed the Fund since May 2017.

BUYING AND SELLING FUND SHARES

The minimum initial investment for Class A and Class C Shares is, generally, \$1,000. The minimum initial investment for Institutional Shares is, generally, \$1,000,000 for individual or certain institutional investors, alone or in combination with other assets under the management of the Investment Adviser and its affiliates. There is no minimum for initial purchases of Investor and Class R6 Shares, except for certain institutional investors who purchase Class R6 Shares directly with the Fund's transfer agent for which the minimum initial investment is \$5,000,000. Those share classes with a minimum initial investment requirement do not impose it on certain employee benefit plans, and Institutional Shares do not impose it on certain investment advisers investing on behalf of other accounts.

The minimum subsequent investment for Class A and Class C shareholders is \$50, except for certain employee benefit plans, for which there is no minimum. There is no minimum subsequent investment for Institutional, Investor or Class R6 shareholders.

The Fund does not impose minimum purchase requirements for initial or subsequent investments in Service Shares, although an Intermediary (as defined below) may impose such minimums and/or establish other requirements such as a minimum account balance.

You may purchase and redeem (sell) shares of the Fund on any business day through certain intermediaries that have a relationship with Goldman Sachs & Co. LLC ("Goldman Sachs"), including banks, trust companies, brokers, registered investment advisers and other financial institutions ("Intermediaries").

TAX INFORMATION

For important tax information, please see "Tax Information" on page 23 of the Prospectus.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

For important information about financial intermediary compensation, please see "Payments to Broker-Dealers and Other Financial Intermediaries" on page 23 of the Prospectus.

Goldman Sachs Emerging Markets Equity ex. China Fund—Summary

INVESTMENT OBJECTIVE

The Goldman Sachs Emerging Markets Equity ex. China Fund (the "Fund") seeks long-term capital appreciation.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.** You may qualify for sales charge discounts on purchases of Class A Shares if you invest at least \$50,000 in Goldman Sachs Funds. More information about these and other discounts is available from your financial professional and in "Shareholder Guide—Common Questions Applicable to the Purchase of Class A Shares" beginning on page 53 and in Appendix C—Additional Information About Sales Charge Variations, Waivers and Discounts on page 105 of the Prospectus and "Other Information Regarding Maximum Sales Charge, Purchases, Redemptions, Exchanges and Dividends" beginning on page B-167 of the Fund's Statement of Additional Information ("SAI").

Shareholder Fees

(fees paid directly from your investment)

	Class A	Class C	Institutional	Investor	Class R	Class R6
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	5.50%	None	None	None	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of the lower of original purchase price or sale proceeds) ¹	None	1.00%	None	None	None	None

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Institutional	Investor	Class R	Class R6
Management Fees	0.90%	0.90%	0.90%	0.90%	0.90%	0.90%
Distribution and/or Service (12b-1) Fees	0.25%	0.75%	None	None	0.50%	None
Other Expenses ²	3.48%	3.73%	3.37%	3.48%	3.48%	3.36%
Service Fees	None	0.25%	None	None	None	None
All Other Expenses	3.48%	3.48%	3.37%	3.48%	3.48%	3.36%
Total Annual Fund Operating Expenses	4.63%	5.38%	4.27%	4.38%	4.88%	4.26%
Fee Waiver and Expense Limitation ³	(3.27)%	(3.27)%	(3.25)%	(3.27)%	(3.27)%	(3.25)%
Total Annual Fund Operating Expenses After Fee Waiver and Expense Limitation	1.36%	2.11%	1.02%	1.11%	1.61%	1.01%

¹ A contingent deferred sales charge ("CDSC") of 1% is imposed on Class C Shares redeemed within 12 months of purchase.

² The "Other Expenses" for Class A, Class C, Investor, Class R and Class R6 Shares have been restated to reflect expenses expected to be incurred during the current fiscal year.

³ The Investment Adviser has agreed to (i) waive a portion of its management fee payable by the Fund in an amount equal to any management fees it earns as an investment adviser to any affiliated funds in which the Fund invests, except those management fees it earns from the Fund's investments of cash collateral received in connection with securities lending transactions in affiliated funds; and (ii) reduce or limit "Other Expenses" (excluding acquired fund fees and expenses, transfer agency fees and expenses, service fees, taxes, interest, brokerage fees, expenses of shareholder meetings, litigation and indemnification, and extraordinary expenses) to 0.084% of the Fund's average daily net assets. Additionally, Goldman Sachs & Co. LLC ("Goldman Sachs"), the Fund's transfer agent, has agreed to waive a portion of its transfer agency fee (a component of "Other Expenses") equal to 0.02% as an annual percentage rate of the average daily net assets attributable to Class A, Class C, Class R and Investor Shares of the Fund. These arrangements will remain in effect through at least February 28, 2026, and prior to such date the Investment Adviser and Goldman Sachs (as applicable) may not terminate the arrangements without the approval of the Board of Trustees.

EXPENSE EXAMPLE

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in Class A, Class C, Institutional, Investor, Class R and/or Class R6 Shares of the Fund for the time periods indicated and then redeem all of your Class A, Class C, Institutional, Investor, Class R and/or Class R6 Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same (except that the Example incorporates any applicable fee waiver and/or expense limitation arrangements for only the first year). Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$681	\$1,591	\$2,508	\$4,831
Class C Shares	\$314	\$1,317	\$2,411	\$5,112
Institutional Shares	\$104	\$999	\$1,906	\$4,234
Investor Shares	\$113	\$1,029	\$1,956	\$4,325
Class R Shares	\$164	\$1,174	\$2,187	\$4,729
Class R6 Shares	\$103	\$996	\$1,901	\$4,225
Class C Shares – Assuming no redemption	\$214	\$1,317	\$2,411	\$5,112

PORTFOLIO TURNOVER

The Fund pays transaction costs when it buys and sells securities or instruments (*i.e.*, “turns over” its portfolio). A high rate of portfolio turnover may result in increased transaction costs, including brokerage commissions, which must be borne by the Fund and its shareholders, and is also likely to result in higher short-term capital gains for taxable shareholders. These costs are not reflected in the annual fund operating expenses or in the expense example above, but are reflected in the Fund's performance. The Fund's portfolio turnover rate for fiscal year ended October 31, 2024 was 27% of the average value of its portfolio.

PRINCIPAL STRATEGY

The Fund invests, under normal circumstances, at least 80% of its net assets plus any borrowings for investment purposes (measured at the time of purchase) (“Net Assets”) in a portfolio of equity investments in emerging country issuers, excluding China. Such equity investments may include exchange-traded funds (“ETFs”), futures and other instruments with similar economic exposures. The Investment Adviser may consider classifications by the World Bank, the International Finance Corporation, the United Nations (and its agencies) or the Fund's benchmark index provider in determining whether a country is emerging or developed. Emerging countries are generally located in Africa, Asia (excluding China for purposes of the Fund), the Middle East, Central and Eastern Europe and Central and South America.

Under normal circumstances, the Fund maintains investments in at least six emerging countries (excluding China). Allocation of the Fund's investments is determined by the Investment Adviser's assessment of a company's upside potential and downside risk, how attractive it appears relative to other holdings, and how the addition will impact sector and industry weightings. The largest weightings in the Fund's portfolio relative to the benchmark of the Fund are given to companies the Investment Adviser believes have the most upside return potential relative to their contribution to overall portfolio risk. The Fund's investments are selected using a strong valuation discipline to purchase what the Investment Adviser believes are well-positioned, cash-generating businesses run by shareholder-oriented management teams. The Fund may gain limited exposure to the Chinese economy, as a consequence of the indirect exposure that companies in other emerging market countries have to China.

The Investment Adviser employs a fundamental investment process that may integrate environmental, social and governance (“ESG”) factors alongside traditional fundamental factors. No one factor or consideration is determinative in the stock selection process.

The Fund may invest in the aggregate up to 20% of its Net Assets in: (i) fixed income securities of private and government emerging country issuers (excluding China); and (ii) equity and fixed income securities, such as government, corporate and bank debt obligations, of developed country issuers.

The Investment Adviser measures the Fund's performance against the Morgan Stanley Capital International (MSCI) Emerging Markets ex China Index (Net, USD, Unhedged).

THE FUND IS NON-DIVERSIFIED UNDER THE INVESTMENT COMPANY ACT OF 1940, AS AMENDED (“INVESTMENT COMPANY ACT”), AND MAY INVEST A LARGER PERCENTAGE OF ITS ASSETS IN ONE OR MORE ISSUERS OR IN FEWER ISSUERS THAN DIVERSIFIED MUTUAL FUNDS.

PRINCIPAL RISKS OF THE FUND

Loss of money is a risk of investing in the Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation (“FDIC”) or any government agency. The Fund should not be relied upon as a complete investment program. There can be no assurance that the Fund will achieve its investment objective. Investments in the Fund involve substantial risks which prospective investors should consider carefully before investing. The Fund's principal risks are presented below in alphabetical order, and not in the order of importance or potential exposure.

Foreign and Emerging Countries Risk. Foreign securities may be subject to risk of loss because of more or less foreign government regulation; less public information; less stringent investor protections; less stringent accounting, corporate governance, financial reporting and disclosure standards; and less economic, political and social stability in the countries in which the Fund invests. The imposition of sanctions, exchange controls (including repatriation restrictions), confiscations, trade restrictions (including tariffs) and other government restrictions by the United States and other governments, or from problems in share registration, settlement or custody, may also result in losses. The type and severity of sanctions and other similar measures, including counter sanctions and other retaliatory actions, that may be imposed could vary broadly in scope, and their impact is impossible to predict. For example, the imposition of sanctions and other similar measures could, among other things, cause a decline in the value and/or liquidity of securities issued by the sanctioned country or companies located in or economically tied to the sanctioned country and increase market volatility and disruption in the sanctioned country and throughout the world. Sanctions and other similar measures could limit or prevent the Fund from buying and selling securities (in the sanctioned country and other markets), significantly delay or prevent the settlement of securities transactions, and significantly impact the Fund's liquidity and performance. Foreign risk also involves the risk of negative foreign currency exchange rate fluctuations, which may cause the value of securities denominated in such foreign currency (or other instruments through which the Fund has exposure to foreign currencies) to decline in value. Currency exchange rates may fluctuate significantly over short periods of time. These risks are more pronounced in connection with the Fund's investments in securities of issuers located in, or otherwise economically tied to, emerging countries.

Large Shareholder Transactions Risk. The Fund may experience adverse effects when certain large shareholders purchase or redeem large amounts of shares of the Fund. Such large shareholder redemptions, which may occur rapidly or unexpectedly, may cause the Fund to sell portfolio securities at times when it would not otherwise do so, which may negatively impact the Fund's net asset value ("NAV") and liquidity. Similarly, large Fund share purchases may adversely affect the Fund's performance to the extent that the Fund is delayed in investing new cash or otherwise maintains a larger cash position than it ordinarily would. These transactions may also accelerate the realization of taxable income to shareholders if such sales of investments resulted in gains, and may also increase transaction costs. In addition, a large redemption could result in the Fund's current expenses being allocated over a smaller asset base, leading to an increase in the Fund's expense ratio.

Liquidity Risk. The Fund may make investments that are illiquid or that may become less liquid in response to market developments or adverse investor perceptions. Illiquid investments may be more difficult to value and more difficult to sell at the desired times and prices. Liquidity risk may also refer to the risk that the Fund will not be able to pay redemption proceeds within the allowable time period because of unusual market conditions, declining prices of the securities sold, an unusually high volume of redemption requests or other reasons. To meet redemption requests, the Fund may be forced to sell securities at an unfavorable time and/or under unfavorable conditions and prices. These risks may be more pronounced in connection with the Fund's investments in securities of issuers located in emerging market countries. Redemptions by large shareholders may have a negative impact on the Fund's liquidity.

Market Risk. The value of the securities in which the Fund invests may go up or down in response to the prospects of individual companies, particular sectors, governments or countries and/or general economic conditions throughout the world due to increasingly interconnected global economies and financial markets. Events such as war, military conflict, geopolitical disputes, acts of terrorism, social or political unrest, natural disasters, recessions, inflation, rapid interest rate changes, supply chain disruptions, tariffs and other restrictions on trade, sanctions or the spread of infectious illness or other public health threats, or the threat or potential of one or more such events and developments, could also significantly impact the Fund and its investments.

Mid-Cap and Small-Cap Risk. Investments in mid-capitalization and small-capitalization companies involve greater risks than those associated with larger, more established companies. These securities may be subject to more abrupt or erratic price movements and may lack sufficient market liquidity, and these issuers often face greater business risks.

Non-Diversification Risk. The Fund is non-diversified, meaning that it is permitted to invest a larger percentage of its assets in one or more issuers or in fewer issuers than diversified mutual funds. Thus, the Fund may be more susceptible to adverse developments affecting any single issuer held in its portfolio, and may be more susceptible to greater losses because of these developments.

Sector Risk. To the extent the Fund focuses its investments in securities of issuers in one or more sectors (such as the financial services or information technology sectors), the Fund will be subject, to a greater extent than if its investments were diversified across different sectors, to the risks of volatile economic cycles and/or conditions and developments that may be particular to that sector, such as: adverse economic, business, political, environmental or other developments.

Stock Risk. Stock prices have historically risen and fallen in periodic cycles. U.S. and foreign stock markets have experienced periods of substantial price volatility in the past and may do so again in the future.

Taiwan Risk. Taiwan's geographic proximity to, and history of political contention with, the People's Republic of China ("PRC") have resulted in ongoing tensions with the PRC, including the continual risk of military conflict with the PRC. These tensions may materially affect the Taiwanese economy and its securities market, including but not limited to, increasing the risks of currency fluctuations, less liquidity, expropriation, confiscatory taxation and nationalization, and may negatively affect the Fund's performance. Taiwan's economy is export-oriented, so it depends on an open world trade regime and remains vulnerable to fluctuations in the world economy. Rising labor costs and increasing environmental consciousness have led some labor-intensive industries to relocate to countries with cheaper work forces, and continued labor outsourcing may adversely affect the Taiwanese economy. In addition, the Fund's investment in or exposure to Taiwan is also subject to risks associated with, among other things, commodity shortages,

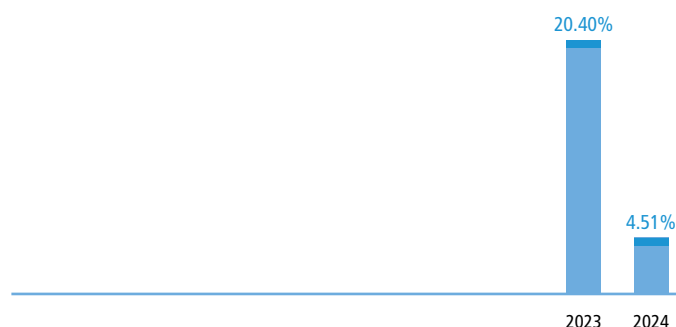

exchange control regulations (including currency blockage), the institution of tariffs or other trade barriers and natural disasters. Inflation and rapid fluctuations in inflation and interest rates have had, and may continue to have, negative effects on the economy and securities markets of Taiwan.

PERFORMANCE

The bar chart and table below provide an indication of the risks of investing in the Fund by showing: (a) changes in the performance of the Fund's Institutional Shares from year to year; and (b) how the average annual total returns of the Fund's Class A, Class C, Institutional, Investor, Class R and Class R6 Shares compare to those of a broad-based securities market index. The Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available at no cost at am.gs.com or by calling the appropriate phone number on the back cover of the Prospectus.

Performance reflects applicable fee waivers and/or expense limitations in effect during the periods shown.

CALENDAR YEAR (INSTITUTIONAL)

During the periods shown in the chart above:	Returns	Quarter ended
Best Quarter Return	12.70%	December 31, 2023
Worst Quarter Return	-6.59%	December 31, 2024

AVERAGE ANNUAL TOTAL RETURN

For the period ended December 31, 2024	1 Year	Since Inception	Inception Date
Class A Shares			12/6/2022
Returns Before Taxes	-1.61%	6.69%	
Returns After Taxes on Distributions	-1.49%	8.43%	
Returns After Taxes on Distributions and Sale of Fund Shares	-0.52%	6.68%	
Class C Shares			12/6/2022
Returns Before Taxes	2.30%	8.81%	
Institutional Shares			12/6/2022
Returns Before Taxes	4.51%	10.03%	
Investor Shares			12/6/2022
Returns Before Taxes	4.32%	9.84%	
Class R Shares			12/6/2022
Returns	3.79%	9.34%	
Class R6 Shares			12/6/2022
Returns Before Taxes	4.52%	10.04%	
MSCI® Emerging Markets ex China Index (Net, USD, Unhedged)	3.55%	9.89%	

Benchmark returns do not reflect any deductions for fees or expenses.

The after-tax returns are for Class A Shares only. The after-tax returns for Class C, Institutional, Investor, Class R and Class R6 Shares will vary. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. In addition, the after-tax returns shown are not relevant to investors who hold Fund Shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

PORTFOLIO MANAGEMENT

Goldman Sachs Asset Management, L.P. is the investment adviser for the Fund (the "Investment Adviser" or "GSAM").

Portfolio Managers: Basak Yavuz, Managing Director, has managed the Fund since 2022; and Hiren Dasani, CFA, Managing Director, has managed the Fund since 2022.

BUYING AND SELLING FUND SHARES

The minimum initial investment for Class A and Class C Shares is, generally, \$1,000. The minimum initial investment for Institutional Shares is, generally, \$1,000,000 for individual or certain institutional investors, alone or in combination with other assets under the management of the Investment Adviser and its affiliates. There is no minimum for initial purchases of Investor and Class R6 Shares, except for certain institutional investors who purchase Class R6 Shares directly with the Fund's transfer agent for which the minimum initial investment is \$5,000,000. Those share classes with a minimum initial investment requirement do not impose it on certain employee benefit plans, and Institutional Shares do not impose it on certain investment advisers investing on behalf of other accounts.

The minimum subsequent investment for Class A and Class C shareholders is \$50, except for certain employee benefit plans, for which there is no minimum. There is no minimum subsequent investment for Institutional, Investor or Class R6 shareholders.

The Fund does not impose minimum purchase requirements for initial or subsequent investments in Service Shares, although an Intermediary (as defined below) may impose such minimums and/or establish other requirements such as a minimum account balance.

You may purchase and redeem (sell) shares of the Fund on any business day through certain intermediaries that have a relationship with Goldman Sachs & Co. LLC ("Goldman Sachs"), including banks, trust companies, brokers, registered investment advisers and other financial institutions ("Intermediaries").

TAX INFORMATION

For important tax information, please see "Tax Information" on page 23 of the Prospectus.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

For important information about financial intermediary compensation, please see "Payments to Broker-Dealers and Other Financial Intermediaries" on page 23 of the Prospectus.

Goldman Sachs ESG Emerging Markets Equity Fund—Summary

INVESTMENT OBJECTIVE

The Goldman Sachs ESG Emerging Markets Equity Fund (the "Fund") seeks long-term capital appreciation.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.** You may qualify for sales charge discounts on purchases of Class A Shares if you invest at least \$50,000 in Goldman Sachs Funds. More information about these and other discounts is available from your financial professional and in "Shareholder Guide—Common Questions Applicable to the Purchase of Class A Shares" beginning on page 53 and in Appendix C—Additional Information About Sales Charge Variations, Waivers and Discounts on page 105 of the Prospectus and "Other Information Regarding Maximum Sales Charge, Purchases, Redemptions, Exchanges and Dividends" beginning on page B-167 of the Fund's Statement of Additional Information ("SAI").

Shareholder Fees

(fees paid directly from your investment)

	Class A	Class C	Institutional	Investor	Class R	Class R6
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	5.50%	None	None	None	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of the lower of original purchase price or sale proceeds) ¹	None	1.00%	None	None	None	None

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Institutional	Investor	Class R	Class R6
Management Fees	0.98%	0.98%	0.98%	0.98%	0.98%	0.98%
Distribution and/or Service (12b-1) Fees	0.25%	0.75%	None	None	0.50%	None
Other Expenses ²	1.87%	2.12%	1.76%	1.87%	1.87%	1.75%
Service Fees	None	0.25%	None	None	None	None
All Other Expenses	1.87%	1.87%	1.76%	1.87%	1.87%	1.75%
Total Annual Fund Operating Expenses	3.10%	3.85%	2.74%	2.85%	3.35%	2.73%
Fee Waiver and Expense Limitation ³	(1.73)%	(1.73)%	(1.72)%	(1.73)%	(1.73)%	(1.72)%
Total Annual Fund Operating Expenses After Fee Waiver and Expense Limitation	1.37%	2.12%	1.02%	1.12%	1.62%	1.01%

¹ A contingent deferred sales charge ("CDSC") of 1% is imposed on Class C Shares redeemed within 12 months of purchase.

² The "Other Expenses" for Institutional and Class R6 Shares have been restated to reflect expenses expected to be incurred during the current fiscal year.

³ The Investment Adviser has agreed to (i) waive a portion of its management fee payable by the Fund in order to achieve an effective net management fee rate of 0.91% as an annual percentage of the Fund's average daily net assets and (ii) reduce or limit "Other Expenses" (excluding acquired fund fees and expenses, transfer agency fees and expenses, service fees, taxes, interest, brokerage fees, expenses of shareholder meetings, litigation and indemnification, and extraordinary expenses) to 0.074% of the Fund's average daily net assets. Additionally, Goldman Sachs & Co. LLC ("Goldman Sachs"), the Fund's transfer agent, has agreed to waive a portion of its transfer agency fee (a component of "Other Expenses") equal to 0.01% as an annual percentage rate of the average daily net assets attributable to Class A, Class C, Class R and Investor Shares of the Fund. These arrangements will remain in effect through at least February 28, 2026, and prior to such date, the Investment Adviser and Goldman Sachs (as applicable) may not terminate the arrangements without the approval of the Board of Trustees.

EXPENSE EXAMPLE

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in Class A, Class C, Institutional, Investor, Class R and/or Class R6 Shares of the Fund for the time periods indicated and then redeem all of your Class A, Class C, Institutional, Investor, Class R and/or Class R6 Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same (except that the Example incorporates any applicable fee waiver and/or expense limitation arrangements for only the first year). Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$682	\$1,301	\$1,943	\$3,659
Class C Shares	\$315	\$1,016	\$1,836	\$3,970
Institutional Shares	\$104	\$687	\$1,296	\$2,944
Investor Shares	\$114	\$719	\$1,350	\$3,051
Class R Shares	\$165	\$869	\$1,596	\$3,523
Class R6 Shares	\$103	\$684	\$1,291	\$2,935
Class C Shares – Assuming no redemption	\$215	\$1,016	\$1,836	\$3,970

PORTFOLIO TURNOVER

The Fund pays transaction costs when it buys and sells securities or instruments (*i.e.*, “turns over” its portfolio). A high rate of portfolio turnover may result in increased transaction costs, including brokerage commissions, which must be borne by the Fund and its shareholders, and is also likely to result in higher short-term capital gains for taxable shareholders. These costs are not reflected in the annual fund operating expenses or in the expense example above, but are reflected in the Fund's performance. The Fund's portfolio turnover rate for the fiscal year ended October 31, 2024 was 34% of the average value of its portfolio.

PRINCIPAL STRATEGY

The Fund invests, under normal circumstances, at least 80% of its net assets plus any borrowings for investment purposes (measured at the time of purchase) (“Net Assets”) in a diversified portfolio of equity investments in emerging country issuers that the Investment Adviser believes adhere to the Fund's environmental, social and governance (“ESG”) criteria. Such equity investments may include exchange-traded funds (“ETFs”), futures and other instruments with similar economic exposures. The Investment Adviser may consider classifications by the World Bank, the International Finance Corporation, the United Nations (and its agencies) or the Fund's benchmark index provider in determining whether a country is emerging or developed. Emerging countries are generally located in Africa, Asia, the Middle East, Central and Eastern Europe and Central and South America.

The Fund's ESG criteria are generally designed to exclude companies that are directly engaged in, and/or derive significant revenue from, certain industries or product lines, including, but not limited to:

- alcohol;
- tobacco;
- gambling;
- adult entertainment;
- for-profit prisons;
- weapons;
- oil and gas exploration and production;
- thermal coal mining; and
- thermal coal power generation.

In determining whether a company is directly engaged in, and/or derives significant revenue from, the industries or product lines listed above, the Fund will use revenue thresholds for certain industries or product lines (e.g., companies that derive more than 5% of revenue from tobacco) and categorical exclusions for other industries or product lines (e.g., companies that derive any revenue from controversial weapons) and apply such thresholds and exclusions to data provided by one or more third-party vendor(s). Generally, the highest revenue threshold used will be 5%. The Investment Adviser, in its sole discretion, retains the right not to use data provided by third-party vendors where it deems the data to be not representative of a company's current business operations. In such cases, or where data on specific companies may not be available from third-party vendors, the Investment Adviser may make reasonable estimates or otherwise exercise its discretion. The Fund's ESG criteria may be updated periodically to, among other things, add or remove certain industries or product lines from the screening process, revise the revenue thresholds and categorical exclusions applicable to such activities, or change particular industries or product lines from a categorical exclusion to a revenue threshold, or vice versa.

Once the Investment Adviser determines that an issuer meets the Fund's ESG criteria, the Investment Adviser conducts a supplemental analysis of individual companies' corporate governance factors and a range of environmental and social factors that may vary by sector. This supplemental analysis will be conducted alongside traditional fundamental, bottom-up financial analysis of individual companies, using traditional fundamental metrics. The Investment Adviser may engage in active dialogues with company management teams to further inform investment decision-making and to foster best corporate governance practices using its fundamental and ESG

analysis. The Fund may invest in a company prior to completion of the supplemental analysis or without engaging with company management. Instances in which the supplemental analysis may not be completed prior to investment include but are not limited to initial public offerings (“IPOs”), in-kind transfers, corporate actions, and/or certain short-term holdings.

The Investment Adviser may sell holdings for several reasons, including, among others, changes in a company’s fundamentals or earnings, a company no longer meeting the Fund’s ESG criteria, or a company otherwise failing to conform to the Investment Adviser’s investment philosophy.

The Fund may invest in the aggregate up to 20% of its Net Assets in: (i) fixed income securities of private and government emerging country issuers; (ii) equity and fixed income securities, such as government, corporate and bank debt obligations, of developed country issuers; and (iii) equity and fixed income securities of issuers that may not adhere to the Fund’s ESG criteria.

The Investment Adviser measures the Fund’s performance against the MSCI Emerging Markets Index (Net, USD, Unhedged).

THE FUND IS “NON-DIVERSIFIED” UNDER THE INVESTMENT COMPANY ACT OF 1940, AS AMENDED, AND MAY INVEST A GREATER PORTION OF ITS ASSETS IN ONE OR MORE ISSUERS OR IN FEWER ISSUERS THAN “DIVERSIFIED” MUTUAL FUNDS.

PRINCIPAL RISKS OF THE FUND

Loss of money is a risk of investing in the Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation (“FDIC”) or any government agency. The Fund should not be relied upon as a complete investment program. There can be no assurance that the Fund will achieve its investment objective. Investments in the Fund involve substantial risks which prospective investors should consider carefully before investing. The Fund’s principal risks are presented below in alphabetical order, and not in the order of importance or potential exposure.

ESG Standards Risk. The Fund’s adherence to its ESG criteria and the application of the Investment Adviser’s supplemental ESG analysis when selecting investments generally will affect the Fund’s exposure to certain companies, sectors, regions, and countries and may affect the Fund’s performance depending on whether such investments are in or out of favor. For example, the Fund generally will not seek to invest in companies that the Investment Adviser believes have adverse social or environmental impacts (e.g., alcohol, tobacco, gambling, adult entertainment, oil and gas, coal or weapons companies). Adhering to the ESG criteria and applying the Investment Adviser’s supplemental ESG analysis may also affect the Fund’s performance relative to similar funds that do not adhere to such criteria or apply such analysis. Additionally, the Fund’s adherence to the ESG criteria and the application of the supplemental ESG analysis in connection with identifying and selecting equity investments in emerging country issuers often require more subjective analysis and may be relatively more difficult than applying the ESG criteria or the supplemental ESG analysis to equity investments of all issuers because data availability may be more limited with respect to emerging country issuers than developed country issuers. When assessing whether an issuer meets the Fund’s ESG criteria and conducting an ESG analysis of an issuer, the Investment Adviser generally will rely on third-party data that it believes to be reliable, but it does not guarantee the accuracy of such third-party data. ESG information from third-party data providers may be incomplete, inaccurate or unavailable and may vary significantly from one third-party data provider to another, which may adversely impact the investment process. Certain investments may be dependent on U.S. and foreign government policies, including tax incentives and subsidies, which may change without notice. The Fund’s ESG criteria and the application of the supplemental ESG analysis may be changed without shareholder approval.

Foreign and Emerging Countries Risk. Foreign securities may be subject to risk of loss because of more or less foreign government regulation; less public information; less stringent investor protections; less stringent accounting, corporate governance, financial reporting and disclosure standards; and less economic, political and social stability in the countries in which the Fund invests. The imposition of sanctions, exchange controls (including repatriation restrictions), confiscations, trade restrictions (including tariffs) and other government restrictions by the United States and other governments, or from problems in share registration, settlement or custody, may also result in losses. The type and severity of sanctions and other similar measures, including counter sanctions and other retaliatory actions, that may be imposed could vary broadly in scope, and their impact is impossible to predict. For example, the imposition of sanctions and other similar measures could, among other things, cause a decline in the value and/or liquidity of securities issued by the sanctioned country or companies located in or economically tied to the sanctioned country and increase market volatility and disruption in the sanctioned country and throughout the world. Sanctions and other similar measures could limit or prevent the Fund from buying and selling securities (in the sanctioned country and other markets), significantly delay or prevent the settlement of securities transactions, and significantly impact the Fund’s liquidity and performance. Foreign risk also involves the risk of negative foreign currency exchange rate fluctuations, which may cause the value of securities denominated in such foreign currency (or other instruments through which the Fund has exposure to foreign currencies) to decline in value. Currency exchange rates may fluctuate significantly over short periods of time. These risks are more pronounced in connection with the Fund’s investments in securities of issuers located in, or otherwise economically tied to, emerging countries.

Greater China Risk. Investing in Greater China involves a higher degree of risk and special considerations not typically associated with investing in other more established economies or securities markets. The Fund’s investment exposure to Greater China may subject the Fund, to a greater extent than if investments were made in developed countries, to the risks of adverse securities markets, exchange rates and social, political, regulatory, economic or environmental events and natural disasters which may occur in the China region. The economy, industries, and securities and currency markets of Greater China are particularly vulnerable to the region’s dependence on exports and international trade, increasing competition from Asia’s other low-cost emerging economies and territorial and other disputes with other countries. The imposition of tariffs or other trade barriers by the U.S. or foreign governments on exports

from Mainland China may also have an adverse impact on Chinese issuers. There is also the risk that the U.S. government or other governments may sanction Chinese issuers or otherwise prohibit U.S. persons (such as the Fund) from investing in certain Chinese issuers which may negatively affect the liquidity and price of their securities and cause the government of the People's Republic of China ("PRC") to take retaliatory measures. In addition, currency fluctuations, currency convertibility, interest rate fluctuations and higher rates of inflation as a result of internal social unrest or conflicts with other countries have had, and may continue to have, negative effects on the economies and securities markets of Greater China. The government of the PRC exercises significant control over the economy in Mainland China, and may at any time alter or discontinue economic reforms. The willingness and ability of the Chinese government to support freer markets is uncertain. Investments in Greater China are subject to the risk of confiscatory taxation, nationalization or expropriation of assets, potentially frequent changes in the law, intervention by the PRC in contractual arrangements, and imperfect information because companies in the China region may not be subject to the same disclosure, accounting, auditing and financial reporting standards and practices as U.S. companies. Taiwan and Hong Kong do not exercise the same level of control over their economies as does the PRC with respect to Mainland China, but changes to their political and economic relationships with the PRC could adversely impact the Fund's investments in Taiwan and Hong Kong.

Large Shareholder Transactions Risk. The Fund may experience adverse effects when certain large shareholders purchase or redeem large amounts of shares of the Fund. Such large shareholder redemptions, which may occur rapidly or unexpectedly, may cause the Fund to sell portfolio securities at times when it would not otherwise do so, which may negatively impact the Fund's net asset value ("NAV") and liquidity. Similarly, large Fund share purchases may adversely affect the Fund's performance to the extent that the Fund is delayed in investing new cash or otherwise maintains a larger cash position than it ordinarily would. These transactions may also accelerate the realization of taxable income to shareholders if such sales of investments resulted in gains, and may also increase transaction costs. In addition, a large redemption could result in the Fund's current expenses being allocated over a smaller asset base, leading to an increase in the Fund's expense ratio.

Liquidity Risk. The Fund may make investments that are illiquid or that may become less liquid in response to market developments or adverse investor perceptions. Illiquid investments may be more difficult to value and more difficult to sell at the desired times and prices. Liquidity risk may also refer to the risk that the Fund will not be able to pay redemption proceeds within the allowable time period because of unusual market conditions, declining prices of the securities sold, an unusually high volume of redemption requests or other reasons. To meet redemption requests, the Fund may be forced to sell securities at an unfavorable time and/or under unfavorable conditions and prices. These risks may be more pronounced in connection with the Fund's investments in securities of issuers located in emerging market countries. Redemptions by large shareholders may have a negative impact on the Fund's liquidity.

Market Risk. The value of the securities in which the Fund invests may go up or down in response to the prospects of individual companies, particular sectors, governments or countries and/or general economic conditions throughout the world due to increasingly interconnected global economies and financial markets. Events such as war, military conflict, geopolitical disputes, acts of terrorism, social or political unrest, natural disasters, recessions, inflation, rapid interest rate changes, supply chain disruptions, tariffs and other restrictions on trade, sanctions or the spread of infectious illness or other public health threats, or the threat or potential of one or more such events and developments, could also significantly impact the Fund and its investments.

Mid-Cap and Small-Cap Risk. Investments in mid-capitalization and small-capitalization companies involve greater risks than those associated with larger, more established companies. These securities may be subject to more abrupt or erratic price movements and may lack sufficient market liquidity, and these issuers often face greater business risks.

Sector Risk. To the extent the Fund focuses its investments in securities of issuers in one or more sectors (such as the financial services or telecommunications sectors), the Fund will be subject, to a greater extent than if its investments were diversified across different sectors, to the risks of volatile economic cycles and/or conditions and developments that may be particular to that sector, such as: adverse economic, business, political, environmental or other developments.

Non-Diversification Risk. The Fund is non-diversified, meaning that it is permitted to invest a larger percentage of its assets in one or more issuers or in fewer issuers than diversified mutual funds. Thus, the Fund may be more susceptible to adverse developments affecting any single issuer held in its portfolio, and may be more susceptible to greater losses because of these developments.

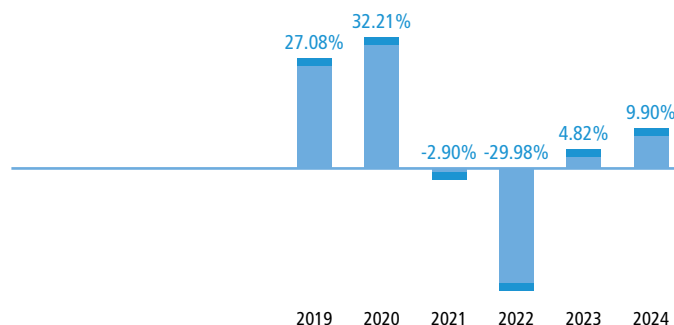

Stock Risk. Stock prices have historically risen and fallen in periodic cycles. U.S. and foreign stock markets have experienced periods of substantial price volatility in the past and may do so again in the future.

PERFORMANCE

The bar chart and table below provide an indication of the risks of investing in the Fund by showing: (a) changes in the performance of the Fund's Institutional Shares from year to year; and (b) how the average annual total returns of the Fund's Class A, Class C, Institutional, Investor, Class R and Class R6 Shares compare to those of a broad-based securities market index. The Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available at no cost at am.gs.com or by calling the appropriate phone number on the back cover of the Prospectus.

Performance reflects applicable fee waivers and/or expense limitations in effect during the periods shown.

CALENDAR YEAR (INSTITUTIONAL)

During the periods shown in the chart above:	Returns	Quarter ended
Best Quarter Return	22.75%	June 30, 2020
Worst Quarter Return	-21.37%	March 31, 2020

AVERAGE ANNUAL TOTAL RETURN

For the period ended December 31, 2024

	1 Year	5 Years	Since Inception	Inception Date
Class A Shares				5/31/2018
Returns Before Taxes	3.58%	-0.73%	0.48%	
Returns After Taxes on Distributions	3.90%	-0.88%	0.38%	
Returns After Taxes on Distributions and Sale of Fund Shares	2.71%	-0.22%	0.66%	
Class C Shares				5/31/2018

Returns	9.29%	0.13%	1.08%	
Class R6 Shares				5/31/2018
Returns Before Taxes	10.02%	0.74%	1.70%	
MSCI Emerging Markets Index (Net, USD, Unhedged)	7.48%	1.70%	1.87%	

Benchmark returns do not reflect any deductions for fees or expenses.

The after-tax returns are for Class A Shares only. The after-tax returns for Class C, Institutional, Investor and Class R6 Shares, and returns for Class R Shares (which are offered exclusively to employee benefit plans), will vary. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. In addition, the after-tax returns shown are not relevant to investors who hold Fund Shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

PORTFOLIO MANAGEMENT

Goldman Sachs Asset Management, L.P. is the investment adviser for the Fund (the "Investment Adviser" or "GSAM").

Portfolio Managers: Basak Yavuz, Managing Director, has managed the Fund since 2018; and Hiren Dasani, CFA, Managing Director, has managed the Fund since 2018.

BUYING AND SELLING FUND SHARES

The minimum initial investment for Class A and Class C Shares is, generally, \$1,000. The minimum initial investment for Institutional Shares is, generally, \$1,000,000 for individual or certain institutional investors or certain wrap account sponsors, alone or in combination with other assets under the management of the Investment Adviser and its affiliates. There is no minimum for initial purchases of Investor, Class R and Class R6 Shares, except for certain institutional investors who purchase Class R6 Shares directly with the Fund's transfer agent for which the minimum initial investment is \$5,000,000. Those share classes with a minimum initial investment requirement do not impose it on certain employee benefit plans, and Institutional Shares do not impose it on certain investment advisers investing on behalf of other accounts.

The minimum subsequent investment for Class A and Class C shareholders is \$50, except for certain employee benefit plans, for which there is no minimum. There is no minimum subsequent investment for Institutional, Investor, Class R or Class R6 shareholders.

You may purchase and redeem (sell) shares of the Fund on any business day through certain intermediaries that have a relationship with Goldman Sachs & Co. LLC (“Goldman Sachs”), including banks, trust companies, brokers, registered investment advisers and other financial institutions (“Intermediaries”).

TAX INFORMATION

For important tax information, please see “Tax Information” on page 23 of the Prospectus.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

For important information about financial intermediary compensation, please see “Payments to Broker-Dealers and Other Financial Intermediaries” on page 23 of the Prospectus.

Fundamental Emerging Markets Equity Funds – Additional Summary Information

TAX INFORMATION

The Funds' distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. Investments made through tax-deferred arrangements may become taxable upon withdrawal from such arrangements.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

If you purchase the Fund through an Intermediary, the Fund and/or its related companies may pay the Intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your Intermediary's website for more information.

Investment Management Approach

INVESTMENT OBJECTIVE

The China Equity, Emerging Markets Equity, Emerging Markets Equity ex. China and ESG Emerging Markets Equity Funds seek long term capital appreciation. Each Fund's investment objective may be changed without shareholder approval upon 60 days' notice.

PRINCIPAL INVESTMENT STRATEGIES

China Equity Fund

The Fund invests, under normal circumstances, at least 80% of its Net Assets in a diversified portfolio of equity investments in issuers economically tied to China. The Fund's investments in derivatives, other investment companies, including ETFs, and other instruments are counted towards the Fund's 80% investment policy to the extent they have economic characteristics similar to the investments included within that policy. Shareholders will be provided with sixty days' notice in the manner prescribed by the Securities and Exchange Commission ("SEC") before any change in the Fund's policy to invest at least 80% of its Net Assets in the particular type of investment suggested by its name. For purposes of the 80% investment policy, China includes Mainland China and China's special administrative regions, such as Hong Kong.

The Fund expects to invest primarily in common stocks, but may also invest in preferred stocks, securities convertible into common or preferred stocks, and depositary receipts. This may include securities that trade in local Chinese, Hong Kong, or other foreign exchanges and securities that trade in RMB. The Fund may purchase securities in their initial public offerings. The Fund may invest in the securities of Chinese companies, normally restricted to residents of Mainland China (commonly known as "A Shares" or "China A Shares"), through the China Stock Connect program or other channels. The Fund may also invest in other investments including, but not limited to, "B Shares" of companies listed on the Shanghai and Shenzhen Stock Exchanges, "H Shares" of companies incorporated in Mainland China and listed on the Hong Kong Stock Exchange and other foreign exchanges, shares of "Red Chip" and "P-Chip" companies with controlling Chinese shareholders that are incorporated outside of Mainland China and listed on the Hong Kong Stock Exchange, and shares of companies listed on the Hong Kong Stock Exchange that generate the majority of their value and revenue from doing business in China. "Red Chip" companies are controlled, either directly or indirectly, by Mainland China state entities. "P-Chip" companies are controlled by Mainland Chinese companies or individuals.

While the Fund may invest in companies of any market capitalization, it expects to primarily invest in large- and mid-capitalization companies. As of February 1, 2025, the Fund generally considers issuers with public stock market capitalizations of approximately \$2.5 billion to \$10 billion to be mid-capitalization companies, and issuers with public stock market capitalizations of approximately \$10 billion or more to be large-capitalization companies. The Fund may also invest in futures, ETFs and other instruments with similar economic exposures.

Allocation of the Fund's investments is determined by the Investment Adviser's assessment of a company's upside potential and downside risk, how attractive it appears relative to other holdings, and how the addition will impact sector and industry weightings. The largest weightings in the Fund's portfolio relative to the benchmark of the Fund are given to companies the Investment Adviser believes have the most upside return potential relative to their contribution to overall portfolio risk.

The Fund may invest in the aggregate up to 20% of its Net Assets in (i) equity investments in issuers that are not economically tied to China; and (ii) fixed income securities, such as government, corporate and bank debt obligations. In addition, the Fund may hold cash and/or invest in securities of other investment companies (specifically, registered money market funds) to manage uninvested cash in the portfolio. The Fund may also invest in stock, warrants, and other securities of special purpose acquisition companies ("SPACs") or similar special purpose entities that pool funds to seek potential acquisition opportunities.

In determining whether an issuer is economically tied to China, the Investment Adviser will consider whether the issuer:

- Has a class of securities whose principal securities market is in China;
- Has its principal office in China;
- Derives 50% or more of its total revenue or profit from goods produced, sales made or services provided in China;
- Maintains 50% or more of its assets in China; or
- Is otherwise determined to be economically tied to China by the Investment Adviser in its discretion. For example, the Investment Adviser may use the classifications assigned by third parties, including an issuer's "country of risk" as determined by Bloomberg or the classifications assigned to an issuer by the Fund's benchmark index provider. These classifications are generally based on a number of criteria, including an issuer's country of domicile, the primary stock exchange on which an issuer's securities trade, the location from which the majority of an issuer's revenue is derived, and an issuer's reporting currency. Although the Investment Adviser may rely on these classifications, it is not required to do so.

The Investment Adviser measures the Fund's performance against the MSCI China All Shares Index (Net, USD, Unhedged). The MSCI China All Shares Index (Net, USD, Unhedged) captures large- and mid-cap representation across China A Shares, B Shares, H Shares, Red Chips, P-Chips and foreign listings. The MSCI China All Shared Index (Net, USD, Unhedged) aims to reflect the opportunity set of China share classes listed in Hong Kong, Shanghai, Shenzhen and outside of China. This series approximates the minimum possible reinvestment of regular cash distributions. Provided that the regular capital repayment is not subject to withholding tax, the reinvestment in the Net Daily Total Return is free of withholding tax. Effective December 1, 2009, the regular cash dividend is reinvested after deduction of withholding tax by applying the maximum rate of the company's country of incorporation applicable to institutional investors. MSCI uses the maximum rate applicable to non-resident institutional investors who do not benefit from double taxation treaties. The MSCI China All Shares Index (Net, USD, Unhedged) does not reflect any deductions of expenses associated with mutual funds such as management fees and other expenses.

Emerging Markets Equity Fund

The Fund seeks to achieve long-term capital appreciation by investing, under normal circumstances, at least 80% of its Net Assets in a diversified portfolio of equity investments in emerging country issuers. Such equity investments may include ETFs, futures and other instruments with similar economic exposures. Shareholders will be provided with sixty days' notice in the manner prescribed by the SEC before any change in the Fund's policy to invest at least 80% of its Net Assets in the particular type of investment suggested by its name. The Investment Adviser may consider classifications by the World Bank, the International Finance Corporation, the United Nations (and its agencies) or the Fund's benchmark index provider in determining whether a country is emerging or developed. Emerging countries are generally located in Africa, Asia, the Middle East, Central and Eastern Europe and Central and South America. The Investment Adviser currently intends that the Fund's investment focus will be in the following emerging countries as well as any other emerging country to the extent that foreign investors are permitted by applicable law to make such investments:

■ Argentina	■ Egypt	■ Malaysia	■ Qatar	■ Turkey
■ Brazil	■ Georgia	■ Mexico	■ Saudi Arabia	■ United Arab Emirates (Abu Dhabi and Dubai)
■ Chile	■ Greece	■ Pakistan	■ South Africa	■ Vietnam
■ China	■ Hungary	■ Peru	■ South Korea	
■ Colombia	■ India	■ Philippines	■ Taiwan	
■ Czech Republic	■ Indonesia	■ Poland	■ Thailand	

An emerging country issuer is an issuer economically tied to an emerging market country. In determining whether an issuer is economically tied to an emerging market country, the Investment Adviser will consider whether the issuer:

- Has a class of securities whose principal securities market is in an emerging country;
- Has its principal office in an emerging country;
- Derives 50% or more of its total revenue or profit from goods produced, sales made or services provided in one or more emerging market countries;
- Maintains 50% or more of its assets in one or more emerging countries; or
- Is otherwise determined to be economically tied to an emerging market country by the Investment Adviser in its discretion. For example, the Investment Adviser may use the classifications assigned by third parties, including an issuer's "country of risk" as determined by Bloomberg or the classifications assigned to an issuer by the Fund's benchmark index provider. These classifications are generally based on a number of criteria, including an issuer's country of domicile, the primary stock exchange on which an issuer's securities trade, the location from which the majority of an issuer's revenue is derived, and an issuer's reporting currency. Although the Investment Adviser may rely on these classifications, it is not required to do so.

Under normal circumstances, the Fund maintains investments in at least six emerging countries. Allocation of the Fund's investments is determined by the Investment Adviser's assessment of a company's upside potential and downside risk, how attractive it appears relative to other holdings, and how the addition will impact sector and industry weightings. The largest weightings are given to companies the Investment Adviser believes have the most upside return potential relative to their contribution to overall portfolio risk.

The Fund may invest in the aggregate up to 20% of its Net Assets in: (i) fixed income securities of private and government emerging country issuers; and (ii) equity and fixed income securities, such as government, corporate and bank debt obligations, of developed country issuers. The Fund may also invest in stock, warrants, and other securities of SPACs or similar special purpose entities that pool funds to seek potential acquisition opportunities.

The Investment Adviser measures the Fund's performance against the MSCI Emerging Markets Index (Net, USD, Unhedged). The MSCI Emerging Markets Index (Net, USD, Unhedged) is a free float-adjusted market capitalization index that is designed to measure equity market performance of emerging markets. As of December 31, 2024, the MSCI Emerging Markets Index (Net, USD, Unhedged) consisted of the following emerging market country indices: Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Kuwait, Malaysia, Mexico, Peru, Philippines, Poland, Qatar, Saudi Arabia, South Africa, Taiwan, Thailand,

Turkey and United Arab Emirates. For this Index, the dividend is reinvested after deduction of withholding tax, applying the rate to nonresident individuals who do not benefit from double taxation treaties. This series approximates the minimum possible reinvestment of regular cash distributions. Provided that the regular capital repayment is not subject to withholding tax, the reinvestment in the Net Daily Total Return is free of withholding tax. Effective December 1, 2009, the regular cash dividend is reinvested after deduction of withholding tax by applying the maximum rate of the company's country of incorporation applicable to institutional investors. MSCI uses the maximum rate applicable to non-resident institutional investors who do not benefit from double taxation treaties. The MSCI Emerging Markets Index (Net, USD, Unhedged) does not reflect any deductions of expenses associated with mutual funds such as management fees and other expenses.

THE FUND IS NON-DIVERSIFIED UNDER THE INVESTMENT COMPANY ACT, AND MAY INVEST A LARGER PERCENTAGE OF ITS ASSETS IN ONE OR MORE ISSUERS OR IN FEWER ISSUERS THAN DIVERSIFIED MUTUAL FUNDS.

Emerging Markets Equity ex. China Fund

The Fund seeks to achieve long-term capital appreciation by investing, under normal circumstances, at least 80% of its Net Assets in a diversified portfolio of equity investments in emerging country issuers, excluding China. Such equity investments may include ETFs, futures and other instruments with similar economic exposures. Shareholders will be provided with sixty days' notice in the manner prescribed by the SEC before any change in the Fund's policy to invest at least 80% of its Net Assets in the particular type of investment suggested by its name. The Investment Adviser may consider classifications by the World Bank, the International Finance Corporation, the United Nations (and its agencies) or the Fund's benchmark index provider in determining whether a country is emerging or developed. Emerging countries are generally located in Africa, Asia (excluding China for purposes of the Fund), the Middle East, Central and Eastern Europe and Central and South America. The Investment Adviser currently intends that the Fund's investment focus will be in the following emerging countries as well as any other emerging country to the extent that foreign investors are permitted by applicable law to make such investments:

■ Brazil	■ Greece	■ Peru	■ Slovenia	■ United Arab Emirates (Abu Dhabi and Dubai)
■ Chile	■ Hungary	■ Philippines	■ South Africa	■ Vietnam
■ Colombia	■ India	■ Poland	■ South Korea	
■ Czech Republic	■ Indonesia	■ Qatar	■ Taiwan	
■ Egypt	■ Malaysia	■ Saudi Arabia	■ Thailand	
■ Georgia	■ Mexico	■ Singapore	■ Turkey	

An emerging country issuer is an issuer economically tied to an emerging market country. In determining whether an issuer is economically tied to an emerging market country, the Investment Adviser will consider whether the issuer:

- Has a class of securities whose principal securities market is in an emerging country;
- Has its principal office in an emerging country;
- Derives 50% or more of its total revenue or profit from goods produced, sales made or services provided in one or more emerging market countries;
- Maintains 50% or more of its assets in one or more emerging countries; or
- Is otherwise determined to be economically tied to an emerging market country by the Investment Adviser in its discretion. For example, the Investment Adviser may use the classifications assigned by third parties, including an issuer's "country of risk" as determined by Bloomberg or the classifications assigned to an issuer by the Fund's benchmark index provider. These classifications are generally based on a number of criteria, including an issuer's country of domicile, the primary stock exchange on which an issuer's securities trade, the location from which the majority of an issuer's revenue is derived, and an issuer's reporting currency. Although the Investment Adviser may rely on these classifications, it is not required to do so.

Under normal circumstances, the Fund maintains investments in at least six emerging countries (excluding China). Allocation of the Fund's investments is determined by the Investment Adviser's assessment of a company's upside potential and downside risk, how attractive it appears relative to other holdings, and how the addition will impact sector and industry weightings. The largest weightings are given to companies the Investment Adviser believes have the most upside return potential relative to their contribution to overall portfolio risk.

The Fund may invest in the aggregate up to 20% of its Net Assets in: (i) fixed income securities of private and government emerging country issuers (excluding China); and (ii) equity and fixed income securities, such as government, corporate and bank debt obligations, of developed country issuers. The Fund may also invest in stock, warrants, and other securities of SPACs or similar special purpose entities that pool funds to seek potential acquisition opportunities.

The Investment Adviser measures the Fund's performance against the MSCI Emerging Markets ex China Index (Net, USD, Unhedged). The MSCI Emerging Markets ex China Index (Net, USD, Unhedged) is a free float-adjusted market capitalization index that is designed to measure equity market performance of emerging market countries excluding China. As of December 31, 2024, the MSCI Emerging Markets ex China Index (Net, USD, Unhedged) consisted of the following country indices: Brazil, Chile, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Kuwait, Malaysia, Mexico, Peru, Philippines, Poland, Qatar, Saudi Arabia, South Africa, Taiwan, Thailand, Turkey and United Arab Emirates. This series approximates the minimum possible reinvestment of regular cash distributions. Provided that the regular capital repayment is not subject to withholding tax, the reinvestment in the Net Daily Total Return is free of withholding tax. Effective December 1, 2009, the regular cash dividend is reinvested after deduction of withholding tax by applying the maximum rate of the company's country of incorporation applicable to institutional investors. MSCI uses the maximum rate applicable to non-resident institutional investors who do not benefit from double taxation treaties.

For this Index, the dividend is reinvested after deduction of withholding tax, applying the rate to nonresident individuals who do not benefit from double taxation treaties. This series approximates the minimum possible reinvestment of regular cash distributions. The MSCI Emerging Markets ex China Index (Net, USD, Unhedged) does not reflect any deductions of expenses associated with mutual funds such as management fees and other expenses.

THE FUND IS NON-DIVERSIFIED UNDER THE INVESTMENT COMPANY ACT, AND MAY INVEST A LARGER PERCENTAGE OF ITS ASSETS IN ONE OR MORE ISSUERS OR IN FEWER ISSUERS THAN DIVERSIFIED MUTUAL FUNDS.

ESG Emerging Markets Equity Fund

The Fund invests, under normal circumstances, at least 80% of its Net Assets in a diversified portfolio of equity investments in emerging country issuers that the Investment Adviser believes adhere to the Fund's environmental, social and governance ("ESG") criteria. Such equity investments may include ETFs, futures and other instruments with similar economic exposures. Shareholders will be provided with sixty days' notice in the manner prescribed by the SEC before any change in the Fund's policy to invest at least 80% of its Net Assets in the particular type of investment suggested by its name. The Investment Adviser may consider classifications by the World Bank, the International Finance Corporation, the United Nations (and its agencies) or the Fund's benchmark index provider in determining whether a country is emerging or developed. Emerging countries are generally located in Africa, Asia, the Middle East, Central and Eastern Europe and Central and South America. The Investment Adviser currently intends that the Fund's investment focus will be in the following emerging countries as well as any other emerging country to the extent that foreign investors are permitted by applicable law to make such investments:

■ Argentina	■ Egypt	■ Malaysia	■ Qatar	■ Turkey
■ Brazil	■ Georgia	■ Mexico	■ Saudi Arabia	■ United Arab Emirates (Abu Dhabi and Dubai)
■ Chile	■ Greece	■ Pakistan	■ South Africa	■ Vietnam
■ China	■ Hungary	■ Peru	■ South Korea	
■ Colombia	■ India	■ Philippines	■ Taiwan	
■ Czech Republic	■ Indonesia	■ Poland	■ Thailand	

An emerging country issuer is an issuer economically tied to an emerging market country. In determining whether an issuer is economically tied to an emerging market country, the Investment Adviser will consider whether the issuer:

- Has a class of securities whose principal securities market is in an emerging market country;
- Has its principal office in an emerging market country;
- Derives 50% or more of its total revenue or profit from goods produced, sales made or services provided in one or more emerging market countries;
- Maintains 50% or more of its assets in one or more emerging market countries; or
- Is otherwise determined to be economically tied to an emerging market country by the Investment Adviser in its discretion. For example, the Investment Adviser may use the classifications assigned by third parties, including an issuer's "country of risk" as determined by Bloomberg or the classifications assigned to an issuer by the Fund's benchmark index provider. These classifications are generally based on a number of criteria, including an issuer's country of domicile, the primary stock exchange on which an issuer's securities trade, the location from which the majority of an issuer's revenue is derived, and an issuer's reporting currency. Although the Investment Adviser may rely on these classifications, it is not required to do so.

The Fund's ESG criteria are generally designed to exclude companies that are directly engaged in, and/or derive significant revenue from, certain industries or product lines, including, but not limited to:

- alcohol;
- tobacco;

- gambling;
- adult entertainment;
- for-profit prisons;
- weapons;
- oil and gas exploration and production;
- thermal coal mining; and
- thermal coal power generation.

In determining whether a company is directly engaged in, and/or derives significant revenue from, the industries or product lines listed above, the Fund will use revenue thresholds for certain industries or product lines (e.g., companies that derive more than 5% of revenue from tobacco) and categorical exclusions for other industries or product lines (e.g., companies that derive any revenue from controversial weapons) and apply such thresholds and exclusions to data provided by one or more third-party vendor(s). Generally, the highest revenue threshold used will be 5%. The Investment Adviser, in its sole discretion, retains the right not to use data provided by third-party vendors where it deems the data to be not representative of a company's current business operations. In such cases, or where data on specific companies may not be available from third-party vendors, the Investment Adviser may make reasonable estimates or otherwise exercise its discretion. The Fund's ESG criteria may be updated periodically to, among other things, add or remove certain industries or product lines from the screening process, revise the revenue thresholds and categorical exclusions applicable to such activities, or change particular industries or product lines from a categorical exclusion to a revenue threshold, or vice versa. The Investment Adviser may periodically review portfolio holdings against the Fund's ESG criteria.

Once the Investment Adviser determines that an issuer meets the Fund's ESG criteria, the Investment Adviser conducts a supplemental analysis of individual companies' corporate governance factors and a range of environmental and social factors that may vary by sector. This supplemental analysis will be conducted alongside traditional fundamental, bottom-up financial analysis of individual companies, using traditional fundamental metrics.

These corporate governance considerations may include:

- quality of earnings;
- concern for shareholder interests and minority shareholder rights;
- unethical business conduct, for example unethical methods of obtaining contracts and/or close connections with authorities;
- board structure;
- board diversity;
- executive management team, for example CEO/CFO effectiveness and acting in interest of shareholders; and
- executive compensation.

Environmental and social considerations may include:

- environmental and social reporting, disclosure and transparency;
- material environmental litigation and/or controversies;
- material social litigation and/or controversies;
- labor practices, for example track record in treatment of employees and supply chain management;
- human rights considerations; and
- climate change policies and environmental practices.

The Investment Adviser may engage in active dialogues with company management teams to further inform investment decision-making and to foster best corporate governance practices using its fundamental and ESG analysis. The Fund may invest in a company prior to completion of the supplemental analysis or without engaging with company management. Instances in which the supplemental analysis may not be completed prior to investment include but are not limited to IPOs, in-kind transfers, corporate actions, and/or certain short-term holdings.

The Investment Adviser may sell holdings for several reasons, including, among others, changes in a company's fundamentals or earnings, a company no longer meeting the Fund's ESG criteria, or a company otherwise failing to conform to the Investment Adviser's investment philosophy.

The Fund may invest in the aggregate up to 20% of its Net Assets in: (i) fixed income securities of private and government emerging country issuers; (ii) equity and fixed income securities, such as government, corporate and bank debt obligations, of developed country issuers; and (iii) equity and fixed income securities of issuers that may not adhere to the Fund's ESG criteria. The Fund may also invest in stock, warrants, and other securities of SPACs or similar special purpose entities that pool funds to seek potential acquisition opportunities.

The Investment Adviser measures the Fund's performance against the MSCI Emerging Markets Index (Net, USD, Unhedged). The MSCI Emerging Markets Index (Net, USD, Unhedged) is a free float-adjusted market capitalization index that is designed to measure equity market performance of emerging markets. As of December 31, 2024, the MSCI Emerging Markets Index (Net, USD, Unhedged) consisted of the following emerging market country indices: Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Kuwait, Malaysia, Mexico, Peru, Philippines, Poland, Qatar, Saudi Arabia, South Africa, Taiwan, Thailand, Turkey and United Arab Emirates. For this Index, the dividend is reinvested after deduction of withholding tax, applying the rate to non-resident individuals who do not benefit from double taxation treaties. This series approximates the minimum possible reinvestment of regular cash distributions. Provided that the regular capital repayment is not subject to withholding tax, the reinvestment in the Net Daily Total Return is free of withholding tax. Effective December 1, 2009, the regular cash dividend is reinvested after deduction of withholding tax by applying the maximum rate of the company's country of incorporation applicable to institutional investors. MSCI uses the maximum rate applicable to non-resident institutional investors who do not benefit from double taxation treaties. The MSCI Emerging Markets Index (Net, USD, Unhedged) does not reflect any deductions of expenses associated with mutual funds such as management fees and other expenses.

THE FUND IS NON-DIVERSIFIED UNDER THE INVESTMENT COMPANY ACT, AND MAY INVEST A LARGER PERCENTAGE OF ITS ASSETS IN ONE OR MORE ISSUERS OR IN FEWER ISSUERS THAN DIVERSIFIED MUTUAL FUNDS.

All Funds

The Funds may, from time to time, take temporary defensive positions that are inconsistent with the Funds' principal investment strategies in attempting to respond to adverse market, political or other conditions. For temporary defensive purposes, each Fund may invest up to 100% of its total assets in securities issued or guaranteed by the U.S. government, its agencies, instrumentalities or sponsored enterprises ("U.S. Government Securities"), commercial paper rated at least A-2 by S&P Global Ratings ("Standard & Poor's"), P-2 by Moody's Investors Service, Inc. ("Moody's") or having a comparable credit rating by another nationally recognized statistical rating organization ("NRSRO") (or if unrated, determined by the Investment Adviser to be of comparable credit quality), certificates of deposit, bankers' acceptances, repurchase agreements, non-convertible preferred stocks and non-convertible corporate bonds with a remaining maturity of less than one year, ETFs and other investment companies and cash items.

When a Fund's assets are invested in such instruments, the Fund may not be achieving its investment objective.

GSAM Fundamental Equity Team's Investment Approach (All Funds):

Belief	How the Investment Adviser Acts on This Belief
Excess returns may be generated by conducting thorough fundamental research and individual stock selection	Seeks to generate excess returns through an intensive research culture and a strong commitment to on-the-ground research resources around the world.
Differentiated portfolios provide potential to generate excess returns	Builds portfolios that are reflective of the team's most compelling investment ideas so that the majority of excess returns is driven by stock selection.
Accountability at the portfolio management level is critical	By ensuring the portfolio managers are empowered to make decisions and are fully accountable for the performance of the Funds, we believe we can build portfolios that reflect compelling risk reward opportunities from our research teams globally.

The GSAM Fundamental Equity team's investment approach is grounded in the belief that we can achieve a competitive edge through selecting stocks with local expertise. We seek to discover a broad range of investment ideas while being flexible, nimble and avoiding complacency. We believe a company's prospective ability to generate high returns on invested capital will strongly influence investment success. In our view, using a strong valuation discipline to purchase well-positioned, cash-generating businesses run by shareholder-oriented management teams is a compelling formula for long-term portfolio performance.

From a valuation perspective, the Investment Adviser generally looks for companies where the Investment Adviser's estimate of their earnings, asset value or cash flow is meaningfully different from consensus; or where the Investment Adviser believes a company's intrinsic value is not reflected in the share price. Within the valuation framework, the Investment Adviser actively searches for companies that it believes can produce above average returns over the full market cycle. As such, the Investment Adviser generally seeks companies that exhibit strong corporate governance, such that minority shareholders may benefit from returns.

The GSAM Fundamental Equity team employs a fundamental investment process that considers a wide range of factors, and no one factor or consideration is determinative. Traditional fundamental factors that the GSAM Fundamental Equity team may consider include, but are not limited to, cash flows, balance sheet leverage, return on invested capital, industry dynamics, earnings quality and profitability. The GSAM Fundamental Equity team may integrate ESG factors alongside traditional fundamental factors as part of its fundamental research process to seek to assess overall business quality and valuation, as well as potential risks. ESG factors that the GSAM Fundamental Equity team may consider include, but are not limited to, carbon intensity and emissions profiles, community

impact, governance practices and board structure. The identification of a risk related to an ESG factor will not necessarily exclude a particular security or sector that, in the GSAM Fundamental Equity team's view, is otherwise suitable and attractively priced for investment, and the GSAM Fundamental Equity team may invest in a security or sector without integrating ESG factors or considerations into its fundamental investment process. The relevance of specific traditional fundamental factors and ESG factors to the fundamental investment process varies across asset classes, sectors and strategies. The GSAM Fundamental Equity team may utilize data sources provided by third-party vendors and/or engage directly with issuers when assessing the above factors.

As stakeholders, the Funds have a vested interest in helping the companies in which they invest unlock value by improving corporate practices and being thoughtful stewards of capital. As part of its focus on long-term, active ownership, the Investment Adviser may, in certain circumstances, use proxy voting and engagement as some of the tools available to encourage positive corporate decision making and productive change, where possible.

GSAM Fundamental Equity Team's Additional Investment Philosophy (ESG Emerging Markets Equity Fund):

Belief	How the Investment Adviser Acts on This Belief
■ Companies that employ sustainable practices and adhere to ESG principles can be more responsive and adaptive to change, better preserve competitive advantages and maintain financial resiliency	Seeks to identify sound companies by conducting proprietary ESG research and bottom-up company analysis.

ADDITIONAL FEES AND EXPENSES INFORMATION

"Acquired Fund Fees and Expenses" reflect the expenses (including the management fees) borne by a Fund through its ownership of shares in other investment companies. Differences in the "Expense Limitation" ratios across a Fund's share classes are the result of, among other things, the effect of mathematical rounding on the daily accrual of expense reimbursement, particularly, in respect to share classes with small amounts of assets. Differences in the "Other Expenses" ratios across a Fund's share classes are the result of, among other things, contractual differences in transfer agency fees and/or the effect of mathematical rounding on the daily accrual of certain expenses, particularly, in respect to share classes with small amounts of assets.

ADDITIONAL PERFORMANCE AND BENCHMARK INFORMATION

The below is additional information that relates to the "Performance" section of each Fund's summary section.

Note that the "Best Quarter" and "Worst Quarter" figures shown in the "Performance" section of each Fund's Summary section are applicable only to the time period covered by the bar chart.

These definitions apply to the after-tax returns shown in the "Performance" section of each Fund's Summary section.

Average Annual Total Returns Before Taxes. These returns do not reflect taxes on distributions on a Fund's Shares nor do they show how performance can be impacted by taxes when shares are redeemed (sold) by you.

Average Annual Total Returns After Taxes on Distributions. These returns assume that taxes are paid on distributions on a Fund's Class A Shares (*i.e.*, dividends and capital gains) but do not reflect taxes that may be incurred upon redemption (sale) of the Class A Shares at the end of the performance period.

Average Annual Total Returns After Taxes on Distributions and Sale of Fund Shares. These returns reflect taxes paid on distributions on a Fund's Class A Shares and taxes applicable when the shares are redeemed (sold).

Note on Tax Rates. The after-tax performance figures are calculated using the historically highest individual federal marginal income tax rates at the time of the distributions and do not reflect state and local taxes. In calculating the federal income taxes due on redemptions, capital gains taxes resulting from a redemption are subtracted from the redemption proceeds and the tax benefits from capital losses resulting from the redemption are added to the redemption proceeds. Under certain circumstances, the addition of the tax benefits from capital losses resulting from redemptions may cause the Returns After Taxes on Distributions and Sale of Fund Shares to be greater than the Returns After Taxes on Distributions or even the Returns Before Taxes.

Note on Benchmarks. References in the Prospectus to a Fund's Regulatory or Performance Benchmark (or any other benchmark) are for informational purposes only, and unless otherwise noted, are not an indication of how a particular Fund is managed or a particular Fund's risk characteristics.

OTHER INVESTMENT PRACTICES AND SECURITIES

Although each Fund's principal investment strategies are described in the Fund's Summary—Principal Strategy section of the Prospectus, the following tables identify some of the investment techniques that may (but are not required to) be used by the Funds in seeking to achieve their investment objectives. The tables also highlight the differences and similarities among the Funds in their use of these techniques and other investment practices and investment securities. Numbers in these tables show allowable usage only; for actual usage, consult the Funds' most recently filed Form N-CSR. For more information about these and other investment practices and securities, see Appendix A.

Each Fund publishes on its website (am.gs.com) complete portfolio holdings for the Fund as of the end of each calendar quarter subject to a fifteen calendar-day lag between the date of the information and the date on which the information is disclosed. In addition, the Funds publish on their website month-end top ten holdings subject to a fifteen calendar-day lag between the date of the information and the date on which the information is disclosed. In addition, a description of the Funds' policies and procedures with respect to the disclosure of the Funds' portfolio holdings is available in the Funds' SAI.

3 May be BB+ or lower by Standard & Poor's, Ba1 or lower by Moody's or have a comparable credit rating by another NRSRO at the time of investment.

4 The China Equity Fund may invest in the aggregate up to 20% of its Net Assets in: (i) fixed income securities; and (ii) equity investments in issuers that are not economically tied to China.

5 The Emerging Markets Equity Fund and ESG Emerging Markets Equity Fund may invest in the aggregate up to 20% of its Net Assets in: (i) fixed income securities of private and government emerging country issuers; and (ii) equity and fixed income investments in developed country issuers.

6 The Emerging Markets ex. China Fund may invest in the aggregate up to 20% of its Net Assets in: (i) fixed income securities of private and government emerging country issuers (excluding China); and (ii) equity and fixed income securities, such as government, corporate and bank debt obligations, of developed country issuers.

Risks of the Fund

Loss of money is a risk of investing in the Fund (which, for the remainder of this Prospectus, refers to one or more of the Funds offered in this Prospectus). An investment in the Fund is not a bank deposit and is not insured or guaranteed by the FDIC or any other governmental agency. The principal risks of the Fund are discussed in the Summary sections of the Prospectus. The following section provides additional information on the risks that apply to the Fund, which may result in a loss of your investment. The risks applicable to the Fund are presented below in alphabetical order, and not in the order of importance or potential exposure. The Fund should not be relied upon as a complete investment program. There can be no assurance that the Fund will achieve its investment objective.

■ **Asian Investment Risk**—Investing in certain Asian issuers may involve a higher degree of risk and special considerations not typically associated with investing in issuers from more established economies or securities markets. Many Asian countries, including China, can be characterized as either developing or newly industrialized economies and tend to experience more volatile economic cycles than developed countries. Some countries in the region have in the past experienced currency devaluations that resulted in high interest rate levels, sharp reductions in economic activity and significant drops in securities prices. Moreover, as export-driven economies, the economies of these countries are affected by developments in the economies of their principal trading partners, including the U.S. Furthermore, flooding, monsoons and other natural disasters also can significantly affect the value of investments. Some countries in the region have in the past imposed restrictions on converting local currency which prevented foreign firms from selling assets and repatriating funds. Many countries in the region have historically encountered political

uncertainty, corruption, military intervention, social unrest and regional armed conflict. Examples include territorial disputes with China, ethnic and sectarian violence in Indonesia and India, armed conflict between India and Pakistan and between North Korea and South Korea, and insurgencies in the Philippines. Although the Emerging Markets Equity ex. China Fund does not intend to invest directly in Chinese issuers, the Fund will be exposed to the Chinese economy, as a consequence of the indirect exposure or relationship that companies in other emerging market countries have to China. Investments related to Greater China involves a higher degree of risk and special considerations not typically associated with investing in other more established economies or securities markets.

- **Banking Industry Risk**—An adverse development in the banking industry may affect the value of a Fund’s investments more than if the Fund was not invested to such a degree in the banking industry. The Fund may, under certain circumstances, invest more than 25% of the value of its total assets in the banking industry. Banks may be particularly susceptible to certain economic factors such as interest rate changes, adverse developments in the real estate market, fiscal and monetary policy and general economic cycles. For example, deteriorating economic and business conditions can disproportionately impact companies in the banking industry due to increased defaults on payments by borrowers. Moreover, political and regulatory changes can affect the operations and financial results of companies in the banking industry, potentially imposing additional costs and expenses or restricting the types of business activities of these companies.
- **Credit/Default Risk**—An issuer or guarantor of fixed income securities or instruments held by the Fund (which may have low credit ratings) may default on its obligation to pay interest and repay principal or default on any other obligation. The credit quality of a Fund’s portfolio securities or instruments may meet the Fund’s credit quality requirements at the time of purchase but then deteriorate thereafter, and such a deterioration can occur rapidly. In certain instances, the downgrading or default of a single holding or guarantor of the Fund’s holdings may impair the Fund’s liquidity and have the potential to cause significant deterioration in NAV. These risks are heightened in market environments where interest rates are rising as well as in connection with the Fund’s investments in non-investment grade fixed-income securities.
- **Currency Risk**—Changes in currency exchange rates may adversely affect the value of the Fund’s securities denominated in foreign currencies. Currency exchange rates can be volatile and affected by, among other factors, the general economic conditions of a country, the actions of the U.S. and non-U.S. governments or central banks, the imposition of currency controls, and speculation. A security may be denominated in a currency that is different from the currency of the country where the issuer is domiciled. If a foreign currency grows weaker relative to the U.S. dollar, the value of securities denominated in that foreign currency generally decreases in terms of U.S. dollars. If the Fund does not correctly anticipate changes in exchange rates, its share price could decline as a result. The Fund may from time to time attempt to hedge all or a portion of its currency risk using a variety of techniques, including currency futures, forwards and options. However, these instruments may not always work as intended, and in certain cases the Fund may be worse off than if it had not used a hedging instrument. For certain emerging market currencies, suitable hedging instruments may not be available.
- **Cybersecurity Risk**—The Fund may be susceptible to operational and information security risks resulting from cyber-attacks. Cyber-attacks include, among others, stealing or corrupting confidential information and other data that is maintained online or digitally for financial gain, denial-of-service attacks on websites causing operational disruption, and the unauthorized release of confidential information and other data. Cyber-attacks have the ability to cause significant disruptions and impact business operations; to result in financial losses; to prevent shareholders from transacting business; to interfere with the Fund’s calculation of NAV; and to lead to violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs and/or additional compliance costs. Cyber-attacks affecting the Fund or its Investment Adviser, custodian, Transfer Agent, or other third-party service providers may adversely impact the Fund and its shareholders.
- **Depository Receipts Risk**—Foreign securities may trade in the form of Depository Receipts. To the extent a Fund acquires Depository Receipts through banks which do not have a contractual relationship with the foreign issuer of the security underlying the Depository Receipts to issue and service such unsponsored Depository Receipts, there may be an increased possibility that the Fund would not become aware of and be able to respond to corporate actions such as stock splits or rights offerings involving the foreign issuer in a timely manner. In addition, the lack of information may result in inefficiencies in the valuation of such instruments. Investment in Depository Receipts does not eliminate all the risks inherent in investing in securities of non-U.S. issuers. The market value of Depository Receipts is dependent upon the market value of the underlying securities and fluctuations in the relative value of the currencies in which the Depository Receipts and the underlying securities are quoted. The Fund will not invest in any Depository Receipts that the Investment Adviser deems to be illiquid or for which pricing information is not readily available. The issuers of Depository receipts may discontinue issuing new Depository Receipts and withdraw existing Depository Receipts, which may result in costs and delays in the distribution of the underlying assets to the Fund and may negatively impact the Fund’s performance.
- **Derivatives Risk**—The Fund’s use of options, futures, forwards, swaps, options on swaps, participation notes, structured securities and other derivatives and similar instruments (collectively referred to in this paragraph as “derivatives”) may result in losses, including due to adverse market movements. Derivatives, which may pose risks in addition to and greater than those associated with

investing directly in securities, currencies or other assets and instruments, may increase market exposure and be illiquid or less liquid, volatile, difficult to price and leveraged so that small changes in the value of the underlying assets or instruments may produce disproportionate losses to the Fund. Certain derivatives are also subject to counterparty risk, which is the risk that the other party in the transaction will not fulfill, or lacks the capacity or authority to fulfill, its contractual obligations, liquidity risk, which includes the risk that the Fund will not be able to close its derivatives position when it is advantageous to do so, and risks arising from margin requirements, which include the risk that the Fund will be required to pay additional margin or set aside additional collateral to maintain open derivative positions. Derivatives may be used for both hedging and non-hedging purposes.

The use of derivatives is a highly specialized activity that involves investment techniques and risks different from those associated with investments in more traditional securities and instruments, and there is no guarantee that the use of derivatives will achieve their intended result. If the Investment Adviser is incorrect in its expectation of the timing or level of fluctuation in securities prices, interest rates, currency prices or other variables, the use of derivatives could result in losses, which in some cases may be significant. A lack of correlation between changes in the value of derivatives and the value of the portfolio assets (if any) being hedged could also result in losses. In addition, there is a risk that the performance of the derivatives or other instruments used by the Investment Adviser to replicate the performance of a particular asset class may not accurately track the performance of that asset class.

The use of derivatives is also subject to operational and legal risks. Operational risks generally refer to risks related to potential operational issues, including documentation issues, settlement issues, system failures, inadequate controls, and human error. Legal risks generally refer to risks of loss resulting from insufficient documentation or legality or enforceability of a contract.

Many of the protections afforded to cleared transactions, such as the security afforded by transacting through a clearing house, might not be available in connection with certain over-the-counter (“OTC”) transactions. Therefore, in those instances in which the Fund enters into certain OTC transactions, the Fund will be subject to the risk that its direct counterparty will not perform its obligations under the transactions and that the Fund will sustain losses. However, recent regulatory developments require margin on certain uncleared OTC transactions which may reduce, but not eliminate, this risk.

- **Emerging and Frontier Countries Risk**—Investments in securities of issuers located in, or otherwise economically tied to, emerging and frontier market countries are subject to the risks associated with investing in foreign securities. The securities markets of most emerging and frontier market countries are less liquid, developed and efficient, are subject to greater price volatility, and have smaller market capitalizations. In addition, emerging and frontier market countries may have more or less government regulation and generally do not impose as extensive and frequent accounting, auditing, financial and other reporting requirements as the securities markets of more developed countries. As a result, there could be less information available about issuers in emerging and frontier market countries, which could negatively affect the Investment Adviser’s ability to evaluate local companies or their potential impact on the Fund’s performance. Further, investments in securities of certain emerging or frontier market country issuers involve the risk of loss resulting from problems in share registration, settlement or custody, substantial economic, political and social disruptions and the imposition of exchange controls (including repatriation restrictions).

Securities traded in emerging and frontier market countries may be subject to additional risks due to, among other factors, the inexperience of financial intermediaries, a lack of modern technology, and the possibility of temporary or permanent termination of trading. In addition, certain countries may restrict or prohibit investment opportunities in issuers or industries deemed important to national interests, which may affect the market price, liquidity and rights of securities that may be purchased by the Fund. Many emerging and frontier market countries have experienced substantial, and in some periods extremely high, rates of inflation for many years. Inflation and rapid fluctuations in inflation rates and corresponding currency devaluations and fluctuations in the rate of exchange between currencies and costs associated with currency conversion have had and may continue to have negative effects on the economies and securities markets of certain emerging and frontier market countries. The legal remedies for investors in emerging and frontier markets may be more limited than the remedies available in the U.S., and the ability of U.S. authorities (e.g., SEC and the U.S. Department of Justice) to bring actions against bad actors may be limited. These risks are not normally associated with investments in more developed countries and are more pronounced in connection with investments in securities of frontier market issuers. For more information about these risks, see Appendix A.

- **ESG Integration Risk**—The Investment Adviser employs a fundamental investment process that may integrate ESG factors with traditional fundamental factors. The relevance and weightings of specific ESG factors to or within the fundamental investment process varies across asset classes, sectors and strategies and no one factor or consideration is determinative. When integrating ESG factors into the investment process, the Investment Adviser may rely on third-party data that it believes to be reliable, but it does not guarantee the accuracy of such third-party data. ESG information from third-party data providers may be incomplete, inaccurate or unavailable, which may adversely impact the investment process. Moreover, ESG information, whether from an external and/or internal source, is, by nature and in many instances, based on a qualitative and subjective assessment. An element of subjectivity and discretion is therefore inherent to the interpretation and use of ESG data. The process for conducting ESG assessments and implementation of ESG views in client/fund portfolios, including the format and content of such analysis and the tools and/or data used to perform such analysis, may also vary among the Investment Adviser’s portfolio management teams. While the Investment

Adviser believes that the integration of material ESG factors into the Fund's investment process has the potential to identify financial risks and contribute to the Fund's long-term performance, ESG factors may not be considered for each and every investment decision, and there is no guarantee that the integration of ESG factors will result in better performance. Investors can differ in their views of what constitutes positive or negative ESG characteristics. Moreover, the current lack of common standards may result in different approaches to integrating ESG factors. As a result, the Fund may invest in companies that do not reflect the beliefs and values of any particular investor. The Investment Adviser's approach to ESG integration may evolve and develop over time, both due to a refinement of investment decision-making processes to address ESG factors and risks, and because of legal and regulatory developments.

- **ESG Standards Risk**—The Fund's adherence to its ESG criteria and the application of the Investment Adviser's supplemental ESG analysis when selecting investments generally will affect the Fund's exposure to certain companies, sectors, regions, and countries and may affect the Fund's performance depending on whether such investments are in or out of favor. For example, the Fund generally will not seek to invest in companies that the Investment Adviser believes have adverse social or environmental impacts (e.g., alcohol, tobacco, gambling, adult entertainment, oil and gas, coal or weapons companies). Adhering to the ESG criteria and applying the Investment Adviser's supplemental ESG analysis may also affect the Fund's performance relative to similar funds that do not adhere to such criteria or apply such analysis. Additionally, the Fund's adherence to the ESG criteria and the application of the supplemental ESG analysis in connection with identifying and selecting equity investments in non-U.S. issuers often require more subjective analysis and may be relatively more difficult than applying the ESG criteria or the supplemental ESG analysis to equity investments of all issuers because data availability may be more limited with respect to non-U.S. issuers. Certain investments may be dependent on U.S. and foreign government policies, including tax incentives and subsidies, which may change without notice.

The exclusionary criteria related to the Fund's ESG criteria may result in the Fund forgoing opportunities to buy certain securities when it might otherwise be advantageous to do so, or selling securities for ESG reasons when it might be otherwise disadvantageous for it to do so. The Fund's investments in certain companies may be susceptible to various factors that may impact their businesses or operations, including costs associated with government budgetary constraints that impact publicly funded projects and clean energy initiatives, the effects of general economic conditions throughout the world, increased competition from other providers of services, unfavorable tax laws or accounting policies and high leverage.

Currently, there is a lack of common industry standards relating to the development and application of ESG criteria, which may make it difficult to compare the Fund's principal investment strategies with the investment strategies of other funds that integrate certain ESG criteria. Although the Fund intends to invest in issuers that the Investment Adviser believes adhere to the Fund's ESG criteria, the subjective value that investors may assign to certain types of ESG criteria may differ substantially from that of the Fund. Investors can differ in their views of what constitutes positive or negative ESG characteristics. As a result, the Fund may invest in companies that do not reflect the beliefs and values of any particular investor. In addition, the application of the Investment Adviser's supplemental ESG analysis may differ by asset class, sector, country and region, and an issuer's ESG practices may change over time. When assessing whether an issuer meets the Fund's ESG criteria and conducting an ESG analysis of an issuer, the Investment Adviser generally will rely on third-party data that it believes to be reliable, but it does not guarantee the accuracy of such third-party data. ESG information from third-party data providers may be incomplete, inaccurate or unavailable and may vary significantly from one third-party data provider to another, which may adversely impact the investment process. The Fund's ESG criteria and the application of the supplemental ESG analysis may be changed without shareholder approval.

- **Foreign Risk**—When a Fund invests in foreign securities, it may be subject to risk of loss not typically associated with U.S. issuers. Loss may result because of more or less foreign government regulation; less public information; less stringent investor protections; less stringent accounting, corporate governance, financial reporting and disclosure standards; less liquid, developed or efficient trading markets; greater volatility; and less economic, political and social stability in the countries in which the Fund invests. Loss may also result from, among other things, deteriorating economic and business conditions in other countries, including the United States, regional and global conflicts, the imposition of sanctions, exchange controls (including repatriation restrictions), foreign taxes, confiscation of assets and property, trade restrictions (including tariffs), expropriations and other government restrictions by the United States and other governments, higher transaction costs, difficulty enforcing contractual obligations or from problems in share registration, settlement or custody. The type and severity of sanctions and other similar measures, including counter sanctions and other retaliatory actions, that may be imposed could vary broadly in scope, and their impact is impossible to predict. These types of measures may include, but are not limited to, banning a sanctioned country from global payment systems that facilitate cross-border payments, restricting the settlement of securities transactions by certain investors, and freezing the assets of particular countries, entities, or persons. The imposition of sanctions and other similar measures could, among other things, cause a decline in the value and/or liquidity of securities issued by the sanctioned country or companies located in or economically tied to the sanctioned country, downgrades in the credit ratings of the sanctioned country or companies located in or economically tied to the sanctioned country, devaluation of the sanctioned country's currency, and increased market volatility and disruption in the sanctioned country and throughout the world. Sanctions and other similar measures could limit or prevent the Fund from buying and selling securities (in the sanctioned country and other markets), significantly delay or prevent the settlement of securities

transactions, and significantly impact the Fund's liquidity and performance. A Fund or the Investment Adviser may determine not to invest in, or may limit its overall investment in, a particular issuer, country or geographic region due to, among other things, heightened risks regarding sanctions, repatriation restrictions, confiscation of assets and property, expropriation or nationalization. Geopolitical developments in certain countries in which a Fund may invest have caused, or may in the future cause, significant volatility in financial markets. These and other geopolitical developments, including ongoing regional armed conflict in Europe and elsewhere, could negatively impact the value of a Fund's investments.

The Fund's investments in foreign securities may also be subject to foreign currency risk, as described above, the risk of negative foreign currency rate fluctuations, which may cause the value of securities denominated in such foreign currency (or other instruments through which a Fund may have exposure to foreign currencies) to decline in value. Foreign risks will normally be greatest when the Fund invests in securities of issuers located in emerging countries. For more information about these risks, see Appendix A.

- **Foreign Custody Risk**—A Fund may hold foreign securities and cash with foreign banks, agents, and securities depositories appointed by the Fund's custodian (each a "Foreign Custodian"). Some Foreign Custodians may be recently organized or new to the foreign custody business. In some countries, Foreign Custodians may be subject to little or no regulatory oversight over or independent evaluation of their operations. Further, the laws of certain countries may place limitations on a Fund's ability to recover its assets if a Foreign Custodian enters bankruptcy. Investments in emerging markets may be subject to even greater custody risks than investments in more developed markets. Custody services in emerging market countries are very often underdeveloped and may be considerably less well regulated than in more developed countries, and thus may not afford the same level of investor protection as would apply in developed countries.
- **Geographic Risk**—If a Fund focuses its investments in securities of issuers located in a particular country or region, the Fund may be subjected, to a greater extent than if its investments were less focused, to the risks of volatile economic cycles and/or conditions and developments that may be particular to that country or region, such as: adverse securities markets; adverse exchange rates; adverse social, political, regulatory, economic, business, environmental or other developments; or natural disasters. The China Equity Fund invests primarily in equity investments in issuers economically tied to China.
- **Greater China Risk**—Investing in Greater China involves a higher degree of risk and special considerations not typically associated with investing in other more established economies or securities markets. Fund's investment exposure to Greater China may subject the Fund, to a greater extent than if investments were made in developed countries, to the risks of adverse securities markets, exchange rates and social, political, regulatory, economic or environmental events and natural disasters which may occur in the China region. The economy, industries, and securities and currency markets of Greater China are particularly vulnerable to the region's dependence on exports and international trade, increasing competition from Asia's other low-cost emerging economies and territorial and other disputes with other countries. The imposition of tariffs or other trade barriers by the U.S. or foreign governments on exports from Mainland China may also have an adverse impact on Chinese issuers. There is also the risk that the U.S. government or other governments may sanction Chinese issuers or otherwise prohibit U.S. persons (such as the Fund) from investing in certain Chinese issuers, which may negatively affect the liquidity and price of their securities and cause the government of the People's Republic of China ("PRC") to take retaliatory measures. In addition, currency fluctuations, currency convertibility, interest rate fluctuations and higher rates of inflation as a result of internal social unrest or conflicts with other countries have had, and may continue to have, negative effects on the economies and securities markets of Greater China.

The universe of share issues currently available to foreign investors in Mainland China may be limited as compared with the universe of equity securities available in other markets. The government of the PRC exercises significant control over the economy in Mainland China, and may at any time alter or discontinue economic reforms. The willingness and ability of the Chinese government to support freer markets is uncertain. Investments in Greater China are subject to the risk of confiscatory taxation, nationalization or expropriation of assets, potentially frequent changes in the law, intervention by the PRC in contractual arrangements, and imperfect information because companies in the China region may not be subject to the same disclosure, accounting, auditing and financial reporting standards and practices as U.S. companies. The Fund may gain exposure to certain companies in the PRC that may otherwise be restricted to Chinese investors through legal structures known as variable interest entities ("VIEs"), which are shell companies set up in offshore jurisdictions and listed on exchanges outside of Mainland China. VIEs provide exposure to Chinese companies through contractual arrangements instead of direct equity ownership. VIEs have not been approved or endorsed by Chinese regulators. Investing through a VIE does not offer the same level of investor protection as direct ownership and is subject to certain risks, including breach of the contractual arrangements, difficulty in enforcing the contractual arrangements outside of the U.S., and intervention by the Chinese government to limit the enforceability of the contractual arrangements. These risks could significantly affect or permanently eliminate a VIE's market value, which in turn could impact the Fund's performance. Investments in Greater China are subject to the risk of confiscatory taxation, nationalization or expropriation of assets, potentially frequent changes in the law, and imperfect information because companies in the China region

may not be subject to the same disclosure, accounting, auditing and financial reporting standards and practices as U.S. companies. Taiwan and Hong Kong do not exercise the same level of control over their economies as does the PRC with respect to Mainland China, but changes to their political and economic relationships with the PRC could adversely impact a Fund's investments in Taiwan and Hong Kong.

- **Interest Rate Risk**—When interest rates increase, fixed income securities or instruments held by the Fund (which may include inflation protected securities) will generally decline in value. Long-term fixed income securities or instruments will normally have more price volatility because of this risk than short-term fixed income securities or instruments. A wide variety of market factors can cause interest rates to rise, including central bank monetary policy, rising inflation and changes in general economic conditions. Changing interest rates may have unpredictable effects on the markets, may result in heightened market volatility and may detract from Fund performance to the extent the Fund is exposed to such interest rates and/or volatility. In addition, changes in monetary policy may exacerbate the risks associated with changing interest rates. Funds with longer average portfolio durations will generally be more sensitive to changes in interest rates than funds with a shorter average portfolio duration. Fluctuations in interest rates may also affect the liquidity of fixed income securities and instruments held by the Fund.

It is difficult to predict the magnitude, timing or direction of interest rate changes and the impact these changes will have on the markets in which the Fund invests.

- **Investment Style Risk**—Different investment styles (e.g., “growth”, “value” or “quantitative”) tend to shift in and out of favor depending upon market and economic conditions as well as investor sentiment. The Fund may outperform or underperform other funds that invest in similar asset classes but employ different investment styles. The Fund intends to employ a blend of growth and value investment styles depending on market conditions, either of which may fall out of favor from time to time. Growth stocks may be more volatile than other stocks because they are more sensitive to investor perceptions of the issuing company's growth of earnings potential. Growth companies are often expected by investors to increase their earnings at a certain rate. When these expectations are not met, investors can punish the stocks inordinately even if earnings showed an absolute increase. Also, since growth companies usually invest a high portion of earnings in their business, growth stocks may lack the dividends of some value stocks that can cushion stock prices in a falling market. Growth oriented funds will typically underperform when value investing is in favor. Value stocks are those that are undervalued in comparison to their peers due to adverse business developments or other factors.
 - **Investing Through Stock Connect Risk**—Investing in China A Shares through Stock Connect is subject to trading, clearance, settlement, and other procedures, which could pose risks to the Fund. Trading through Stock Connect is subject to market-wide trading volume and market cap quota limitations, each of which may restrict or preclude the Fund's ability to invest in A Shares through Stock Connect. A primary feature of Stock Connect is the application of the home market's laws and rules applicable to investors in A Shares. Therefore, the Fund's investments in Stock Connect A Shares are generally subject to PRC securities regulations and listing rules, among other restrictions. Additionally, restrictions on the timing of permitted trading activity in A Shares, including the imposition of local holidays in either Hong Kong or Mainland China and restrictions on purchasing and selling the same security on the same day, may subject the Fund to the risk of price fluctuations of China A Shares at times when the Fund is unable to add to or exit its position.
- The risks related to investments in China A Shares through Stock Connect are heightened to the extent that the Fund invests in China A Shares listed on the Science and Technology Innovation Board of the Shanghai Stock Exchange (“STAR Market”) and/or the ChiNext Market of the Shenzhen Stock Exchange (“ChiNext Market”). Listed companies on the STAR Market and ChiNext Market are usually of an emerging nature with smaller operating scale. They are subject to higher fluctuation in stock prices and liquidity. It may be more common and faster for companies listed on the STAR Market and ChiNext Market to delist.
- **IPO Risk**—The market value of shares issued in an IPO may fluctuate considerably due to factors such as the absence of a prior public market, unseasoned trading, the small number of shares available for trading and limited information about a company's business model, quality of management, earnings growth potential, and other criteria used to evaluate its investment prospects. The purchase of IPO shares may involve high transaction costs. Investments in IPO shares, which are subject to market risk and liquidity risk, involve greater risks than investments in shares of companies that have traded publicly on an exchange for extended periods of time.
 - **Large Shareholder Transactions Risk**—The Fund may experience adverse effects when certain large shareholders, such as other funds, institutional investors (including those trading by use of non-discretionary mathematical formulas), financial intermediaries (who may make investment decisions on behalf of underlying clients and/or include the Fund in their investment model), individuals, accounts and Goldman Sachs affiliates, purchase or redeem large amounts of shares of the Fund. Such large shareholder redemptions, which may occur rapidly or unexpectedly, may cause the Fund to sell portfolio securities at times when it would not otherwise do so, which may negatively impact the Fund's NAV and liquidity. Similarly, large Fund share purchases may adversely affect the Fund's performance to the extent that the Fund is delayed in investing new cash or otherwise maintains a larger

cash position than it ordinarily would. These transactions may also accelerate the realization of taxable income to shareholders if such sales of investments resulted in gains, and may also increase transaction costs. In addition, a large redemption could result in the Fund's current expenses being allocated over a smaller asset base, leading to an increase in the Fund's expense ratio.

- **Liquidity Risk**—The Fund may invest in securities or instruments that trade in lower volumes, that are less liquid than other investments and/or that may become illiquid or less liquid in response to market developments or adverse investor perceptions. Investments that are illiquid or that trade in lower volumes may be more difficult to value and more difficult to sell at the desired times and prices. When there is no willing buyer and investments cannot be readily sold at the desired time or price, the Fund may have to accept a lower price or may not be able to sell the security or instrument at all. An inability to sell one or more portfolio positions can adversely affect the Fund's value or prevent the Fund from being able to take advantage of other investment opportunities.

Illiquidity can be caused by a drop in overall market trading volume, an inability to find a willing buyer, or legal restrictions on the securities' resale. In addition, during certain periods, the liquidity of particular issuers or industries in which the Fund may invest, or all securities within a particular investment category in which the Fund may invest, may shrink or disappear suddenly and without warning as a result of adverse economic, market or political events (including periods of rapid interest rate changes), or adverse investor perceptions whether or not accurate. Liquidity risk is heightened during these periods.

To the extent that the traditional dealer counterparties that engage in fixed income trading do not maintain inventories of bonds (which provide an important indication of their ability to "make markets") that keep pace with the growth of the bond markets over time, relatively low levels of dealer inventories could lead to decreased liquidity and increased volatility in the fixed income markets. Additionally, market participants other than the Fund may attempt to sell fixed income holdings at the same time as the Fund, which could cause downward pricing pressure and contribute to decreased liquidity.

Liquidity risk may also refer to the risk that the Fund will not be able to pay redemption proceeds within the allowable time period stated in the Fund's prospectus or without significant dilution to remaining investors' interests because of unusual market conditions, declining prices of the securities sold, an unusually high volume of redemption requests or other reasons. While the Fund reserves the right to meet redemption requests through in-kind distributions, the Fund may instead choose to raise cash to meet redemption requests through sales of portfolio securities or permissible borrowings. If the Fund is forced to sell securities at an unfavorable time and/or under unfavorable conditions and prices, such sales may adversely affect the Fund's NAV and dilute remaining investors' interests.

Certain shareholders, including clients or affiliates of the Investment Adviser and/or other funds managed by the Investment Adviser, may from time to time own or control a significant percentage of the Fund's shares. Redemptions by these shareholders of their shares of the Fund may further increase the Fund's liquidity risk and may impact the Fund's NAV. These shareholders may include, for example, institutional investors, funds of funds, discretionary advisory clients, accounts or Goldman Sachs affiliates and other shareholders, whose buy-sell decisions are controlled by a single decision-maker.

- **Management Risk**—The strategy used by the Investment Adviser may fail to produce the intended results.
- **Market Risk**—The value of the securities in which a Fund invests may go up or down in response to the prospects of individual companies, particular sectors, governments or countries and/or general economic conditions throughout the world. Price changes may be temporary or last for extended periods. A Fund's investments may be over-weighted from time to time in one or more sectors, countries or regions, which will increase the Fund's exposure to risk of loss from adverse developments affecting those sectors, countries or regions.

Global economies and financial markets are becoming increasingly interconnected, and conditions and events in one country, region or financial market may adversely impact issuers in a different country, region or financial market. Furthermore, local, regional and global events such as war, military conflict, geopolitical disputes, acts of terrorism, social or political unrest, natural disasters, recessions, inflation, rapid interest rate changes, supply chain disruptions, tariffs and other restrictions on trade, sanctions or the spread of infectious illness or other public health threats, or the threat or potential of one or more such events and developments, could also adversely impact issuers, markets and economies, including in ways that cannot necessarily be foreseen. The Fund could be negatively impacted if the value of a portfolio holding were harmed by such political or economic conditions or events. In addition, governmental and quasi-governmental organizations have taken a number of unprecedented actions designed to support the markets. Such conditions, events and actions may result in greater market risk.

- **Mid-Cap and Small-Cap Risk**—The securities of mid-capitalization and small-capitalization companies involve greater risks than those associated with larger, more established companies and may be subject to more abrupt or erratic price movements. Securities of such issuers may lack sufficient market liquidity to enable a Fund to effect sales at an advantageous time or without a substantial

drop in price. Both mid-capitalization and small-capitalization companies often have narrower markets and more limited managerial and financial resources than larger, more established companies. As a result, their performance can be more volatile and they face greater risk of business failure, which could increase the volatility of a Fund's portfolio. Generally, the smaller the company size, the greater these risks become.

- **NAV Risk**—The net asset value of the Fund and the value of your investment will fluctuate.
- **Non-Diversification Risk**—The Fund is non-diversified, meaning that it is permitted to invest a larger percentage of its assets in one or more issuers or in fewer issuers than diversified mutual funds. Thus, the Fund may be more susceptible to adverse developments affecting any single issuer held in its portfolio, and may be more susceptible to greater losses because of these developments.
- **Non-Investment Grade Fixed Income Securities Risk**—Non-investment grade fixed income securities and unrated securities of comparable credit quality (commonly known as “junk bonds”) are considered speculative and are subject to the increased risk of an issuer's inability to meet principal and interest payment obligations. These securities may be subject to greater price volatility due to such factors as specific issuer developments, interest rate sensitivity, negative perceptions of the junk bond markets generally and less liquidity.
- **Participation Notes Risk**—The Fund may use participation notes to gain exposure to certain markets in which it cannot invest directly. Participation notes are designed to track the return of a particular underlying equity or debt security, currency, or market. Investments in participation notes involve the same risks associated with a direct investment in the underlying security, currency, or market that they seek to replicate. In addition, the Fund has no rights under participation notes against the issuer of the underlying security and must rely on the creditworthiness of the counterparty to the transaction.
- **Private Investments in Public Equities Risk**—The Fund may purchase equity securities in a private placement that are issued by issuers who have outstanding, publicly-traded equity securities of the same class (“private investments in public equity” or “PIPEs”). Shares in PIPEs generally are not registered with the SEC until after a certain time period from the date the private sale is completed. This restricted period can last many months. Until the public registration process is completed, PIPEs are restricted as to resale and the Funds cannot freely trade the securities. Generally, such restrictions cause the PIPEs to be illiquid during this time. PIPEs may contain provisions that the issuer will pay specified financial penalties to the holder if the issuer does not publicly register the restricted equity securities within a specified period of time, but there is no assurance that the restricted equity securities will be publicly registered, or that the registration will remain in effect.
- **RMB Risk**—There is no assurance that there will always be sufficient amounts of RMB available for the China Equity Fund to remain fully invested in Chinese equities. The Chinese government heavily regulates the domestic exchange of foreign currencies and RMB exchange rates in China and may direct the timing, amount and intervals for effecting conversions, which may adversely affect the operations and financial results of the Fund's investments in China.
- **Regulatory Risk (Volcker Rule)**—Section 619 of the Dodd-Frank Wall Street Reform and Consumer Protection Act and the rules issued thereunder (also known as the “Volcker Rule”) prohibit banking entities, such as The Goldman Sachs Group, Inc. (“Goldman”) and its affiliates, including the Investment Adviser, from engaging in certain trading activities involving their own capital (also known as “proprietary trading”). These prohibitions may include certain restrictions on the extent to which Goldman and/or its affiliates may own shares of the Fund. If Goldman or its affiliates own 25% or more of the outstanding shares of the Fund longer than three years from the Fund's launch date, the Fund may be subject to these proprietary trading restrictions, which include restrictions on the ability to purchase and sell securities on a short term basis. As of the date of the Prospectus, Goldman and/or its affiliates own more than 25% of the outstanding shares of the Fund. Reducing the seed capital in the Fund to address these trading restrictions may prevent the Fund from pursuing its investment objective, may restrict the Fund's activities and may prevent the Fund from retaining enough capital to engage in certain investment strategies, which could have a negative impact on the Fund's performance. In addition, if Goldman or its affiliates reduce their interest in the Fund, the Fund may be subject to transaction costs, losses and adverse tax consequences and may be forced to liquidate prematurely, among other things.
- **Sector Risk**—To the extent a Fund focuses its investments in securities of issuers in one or more sectors (such as the financial services or telecommunications sectors), a Fund will be subject, to a greater extent than if its investments were diversified across different sectors, to the risks of volatile economic cycles and/or conditions and developments that may be particular to that sector, such as: adverse economic, business, political, environmental or other developments.
- **Special Purpose Acquisition Companies Risk**—The Fund may invest in stock, warrants, and other securities of SPACs. A SPAC is typically a publicly traded company that raises funds through an IPO for the purpose of acquiring or merging with another company to be identified subsequent to the SPAC's IPO. Because SPACs and similar entities are in essence blank check companies without operating history or ongoing business other than seeking acquisitions, the value of their securities is particularly dependent on the ability of the entity's management to identify and complete a profitable acquisition. An investment in a SPAC is subject to a variety of risks, including that (i) prior to any acquisition or merger, a SPAC's assets are typically invested in U.S. government securities,

money market funds and similar investments whose returns or yields may be significantly lower than those of the Fund's other investments; (ii) the Fund generally will not receive significant income from its investments in SPACs (both prior to and after any acquisition or merger) and, therefore, the Fund's investments in SPACs will not significantly contribute to the Fund's distributions to shareholders; (iii) attractive acquisition or merger targets may become scarce if the number of SPACs seeking to acquire operating businesses increases; (iv) an attractive acquisition or merger target may not be identified at all, in which case the SPAC will be required to return any remaining monies to shareholders (unless such shareholders approve alternative arrangements), and the Fund may be subject to opportunity costs to the extent that alternative investments would have produced higher returns; (v) if an acquisition or merger target is identified, the Fund may elect not to participate in, or vote to approve, the proposed transaction or the Fund may be required to divest its interests in the SPAC, due to regulatory or other considerations, in which case the Fund may not reap any resulting benefits; (vi) an acquisition or merger once effected may prove unsuccessful and an investment in the SPAC may lose value; (vii) an investment in a SPAC may be diluted by additional, later offerings of securities by the SPAC or by other investors exercising existing rights to purchase securities of the SPAC; (viii) a significant portion of the funds raised by the SPAC may be expended during the search for a target acquisition or merger; (ix) only a thinly traded market for shares of or interests in a SPAC may develop, or there may be no market at all, leaving the Fund unable to sell its interest in a SPAC or to sell its interest only at a lower price; and (x) the values of investments in SPACs may be highly volatile and may depreciate significantly over time. In addition, the Fund may obtain certain private rights and other interests issued by a SPAC (commonly referred to as "founder shares"), which may be subject to forfeiture or expire worthless and which generally have more limited liquidity than SPAC shares issued in an IPO.

- **Stock Risk**—Stock prices have historically risen and fallen in periodic cycles. U.S. and foreign stock markets have experienced periods of substantial price volatility in the past and may do so again in the future. Stock prices may fluctuate from time to time in response to the activities of individual companies and in response to general market and economic conditions. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments, and the stock prices of such companies may suffer a decline in response.
- **Taiwan Risk**—Taiwan's geographic proximity to, and history of political contention with, the People's Republic of China ("PRC") have resulted in ongoing tensions with the PRC, including the continual risk of military conflict with the PRC. These tensions may materially affect the Taiwanese economy and its securities market, including but not limited to, increasing the risks of currency fluctuations, less liquidity, expropriation, confiscatory taxation and nationalization, and may negatively affect the Fund's performance. Taiwan's economy is export-oriented, so it depends on an open world trade regime and remains vulnerable to fluctuations in the world economy. Rising labor costs and increasing environmental consciousness have led some labor-intensive industries to relocate to countries with cheaper work forces, and continued labor outsourcing may adversely affect the Taiwanese economy. In addition, the Fund's investment in or exposure to Taiwan is also subject to risks associated with, among other things, commodity shortages, exchange control regulations (including currency blockage), the institution of tariffs or other trade barriers and natural disasters. Inflation and rapid fluctuations in inflation and interest rates have had, and may continue to have, negative effects on the economy and securities markets of Taiwan. Taiwan's economy is intricately linked with the economies of other Asian countries, which often are emerging market economies that often experience over-extensions of credit, frequent and pronounced currency fluctuations, devaluations and restrictions, rising unemployment and fluctuations in inflation. Political and social unrest in other Asian countries could cause further economic and market uncertainty in Taiwan. In particular, the Taiwanese economy is dependent on the economies of Japan, the PRC and the United States, and a reduction in purchases by any of them of Taiwanese products and services or negative changes in their economies would likely have an adverse impact on the Taiwanese economy. Lastly, Taiwan is a small island state with few raw material resources and limited land area and thus it relies heavily on imports for its commodity needs. Any fluctuations or shortages in the commodity markets could have a negative impact on the Taiwanese economy.

More information about the Fund's portfolio securities and investment techniques, and its associated risks, is provided in Appendix A. You should consider the investment risks discussed in this section and in Appendix A. Both are important to your investment choice.

Service Providers

INVESTMENT ADVISER

Investment Adviser	Fund
Goldman Sachs Asset Management, L.P. ("GSAM") 200 West Street New York, NY 10282	China Equity Emerging Markets Equity Emerging Markets Equity ex. China ESG Emerging Markets Equity

GSAM has been registered as an investment adviser with the SEC since 1990 and is an indirect, wholly-owned subsidiary of The Goldman Sachs Group, Inc. and an affiliate of Goldman Sachs. Founded in 1869, The Goldman Sachs Group, Inc. is a publicly-held financial holding company and a leading global investment banking, securities and investment management firm. As of December 31, 2024, GSAM, including its investment advisory affiliates, had assets under supervision of approximately \$2.82 trillion.

The Investment Adviser provides day-to-day advice regarding the Funds' portfolio transactions. The Investment Adviser makes the investment decisions for the Funds and places purchase and sale orders for the Funds' portfolio transactions in U.S. and foreign markets. As permitted by applicable law, these orders may be directed to any executing brokers, dealers, futures commission merchants ("FCMs") or other counterparties, including Goldman Sachs and its affiliates. While the Investment Adviser is ultimately responsible for the management of the Funds, it is able to draw upon the research and expertise of its asset management affiliates for portfolio decisions and management with respect to certain portfolio securities. GSAM is responsible for the risk management functions for the Funds. In addition, the Investment Adviser has access to the research and certain proprietary technical models developed by Goldman Sachs (subject to legal, internal, regulatory and Chinese Wall restrictions), and will apply quantitative and qualitative analysis in determining the appropriate allocations among categories of issuers and types of securities.

The Investment Adviser also performs the following additional services for the Funds (to the extent not performed by others pursuant to agreements with the Funds):

- Supervises all non-advisory operations of the Fund
- Provides personnel to perform necessary executive, administrative and clerical services to the Fund
- Arranges for the preparation of all required tax returns, reports to shareholders, prospectuses and statements of additional information and other reports filed with the SEC and other regulatory authorities
- Maintains the records of the Fund
- Provides office space and all necessary office equipment and services

An investment in the Fund may be negatively impacted because of the operational risks arising from factors such as processing errors and human errors, inadequate or failed internal or external processes, failures in systems and technology, changes in personnel, and errors caused by third-party service providers or trading counterparties. The use of certain investment strategies that involve manual or additional processing, such as over-the-counter derivatives, increases these risks. Although the Fund attempts to minimize such failures through controls and oversight, it is not possible to identify all of the operational risks that may affect the Fund or to develop processes and controls that completely eliminate or mitigate the occurrence of such failures. The Fund and its shareholders could be negatively impacted as a result.

From time to time, Goldman Sachs or its affiliates may invest "seed" capital in the Fund. These investments are generally intended to enable the Fund to commence investment operations and achieve sufficient scale. Goldman Sachs and its affiliates may hedge the exposure of the seed capital invested in the Fund by, among other things, taking an offsetting position in the benchmark of the Fund.

MANAGEMENT FEES AND OTHER EXPENSES

As compensation for its services and its assumption of certain expenses, the Investment Adviser is entitled to the following fees, computed daily and payable monthly, at the annual rates listed below (as a percentage of each respective Fund's average daily net assets):

Fund	Contractual Management Fee Annual Rate	Average Daily Net Assets	Actual Rate For the Fiscal Year Ended October 31, 2024*
China Equity	1.00% 0.90% 0.86% 0.84% 0.82%	First \$1 Billion Next \$1 Billion Next \$3 Billion Next \$3 Billion Over \$8 Billion	1.00%
Emerging Markets Equity	1.02% 0.92% 0.87% 0.85%	First \$2 Billion Next \$3 Billion Next \$3 Billion Over \$8 Billion	0.90%
Emerging Markets Equity ex. China	0.90% 0.81% 0.77% 0.75%	First \$2 Billion Next \$3 Billion Next \$3 Billion Over \$8 Billion	0.90%
ESG Emerging Markets Equity	0.98% 0.88% 0.84% 0.82%	First \$2 Billion Next \$3 Billion Next \$3 Billion Over \$8 Billion	0.91%

* The Actual Rate may not correlate to the Contractual Management Fee Annual Rate as a result of management fee waivers that may be in effect from time to time.

The Investment Adviser has agreed to waive a portion of its management fee payable by the Emerging Markets Equity Fund in order to achieve an effective net management fee rate of 0.90% as an annual percentage of the Fund's average daily net assets. The Investment Adviser has also agreed to waive a portion of its management fee payable by the ESG Emerging Markets Equity Fund in order to achieve an effective net management fee rate of 0.91% as an annual percentage of the Fund's average daily net assets. These arrangements will remain in effect through at least February 28, 2026, and prior to such date, the Investment Adviser may not terminate the arrangements without the approval of the Board of Trustees. The management fee waivers may be modified or terminated by the Investment Adviser at its discretion and without shareholder approval after such date, although the Investment Adviser does not presently intend to do so.

In addition to the management fee waivers described above, the Investment Adviser may waive an additional portion of its management fee, including fees earned as the Investment Adviser to any of the affiliated funds in which the Funds invest, from time to time, and may discontinue or modify any such waivers in the future, consistent with the terms of any fee waiver arrangements in place.

A discussion regarding the basis for the Board of Trustees' approval of the Management Agreement for the Funds in 2024 is available in the Funds' Form N-CSR dated October 31, 2024.

The Investment Adviser has agreed to reduce or limit "Other Expenses" (excluding acquired fund fees and expenses, transfer agency fees and expenses, service fees and shareholder administration fees (as applicable), taxes, interest, brokerage fees, expenses of shareholder meetings, litigation and indemnification, and extraordinary expenses) to 0.054%, 0.104%, 0.084% and 0.074% of average daily net assets for the China Equity, Emerging Markets Equity, Emerging Markets Equity ex. China and ESG Emerging Markets Equity Funds, respectively, through at least February 28, 2026, and prior to such date, the Investment Adviser may not terminate the arrangements without the approval of the Board of Trustees. The expense limitations may be modified or terminated by the Investment Adviser at its discretion and without shareholder approval after such date, although the Investment Adviser does not presently intend to do so. A Fund's "Other Expenses" may be further reduced by any custody and transfer agency fee credits received by the Fund.

FUND MANAGERS

Global Emerging Markets Equity Team

The individuals jointly and primarily responsible for the day-to-day management of the Funds are listed below. The Fund's portfolio managers' individual responsibilities may differ and may include, among other things, security selection, asset allocation, risk budgeting and general oversight of the management of the Fund's portfolios.

Name and Title	Fund Responsibility	Years Primarily Responsible	Five Year Employment History
Basak Yavuz Managing Director	Portfolio Manager— China Equity Emerging Markets Equity Emerging Markets Equity ex. China ESG Emerging Markets Equity	Since 2019 2015 2022 2018	Ms. Yavuz joined the Investment Adviser in 2011. Ms. Yavuz is the co-head of GSAM's Emerging Markets Equity team and a portfolio manager for GSAM's Emerging Markets Equity strategies.
Hiren Dasani, CFA Managing Director	Portfolio Manager— China Equity Emerging Markets Equity Emerging Markets Equity ex. China ESG Emerging Markets Equity	Since 2019 2017 2022 2018	Mr. Dasani joined GSAM's India Equity Research team in January 2007. He is the co-head of GSAM's Emerging Markets Equity team and a portfolio manager for GSAM's Emerging Markets Equity and India Equity strategies.
Christine Pu, CFA Vice President	Portfolio Manager— China Equity	Since 2019	Ms. Pu joined the Investment Adviser in October 2007. She is co-head of the China Equity team and portfolio manager for the Goldman Sachs Asset Management China Equity Strategies.
Nathan Lin Managing Director	Portfolio Manager— China Equity	Since 2023	Mr. Lin joined the Investment Adviser in 2008. He is co-head of the China Equity team and portfolio manager for the Goldman Sachs Asset Management China Equity Strategies.

For information about portfolio manager compensation, other accounts managed by the portfolio managers and portfolio manager ownership of securities in the Fund, see the SAI.

DISTRIBUTOR AND TRANSFER AGENT

Goldman Sachs, 200 West Street, New York, NY 10282, serves as the exclusive distributor (the "Distributor") of each Fund's shares. Goldman Sachs, 71 South Wacker Drive, Suite 1200, Chicago, IL 60606, also serves as each Fund's transfer agent (the "Transfer Agent") and, as such, performs various shareholder servicing functions.

For its transfer agency services, Goldman Sachs is entitled to receive a transfer agency fee equal, on an annualized basis, to 0.03% of average daily net assets with respect to Class R6 Shares, 0.04% of average daily net assets with respect to the Institutional and Service Shares and 0.15% of average daily net assets with respect to the Class A, Class C, Investor and Class R Shares. Goldman Sachs has agreed to waive a portion of its transfer agency fee (a component of "Other Expenses") equal to 0.06%, 0.02% and 0.01% as an annual percentage rate of the average daily net assets attributable to Class A, Class C, Investor and Class R Shares, as applicable, of the Emerging Markets Equity Fund, Emerging Markets Equity ex. China Fund and ESG Emerging Markets Equity Fund, respectively, through at least February 28, 2026, and prior to such date, Goldman Sachs may not terminate the arrangement without the approval of the Board of Trustees.

From time to time, Goldman Sachs or any of its affiliates may purchase and hold shares of the Funds. Goldman Sachs and its affiliates reserve the right to redeem at any time some or all of the shares acquired for their own accounts.

ACTIVITIES OF GOLDMAN SACHS AND ITS AFFILIATES AND OTHER ACCOUNTS MANAGED BY GOLDMAN SACHS

The involvement of the Investment Adviser, Goldman Sachs and their affiliates in the management of, or their interest in, other accounts and other activities of Goldman Sachs will present conflicts of interest with respect to the Fund and will, under certain circumstances, limit the Fund's investment activities. Goldman Sachs is a worldwide, full service investment banking, broker dealer, asset management and financial services organization and a major participant in global financial markets that provides a wide range of financial services to a substantial and diversified client base that includes corporations, financial institutions, governments and individuals. As such, it acts as a broker-dealer, investment adviser, investment banker, underwriter, research provider, administrator, financier, adviser, market maker, trader, prime broker, derivatives dealer, clearing agent, lender, counterparty, agent, principal, distributor, investor or in other commercial capacities for accounts or companies (including Fund portfolio companies) or affiliated or

unaffiliated investment funds (including pooled investment vehicles and private funds) in which one or more accounts, including the Fund, invest. In those and other capacities, Goldman Sachs and its affiliates advise and deal with clients and third parties in all markets and transactions and purchase, sell, hold and recommend a broad array of investments, including securities, derivatives, loans, commodities, currencies, credit default swaps, indices, baskets and other financial instruments and products for their own accounts or for the accounts of their customers and have other direct and indirect interests in the global fixed income, currency, commodity, equities, bank loans and other markets and the securities and issuers in which the Fund directly and indirectly invests. Thus, it is expected that the Fund will have multiple business relationships with and will invest in, engage in transactions with, make voting decisions with respect to, or obtain services from entities for which Goldman Sachs and its affiliates perform or seek to perform investment banking or other services. The Investment Adviser and/or certain of its affiliates are the managers of the Goldman Sachs Funds (as defined below). The Investment Adviser and its affiliates earn fees from this and other relationships with the Fund. Although management fees paid by the Fund to the Investment Adviser and certain other fees paid to the Investment Adviser's affiliates are based on asset levels, the fees are not directly contingent on Fund performance, and the Investment Adviser and its affiliates will still receive significant compensation from the Fund even if shareholders lose money. Goldman Sachs and its affiliates engage in proprietary trading and advise accounts and funds which have investment objectives similar to those of the Fund and/or which engage in and compete for transactions in the same types of securities, currencies and instruments as the Fund. Goldman Sachs and its affiliates will not have any obligation to make available any information regarding their proprietary activities or strategies, or the activities or strategies used for other accounts managed by them, for the benefit of the management of the Fund. The results of the Fund's investment activities, therefore, will likely differ from those of Goldman Sachs, its affiliates and other accounts managed by Goldman Sachs, and it is possible that the Fund could sustain losses during periods in which Goldman Sachs and its affiliates and other accounts achieve significant profits on their trading for proprietary or other accounts. In addition, the Fund may enter into transactions in which Goldman Sachs and its affiliates or their other clients have an adverse interest.

For example, the Fund may take a long position in a security at the same time that Goldman Sachs and its affiliates or other accounts managed by the Investment Adviser or its affiliates take a short position in the same security (or vice versa). These and other transactions undertaken by Goldman Sachs, its affiliates or Goldman Sachs-advised clients may, individually or in the aggregate, adversely impact the Fund. Transactions by one or more Goldman Sachs-advised clients or the Investment Adviser may have the effect of diluting or otherwise disadvantaging the values, prices or investment strategies of the Fund. The Fund's activities will, under certain circumstances, be limited because of regulatory restrictions applicable to Goldman Sachs and its affiliates, and/or their internal policies designed to comply with such restrictions. As a global financial services firm, Goldman Sachs and its affiliates also provide a wide range of investment banking and financial services to issuers of securities and investors in securities. Goldman Sachs, its affiliates and others associated with it are expected to create markets or specialize in, have positions in and/or effect transactions in, securities of issuers held by the Fund, and will likely also perform or seek to perform investment banking and financial services for one or more of those issuers. Goldman Sachs and its affiliates are expected to have business relationships with and purchase or distribute or sell services or products from or to distributors, consultants or others who recommend the Fund or who engage in transactions with or for the Fund. For more information about conflicts of interest, see the section titled "Potential Conflicts of Interest" in the SAI.

Under a securities lending program approved by the Fund's Board of Trustees, the Fund has retained an affiliate of the Investment Adviser to serve as a securities lending agent for the Fund to the extent that the Fund engages in the securities lending program. For these services, the lending agent would receive a fee from the Fund, including a fee based on the returns earned on the Fund's investment of the cash received as collateral for the loaned securities. The Board of Trustees periodically reviews reports on portfolio securities loan transactions for which the affiliated lending agent has acted as lending agent. In addition, the Fund may make brokerage and other payments to Goldman Sachs and its affiliates in connection with the Fund's portfolio investment transactions, in accordance with applicable law.

Distributions

The Fund pays distributions from its investment income and from net realized capital gains. You may choose to have distributions paid in:

- Cash
- Additional shares of the same class of the same Fund
- Shares of the same or an equivalent class of another Goldman Sachs Fund. Special restrictions may apply. See the SAI.

You may indicate your election on your account application. Any changes may be submitted in writing or via telephone, in some instances, to the Transfer Agent (either directly or through your Intermediary) at any time before the record date for a particular distribution. If you do not indicate any choice, your distributions will be reinvested automatically in the Fund. Distributions from net investment income and net capital gains, if any, are normally declared and paid annually for each Fund. In addition a Fund may occasionally make a distribution at a time when it is not normally made. If cash distributions are elected with respect to the Fund's distributions from net investment income, then cash distributions must also be elected with respect to the net short-term capital gains component, if any, of the Fund's distributions.

The election to reinvest distributions in additional shares will not affect the tax treatment of such distributions, which will be treated as received by you and then used to purchase the shares.

The Fund's investments in foreign securities may be subject to foreign withholding taxes. Under certain circumstances, the Fund may elect to pass-through these taxes to you. If this election is made, a proportionate amount of such taxes will constitute a distribution to you, which would allow you either (i) to credit such proportionate amount of foreign taxes against your U.S. federal income tax liability or (ii) to take such amount as an itemized deduction.

From time to time a portion of the Fund's distributions may constitute a return of capital for tax purposes, and/or may include amounts in excess of the Fund's net investment income for the period calculated in accordance with generally accepted accounting principles (GAAP).

When you purchase shares of the Fund, part of the NAV per share may be represented by undistributed income and/or realized gains that have previously been earned by the Fund. Therefore, subsequent distributions on such shares from such income and/or realized gains may be taxable to you even if the NAV of the shares is, as a result of the distributions, reduced below the cost of such shares and the distributions (or portions thereof) represent a return of a portion of the purchase price.

Shareholder Guide

The following section will provide you with answers to some of the most frequently asked questions regarding buying and selling the Funds' shares.

HOW TO BUY SHARES

Shares Offering

Shares of the Funds are continuously offered through the Distributor. The Fund and the Distributor will have the sole right to accept orders to purchase shares and reserve the right to reject any purchase order in whole or in part.

How Can I Purchase Shares Of The Funds?

You may purchase shares of the Funds through certain intermediaries that have a relationship with Goldman Sachs, including banks, trust companies, brokers, registered investment advisers and other financial institutions ("Intermediaries"). Certain Intermediaries have been authorized by Goldman Sachs Trust (the "Trust") to accept purchase, redemption or exchange orders on behalf of the Funds for their customers ("Authorized Institutions"), and if approved by the Funds, may designate other financial intermediaries to accept such orders. You should contact your Intermediary to learn whether it is authorized to accept orders on behalf of the Funds (i.e., an Authorized Institution). In order to make an initial investment in a Fund you must furnish to your Intermediary the information in the account application.

The decision as to which class to purchase depends on the amount you invest, the intended length of the investment and your personal situation. You should contact your Intermediary to discuss which share class option is right for you.

Note: Intermediaries may receive different compensation for selling different share classes.

To open an account, contact your Intermediary. Customers of an Intermediary will normally give their order instructions to the Intermediary, and the Intermediary will, in turn, place the order with the Transfer Agent. Intermediaries are responsible for transmitting accepted orders and payments to the Transfer Agent within the time period agreed upon by them and will set times by which orders and payments must be received by them from their customers. The Trust, Transfer Agent, Investment Adviser and their affiliates will not be responsible for any loss in connection with orders that are not transmitted to the Transfer Agent by an Intermediary on a timely basis.

A Fund will be deemed to have received an order for purchase, redemption or exchange of Fund shares when the order is accepted in "proper form" by the Transfer Agent (or, if applicable, by an Authorized Institution) on a business day, and the order will be priced at the Fund's current NAV per share (adjusted for any applicable sales charge) next determined after acceptance by the Transfer Agent (or, if applicable, by an Authorized Institution). For shareholders that place trades directly with a Fund's Transfer Agent, proper form generally means that specific trade details and customer identifying information must be received by the Transfer Agent at the time an order is submitted. Intermediaries of the Funds may have different requirements regarding what constitutes proper form for trade instructions. Please contact your Intermediary for more information.

For purchases by check, the Funds will not accept checks drawn on foreign banks, third party checks, temporary checks, cash or cash equivalents; e.g., cashier's checks, official bank checks, money orders, traveler's cheques or credit card checks. In limited situations involving the transfer of retirement assets, a Fund may accept cashier's checks or official bank checks.

Investor and Class R Shares are not sold directly to the public. Instead, Investor and Class R Shares generally are available only to Section 401(k), 403(b), 457, profit sharing, money purchase pension, tax-sheltered annuity, defined benefit pension, non-qualified deferred compensation plans and non-qualified pension plans or other employee benefit plans (including health savings accounts) or SIMPLE plans that are sponsored by one or more employers (including governmental or church employers) or employee organizations ("Employee Benefit Plans"). Investor Shares may also be sold to accounts established under a fee-based program that is sponsored and maintained by an Intermediary that has entered into a contractual relationship with Goldman Sachs to offer such shares through such programs ("Eligible Fee-Based Program"). Investor and Class R Shares are not available to traditional and Roth Individual Retirement Accounts ("IRAs"), SEPs and SARSEPs; except that Investor Shares are available to such accounts or plans to the extent they are purchased through an Eligible Fee-Based Program. Employee Benefit Plans and Eligible Fee-Based Programs must purchase Investor or Class R Shares through an Intermediary using a plan level or omnibus account.

Employee Benefit Plans generally may open an account and purchase Investor and/or Class R Shares through Intermediaries, financial planners, Employee Benefit Plan administrators and other financial intermediaries. Investor and/or Class R Shares may not be available through certain Intermediaries.

Class R6 Shares are generally available to the following investors who purchase shares of the Funds through certain Intermediaries that have a contractual relationship with Goldman Sachs, including banks, trust companies, brokers, registered investment advisers and other financial institutions, using a plan level or omnibus account, unless otherwise noted below.

- Investors who purchase Class R6 Shares through an Eligible Fee-Based Program;
- Employee Benefit Plans;
- Registered investment companies or bank collective trusts investing directly with the Transfer Agent;
- Institutional investors, including companies, foundations, endowments, municipalities, trusts and other entities, investing at least \$5,000,000 directly with the Transfer Agent; and
- Other investors at the discretion of the Trust's officers.

Class R6 Shares may not be available through certain Intermediaries. For the purposes of Class R6 Shares eligibility, the term "Intermediary" does not include Goldman Sachs or its affiliates and Class R6 Shares will not be available to clients of Goldman Sachs Private Wealth Management, The Goldman Sachs Trust Company, N.A., The Goldman Sachs Trust Company of Delaware or The Ayco Company, L.P.

What Is My Minimum Investment In The Funds?

For each of your accounts investing in Class A or Class C Shares, the following investment minimums must be met:

	Initial	Additional*
Regular Accounts	\$1,000	\$50
Employee Benefit Plans	No Minimum	No Minimum
Uniform Gift/Transfer to Minors Accounts (UGMA/UTMA)	\$250	\$50
Individual Retirement Accounts and Coverdell ESAs	\$250	\$50
Automatic Investment Plan Accounts	\$250	\$50

* No minimum additional investment requirements are imposed with respect to investors trading through Intermediaries who aggregate shares in omnibus or similar accounts (e.g., employee benefit plan accounts, wrap program accounts or traditional brokerage house accounts). A maximum purchase limitation of \$1,000,000 in the aggregate normally applies to purchases of Class C Shares across all Goldman Sachs Funds.

For Institutional Shares, the minimum initial investment is \$1,000,000 for individual or Institutional Investors, alone or in combination with other assets under the management of the Investment Adviser and its affiliates, except that no initial minimum will be imposed on (i) Employee Benefit Plans that hold their Institutional Shares through plan-level or omnibus accounts; or (ii) investment advisers investing for accounts for which they receive asset-based fees where the investment adviser or its Intermediary purchases Institutional Shares through an omnibus account. For this purpose, "Institutional Investors" shall include "wrap" account sponsors (provided they have an agreement covering the arrangement with the Distributor); corporations; qualified non-profit organizations, charitable trusts, foundations and endowments; any state, county or city, or any instrumentality, department, authority or agency thereof; and banks, trust companies or other depository institutions investing for their own account or on behalf of their clients.

No minimum amount is required for initial purchases in Investor, Class R and Class R6 (except as provided below) Shares or additional investments in Institutional, Service, Investor, Class R or Class R6 Shares.

For Class R6 Shares, the minimum initial investment is \$5,000,000 for institutional investors, including companies, foundations, endowments, municipalities, trusts and other entities who purchase Class R6 Shares directly with the Transfer Agent.

There are no minimum purchase or account (minimum) requirements with respect to Service Shares. An Intermediary may, however, impose a minimum amount for initial and additional investments in Service Shares, and may establish other requirements such as a minimum account balance. An Intermediary may redeem Service Shares held by non-complying accounts, and may impose a charge for any special services.

The minimum investment requirement for Class A, Class C and Institutional Shares may be waived for: (i) Goldman Sachs, its affiliates (including the Trust) or their respective Trustees, officers, partners, directors or employees (including retired employees and former partners), as well as certain individuals related to such investors, including spouses or domestic partners, minor children including those of their domestic partners, other family members residing in the same household, and/or financial dependents, provided that all of the above are designated as such with an Intermediary or the Funds' Transfer Agent; (ii) advisory clients of Goldman Sachs Private Wealth Management and accounts for which The Goldman Sachs Trust Company, N.A. acts in a fiduciary capacity (i.e., as agent or trustee); (iii) certain mutual fund "wrap" programs at the discretion of the Trust's officers; and (iv) other investors at the discretion of the Trust's officers. No minimum amount is required for additional investments in such accounts.

What Should I Know When I Purchase Shares Through An Intermediary?

If shares of a Fund are held in an account maintained and serviced by your Intermediary, all recordkeeping, transaction processing and payments of distributions relating to your account will be performed by your Intermediary, and not by a Fund and its Transfer Agent. Since the Funds will have no record of your transactions, you should contact your Intermediary to purchase, redeem or exchange shares, to make changes in or give instructions concerning your account or to obtain information about your account. The transfer of shares from an account with one Intermediary to an account with another Intermediary involves special procedures and may require you to obtain historical purchase information about the shares in the account from your Intermediary. If your Intermediary's relationship with Goldman Sachs is terminated, and you do not transfer your account to another Intermediary, the Trust reserves the right to redeem your shares. The Trust will not be responsible for any loss in an investor's account or tax liability resulting from a redemption.

Certain Intermediaries may provide the following services in connection with their customers' investments in Service Shares:

- Personal and account maintenance services
 - Provide facilities to answer inquiries and respond to correspondence
 - Act as liaison between the Intermediary's customers and the Trust
 - Assist customers in completing application forms, selecting dividend and other options, and similar services
- Shareholder administration services
 - Act, directly or through an agent, as the sole shareholder of record
 - Maintain account records for customers
 - Process orders to purchase, redeem and exchange shares for customers
 - Process payments for customers

Intermediaries that invest in shares on behalf of their customers may charge brokerage commissions or other fees directly to their customer accounts in connection with their investments. You should contact your Intermediary for information regarding such charges, as these fees, if any, may affect the return such customers realize with respect to their investments.

The Investment Adviser, Distributor and/or their affiliates may make payments or provide services to Intermediaries and other persons to promote the sale, distribution and/or servicing of shares of the Funds and other Goldman Sachs Funds, except that the Investment Adviser, Distributor and their affiliates do not make such payments on behalf of Class R6 Shares. These payments are made out of the Investment Adviser's, Distributor's and/or their affiliates' own assets, and are not an additional charge to the Funds. The payments are in addition to the distribution and service fees, service fees and shareholder administration fees and sales charges described in the Prospectus. Such payments are intended to compensate Intermediaries and other persons for, among other things: marketing shares of the Fund and other Goldman Sachs Funds, which may consist of payments relating to the Funds' inclusion on preferred or recommended fund lists or in certain sales programs sponsored by the recipients; access to the Intermediaries' registered representatives or salespersons, including at conferences and other meetings; assistance in training and education of personnel; marketing support; the provision of analytical or other data to the Investment Adviser or its affiliates relating to sales of shares of the Funds and other Goldman Sachs Funds; the support or purchase of technology platforms/software; and/or other specified services intended to assist in the distribution and marketing of the Funds and other Goldman Sachs Funds, including provision of consultative services to the Investment Adviser or its affiliates relating to marketing and/or sale of shares of the Fund and other Goldman Sachs Funds. The payments may also, to the extent permitted by applicable regulations, sponsor various trainings and educational programs, sales contests and/or promotions. The payments by the Investment Adviser, Distributor and/or their affiliates, which are in addition to the fees paid for these services by the Funds, may also compensate Intermediaries and other persons for sub-accounting, sub-transfer agency, administrative, shareholder processing and/or recordkeeping services. These additional payments may exceed amounts earned on these assets by the Investment Adviser, Distributor and/or their affiliates for the performance of these or similar services. The amount of these additional payments is normally not expected to exceed 0.50% (annualized) of the amount sold or invested through recipients. In addition, certain Intermediaries may have access to certain services from the Investment Adviser, Distributor and/or their affiliates, including research reports, economic analysis, and portfolio analysis, portfolio construction and similar tools and software. In certain cases, the Intermediaries may not pay for these products or services or may only pay for a portion of the total cost of these products or services. Please refer to the "Payments to Others (Including Intermediaries)" section of the SAI for more information about these and similar payments and services.

The payments made by the Investment Adviser, Distributor and/or their affiliates and the services provided by an Intermediary or other person may differ for different Intermediaries and other persons. The presence of these and similar payments, receipt of these services and the basis on which an Intermediary compensates its registered representatives or salespersons may create an incentive for a particular Intermediary, registered representative, salesperson or other person to highlight, feature or recommend Funds based, at least in part, on the level of compensation paid. You should contact your Intermediary, or any other person that provides services to you, for more information about the payments it receives and any potential conflicts of interest.

You may be required to pay a commission directly to a broker or financial intermediary for effecting transactions in Institutional Shares. In addition to Institutional Shares, each Fund also offers other classes of shares to investors. These other share classes are subject to different fees and expenses (which affect performance) and are entitled to different services than Institutional Shares. Information regarding these other share classes is included in the Prospectus for the applicable share class and may also be obtained from your Intermediary or from Goldman Sachs by calling the number on the back cover of the Prospectus.

What Else Should I Know About Share Purchases?

The Trust reserves the right to:

- Refuse to open an account or require an Intermediary to refuse to open an account if you fail to (i) provide a taxpayer identification number, a Social Security Number or other government-issued identification (e.g., for an individual, a driver's license or passport); or (ii) certify that such number or other information is correct (if required to do so under applicable law).
- Reject or restrict any purchase or exchange order by a particular purchaser (or group of related purchasers) for any reason in its discretion. Without limiting the foregoing, the Trust may reject or restrict purchase and exchange orders by a particular purchaser (or group of related purchasers) when a pattern of frequent purchases, sales or exchanges of shares of a Fund is evident, or if purchases, sales or exchanges are, or a subsequent redemption might be, of a size that would disrupt the management of a Fund.
- Close a Fund to new investors from time to time and reopen any such Fund whenever it is deemed appropriate by the Investment Adviser.
- Provide for, modify or waive the minimum investment requirements.
- Modify the manner in which shares are offered.
- Modify the sales charge rate applicable to future purchases of shares.

Shares of the Funds are only registered for sale in the United States and certain of its territories. Generally, shares of the Funds will only be offered or sold to "U.S. persons" and all offerings or other solicitation activities will be conducted within the United States, in accordance with the rules and regulations of the Securities Act of 1933, as amended ("Securities Act").

A Fund may allow you to purchase shares through an Intermediary with securities instead of cash if consistent with the Fund's investment policies and operations and approved by the Investment Adviser.

Notwithstanding the foregoing, the Trust and Goldman Sachs reserve the right to reject or restrict purchase or exchange requests from any investor. The Trust and Goldman Sachs will not be liable for any loss resulting from rejected purchase or exchange orders.

Please be advised that abandoned or unclaimed property laws for certain states (to which your account may be subject) require financial organizations to transfer (escheat) unclaimed property (including shares of a Fund) to the appropriate state if no activity occurs in an account for a period of time specified by state law. For IRA accounts escheated to a state under these abandoned property laws, the escheatment will generally be treated as a taxable distribution to you; federal and any applicable state income tax will be withheld. This may apply to your Roth IRA as well.

Customer Identification Program. Federal law requires the Funds to obtain, verify and record identifying information for certain investors, which will be reviewed solely for customer identification purposes, which may include the name, residential or business street address, date of birth (for an individual), Social Security Number or taxpayer identification number or other information, for each investor who opens an account directly with the Funds. Applications without the required information may not be accepted by the Funds. Throughout the life of your account, the Funds may request updated identifying information in accordance with their Customer Identification Program. After accepting an application, to the extent permitted by applicable law or their Customer Identification Program, the Funds reserve the right to: (i) place limits on transactions in any account until the identity of the investor is verified; (ii) refuse an investment in the Funds; or (iii) involuntarily redeem an investor's shares and close an account in the event that the Funds are unable to verify an investor's identity or are unable to obtain all required information. The Funds and their agents will not be responsible for any loss or tax liability in an investor's account resulting from the investor's delay in providing all required information or from closing an account and redeeming an investor's shares pursuant to their Customer Identification Program.

How Are Shares Priced?

The price you pay when you buy shares is a Fund's next-determined NAV per share (as adjusted for any applicable sales charge) after the Transfer Agent (or, if applicable, an Authorized Institution) has received and accepted your order in proper form. The price you receive when you sell shares is a Fund's next-determined NAV per share (adjusted for any applicable CDSCs) after the Transfer Agent (or, if applicable, an Authorized Institution) has received and accepted your order in proper form, with the redemption proceeds reduced by any applicable charges (e.g., CDSCs). Each class generally calculates its NAV as follows:

$$\text{NAV} = \frac{\begin{array}{l} \text{(Value of Assets of the Class)} \\ - \text{(Liabilities of the Class)} \end{array}}{\text{Number of Outstanding Shares of the Class}}$$

A Fund's investments for which market quotations are readily available are valued at market value on the basis of quotations provided by pricing sources. If accurate quotations are not readily available, if the Funds' fund accounting agent is unable for other reasons to facilitate pricing of individual securities or calculate a Fund's NAV, or if the Investment Adviser believes that such quotations do not accurately reflect fair value, the fair value of the Funds' investments may be determined in good faith under valuation procedures approved by the Board of Trustees. Thus, such pricing may be based on subjective judgments and it is possible that the prices resulting from such valuation procedures may differ materially from the value realized on a sale. Cases where there is no clear indication of a value of the Fund's investments include, among others, situations where a security or other asset or liability does not have a price source or a price is unavailable.

Equity securities listed on an exchange are generally valued at the last available sale price on the exchange on which they are principally traded. To the extent a Fund invests in foreign equity securities, "fair value" prices will be provided by an independent third-party pricing (fair value) service in accordance with the fair value procedures approved by the Board of Trustees. Fair value prices are used because many foreign markets operate at times that do not coincide with those of the major U.S. markets. Events that could affect the values of foreign portfolio holdings may occur between the close of the foreign market and the time of determining the NAV, and would not otherwise be reflected in the NAV.

Fixed income securities are generally valued on the basis of prices (including evaluated prices) and quotations provided by pricing services or securities dealers. Pricing services may use matrix pricing or valuation models, which utilize certain inputs and assumptions, including, but not limited to, yield or price with respect to comparable fixed income securities, to determine current value. Pricing services generally value fixed income securities assuming orderly transactions of an institutional round lot size, but the Fund may hold or transact in such securities in smaller odd lot sizes. Odd lots may trade at lower prices than institutional round lots.

Investments in other open-end registered investment companies (if any), excluding investments in ETFs, are valued based on the NAV of those open-end registered investment companies (which may use fair value pricing as discussed in their prospectuses). Investments in ETFs will generally be valued at the last sale price or official closing price on the exchange on which they are principally traded.

In addition, the Investment Adviser, consistent with its procedures and applicable regulatory guidance, may (but need not) determine to make an adjustment to the previous closing prices of either domestic or foreign securities in light of significant events, to reflect what it believes to be the fair value of the securities at the time of determining a Fund's NAV. Significant events that could affect a large number of securities in a particular market may include, but are not limited to: situations relating to one or more single issuers in a market sector; significant fluctuations in U.S. or foreign markets; market dislocations; market disruptions or unscheduled market closings; equipment failures; natural or man-made disasters or acts of God; armed conflicts; governmental actions or other developments; as well as the same or similar events which may affect specific issuers or the securities markets even though not tied directly to the securities markets. Other significant events that could relate to a single issuer may include, but are not limited to: corporate actions such as reorganizations, mergers and buy-outs; corporate announcements, including those relating to earnings, products and regulatory news; significant litigation; ratings downgrades; bankruptcies; and trading limits or suspensions.

One effect of using an independent third-party pricing (fair value) service and fair valuation may be to reduce stale pricing arbitrage opportunities presented by the pricing of Fund shares. However, it involves the risk that the values used by a Fund to price its investments may be different from those used by other investment companies and investors to price the same investments.

Please note the following with respect to the price at which your transactions are processed:

- NAV per share of each share class is generally calculated by the Funds' fund accounting agent on each business day as of the close of regular trading on the New York Stock Exchange (normally 4:00 p.m. Eastern time) or such other times as the New York Stock Exchange or NASDAQ market may officially close. Fund shares will generally not be priced on any day the New York Stock Exchange is closed.
- The Trust reserves the right to reprocess purchase (including dividend reinvestments), redemption and exchange transactions that were processed at a NAV that is subsequently adjusted, and to recover amounts from (or distribute amounts to) shareholders accordingly based on the official closing NAV, as adjusted.
- The Trust reserves the right to advance the time by which purchase and redemption orders must be received for same business day credit as otherwise permitted by the SEC.

Consistent with industry practice, investment transactions not settling on the same day are recorded and factored into a Fund's NAV on the business day following trade date (T+1). The use of T+1 accounting generally does not, but may, result in a NAV that differs materially from the NAV that would result if all transactions were reflected on their trade dates.

Note: The time at which transactions and shares are priced and the time by which orders must be received may be changed in case of an emergency or if regular trading on the New York Stock Exchange is stopped at a time other than its regularly scheduled closing time. In the event the New York Stock Exchange does not open for business, the Trust may, but is not required to, open one or more Funds for purchase, redemption and exchange transactions if the Federal Reserve wire payment system is open. To learn whether a Fund is open for business during this situation, please call the appropriate phone number located on the back cover of the Prospectus.

Foreign securities may trade in their local markets on days a Fund is closed. As a result, if a Fund holds foreign securities, its NAV may be impacted on days when investors may not purchase or redeem Fund shares.

Each Fund relies on various sources to calculate its NAV. The ability of the Funds' fund accounting agent to calculate the NAV per share of each share class of the Funds is subject to operational risks associated with processing or human errors, systems or technology failures, cyber attacks and errors caused by third party service providers, data sources, or trading counterparties. Such failures may result in delays in the calculation of a Fund's NAV and/or the inability to calculate NAV over extended time periods. The Funds may be unable to recover any losses associated with such failures. In addition, if the third party service providers and/or data sources upon which a Fund directly or indirectly relies to calculate its NAV or price individual securities are unavailable or otherwise unable to calculate the NAV correctly, it may be necessary for alternative procedures to be utilized to price the securities at the time of determining the Fund's NAV.

COMMON QUESTIONS APPLICABLE TO THE PURCHASE OF CLASS A SHARES

What Is The Offering Price Of Class A Shares?

The offering price of Class A Shares of each Fund is the next determined NAV per share plus an initial sales charge paid to Goldman Sachs at the time of purchase of shares. The sales charge varies depending upon the amount you purchase. In some cases, described below, the initial sales charge may be eliminated altogether, and the offering price will be the NAV per share. The current sales charges and commissions paid to Intermediaries for Class A Shares of the Funds are as follows:

Amount of Purchase (including sales charge, if any)	Sales Charge as Percentage of Offering Price	Sales Charge as Percentage of Net Amount Invested	Maximum Dealer Allowance as Percentage of Offering Price*
Less than \$50,000	5.50%	5.82%	5.00%
\$50,000 up to (but less than) \$100,000	4.75	4.99	4.00
\$100,000 up to (but less than) \$250,000	3.75	3.90	3.00
\$250,000 up to (but less than) \$500,000	2.75	2.83	2.25
\$500,000 up to (but less than) \$1 million	2.00	2.04	1.75
\$1 million or more	0.00**	0.00**	***, ****

* Dealer's allowance may be changed periodically. During special promotions, the entire sales charge may be reallocated to Intermediaries. Intermediaries to whom substantially the entire sales charge is reallocated may be deemed to be "underwriters" under the Securities Act.

** No sales charge is payable at the time of purchase of Class A Shares of \$1 million or more, but a CDSC of 1.00% may be imposed in the event of certain redemptions within 18 months. For more information about Class A Shares' CDSCs, please see "What Else Do I Need to Know About Class A Shares' CDSC?" below.

*** With respect to the China Equity Fund, Emerging Markets Equity Fund and Emerging Markets ex. China Fund the Distributor may pay a one-time commission to Intermediaries who initiate or are responsible for purchases of \$1 million or more of shares of the Funds equal to 1.00% of the amount under \$3 million, 0.50% of the next \$2 million, and 0.25% thereafter. In instances where this one-time commission is not paid to a particular Intermediary (including Goldman Sachs' Private Wealth Management Unit), the CDSC on Class A Shares, generally, will be waived. The Distributor may also pay, with respect to all or a portion of the amount purchased, a commission in accordance with the foregoing schedule to Intermediaries who initiate or are responsible for purchases by Employee Benefit Plans investing in the Funds which satisfy the criteria set forth below in "When Are Class A Shares Not Subject To A Sales Load?" or \$1 million or more by certain "wrap" accounts. Purchases by such plans will be made at NAV with no initial sales charge, but if shares are redeemed within 18 months, a CDSC of 1.00% may be imposed upon the plan, the plan sponsor or the third-party administrator. In addition, Intermediaries will remit to the Distributor such payments received in connection with "wrap" accounts in the event that shares are redeemed within 18 months.

**** With respect to the ESG Emerging Markets Equity Fund, the Distributor may pay a one-time commission to Intermediaries who initiate or are responsible for purchases of \$1 million or more of shares of the Fund equal to 1.00% of the amount under \$3 million, 0.50% of the next \$2 million, and 0.25% thereafter. In instances where this one-time commission is not paid to a particular Intermediary (including Goldman Sachs' Private Wealth Management Unit and Employee Benefit Plans), the CDSC on Class A Shares, generally, will be waived. The Distributor may also pay, with respect to all or a portion of the amount purchased, a commission in accordance with the foregoing schedule to Intermediaries who initiate or are responsible for purchases of \$1 million or more by certain "wrap" accounts. Purchases by such accounts will be made at NAV with no initial sales charge, but if shares are redeemed within 18 months, a CDSC of 1.00% may be imposed upon the account. In addition, Intermediaries will remit to the Distributor such payments received in connection with "wrap" accounts in the event that shares are redeemed within 18 months.

Different Intermediaries may impose different sales charges. These variations are described in Appendix C—Additional Information About Sales Charge Variations, Waivers and Discounts.

You should note that the actual sales charge that appears in your mutual fund transaction confirmation may differ slightly from the rate disclosed above in the Prospectus due to rounding calculations.

As indicated in the preceding chart, and as discussed further below and in the section titled “How Can The Sales Charge On Class A Shares Be Reduced?” and in Appendix C—Additional Information About Sales Charge Variations, Waivers and Discounts, you may, under certain circumstances, be entitled to pay reduced sales charges on your purchases of Class A Shares or have those charges waived entirely. To take advantage of these discounts, your Intermediary must notify the Funds’ Transfer Agent at the time of your purchase order that a discount may apply to your current purchases. You may also be required to provide appropriate documentation to receive these discounts, including:

- (i) Information or records regarding shares of the Funds or other Goldman Sachs Funds held in all accounts (e.g., retirement accounts) of the shareholder at all Intermediaries; or
- (ii) Information or records regarding shares of the Funds or other Goldman Sachs Funds held at any Intermediary by related parties of the shareholder, such as members of the same family or household.

What Else Do I Need To Know About Class A Shares’ CDSC?

Purchases of \$1 million or more of Class A Shares will be made at NAV with no initial sales charge. However, if you redeem shares within 18 months after the beginning of the month in which the purchase was made, a CDSC of 1% may be imposed. The CDSC may not be imposed if your Intermediary agrees with the Distributor to return all or an applicable prorated portion of its commission to the Distributor. The CDSC is waived on redemptions in certain circumstances. See “In What Situations May The CDSC On Class A Or C Shares Be Waived Or Reduced?” below and, if you hold shares through an Intermediary, see Appendix C—Additional Information About Sales Charge Variations, Waivers and Discounts.

When Are Class A Shares Not Subject To A Sales Load?

Class A Shares of the Funds may be sold at NAV without payment of any sales charge to the following individuals and entities:

- Goldman Sachs, its affiliates or their respective officers, partners, directors or employees (including retired employees and former partners), any partnership of which Goldman Sachs is a general partner, any Trustee or officer of the Trust and designated family members of any of these individuals;
- Qualified employee benefit plans of Goldman Sachs;
- Trustees or directors of investment companies for which Goldman Sachs or an affiliate acts as sponsor;
- Any employee or registered representative of any Intermediary (or such Intermediaries’ affiliates and subsidiaries) or their respective spouses or domestic partners, children and parents;
- Banks, trust companies or other types of depository institutions;
- Any state, county or city, or any instrumentality, department, authority or agency thereof, which is prohibited by applicable investment laws from paying a sales charge or commission in connection with the purchase of shares of a Fund;
- Employee Benefit Plans, other than Employee Benefit Plans that purchase Class A Shares through brokerage relationships in which sales charges are customarily imposed. Under such circumstances, Plans will be assessed sales charges as described further in “Shareholder Guide—Common Questions Applicable to the Purchase of Class A Shares;”
- Investors who purchase Class A Shares through an omnibus account sponsored by an Intermediary that has an agreement with the Distributor covering such investors to offer Class A Shares without charging an initial sales charge;
- Insurance company separate accounts that make the Funds available as an underlying investment in certain group annuity contracts;
- “Wrap” accounts for the benefit of clients of broker-dealers, financial institutions or financial planners, provided they have entered into an agreement with GSAM specifying aggregate minimums and certain operating policies and standards;
- Investment advisers investing for accounts for which they receive asset-based fees;
- Accounts over which GSAM or its advisory affiliates have investment discretion;
- Shareholders who roll over distributions from any tax-qualified Employee Benefit Plan or tax-sheltered annuity to an IRA which invests in the Goldman Sachs Funds if the tax-qualified Employee Benefit Plan or tax-sheltered annuity receives administrative services provided by certain third party administrators that have entered into a special service arrangement with Goldman Sachs relating to such plan or annuity;
- State sponsored 529 college savings plans;
- Investors that purchase Class A Shares through the GS Retirement Plan Plus and Goldman Sachs 401(k) Programs;

- Former shareholders of certain funds who (i) received shares of a Goldman Sachs Fund in connection with a reorganization of an acquired fund into a Goldman Sachs Fund, (ii) had previously qualified for purchases of Class A Shares of the acquired funds without the imposition of a sales load under the guidelines of the applicable acquired fund family, and (iii) as of August 24, 2012 held their Goldman Sachs Fund shares directly with the Goldman Sachs Funds' Transfer Agent, as long as they continue to hold the shares directly at the Transfer Agent; or
- Investors who purchase Class A Shares in accounts that are no longer associated with an Intermediary and held direct at the Transfer Agent, including retirement accounts.

You must certify eligibility for any of the above exemptions on your account application and notify your Intermediary and the Funds if you no longer are eligible for the exemption. You may be eligible for different or additional exemptions based on your Intermediary; see Appendix C—Additional Information About Sales Charge Variations, Waivers and Discounts.

A Fund will grant you an exemption subject to confirmation of your eligibility by your Intermediary. You may be charged a fee by your Intermediary.

How Can The Sales Charge On Class A Shares Be Reduced?

- **Right of Accumulation:** When buying Class A Shares in Goldman Sachs Funds, your current aggregate investment determines the initial sales load you pay. You may qualify for reduced sales charges when the current market value of holdings across Class A and/or Class C Shares, plus new purchases, reaches \$50,000 or more. Class A and/or Class C Shares of any of the Goldman Sachs Funds may be combined under the Right of Accumulation. If a Fund's Transfer Agent is properly notified, the "Amount of Purchase" in the chart in the section "What Is The Offering Price of Class A Shares?" will be deemed to include all Class A and/or Class C Shares of the Goldman Sachs Funds that were held at the time of purchase by any of the following persons: (i) you, your spouse or domestic partner, your parents and your children; and (ii) any trustee, guardian or other fiduciary of a single trust estate or a single fiduciary account. This includes, for example, any Class A and/or Class C Shares held at an Intermediary other than the one handling your current purchase. For purposes of applying the Right of Accumulation, shares of the Funds and any other Goldman Sachs Funds purchased by an existing client of Goldman Sachs Private Wealth Management or GS Ayco Holding LLC will be combined with Class A and/or Class C Shares and other assets held by all other Goldman Sachs Private Wealth Management accounts or accounts of GS Ayco Holding LLC, respectively. In addition, under some circumstances, Class A and/or Class C Shares of the Funds and Class A and/or Class C Shares of any other Goldman Sachs Fund purchased by partners, directors, officers or employees of certain organizations may be combined for the purpose of determining whether a purchase will qualify for the Right of Accumulation and, if qualifying, the applicable sales charge level. To qualify for a reduced sales load, you or your Intermediary must notify the Funds' Transfer Agent at the time of investment that a quantity discount is applicable. If you do not notify your Intermediary at the time of your current purchase or a future purchase that you qualify for a quantity discount, you may not receive the benefit of a reduced sales charge that might otherwise apply. Use of this option is subject to a check of appropriate records.

In some circumstances, other Class A and/or Class C Shares may be aggregated with your current purchase under the Right of Accumulation as described in the SAI. For purposes of determining the "Amount of Purchase," all Class A and/or Class C Shares currently held will be valued at their current market value.

- **Statement of Intention:** You may obtain a reduced sales charge by means of a written Statement of Intention which expresses your non-binding commitment to invest (not counting reinvestments of dividends and distributions) in the aggregate \$50,000 or more within a period of 13 months in Class A Shares of one or more of the Goldman Sachs Funds. Any investments you make during the period will receive the discounted sales load based on the full amount of your investment commitment. Purchases made during the previous 90 days may be included; however, capital appreciation does not apply toward these combined purchases. If the investment commitment of the Statement of Intention is not met prior to the expiration of the 13-month period, the entire amount will be subject to the higher applicable sales charge unless the failure to meet the investment commitment is due to the death of the investor. By selecting the Statement of Intention, you authorize the Transfer Agent to escrow and redeem Class A Shares in your account to pay this additional charge if the Statement of Intention is not met. You must, however, inform the Transfer Agent (either directly or through your Intermediary) that the Statement of Intention is in effect each time shares are purchased. Each purchase will be made at the public offering price applicable to a single transaction of the dollar amount specified on the Statement of Intention. The SAI has more information about the Statement of Intention, which you should read carefully.

Different Intermediaries may have different policies regarding Rights of Accumulation and Statements of Intention. These variations are described in Appendix C—Additional Information About Sales Charge Variations, Waivers and Discounts.

COMMON QUESTIONS APPLICABLE TO THE PURCHASE OF CLASS C SHARES

What Is The Offering Price Of Class C Shares?

You may purchase Class C Shares of the Fund at the next determined NAV without paying an initial sales charge. However, if you redeem Class C Shares within 12 months of purchase, a CDSC of 1.00% will normally be deducted from the redemption proceeds. In connection with purchases by Employee Benefit Plans, where Class C Shares are redeemed within 12 months of purchase, a CDSC of 1.00% may be imposed upon the plan sponsor or third party administrator. Class C Shares acquired in exchange for shares subject to a CDSC will be subject to the CDSC, if any, of the shares originally held. No CDSC is imposed in connection with an exchange of Class C Shares at the time of such exchange. When Class C Shares are exchanged for Class C Shares of another fund, the period of time that such shares will be subject to a CDSC (if any) will be measured as of the date of the original purchase. With respect to such shares held by Employee Benefit Plans, the CDSC may be imposed on the plan sponsor or third party administrator.

Different Intermediaries may impose different sales charges. These variations are described in “Appendix C—Additional Information About Sales Charge Variations, Waivers and Discounts.”

Proceeds from the CDSC are payable to the Distributor and may be used in whole or in part to defray the Distributor’s expenses related to providing distribution-related services to the Fund in connection with the sale of Class C Shares, including the payment of compensation to Intermediaries. A commission equal to 1% of the amount invested is normally paid by the Distributor to Intermediaries.

What Should I Know About The Automatic Conversion Of Class C Shares?

Class C Shares of the Fund will automatically convert into Class A Shares (which bear lower distribution and service (12b-1) fees and do not bear additional personal and account maintenance services fees) of the same Fund on or about the fifteenth day of the last month of the quarter that is eight years after the purchase date. No sales charges or other charges will apply in connection with any conversion.

If you acquire Class C Shares of the Fund by exchange from Class C Shares of another Goldman Sachs Fund, your Class C Shares will convert into Class A Shares of such Fund based on the date of the initial purchase. If you acquire Class C Shares through reinvestment of distributions, your Class C Shares will convert into Class A Shares based on the date of the initial purchase of the shares on which the distribution was paid.

Shareholders will not recognize a gain or loss for federal income tax purposes upon the conversion of Class C Shares for Class A Shares of the same Fund. The automatic conversion of Class C Shares to Class A Shares will not apply to shares held through group retirement plan recordkeeping platforms of certain Intermediaries who hold such shares in an omnibus account and do not track participant level share lot aging to facilitate such a conversion.

New employee benefit plans are not eligible to purchase Class C Shares. Employee benefit plans which had this share class of the Fund available to participants on or before September 18, 2018, may continue to open accounts for new participants in such share class of the Fund and purchase additional shares in existing participant accounts.

If you purchased your shares through an Intermediary, it is the responsibility of your Intermediary to work with the Transfer Agent to effect the conversion and to ensure that Class C Shares are automatically converted after the appropriate period of time. In addition, if your shares are no longer subject to a CDSC, you may be able to exchange your Class C Shares for Class A Shares without the payment of a sales charge prior to the automatic conversion subject to the policies and procedures of the Intermediary through whom you have purchased your shares. Please contact your Intermediary with questions regarding your eligibility to exchange Class C Shares for Class A Shares.

COMMON QUESTIONS APPLICABLE TO THE PURCHASE OF CLASS A AND C SHARES

What Else Do I Need To Know About The CDSC On Class A Or C Shares?

- The CDSC is based on the lesser of the NAV of the shares at the time of redemption or the original offering price (which is the original NAV).
 - No CDSC is charged on shares acquired from reinvested dividends or capital gains distributions.
 - No CDSC is charged on the per share appreciation of your account over the initial purchase price.

- When counting the number of months since a purchase of Class A or Class C Shares was made, all purchases made during a month will be combined and considered to have been made on the first day of that month.
- To keep your CDSC as low as possible, each time you place a request to sell shares, the Fund will first sell any shares in your account that do not carry a CDSC and then the shares in your account that have been held the longest.

In What Situations May The CDSC On Class A Or C Shares Be Waived Or Reduced?

The CDSC on Class A and Class C Shares that are subject to a CDSC may be waived or reduced if the redemption relates to:

- Mandatory retirement distributions or loans to participants or beneficiaries from Employee Benefit Plans;
- Hardship withdrawals by a participant or beneficiary in an Employee Benefit Plan;
- The separation from service by a participant or beneficiary in an Employee Benefit Plan;
- Excess contributions distributed from an Employee Benefit Plan;
- Distributions from a qualified Employee Benefit Plan invested in the Goldman Sachs Funds which are being rolled over to an IRA in the same share class of a Goldman Sachs Fund;
- The death or disability (as defined in Section 72(m)(7) of the Internal Revenue Code of 1986, as amended (the “Code”)) of a shareholder, participant or beneficiary in an Employee Benefit Plan;
- Satisfying the minimum distribution requirements of the Code;
- Establishing “substantially equal periodic payments” as described under Section 72(t)(2) of the Code;
- Redemption proceeds which are to be reinvested in accounts or non-registered products over which GSAM or its advisory affiliates have investment discretion;
- A systematic withdrawal plan. The Fund reserves the right to limit such redemptions, on an annual basis, to 12% of the value of your Class C Shares and 10% of the value of your Class A Shares;
- Redemptions or exchanges of Fund shares held through an Employee Benefit Plan using the Fund as part of a qualified default investment alternative or “QDIA”; or
- Other redemptions, at the discretion of the Trust’s officers, relating to shares purchased through Employee Benefit Plans.

You may be eligible for different or additional exemptions based on your Intermediary; see “Appendix C—Additional Information About Sales Charge Variations, Waivers and Discounts.”

HOW TO SELL SHARES

How Can I Sell Shares Of The Fund?

Generally, Shares may be sold (redeemed) only through Intermediaries. Customers of an Intermediary will normally give their redemption instructions to the Intermediary, and the Intermediary will, in turn, place the order with the Transfer Agent. On any business day the Fund is open, the Fund will generally redeem its Shares upon request at their next-determined NAV per share (subject to any applicable CDSC) after the Transfer Agent (or, if applicable, the Authorized Institution) has received and accepted a redemption order in proper form, as described under “How To Buy Shares—How Can I Purchase Shares Of The Fund?” above. Redemptions may be requested by electronic trading platform (through your Intermediary), in writing or by telephone (unless the Intermediary opts out of the telephone redemption privilege on the account application). You should contact your Intermediary to discuss redemptions and redemption proceeds. The Fund may transfer redemption proceeds to an account with your Intermediary. In the alternative, your Intermediary may request that redemption proceeds be sent to you by check or wire (if the wire instructions are designated in the current records of the Transfer Agent).

When Do I Need A Medallion Signature Guarantee To Redeem Shares?

Generally, a redemption request must be in writing and signed by an authorized person with a Medallion signature guarantee if:

- A request is made in writing to redeem Class A, Class C, Investor or Class R Shares in an amount over \$50,000 via check;
- You would like the redemption proceeds sent to an address that is not your address of record; or
- You would like the redemption proceeds sent to a domestic bank account that is not designated in the current records of the Transfer Agent.

A Medallion signature guarantee must be obtained from a bank, brokerage firm or other financial intermediary that is a member of an approved Medallion Guarantee Program or that is otherwise approved by the Trust. A notary public cannot provide a Medallion signature guarantee. The written request may be confirmed by telephone with both the requesting party and the designated Intermediary to verify instructions. Additional documentation may be required.

What Do I Need To Know About Telephone Redemption Requests?

The Trust, the Distributor and the Transfer Agent will not be liable for any loss or tax liability you may incur in the event that the Trust accepts unauthorized telephone redemption requests that the Trust reasonably believes to be genuine. The Trust may accept telephone redemption instructions from any person identifying himself or herself as the owner of an account or the owner's registered representative where the owner has not declined in writing to use this service. Thus, you risk possible losses if a telephone redemption is not authorized by you.

In an effort to prevent unauthorized or fraudulent redemption and exchange requests by telephone, Goldman Sachs and SS&C Global Investor & Distribution Solutions, Inc. ("SS&C") each employ reasonable procedures specified by the Trust to confirm that such instructions are genuine. The following general policies are currently in effect:

- Telephone requests are recorded.
- Proceeds of telephone redemption requests will be sent to your address of record or authorized account designated in the current records of the Transfer Agent (unless you provide written instructions and a Medallion signature guarantee indicating another address or account).
- For the 30-day period following a change of address, telephone redemptions will only be filled by a wire transfer to the authorized account designated in the current records of the Transfer Agent (see immediately preceding bullet point). In order to receive the redemption by check during this time period, the redemption request must be in the form of a written, Medallion signature guaranteed letter.
- The telephone redemption option does not apply to Shares held in an account maintained and serviced by your Intermediary. If your Shares are held in an account with an Intermediary, you should contact your registered representative of record, who may make telephone redemptions on your behalf.
- The telephone redemption option may be modified or terminated at any time without prior notice.
- The Fund may allow redemptions via check up to \$50,000 in Class A, Class C, Investor and Class R Shares requested via telephone.

Note: It may be difficult to make telephone redemptions in times of unusual economic or market conditions.

How Are Redemption Proceeds Paid?

By Wire: You may arrange for your redemption proceeds to be paid as federal funds to an account with your Intermediary or to a domestic bank account designated in the current records of the Transfer Agent. In addition, redemption proceeds may be transmitted through an electronic trading platform to an account with your Intermediary. The following general policies govern wiring redemption proceeds:

- Redemption proceeds will normally be paid in federal funds within one business day (or such other times in accordance with the requirements of your Intermediary) following receipt of a properly executed wire transfer redemption request. In certain circumstances, however (such as unusual market conditions or in cases of very large redemptions or excessive trading), it may take up to seven days to pay redemption proceeds.
- Redemption requests may only be postponed or suspended for longer than seven days as permitted under Section 22(e) of the Investment Company Act of 1940 (the "Investment Company Act") if (i) the New York Stock Exchange is closed for trading or trading is restricted; (ii) an emergency exists which makes the disposal of securities owned by the Fund or the fair determination of the value of the Fund's net assets not reasonably practicable; or (iii) the SEC, by order or regulation, permits the suspension of the right of redemption.
- If you are selling shares you recently paid for by check or purchased by Automated Clearing House ("ACH"), the Fund will pay you when your check or ACH has cleared, which may take up to 15 days.
- If the Federal Reserve Bank is closed on the day that the redemption proceeds would ordinarily be wired, wiring the redemption proceeds may be delayed until the Federal Reserve Bank reopens.
- To change the bank wiring instructions designated in the current records of the Transfer Agent, you must send written instructions signed by an authorized person designated in the current records of the Transfer Agent. A Medallion signature guarantee may be required if you are requesting a redemption in conjunction with the change.
- None of the Trust, the Investment Adviser or Goldman Sachs assumes any responsibility for the performance of your bank or Intermediary in the transfer process. If a problem with such performance arises, you should deal directly with your bank or Intermediary.

By Check: You may elect to receive your redemption proceeds by check. Redemption proceeds paid by check will normally be mailed to the address of record within one business day (or such other times in accordance with the requirements of your Intermediary) following receipt of a properly executed redemption request, except in certain circumstances (such as those set forth above with respect to wire transfer redemption requests). If you are selling shares you recently paid for by check or ACH, the Fund will pay you when your check or ACH has cleared, which may take up to 15 days.

What Else Do I Need To Know About Redemptions?

The following generally applies to redemption requests:

- Additional documentation may be required when deemed appropriate by the Transfer Agent. A redemption request will not be in proper form until such additional documentation has been received.
- Intermediaries are responsible for the timely transmittal of redemption requests by their customers to the Transfer Agent. In order to facilitate the timely transmittal of redemption requests, Intermediaries may set times by which they must receive redemption requests. Intermediaries may also require additional documentation from you.

The Trust reserves the right to:

- Redeem your shares in the event your Intermediary's relationship with Goldman Sachs is terminated, and you do not transfer your account to another Intermediary or in the event that the Fund is no longer an option in your Employee Benefit Plan or no longer available through your Eligible Fee-Based Program.
- Redeem your shares if your account balance is below the required Fund minimum. The Fund will not redeem your shares on this basis if the value of your account falls below the minimum account balance solely as a result of market conditions. The Fund will give you 60 days prior written notice to allow you to purchase sufficient additional shares of the Fund in order to avoid such redemption. Different rules may apply to investors who have established brokerage accounts with Goldman Sachs in accordance with the terms and conditions of their account agreements.
- Redeem your shares in the case of actual or suspected threatening conduct or actual or suspected fraudulent, suspicious or illegal activity by you or any other individual associated with your account.
- Subject to applicable law, redeem your shares in other circumstances determined by the Board of Trustees to be in the best interest of the Trust.
- Pay redemptions by a distribution in-kind of securities (instead of cash). If you receive redemption proceeds in-kind, you should expect to incur transaction costs upon the disposition of those securities. In addition, if you receive redemption proceeds in-kind, you will be subject to market gains or losses upon the disposition of those securities.
- Reinvest any amounts (e.g., dividends, distributions or redemption proceeds) which you have elected to receive by check should your check remain uncashed for more than 180 days. No interest will accrue on amounts represented by uncashed checks. Your check will be reinvested in your account at the NAV on the day of the reinvestment. When reinvested, those amounts are subject to the risk of loss like any Fund investment. If you elect to receive distributions in cash and a check remains uncashed for more than 180 days, your cash election may be changed automatically to reinvest and your future dividend and capital gains distributions will be reinvested in the Fund at the NAV as of the date of payment of the distribution. This provision may not apply to certain retirement or qualified accounts, accounts with a non-U.S. address or closed accounts. Your participation in a systematic withdrawal program may be terminated if a check remains uncashed.
- Charge an additional fee in the event a redemption is made via wire transfer.

The Fund typically expects to meet redemption requests by using holdings of cash or cash equivalents and/or proceeds from the sale of portfolio holdings. In addition, under stressed market conditions, as well as for other temporary or emergency purposes, the Fund may distribute redemption proceeds in-kind (instead of cash), access a line of credit or overdraft facility, or borrow through other sources to meet redemption requests.

None of the Trust, the Investment Adviser or Goldman Sachs will be responsible for any loss in an investor's account or tax liability resulting from an involuntary redemption.

Can I Reinvest Redemption Proceeds In The Same Or Another Goldman Sachs Fund?

You may redeem shares of the Fund and reinvest a portion or all of the redemption proceeds in the same share class of another Goldman Sachs Fund at NAV. To be eligible for this privilege, you must have held the shares you want to redeem for at least 30 days and you must reinvest the share proceeds within 90 days after you redeem. You should obtain and read the applicable prospectus before investing in any other Goldman Sachs Fund.

You may reinvest redemption proceeds as follows:

- If you pay a CDSC upon redemption of Class A or Class C Shares and then reinvest in Class A or Class C Shares of another Goldman Sachs Fund as described above, your account will be credited with the amount of the CDSC you paid. The reinvested shares will, however, continue to be subject to a CDSC. The holding period of the shares acquired through reinvestment will include the holding period of the redeemed shares for purposes of computing the CDSC payable upon a subsequent redemption.
- The reinvestment privilege may be exercised at any time in connection with transactions in which the proceeds are reinvested at NAV in a tax-sheltered Employee Benefit Plan. In other cases, the reinvestment privilege may be exercised once per year upon receipt of a written request.
- You may be subject to tax as a result of a redemption. You should consult your tax adviser concerning the tax consequences of a redemption and reinvestment.

Can I Exchange My Investment From One Goldman Sachs Fund To Another Goldman Sachs Fund?

You may exchange shares of a Goldman Sachs Fund at NAV without the imposition of an initial sales charge or CDSC, if applicable, at the time of exchange for certain shares of another Goldman Sachs Fund. The exchange privilege may be materially modified or withdrawn at any time upon 60 days' written notice. You should contact your Intermediary to arrange for exchanges of shares of the Fund for shares of another Goldman Sachs Fund.

You should keep in mind the following factors when making or considering an exchange:

- You should obtain and carefully read the prospectus of the Goldman Sachs Fund you are acquiring before making an exchange. You should be aware that not all Goldman Sachs Funds may offer all share classes.
- Currently, the Fund does not impose any charge for exchanges although the Fund may impose a charge in the future.
- The exchanged shares of the new Goldman Sachs Fund may later be exchanged for shares of the same class of the original Fund held at the next determined NAV without the imposition of an initial sales charge or CDSC. However, if additional shares of the new Goldman Sachs Fund were purchased after the initial exchange, and that Fund's shares do not impose a sales charge or CDSC, then the applicable sales charge or CDSC of the original Fund's shares will be imposed upon the exchange of those shares.
- When you exchange shares subject to a CDSC, no CDSC will be charged at that time. However, for purposes of determining the amount of CDSC applicable to those shares acquired in the exchange, the length of time you have owned the shares will be measured from the date you acquired the original shares subject to a CDSC, and the amount and terms of the CDSC will be those applicable to the original shares acquired and will not be affected by a subsequent exchange.
- Eligible investors may exchange certain classes of shares for another class of shares of the same Fund. For further information, contact your Intermediary.
- All exchanges which represent an initial investment in a Goldman Sachs Fund must satisfy the minimum initial investment requirement of that Fund. This requirement may be waived at the discretion of the Trust. Exchanges into a Goldman Sachs Fund need not meet the traditional minimum investment requirement for that Fund if the entire balance of the original Fund account is exchanged.
- Exchanges are available only in states where exchanges may be legally made.
- It may be difficult to make telephone exchanges in times of unusual economic or market conditions.
- Goldman Sachs and SS&C may use reasonable procedures described above in "How To Sell Shares—What Do I Need To Know About Telephone Redemption Requests?" in an effort to prevent unauthorized or fraudulent telephone exchange requests.
- Normally, a telephone exchange will be made only to an identically registered account.
- Exchanges into Goldman Sachs Funds or certain share classes of Goldman Sachs Funds that are closed to new investors may be restricted.

For federal income tax purposes, an exchange from one Goldman Sachs Fund to another is treated as a redemption of the shares surrendered in the exchange, on which you may be subject to tax, followed by a purchase of shares received in the exchange. Exchanges within Employee Benefit Plan accounts will not result in capital gains or loss for federal or state income tax purposes. You should consult your tax adviser concerning the tax consequences of an exchange.

SHAREHOLDER SERVICES

Can I Arrange To Have Automatic Investments Made On A Regular Basis?

You may be able to make automatic investments in Class A and Class C Shares through your bank via ACH transfer or via bank draft or through your Intermediary each month. The minimum dollar amount for this service is \$250 for the initial investment and \$50 per month for additional investments. Forms for this option are available online at am.gs.com and from your Intermediary, or you may check the appropriate box on the account application.

Can My Distributions From The Fund Be Invested In Other Goldman Sachs Funds?

You may elect to cross-reinvest distributions paid by a Goldman Sachs Fund in shares of the same class of other Goldman Sachs Funds.

- Shares will be purchased at NAV.
- You may elect cross-reinvestment into an identically registered account or a similarly registered account provided that at least one name on the account is registered identically.
- You cannot make cross-reinvestments into a Goldman Sachs Fund unless that Fund's minimum initial investment requirement is met.
- You should obtain and read the prospectus of the Goldman Sachs Fund into which distributions are invested.

Can I Arrange To Have Automatic Exchanges Made On A Regular Basis?

You may elect to exchange automatically a specified dollar amount of Class A or Class C Shares of the Fund for shares of the same class of other Goldman Sachs Funds.

- Shares will be purchased at NAV if a sales charge had been imposed on the initial purchase.
- You may elect to exchange into an identically registered account or a similarly registered account provided that at least one name on the account is registered identically.
- Shares subject to a CDSC acquired under this program may be subject to a CDSC at the time of redemption from the Goldman Sachs Fund into which the exchange is made depending upon the date and value of your original purchase.
- Automatic exchanges are made monthly on the 15th day of each month or the first business day thereafter.
- Minimum dollar amount: \$50 per month.
- You cannot make automatic exchanges into a Goldman Sachs Fund unless that Fund's minimum initial investment requirement is met.
- You should obtain and read the prospectus of the Goldman Sachs Fund into which automatic exchanges are made.
- An exchange is considered a redemption and a purchase and therefore may be a taxable transaction.

Can I Have Systematic Withdrawals Made On A Regular Basis?

You may redeem from your Class A or Class C Share account systematically via check or ACH transfer or through your Intermediary in any amount of \$50 or more.

- It is normally undesirable to maintain a systematic withdrawal plan at the same time that you are purchasing additional Class A or Class C Shares because of the sales charges that are imposed on certain purchases of Class A Shares and because of the CDSCs that are imposed on certain redemptions of Class A and Class C Shares.
- Checks are normally mailed within two business days after your selected systematic withdrawal date of either the 15th or 25th of the month. ACH payments may take up to three business days to post to your account after your selected systematic withdrawal date between, and including, the 3rd and 26th of the month.
- Each systematic withdrawal is a redemption and therefore may be a taxable transaction.
- The CDSC applicable to Class A or Class C Shares redeemed under the systematic withdrawal plan may be waived. The Fund reserves the right to limit such redemptions, on an annual basis, to 12% each of the value of your Class C Shares and 10% of the value of your Class A Shares.

What Types Of Reports Will I Be Sent Regarding My Investment?

Intermediaries are responsible for providing any communication from the Fund to shareholders, including but not limited to, prospectuses, prospectus supplements, proxy materials and notices regarding the source of dividend payments under Section 19 of the Investment Company Act. They may charge additional fees not described in the Prospectus to their customers for such services.

You will be provided with a printed confirmation of each transaction in your account and a quarterly account statement if you invest in Class A, Class C, Investor or Class R Shares and a monthly account statement if you invest in Institutional, Service or Class R6 Shares. If your account is held through your Intermediary, you will receive this information from your Intermediary.

You will also receive an annual shareholder report and a semi-annual shareholder report. If you have consented to the delivery of a single copy of shareholder reports, prospectuses and other information to all shareholders who share the same mailing address with your account, you may revoke your consent at any time by contacting your Intermediary or Goldman Sachs Funds at the appropriate phone number or address found on the back cover of the Prospectus. The Fund will begin sending individual copies to you within 30 days after receipt of your revocation. If your account is held through an Intermediary, please contact the Intermediary to revoke your consent.

DISTRIBUTION AND SERVICE FEES

What Are The Different Distribution And/Or Service Fees Paid By The Fund's Shares?

The Trust has adopted distribution and service plans (each a "Plan") under which Class A, Class C and Class R Shares bear distribution and/or service fees paid to Goldman Sachs, some of which Goldman Sachs may pay to Intermediaries. Intermediaries seek distribution and/or servicing fee revenues to, among other things, offset the cost of servicing small and medium sized plan investors and providing information about the Fund. If the fees received by Goldman Sachs pursuant to the Plans exceed its expenses, Goldman Sachs may realize a profit from these arrangements. Goldman Sachs generally receives and pays the distribution and service fees on a quarterly basis.

Under the Plans, Goldman Sachs is entitled to a monthly fee from the Fund for distribution services equal, on an annual basis, to 0.25%, 0.75% and 0.50% of each applicable Fund's average daily net assets attributed to Class A, Class C, and Class R Shares, respectively. Because these fees are paid out of the Fund's assets on an ongoing basis, over time, these fees will increase the cost of your investment and may cost you more than paying other types of such charges.

The distribution fees are subject to the requirements of Rule 12b-1 under the Investment Company Act, and may be used (among other things) for:

- Compensation paid to and expenses incurred by Intermediaries, Goldman Sachs and their respective officers, employees and sales representatives;
- Commissions paid to Intermediaries;
- Allocable overhead;
- Telephone and travel expenses;
- Interest and other costs associated with the financing of such compensation and expenses;
- Printing of prospectuses for prospective shareholders;
- Preparation and distribution of sales literature or advertising of any type; and
- All other expenses incurred in connection with activities primarily intended to result in the sale of Class A, Class C and Class R Shares.

In connection with the sale of Class C Shares, Goldman Sachs normally begins paying the 0.75% distribution fee as an ongoing commission to Intermediaries after the shares have been held for one year. Goldman Sachs normally begins accruing the annual 0.25% and 0.50% distribution fees for the Class A and Class R Shares, respectively, as ongoing commissions to Intermediaries, immediately. Goldman Sachs generally pays the distribution fee on a quarterly basis.

CLASS C PERSONAL AND ACCOUNT MAINTENANCE SERVICES AND FEES

Under the Class C Plan, Goldman Sachs is also entitled to receive a separate fee equal on an annual basis to 0.25% of each applicable Fund's average daily net assets attributed to Class C Shares. This fee is for personal and account maintenance services, and may be used to make payments to Goldman Sachs, Intermediaries and their officers, sales representatives and employees for responding to inquiries of, and furnishing assistance to, shareholders regarding ownership of their shares or their accounts or similar services not otherwise provided on behalf of the Fund. If the fees received by Goldman Sachs pursuant to the Plan exceed its expenses, Goldman Sachs may realize a profit from this arrangement.

In connection with the sale of Class C Shares, Goldman Sachs normally begins paying the 0.25% ongoing service fee to Intermediaries after the shares have been held for one year.

SERVICE SHARES SERVICE PLAN AND SHAREHOLDER ADMINISTRATION PLAN

The Trust, on behalf of the Funds offering Service Shares, has adopted a Service Plan and Shareholder Administration Plan for Service Shares, pursuant to which Goldman Sachs and certain Intermediaries are entitled to receive payments for their services from the Trust. These payments are equal to 0.25% (annualized) for personal and account maintenance services, plus an additional 0.25% (annualized) for shareholder administration services of the average daily net assets of Service Shares of the Fund that are attributable to or held in the name of Goldman Sachs or an Intermediary for its customers. Fees for personal and account maintenance services are paid pursuant to the Service Shares' Service Plan and are subject to the requirements of Rule 12b-1 under the Investment Company Act. Because these fees are paid out of the Fund's assets on an ongoing basis, over time, these fees will increase the cost of your investment and may cost you more than paying other types of such charges.

RESTRICTIONS ON EXCESSIVE TRADING PRACTICES

Policies and Procedures on Excessive Trading Practices. In accordance with the policy adopted by the Board of Trustees, the Trust discourages frequent purchases and redemptions of Fund shares and does not permit market timing or other excessive trading practices. Purchases and exchanges should be made with a view to longer-term investment purposes only that are consistent with the investment policies and practices of the respective Fund. Excessive, short-term (market timing) trading practices may disrupt portfolio management strategies, increase brokerage and administrative costs, harm Fund performance and result in dilution in the value of Fund shares held by longer-term shareholders. The Trust and Goldman Sachs reserve the right to reject or restrict purchase or exchange requests from any investor. The Trust and Goldman Sachs will not be liable for any loss resulting from rejected purchase or exchange orders. To minimize harm to the Trust and its shareholders (or Goldman Sachs), the Trust (or Goldman Sachs) will exercise this right if, in the Trust's (or Goldman Sachs') judgment, an investor has a history of excessive trading or if an investor's trading, in the

judgment of the Trust (or Goldman Sachs), has been or may be disruptive to the Fund. In making this judgment, trades executed in multiple accounts under common ownership or control may be considered together to the extent they can be identified. No waivers of the provisions of the policy established to detect and deter market timing and other excessive trading activity are permitted that would harm the Trust or its shareholders or would subordinate the interests of the Trust or its shareholders to those of Goldman Sachs or any affiliated person or associated person of Goldman Sachs.

As a deterrent to excessive trading, many foreign equity securities held by the Goldman Sachs Funds are priced by an independent pricing service using fair valuation. For more information on fair valuation, please see “How To Buy Shares—How Are Shares Priced?”

Pursuant to the policy adopted by the Board of Trustees of the Trust, Goldman Sachs has developed criteria that it uses to identify trading activity that may be excessive. Excessive trading activity in the Fund is measured by the number of “round trip” transactions in a shareholder’s account. A “round trip” includes a purchase or exchange into the Fund followed or preceded by a redemption or exchange out of the same Fund. If the Fund detects that a shareholder has completed two or more round trip transactions in a single Fund within a rolling 90-day period, the Fund may reject or restrict subsequent purchase or exchange orders by that shareholder permanently. In addition, the Fund may, in its sole discretion, permanently reject or restrict purchase or exchange orders by a shareholder if the Fund detects other trading activity that is deemed to be disruptive to the management of the Fund or otherwise harmful to the Fund. For purposes of these transaction surveillance procedures, the Fund may consider trading activity in multiple accounts under common ownership, control, or influence. A shareholder that has been restricted from participation in the Fund pursuant to this policy will be allowed to apply for re-entry after one year. A shareholder applying for re-entry must provide assurances acceptable to the Fund that the shareholder will not engage in excessive trading activities in the future.

Goldman Sachs may modify its surveillance procedures and criteria from time to time without prior notice regarding the detection of excessive trading or to address specific circumstances. Goldman Sachs will apply the criteria in a manner that, in Goldman Sachs’ judgment, will be uniform.

Fund shares may be held through omnibus arrangements maintained by Intermediaries, such as broker-dealers, investment advisers and insurance companies. In addition, Fund shares may be held in omnibus Employee Benefit Plans, Eligible Fee-Based Programs and other group accounts. Omnibus accounts include multiple investors and such accounts typically provide the Fund with a net purchase or redemption request on any given day where the purchases and redemptions of Fund shares by the investors are netted against one another. The identity of individual investors whose purchase and redemption orders are aggregated are ordinarily not tracked by the Fund on a regular basis. A number of these Intermediaries may not have the capability or may not be willing to apply the Fund’s market timing policies. While Goldman Sachs may monitor share turnover at the omnibus account level, the Fund’s ability to monitor and detect market timing by shareholders in these omnibus accounts may be limited in certain circumstances, and certain of these Intermediaries may charge the Fund a fee for providing certain shareholder financial information requested as part of the Fund’s surveillance process. The netting effect makes it more difficult to identify, locate and eliminate market timing activities. In addition, those investors who engage in market timing and other excessive trading activities may employ a variety of techniques to avoid detection. There can be no assurance that the Fund and Goldman Sachs will be able to identify all those who trade excessively or employ a market timing strategy, and curtail their trading in every instance. If necessary, the Trust may prohibit additional purchases of Fund shares by an Intermediary or by certain customers of the Intermediary. Intermediaries may also monitor their customers’ trading activities in the Fund. The criteria used by Intermediaries to monitor for excessive trading may differ from the criteria used by the Fund. If an Intermediary fails to cooperate in the implementation or enforcement of the Trust’s excessive trading policies, the Trust may take certain actions including terminating the relationship.

Taxation

As with any investment, you should consider how your investment in the Fund will be taxed. The tax information below is provided as general information. More tax information is available in the SAI. You should consult your tax adviser about the federal, state, local or foreign tax consequences of your investment in the Fund. Except as otherwise noted, the tax information provided assumes that you are a U.S. citizen or resident.

Unless your investment is through an Employee Benefit Plan or other tax-advantaged account, you should carefully consider the possible tax consequences of Fund distributions and the sale of your Fund shares.

DISTRIBUTIONS

The Fund contemplates declaring as dividends each year all or substantially all of its taxable income. Distributions you receive from the Fund are generally subject to federal income tax, and may also be subject to state or local taxes. This is true whether you reinvest your distributions in additional Fund shares or receive them in cash. For federal tax purposes, the Funds' distributions attributable to net investment income and short-term capital gains are taxable to you as ordinary income, while distributions of long-term capital gains are taxable to you as long-term capital gains, no matter how long you have owned your Fund shares.

Under current provisions of the Code, the maximum individual rate applicable to long-term capital gains is generally either 15% or 20%, depending on whether the individual's income exceeds certain threshold amounts. Also, Fund distributions to noncorporate shareholders attributable to dividends received by the Funds from U.S. and certain qualified foreign corporations will generally be taxed at the long-term capital gain rate, as long as certain other requirements are met. For these lower rates to apply, the non-corporate shareholder must own the relevant Fund shares for at least 61 days during the 121-day period beginning 60 days before the Fund's ex-dividend date. The amount of a Fund's distributions that would otherwise qualify for this favorable tax treatment will be reduced as a result of a Fund's securities lending activities or high portfolio turnover rate.

A percentage of the Funds' dividends paid to corporate shareholders may be eligible for the corporate dividends-received deduction. This percentage may, however, be reduced as a result of a Fund's securities lending activities or by a high portfolio turnover rate. Character and tax status of all distributions will be available to shareholders after the close of each calendar year.

Distributions in excess of a Fund's current and accumulated earnings and profits are treated as a tax-free return of your investment to the extent of your basis in the shares, and generally as capital gain thereafter. A return of capital, which for tax purposes is treated as a return of your investment, reduces your basis in shares, thus reducing any loss or increasing any gain on a subsequent taxable disposition of shares. A distribution will reduce the Fund's NAV per share and may be taxable to you as ordinary income or capital gain even though, from an economic standpoint, the distribution may constitute a return of capital.

A Fund's transactions in derivatives (such as futures contracts and swaps) will be subject to special tax rules, the effect of which may be to accelerate income to the Fund, defer losses to the Fund, cause adjustments in the holding periods of the Fund's securities and convert short-term capital losses into long-term capital losses. These rules could therefore affect the amount, timing and character of distributions to you. A Fund's use of derivatives may result in the Fund realizing more short-term capital gains and ordinary income subject to tax at ordinary income tax rates than it would if it did not use derivatives.

An additional 3.8% Medicare tax is imposed on certain net investment income (including ordinary dividends and capital gain distributions received from the Fund and net gains from redemptions or other taxable dispositions of Fund shares) of U.S. individuals, estates and trusts to the extent that such person's "modified adjusted gross income" (in the case of an individual) or "adjusted gross income" (in the case of an estate or trust) exceeds certain threshold amounts.

Although distributions are generally treated as taxable to you in the year they are paid, distributions declared in October, November or December but paid in January are taxable as if they were paid in December.

Each Fund may be subject to foreign withholding or other foreign taxes on income or gain from certain foreign securities. In general, each Fund may deduct these taxes in computing its taxable income. Rather than deducting these foreign taxes, each Fund may make an election to treat a proportionate amount of those taxes as constituting a distribution to each shareholder, which would generally allow you either (i) to credit (subject to certain holding period and other limitations) that proportionate amount of taxes against your U.S. Federal income tax liability as a foreign tax credit or (ii) to take that amount as an itemized deduction.

If you buy shares of the Fund before it makes a distribution, the distribution will be taxable to you even though it may actually be a return of a portion of your investment. This is known as "buying into a dividend."

SALES AND EXCHANGES

Your sale of Fund shares is a taxable transaction for federal income tax purposes, and may also be subject to state and local taxes. For tax purposes, the exchange of your Fund shares for shares of a different Goldman Sachs Fund is the same as a sale. When you sell your shares, you will generally recognize a capital gain or loss in an amount equal to the difference between your adjusted tax basis in the shares and the amount received. Generally, this capital gain or loss is long-term or short-term depending on whether your holding period exceeds one year, except that any loss realized on shares held for six months or less will be treated as a long-term capital loss to the extent of any long-term capital gain dividends that were received on the shares. Additionally, any loss realized on a sale, exchange or redemption of shares of the Fund may be disallowed under “wash sale” rules to the extent the shares disposed of are replaced with other shares of that Fund within a period of 61 days beginning 30 days before and ending 30 days after the shares are disposed of, such as pursuant to a dividend reinvestment in shares of that Fund. If disallowed, the loss will be reflected in an adjustment to the basis of the shares acquired.

OTHER INFORMATION

When you open your account, you should provide your Social Security Number or tax identification number on your account application. By law, the Fund must withhold 24% of your taxable distributions and any redemption proceeds if you do not provide your correct taxpayer identification number, or certify that it is correct, or if the Internal Revenue Service (“IRS”) instructs the Fund to do so.

The Fund is required to report to you and the IRS annually on Form 1099-B not only the gross proceeds of Fund shares you sell or redeem but also, for shares purchased on or after January 1, 2012, their cost basis. **Cost basis will be calculated using the Fund’s default method of average cost, unless you instruct the Fund to use a different methodology.** If you would like to use the average cost method of calculation, no action is required. To elect an alternative method, you should contact Goldman Sachs Funds at the address or phone number on the back cover of the Prospectus. If your account is held with an Intermediary, contact your representative with respect to reporting of cost basis and available elections for your account.

You should carefully review the cost basis information provided by the Fund and make any additional basis, holding period or other adjustments that are required when reporting these amounts on your federal income tax returns.

Non-U.S. investors will generally be subject to U.S. withholding tax with respect to dividends received from a Fund and may be subject to estate tax with respect to their Fund shares. However, withholding is generally not required on properly designated distributions to non-U.S. investors of long-term capital gains. Designated distributions of certain qualified interest income and short-term capital gains paid to non-U.S. investors are generally not subject to withholding. Although this designation will generally be made by the Funds for distributions of long-term and short-term capital gains, the Funds do not anticipate making any qualified interest income designations. Therefore, all distributions of interest income will generally be subject to withholding when paid to non-U.S. investors. More information about U.S. taxation and non-U.S. investors is included in the SAI.

The Funds are required to withhold U.S. tax (at a 30% rate) on payments of dividends made to certain non-U.S. entities that fail to comply (or be deemed compliant) with extensive reporting and withholding requirements designed to inform the U.S. Department of the Treasury of U.S.-owned foreign investment accounts. Shareholders may be requested to provide additional information to enable the Fund to determine whether withholding is required.

Appendix A

Additional Information on Portfolio Risks, Securities and Techniques

A. GENERAL PORTFOLIO RISKS

The Funds will be subject to the risks associated with equity investments. “Equity investments” may include common stocks, preferred stocks, interests in REITs, convertible debt obligations, convertible preferred stocks, equity interests in trusts, partnerships, joint ventures, limited liability companies and similar enterprises, other investment companies (including ETFs), warrants, stock purchase rights, Depositary Receipts and synthetic and derivative instruments (such as participation notes, swaps, options and futures contracts) that have economic characteristics similar to equity securities. In general, the values of equity investments fluctuate in response to the activities of individual companies and in response to general market and economic conditions. Accordingly, the values of the equity investments that a Fund holds may decline over short or extended periods. The stock markets tend to be cyclical, with periods when stock prices generally rise and periods when prices generally decline. This volatility means that the value of your investment in a Fund may increase or decrease. In recent years, certain stock markets have experienced substantial price volatility. To the extent a Fund’s net assets decrease or increase in the future due to price volatility or share redemption or purchase activity, the Fund’s expense ratio may correspondingly increase or decrease from the expense ratio disclosed in the Prospectus.

To the extent a Fund invests in pooled investment vehicles (including investment companies and ETFs), partnerships and REITs, the Fund will be affected by the investment policies, practices and performance of such entities in direct proportion to the amount of assets the Fund invests therein.

To the extent that a Fund invests in fixed income securities, that Fund will also be subject to the risks associated with its fixed income securities. These risks include interest rate risk, credit/default risk and call/extension risk. In general, interest rate risk involves the risk that when interest rates decline, the market value of fixed income securities tends to increase (although many mortgage-related securities will have less potential than other debt securities for capital appreciation during periods of declining rates). Conversely, when interest rates increase, the market value of fixed income securities tends to decline. Credit/default risk involves the risk that an issuer or guarantor could default on its obligations, and a Fund will not recover its investment. Call risk and extension risk are normally present in mortgage-backed securities and asset-backed securities. For example, homeowners have the option to prepay their mortgages. Therefore, the duration of a security backed by home mortgages can either shorten (call risk) or lengthen (extension risk). In general, if interest rates on new mortgage loans fall sufficiently below the interest rates on existing outstanding mortgage loans, the rate of prepayment would be expected to increase. Conversely, if mortgage loan interest rates rise above the interest rates on existing outstanding mortgage loans, the rate of prepayment would be expected to decrease. In either case, a change in the prepayment rate can result in losses to investors. The same would be true of asset-backed securities such as securities backed by car loans.

A rising interest rate environment could cause the value of a Fund’s fixed income securities to decrease, and fixed income markets to experience increased volatility in addition to heightened levels of liquidity risk. Additionally, decreases in the value of fixed income securities could lead to increased shareholder redemptions, which could impair a Fund’s ability to achieve its investment objective. The risks associated with changing interest rates may have unpredictable effects on the markets and the Funds’ investments.

The Funds may invest in non-investment grade fixed income securities (commonly known as “junk bonds”), which are rated below investment grade (or determined to be of comparable credit quality, if not rated) at the time of purchase and are therefore considered speculative. Because non-investment grade fixed income securities are issued by issuers with low credit ratings, they pose a greater risk of default than investment grade securities.

The Investment Adviser will not consider the portfolio turnover rate a limiting factor in making investment decisions for a Fund. A high rate of portfolio turnover (100% or more) involves correspondingly greater expenses which must be borne by a Fund and its shareholders, and is also likely to result in higher short-term capital gains taxable to certain shareholders. The portfolio turnover rate is calculated by dividing the lesser of the dollar amount of sales or purchases of portfolio securities by the average monthly value of a Fund’s portfolio securities, excluding securities having a maturity at the date of purchase of one year or less. See “Financial Highlights” in Appendix B for a statement of the Funds’ historical portfolio turnover rates.

The Funds may, from time to time, enter into arrangements with certain brokers or other counterparties that require the segregation of collateral. For operational, cost or other reasons, when setting up arrangements relating to the execution/clearing of trades, a Fund may choose to select a segregation model which may not be the most protective option available in the case of a default by a broker or counterparty.

The following sections provide further information on certain types of securities and investment techniques that may be used by the Funds, including their associated risks. Additional information is provided in the SAI, which is available upon request. Among other things, the SAI describes certain fundamental investment restrictions that cannot be changed without shareholder approval. You should

note, however, that all investment objectives and all investment policies not specifically designated as fundamental are non-fundamental, and may be changed without shareholder approval. If there is a change in a Fund's investment objective, you should consider whether that Fund remains an appropriate investment in light of your then current financial position and needs.

B. OTHER PORTFOLIO RISKS

Risks of Investing in Mid-Capitalization and Small-Capitalization Companies. Each Fund may, to the extent consistent with its investment policies, invest in mid- and small-capitalization companies. Investments in mid- and small-capitalization companies involve greater risk and portfolio price volatility than investments in larger capitalization stocks. Among the reasons for the greater price volatility of these investments are the less certain growth prospects of smaller firms and the lower degree of liquidity in the markets for such securities. Mid- and small-capitalization companies may be thinly traded and may have to be sold at a discount from current market prices or in small lots over an extended period of time. In addition, these securities are subject to the risk that during certain periods the liquidity of particular issuers or industries, or all securities in particular investment categories, will shrink or disappear suddenly and without warning as a result of adverse economic or market conditions, or adverse investor perceptions whether or not accurate. Because of the lack of sufficient market liquidity, a Fund may incur losses because it will be required to effect sales at a disadvantageous time and only then at a substantial drop in price. Mid- and small-capitalization companies include “unseasoned” issuers that do not have an established financial history; often have limited product lines, markets or financial resources; may depend on or use a few key personnel for management; and may be susceptible to losses and risks of bankruptcy. Mid- and small-capitalization companies may be operating at a loss or have significant variations in operating results; may be engaged in a rapidly changing business with products subject to a substantial risk of obsolescence; may require substantial additional capital to support their operations, to finance expansion or to maintain their competitive position; and may have substantial borrowings or may otherwise have a weak financial condition. In addition, these companies may face intense competition, including competition from companies with greater financial resources, more extensive development, manufacturing, marketing, and other capabilities, and a larger number of qualified managerial and technical personnel. Transaction costs for these investments are often higher than those of larger capitalization companies. Investments in mid- and small-capitalization companies may be more difficult to price precisely than other types of securities because of their characteristics and lower trading volumes.

Risks of Foreign Investments. The Funds will make foreign investments. Foreign investments involve special risks that are not typically associated with U.S. dollar denominated or quoted securities of U.S. issuers. Foreign investments may be affected by changes in currency rates, changes in foreign or U.S. laws or restrictions applicable to such investments and changes in exchange control regulations (e.g., currency blockage). A decline in the exchange rate of the currency (i.e., weakening of the currency against the U.S. dollar) in which a portfolio security is quoted or denominated relative to the U.S. dollar would reduce the value of the portfolio security. In addition, if the currency in which a Fund receives dividends, interest or other payments declines in value against the U.S. dollar before such income is distributed as dividends to shareholders or converted to U.S. dollars, the Fund may have to sell portfolio securities to obtain sufficient cash to pay such dividends.

Certain foreign markets may rely heavily on particular industries or foreign capital and are more vulnerable to diplomatic developments, the imposition of economic sanctions against a particular country or countries, organizations, entities and/or individuals, changes in international trading patterns, trade barriers, and other protectionist or retaliatory measures. International trade barriers or economic sanctions against foreign countries, organizations, entities and/or individuals may adversely affect a Fund's foreign holdings or exposures. The type and severity of sanctions and other similar measures, including counter sanctions and other retaliatory actions, that may be imposed could vary broadly in scope, and their impact is impossible to predict. These types of measures may include, but are not limited to, banning a sanctioned country from global payment systems that facilitate cross-border payments, restricting the settlement of securities transactions by certain investors, and freezing the assets of particular countries, entities, or persons. The imposition of sanctions and other similar measures could, among other things, cause a decline in the value and/or liquidity of securities issued by the sanctioned country or companies located in or economically tied to the sanctioned country, downgrades in the credit ratings of the sanctioned country or companies located in or economically tied to the sanctioned country, devaluation of the sanctioned country's currency, and increased market volatility and disruption in the sanctioned country and throughout the world. Sanctions and other similar measures could limit or prevent the Fund from buying and selling securities (in the sanctioned country and other markets), significantly delay or prevent the settlement of securities transactions, and significantly impact the Fund's liquidity and performance.

Brokerage commissions, custodial services and other costs relating to investment in international securities markets generally are more expensive than in the United States. In addition, clearance and settlement procedures may be different in foreign countries and, in certain markets, such procedures have been unable to keep pace with the volume of securities transactions, thus making it difficult to conduct such transactions.

Foreign issuers are not generally subject to uniform accounting, auditing and financial reporting standards comparable to those applicable to U.S. issuers. There may be less publicly available information about a foreign issuer than about a U.S. issuer. In addition, there is generally less government regulation of foreign markets, companies and securities dealers than in the United States, and the

legal remedies for investors may be more limited than the remedies available in the United States. Foreign securities markets may have substantially less volume than U.S. securities markets and securities of many foreign issuers are less liquid and more volatile than securities of comparable domestic issuers. Furthermore, with respect to certain foreign countries, there is a possibility of nationalization, expropriation or confiscatory taxation, imposition of withholding or other taxes on dividend or interest payments (or, in some cases, capital gains distributions), limitations on the removal of funds or other assets from such countries, and risks of political or social instability or diplomatic developments which could adversely affect investments in those countries.

Certain foreign investments may become less liquid in response to social, political or market developments or adverse investor perceptions, or become illiquid after purchase by the Fund, particularly during periods of market turmoil. Certain foreign investments may become illiquid when, for instance, there are few, if any, interested buyers and sellers or when dealers are unwilling to make a market for certain securities. When a Fund holds illiquid investments, its portfolio may be harder to value, especially in changing markets.

If a Fund focuses its investments in one or a few countries and currencies, the Fund may be subjected to greater risks than if a Fund's assets were not geographically focused.

Investments in foreign securities may take the form of sponsored and unsponsored ADRs, GDRs, EDRs, TDRs or other similar instruments representing securities of foreign issuers. ADRs, GDRs, EDRs and TDRs represent the right to receive securities of foreign issuers deposited in a bank or other depository. ADRs and certain GDRs are traded in the United States. GDRs may be traded in either the United States or in foreign markets. EDRs and TDRs are traded primarily outside the United States. Prices of ADRs are quoted in U.S. dollars. EDRs, GDRs and TDRs are not necessarily quoted in the same currency as the underlying security.

Risks of Sovereign Debt. Investment in sovereign debt obligations by a Fund involves risks not present in debt obligations of corporate issuers. The issuer of the debt or the governmental authorities that control the repayment of the debt may be unable or unwilling to repay principal or interest when due in accordance with the terms of such debt, and a Fund may have limited recourse to compel payment in the event of a default. Periods of economic uncertainty may result in the volatility of market prices of sovereign debt, and in turn a Fund's NAV, to a greater extent than the volatility inherent in debt obligations of U.S. issuers.

A sovereign debtor's willingness or ability to repay principal and pay interest in a timely manner may be affected by, among other factors, its cash flow situation, the extent of its foreign currency reserves, the availability of sufficient foreign exchange on the date a payment is due, the relative size of the debt service burden to the economy as a whole, the sovereign debtor's policy toward international lenders, and the political constraints to which a sovereign debtor may be subject.

Risks of Emerging Countries. The Funds may invest in securities of issuers located in, or otherwise economically tied to, emerging countries. The risks of foreign investment are heightened when the issuer is located in an emerging country. Emerging countries are generally located in Africa, Asia, the Middle East, Eastern and Central Europe, and Central and South America. A Fund's purchase and sale of portfolio securities in certain emerging countries may be constrained by limitations relating to daily changes in the prices of listed securities, periodic trading or settlement volume and/or limitations on aggregate holdings of foreign investors. Such limitations may be computed based on the aggregate trading volume by or holdings of a Fund, the Investment Adviser, its affiliates and their respective clients and other service providers. A Fund may not be able to sell securities in circumstances where price, trading or settlement volume limitations have been reached.

Foreign investment in the securities markets of certain emerging countries is restricted or controlled to varying degrees which may limit investment in such countries or increase the administrative costs of such investments. For example, certain Asian countries require governmental approval prior to investments by foreign persons or limit investment by foreign persons to only a specified percentage of an issuer's outstanding securities or a specific class of securities which may have less advantageous terms (including price) than securities of the issuer available for purchase by nationals. In addition, certain countries may restrict or prohibit investment opportunities in issuers or industries deemed important to national interests. Such restrictions may affect the market price, liquidity and rights of securities that may be purchased by a Fund. The repatriation of investment income, capital or the proceeds of securities sales from certain emerging countries is subject to restrictions such as the need for governmental consents, which may make it difficult for a Fund to invest in such emerging countries. A Fund could be adversely affected by delays in, or a refusal to grant, any required governmental approval for such repatriation. In situations where a country restricts direct investment in securities (which may occur in certain Asian and other countries), a Fund may invest in such countries through other investment funds in such countries.

Emerging market countries may have more or less government regulation and generally do not impose as extensive and frequent accounting, auditing, financial and other reporting requirements as the securities markets of more developed countries. The degree of cooperation between issuers in emerging and frontier market countries with foreign and U.S. financial regulators may vary significantly. Accordingly, regulators may not have sufficient access to audit and oversee issuers, and there could be less information available about issuers in certain emerging market countries. As a result, the Investment Adviser's ability to evaluate local companies or their potential impact on the Fund's performance could be inhibited.

Many emerging countries have experienced currency devaluations and substantial (and, in some cases, extremely high) rates of inflation. Other emerging countries have experienced economic recessions. These circumstances have had a negative effect on the economies and securities markets of such emerging countries. Economies in emerging countries generally are dependent heavily upon commodity prices and international trade and, accordingly, have been and may continue to be affected adversely by the economies of their trading partners, trade barriers, exchange controls, managed adjustments in relative currency values and other protectionist measures imposed or negotiated by the countries with which they trade.

Many emerging countries are subject to a substantial degree of economic, political and social instability. Governments of some emerging countries are authoritarian in nature or have been installed or removed as a result of military coups, while governments in other emerging countries have periodically used force to suppress civil dissent. Disparities of wealth, the pace and success of democratization, and ethnic, religious and racial disaffection, among other factors, have also led to social unrest, violence and/or labor unrest in some emerging countries. Unanticipated political or social developments may result in sudden and significant investment losses. Investing in emerging countries involves greater risk of loss due to expropriation, nationalization, confiscation of assets and property or the imposition of restrictions on foreign investments and on repatriation of capital invested. As an example, in the past, some Eastern European governments have expropriated substantial amounts of private property, and many claims of the property owners have never been fully settled. There is no assurance that similar expropriations will not occur in other countries.

A Fund's investment in emerging countries may also be subject to withholding or other taxes, which may be significant and may reduce the return to the Fund from an investment in issuers in such countries.

Settlement procedures in emerging countries are frequently less developed and reliable than those in the United States and may involve a Fund's delivery of securities before receipt of payment for their sale. In addition, significant delays may occur in certain markets in registering the transfer of securities. Settlement or registration problems may make it more difficult for a Fund to value its portfolio securities and could cause the Fund to miss attractive investment opportunities, to have a portion of its assets uninvested or to incur losses due to the failure of a counterparty to pay for securities the Fund has delivered or the Fund's inability to complete its contractual obligations because of theft or other reasons.

The creditworthiness of the local securities firms used by a Fund in emerging countries may not be as sound as the creditworthiness of firms used in more developed countries. As a result, the Fund may be subject to a greater risk of loss if a securities firm defaults in the performance of its responsibilities.

The small size and inexperience of the securities markets in certain emerging countries and the limited volume of trading in securities in those countries may make a Fund's investments in such countries less liquid and more volatile than investments in countries with more developed securities markets (such as the United States, Japan and most Western European countries). A Fund's investments in emerging countries are subject to the risk that the liquidity of a particular investment, or investments generally, in such countries will shrink or disappear suddenly and without warning as a result of adverse economic, market or political conditions or adverse investor perceptions, whether or not accurate. Because of the lack of sufficient market liquidity, a Fund may incur losses because it will be required to effect sales at a disadvantageous time and only then at a substantial drop in price. Investments in emerging countries may be more difficult to value precisely because of the characteristics discussed above and lower trading volumes.

A Fund's use of foreign currency management techniques in emerging countries may be limited. The Investment Adviser anticipates that a significant portion of the Funds' currency exposure in emerging countries may not be covered by those techniques.

Risks Specific to Greater China. Investments in Greater China are generally subject to a higher degree of risk than investments in the U.S. and other developed countries. The economies of Greater China—which includes Mainland China, Hong Kong and Taiwan—differ from the U.S. economy in terms of legal and regulatory controls, the rate of growth of gross domestic product, the rate of inflation, capital reinvestment, resource self-sufficiency and balance of payments position, among other factors. Greater China is also subject to heightened risk of adverse environmental events and natural disasters, including earthquakes, droughts, and floods, and may demonstrate economic sensitivity to such events.

Mainland China. Investments in Mainland China are subject to the risks associated with greater governmental control over the economy, political and legal uncertainties and currency fluctuations or blockage. In particular, the Chinese Communist Party exercises significant control over economic growth in Mainland China through the allocation of resources, controlling payment of foreign currency-denominated obligations, setting monetary policy and providing preferential treatment to particular industries or companies.

Because the local legal system is still developing, it may be more difficult to obtain or enforce judgments with respect to investments in Mainland China. Chinese companies may not be subject to the same disclosure, accounting, auditing and financial reporting standards and practices as U.S. companies. Thus, there may be less information publicly available about Chinese companies than about most U.S. companies. Government supervision and regulation of Chinese stock exchanges, currency markets, trading systems and brokers may be more or less rigorous than that present in the U.S. The procedures and rules governing transactions and custody in

Mainland China also may involve delays in payment, delivery or recovery of money or investments. The imposition of tariffs or other trade barriers by the U.S. or other foreign governments on exports from Mainland China and any retaliatory measures taken by the Chinese government may also have an adverse impact on Chinese issuers and China's economy as a whole.

Foreign investments in Mainland China are somewhat restricted. Securities listed on the Shanghai and Shenzhen Stock Exchanges are divided into two classes of shares: A shares and B Shares. Ownership of A Shares is restricted to Chinese investors, Qualified Foreign Institutional Investors ("QFIIs") who have obtained a QFII license, and participants in the Shanghai-Hong Kong and Shenzhen-Hong Kong Stock Connect programs ("Stock Connect"). B shares may be owned by Chinese and foreign investors. The Funds may obtain exposure to the A share market in the People's Republic of China ("PRC") by investing directly in A shares through participation in Stock Connect, by investing in participatory notes issued by banks, broker-dealers and other financial institutions, or through other structured or derivative instruments (including Variable Interest Entities ("VIEs")) that are designed to replicate, or otherwise provide exposure to, the performance of A shares of Chinese companies. The Funds may also invest directly in B shares on the Shanghai and Shenzhen Stock Exchanges.

As a result of investing in the PRC, a Fund may be subject to withholding and various other taxes imposed by the PRC, including value added taxes and withholding taxes levied on cash dividends, distributions and interest payments from companies listed in the PRC to foreign investors, unless the withholding tax can be reduced by an applicable income tax treaty.

The tax law and regulations of the PRC are constantly changing, and they may be changed with retrospective effect to the advantage or disadvantage of shareholders. Any changes in the tax law and regulations of the PRC, future clarifications thereof, and/or subsequent retroactive enforcement by the PRC tax authorities may result in a loss which could be material to the Fund. There is a risk the PRC tax authorities may withdraw any tax exemptions that may be applicable to the Fund in the future and seek to collect taxes realized on the sale of investments without giving any prior notice. If any such tax exemptions are withdrawn, any taxes may be directly borne by or indirectly passed on to a Fund and may result in a substantial impact to its net asset value. As with any net asset value adjustment, shareholders may be advantaged or disadvantaged depending on when the shareholders purchased and/or sold their shares of a Fund. There will be no retrospective restatement of a Fund's net asset value. The interpretation and applicability of the tax law and regulations by tax authorities may not be as consistent and transparent as those of more developed nations, and may vary from region to region. It should also be noted that any provision for taxation made by the Investment Adviser may be excessive or inadequate to meet final tax liabilities. Consequently, shareholders may be advantaged or disadvantaged depending upon the final tax liabilities, the level of provision and when they purchased and/or sold their shares of a Fund.

Hong Kong. Hong Kong is a Special Administrative Region of the People's Republic of China. Since Hong Kong reverted to Chinese sovereignty in 1997, it has been governed by the Basic Law, a "quasi-constitution." The Basic Law guarantees a high degree of autonomy in certain matters, including economic matters, until 2047. Attempts by the government of the People's Republic of China to exert greater control over Hong Kong's economic, political or legal structures or its existing social policy, could negatively affect investor confidence in Hong Kong, which in turn could negatively affect markets and business performance.

In addition, the Hong Kong dollar trades within a fixed trading band rate to (or is "pegged" to) the U.S. dollar. This fixed exchange rate has contributed to the growth and stability of the economy, but could be discontinued. It is uncertain what effect any discontinuance of the currency peg and the establishment of an alternative exchange rate system would have on the Hong Kong economy.

Taiwan. The prospect of political reunification of the People's Republic of China and Taiwan has engendered hostility between the two regions' governments. This situation poses a significant threat to Taiwan's economy, as heightened conflict could potentially lead to distortions in Taiwan's capital accounts and have an adverse impact on the value of investments throughout Greater China.

Investing through Stock Connect. The Funds may invest in eligible securities ("Stock Connect Securities") listed and traded on the Shanghai and Shenzhen Stock Exchanges through Stock Connect. Stock Connect is a mutual market access program that allows Chinese investors to trade Stock Connect Securities listed on the Hong Kong Stock Exchange via Chinese brokers and non-Chinese investors (such as the Funds) to purchase China A Shares via brokers in Hong Kong. Although Stock Connect allows non-Chinese investors to trade Chinese equities without obtaining a special license (in contrast to earlier direct investment programs), purchases of securities through Stock Connect are subject to market-wide trading volume and market cap quota limitations, which may prevent a Fund from purchasing Stock Connect Securities when it is otherwise desirable to do so.

The eligibility of China A Shares to be accessed through Stock Connect is subject to change by Chinese regulators. Only certain securities are accessible through Stock Connect and such eligibility may be revoked at any time, resulting in a Fund's inability to add to (but not subtract from) any existing positions in Stock Connect Securities. There can be no assurance that further regulations will not affect the availability of securities in the program or impose other limitations.

Because Stock Connect is relatively new, its effects on the market for trading China A Shares are uncertain. In addition, the trading, settlement and information technology systems used to operate Stock Connect are relatively new and are continuing to evolve. In the event that these systems do not function properly, trading through Stock Connect could be disrupted.

Stock Connect is subject to regulation by both Hong Kong and Mainland China. Regulators in both jurisdictions may suspend or terminate Stock Connect trading in certain circumstances. In addition, Chinese regulators have previously suspended trading in Chinese issuers (or permitted such issuers to suspend trading) during market disruptions and may do so again in the event of future disruptions and/or various company-specific events. Such suspensions may be widespread and may adversely affect a Fund's ability to trade Stock Connect Securities during periods of heightened market volatility. There can be no assurance that any such suspensions or terminations will not be exercised against certain market participants.

Stock Connect transactions are not subject to the investor protection programs of the Hong Kong, Shanghai or Shenzhen Stock Exchanges, though established Hong Kong law may provide other remedies as to any default by a Hong Kong broker. In China, Stock Connect Securities are held on behalf of ultimate investors (such as a Fund) by the Hong Kong Securities Clearing Company Limited ("HKSCC") as nominee. Although Chinese regulators have affirmed that ultimate investors hold a beneficial interest in Stock Connect Securities, the legal mechanisms available to beneficial owners for enforcing their rights are untested and therefore may expose ultimate investors to risks. Further, Chinese law surrounding the rights of beneficial owners of securities is relatively underdeveloped and courts in China have relatively limited experience in applying the concept of beneficial ownership. As the law continues to evolve, there is a risk that a Fund's ability to enforce its ownership rights may be uncertain, which could subject the Fund to significant losses.

A Fund may be unable to participate in corporate actions affecting Stock Connect Securities due to time constraints or for other operational reasons. In addition, a Fund will not be able to vote in shareholders' meetings except through HKSCC and will not be able to attend shareholders' meetings.

Trades in Stock Connect Securities are subject to certain pre-trade requirements and checks designed to confirm that, for purchases, there is sufficient Stock Connect quota to complete the purchase, and, for sales, the seller has sufficient Stock Connect Securities to complete the sale. Investment quota limitations are subject to change. In addition, these pre-trade requirements may, in practice, limit the number of brokers that a Fund may use to execute trades. While a Fund may use special segregated accounts in lieu of pre-trade requirements and checks, some market participants in Stock Connect Securities, either in China or others investing through Stock Connect or other foreign direct investment programs, have yet to fully implement information technology systems necessary to complete trades involving shares in such accounts in a timely manner. Market practice with respect to special segregated accounts is continuing to evolve.

A Fund will not be able to buy or sell Stock Connect Securities when either the Chinese and Hong Kong markets are closed for trading, and the Chinese and/or Hong Kong markets may be closed for trading for extended periods of time because of local holidays. When the Chinese and Hong Kong markets are not both open on the same day, a Fund may be unable to buy or sell a Stock Connect Security at the desired time. Stock Connect trades are settled in RMB, the official Chinese currency, and investors must have timely access to a reliable supply of RMB in Hong Kong, which cannot be guaranteed.

The Funds and the Investment Adviser (on behalf of itself and its other clients) will also be subject to restrictions on trading (including restriction on retention of proceeds) in China A Shares as a result of their interest in China A Shares and are responsible for compliance with all notifications, reporting and other applicable requirements in connection with such interests. For example, under current Chinese law, once an investor (and, potentially, related investors) holds up to 5% of the shares of a Chinese-listed company, the investor is required to disclose its interest within three days in accordance with applicable regulations and during the reporting period it cannot trade the shares of that company. The investor is also required to disclose any change in its holdings and comply with applicable trading restrictions in accordance with Chinese law.

Trades in Stock Connect Securities may also be subject to various fees, taxes and market charges imposed by Chinese market participants and regulatory authorities. These fees may result in greater trading expenses, which could be borne by a Fund.

The risks related to investments in China A Shares through Stock Connect are heightened to the extent that the Fund invests in China A Shares listed on the Science and Technology Innovation Board of the Shanghai Stock Exchange ("STAR Market") and/or the ChiNext Market of the Shenzhen Stock Exchange ("ChiNext Market"). Listed companies on the STAR Market and ChiNext Market are usually of an emerging nature with smaller operating scale. They are subject to higher fluctuation in stock prices and liquidity. It may be more common and faster for companies listed on the STAR Market and ChiNext Market to delist.

Investing through VIEs. A Fund may obtain exposure to companies based or operated in the PRC by investing through legal structures known as VIEs. Because of Chinese governmental restrictions on non-Chinese ownership of companies in certain industries in the PRC, certain Chinese companies have used VIEs to facilitate foreign investment without distributing direct ownership of companies based or operated in the PRC. In such cases, the Chinese operating company establishes an offshore company, and the offshore company enters into contractual arrangements (such as powers of attorney, equity pledge agreements and other services or business cooperation agreements) with the operating company. These contractual arrangements are intended to give the offshore company the ability to exercise power over and obtain economic rights from the operating company. Shares of the offshore company, in turn, are listed and traded on exchanges outside of the PRC and are available to non-Chinese investors such as a Fund. This arrangement allows non-Chinese investors in the offshore company to obtain economic exposure to the Chinese company without direct equity ownership in the Chinese company. The VIE contractual arrangements permit the VIE structure to consolidate its

financial statements with those of the underlying Chinese company. The offshore companies in VIE structures may be constituents of an index against which a Fund measures its performance. To the extent a Fund declines or is otherwise unable to seek exposure to companies based or operated in the PRC through VIE structures, the Fund may underperform its performance benchmark.

On February 17, 2023, the China Securities Regulatory Commission (“CSRC”) released the “Trial Administrative Measures of Overseas Securities Offering and Listing by Domestic Companies” (the “Trial Measures”) which went into effect on March 31, 2023. The Trial Measures and its implementing guidelines require Chinese companies that pursue listings outside of Mainland China, including those that do so using the VIE structure, to make a filing with the CSRC. While the Trial Measures and its implementing guidelines do not prohibit the use of VIE structures, they do not serve as a formal endorsement either. There is a risk that the government of the PRC may cease to tolerate VIEs at any time or impose new restrictions on the structure, in each case either generally or with respect to specific industries, sectors or companies. Investments involving a VIE may also pose additional risks because such investments are made through a company whose interests in the underlying operating company are established through contract rather than through direct equity ownership. For example, in the event of a dispute, the offshore company’s contractual claims with respect to the operating company may be deemed unenforceable in the PRC, thus limiting (or eliminating) the remedies and rights available to the offshore company and its investors. Such legal uncertainty may also be exploited against the interests of the offshore company and its investors (such as a Fund). Further, the interests of the equity owners of the operating company may conflict with the interests of the investors of the offshore company, and the fiduciary duties of the officers and directors of the operating company may differ from, or conflict with, the fiduciary duties of the officers and directors of the offshore company. Foreign companies listed on U.S. exchanges, including offshore companies that utilize a VIE structure, also could face delisting or other ramifications for failure to meet the requirements of the SEC, the Public Company Accounting Oversight Board (“PCAOB”) or other U.S. regulators. Any of the foregoing risks and events could negatively impact a Fund’s performance. Additionally, investment in a VIE structure subjects a Fund to the risks associated with the underlying Chinese company, which could also negatively impact a Fund’s performance.

Foreign Custody Risk. A Fund that invests in foreign securities, may hold such securities and cash with foreign banks, agents, and securities depositories appointed by the Fund’s custodian (each a “Foreign Custodian”). Some Foreign Custodians may be recently organized or new to the foreign custody business. In some countries, Foreign Custodians may be subject to little or no regulatory oversight over or independent evaluation of their operations. Further, the laws of certain countries may place limitations on a Fund’s ability to recover its assets if a Foreign Custodian enters bankruptcy. Investments in emerging markets may be subject to even greater custody risks than investments in more developed markets. Custody services in emerging market countries are very often undeveloped and may be considerably less well regulated than in more developed countries, and thus may not afford the same level of investor protection as would apply in developed countries.

Risks of Derivative Investments. The Funds may invest in derivative instruments including without limitation, options, futures, options on futures, forward contracts, participation notes, swaps, options on swaps, structured securities and other derivatives relating to foreign currency transactions. Derivatives may be used for both hedging and nonhedging purposes (that is, to seek to increase total return), although suitable derivative instruments may not always be available to the Investment Adviser for these purposes. Losses from derivative instruments can result from a lack of correlation between changes in the value of derivative instruments and the portfolio assets (if any) being hedged, the potential illiquidity of the markets for derivative instruments, the failure of the counterparty to perform its contractual obligations, or the risks related to leverage factors associated with such transactions. Derivatives are also subject to risks arising from margin requirements, which include the risk that a Fund will be required to pay additional margin or set aside additional collateral to maintain open derivative positions and the risk of loss by a Fund of margin deposits in the event of the bankruptcy or other similar insolvency with respect to a broker or counterparty with whom a Fund has an open derivative position. Losses may also arise if the Funds receive cash collateral under the transactions and some or all of that collateral is invested in the market. To the extent that cash collateral is so invested, such collateral will be subject to market depreciation or appreciation, and a Fund may be responsible for any loss that might result from its investment of the counterparty’s cash collateral. If cash collateral is not invested, the Fund may be exposed to additional risk of loss in the event of the insolvency of its custodian holding such cash collateral. The use of these management techniques also involves the risk of loss if the Investment Adviser is incorrect in its expectation of the timing or level of fluctuations in securities prices, interest rates, currency prices or other variables. Derivative instruments may be harder to value, subject to greater volatility and more likely subject to changes in tax treatment than other investments. For these reasons, the Investment Adviser’s attempts to hedge portfolio risks through the use of derivative instruments may not be successful, and the Investment Adviser may choose not to hedge portfolio risks. Using derivatives for nonhedging purposes is considered a speculative practice and presents greater risk of loss than derivatives used for hedging purposes.

Risks of Participation Notes. The Funds may invest in participation notes. Some countries, especially emerging markets countries, do not permit foreigners to participate directly in their securities markets or otherwise present difficulties for efficient foreign investment. A Fund may use participation notes to establish a position in such markets as a substitute for direct investment. Participation notes are issued by banks or broker-dealers and are designed to track the return of a particular underlying equity or debt security, currency or market. When the participation note matures, the issuer of the participation note will pay to, or receive from, a Fund the difference between the nominal value of the underlying instrument at the time of purchase and that instrument’s value at maturity. Investments in participation notes involve the same risks as are associated with a direct investment in the underlying security, currency or market that

they seek to replicate. In addition, participation notes are generally traded over-the-counter and are subject to counterparty risk. Counterparty risk is the risk that the broker-dealer or bank that issues them will not fulfill its contractual obligation to complete the transaction with a Fund. Participation notes constitute general unsecured contractual obligations of the banks or broker-dealers that issue them, and a Fund would be relying on the creditworthiness of such banks or broker-dealers and would have no rights under a participation note against the issuer of the underlying assets. In addition, participation notes may trade at a discount to the value of the underlying securities or markets that they seek to replicate.

Risks of Illiquid Investments. Each Fund may not acquire any “illiquid investment” if, immediately after the acquisition, the Fund would have invested more than 15% of its net assets in illiquid investments that are assets. An “illiquid investment” is an investment that the Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment. In determining whether an investment is an illiquid investment, the Investment Adviser will take into account actual or estimated daily transaction volume of an investment, group of related investments or asset class and other relevant market, trading, and investment-specific considerations. In addition, in determining the liquidity of an investment, the Investment Adviser must determine whether trading varying portions of a position in a particular portfolio investment or asset class, in sizes that a Fund would reasonably anticipate trading, is reasonably expected to significantly affect its liquidity, and if so, the Fund must take this determination into account when classifying the liquidity of that investment or asset class.

Investments purchased by a Fund that are liquid at the time of purchase may subsequently become illiquid. If one or more investments in a Fund’s portfolio become illiquid, the Fund may exceed the 15% limitation in illiquid investments. In the event that changes in the portfolio or other external events cause a Fund to exceed this limit, the Fund must take steps to bring its illiquid investments that are assets to or below 15% of its net assets within a reasonable period of time. This requirement would not force a Fund to liquidate any portfolio instrument where the Fund would suffer a loss on the sale of that instrument.

In cases where no clear indication of the value of a Fund’s portfolio instruments is available, the portfolio instruments will be valued at their fair value according to the valuation procedures approved by the Board of Trustees. These cases include, among others, situations where a security or other asset or liability does not have a price source, or the secondary markets on which an investment has previously been traded are no longer viable, due to its lack of liquidity. For more information on fair valuation, please see “Shareholder Guide—How To Buy Shares—How Are Shares Priced?”

Credit/Default Risks. Debt securities purchased by the Funds may include U.S. Government Securities (including zero coupon bonds) and securities issued by foreign governments, domestic and foreign corporations, banks and other issuers. Some of these fixed income securities are described in the next section below. Further information is provided in the SAI.

Debt securities rated BBB– or higher by Standard & Poor’s or Baa3 or higher by Moody’s or having a comparable credit rating by another NRSRO are considered “investment grade.” Securities rated BBB– or Baa3 are considered medium-grade obligations with speculative characteristics, and adverse economic conditions or changing circumstances may weaken their issuers’ capacity to pay interest and repay principal. For the purpose of determining compliance with any credit rating requirement, each Fund assigns a security, at the time of purchase, the highest rating by an NRSRO if the security is rated by more than one NRSRO. Therefore, a security will be deemed to have met a rating requirement if it receives the minimum required rating from at least one such rating organization even though it has been rated below the minimum rating by one or more other rating organizations, or if unrated by such rating organizations, the security is determined by the Investment Adviser to be of comparable credit quality. A security satisfies a Fund’s minimum rating requirement regardless of its relative ranking (for example, plus or minus) within a designated major rating category (for example, BBB or Baa). If a security satisfies a Fund’s minimum rating requirement at the time of purchase and is subsequently downgraded below that rating, the Fund will not be required to dispose of the security. If a downgrade occurs, the Investment Adviser will consider which action, including the sale of the security, is in the best interest of a Fund and its shareholders.

The Funds may invest in fixed income securities rated BB+ or Ba1 or below (or comparable unrated securities) which are commonly referred to as “junk bonds.” Junk bonds are considered speculative and may be questionable as to principal and interest payments.

In some cases, junk bonds may be highly speculative, have poor prospects for reaching investment grade standing and be in default. As a result, investment in such bonds will present greater speculative risks than those associated with investment in investment grade bonds. Also, to the extent that the rating assigned to a security in a Fund’s portfolio is downgraded by a rating organization, the market price and liquidity of such security may be adversely affected.

Risks of Initial Public Offerings. The Funds may invest in IPOs. An IPO is a company’s first offering of stock to the public. IPO risk is the risk that the market value of IPO shares will fluctuate considerably due to factors such as the absence of a prior public market, unseasoned trading, the small number of shares available for trading and limited information about a company’s business model, quality of management, earnings growth potential and other criteria used to evaluate its investment prospects. The purchase of IPO shares may involve high transaction costs. Investments in IPO shares, which are subject to market risk and liquidity risk, involve greater risks than investments in shares of companies that have traded publicly on an exchange for extended periods of time. When a Fund’s asset base is small, a significant portion of the Fund’s performance could be attributable to investments in IPOs, because such

investments would have a magnified impact on the Fund. As the Fund's assets grow, the effect of the Fund's investments in IPOs on the Fund's performance probably will decline, which could reduce the Fund's performance. Because of the price volatility of IPO shares, a Fund may choose to hold IPO shares for a very short period of time. This may increase the turnover of the Fund's portfolio and may lead to increased expenses to the Fund, such as commissions and transaction costs. By selling IPO shares, a Fund may realize taxable gains it will subsequently distribute to shareholders. In addition, the market for IPO shares can be speculative and/or inactive for extended periods of time. There is no assurance that a Fund will be able to obtain allocable portions of IPO shares. The limited number of shares available for trading in some IPOs may make it more difficult for a Fund to buy or sell significant amounts of shares without an unfavorable impact on prevailing prices. Investors in IPO shares can be affected by substantial dilution in the value of their shares, by sales of additional shares and by concentration of control in existing management and principal shareholders.

Temporary Investment Risks. Each Fund may, for temporary defensive purposes (and to the extent it is permitted to invest in the following), invest up to 100% of its total assets in:

- U.S. Government Securities
- Commercial paper rated at least A-2 by Standard & Poor's, P-2 by Moody's or having a comparable credit rating by another NRSRO (or, if unrated, determined by the Investment Adviser to be of comparable credit quality)
- Certificates of deposit
- Bankers' acceptances
- Repurchase agreements
- Non-convertible preferred stocks and non-convertible corporate bonds with a remaining maturity of less than one year
- ETFs
- Other investment companies
- Cash items

When a Fund's assets are invested in such instruments, the Fund may not be achieving its investment objective.

C. PORTFOLIO SECURITIES AND TECHNIQUES

This section provides further information on certain types of securities and investment techniques that may be used by the Funds, including their associated risks.

The Funds may purchase other types of securities or instruments similar to those described in this section if otherwise consistent with the Fund's investment objective and policies. Further information is provided in the SAI, which is available upon request.

Other Investment Companies. Each Fund may invest in securities of other investment companies, including ETFs and money market funds, subject to statutory limitations prescribed by the Investment Company Act or rules, regulations or exemptive relief thereunder. These statutory limitations include in certain circumstances a prohibition on any Fund acquiring more than 3% of the voting shares of any other investment company, and a prohibition on investing more than 5% of a Fund's total assets in securities of any one investment company or more than 10% of total assets in securities of all investment companies.

Subject to applicable law and/or pursuant to an exemptive order obtained from the SEC or under an exemptive rule adopted by the SEC, a Fund may invest in certain other investment companies (including ETFs and money market funds) and business development companies beyond the statutory limits described above or otherwise provided that certain conditions are met. Some of those investment companies may be funds for which the Investment Adviser or any of its affiliates serves as investment adviser, administrator or distributor.

Additionally, to the extent that any Fund serves as an "acquired fund" to another Goldman Sachs Fund or unaffiliated investment company, the Fund's ability to invest in other investment companies and private funds may be limited and, under these circumstances, the Fund's investments in other investment companies and private funds will be consistent with applicable law and/or exemptive rules adopted by or exemptive orders obtained from the SEC. For example, to the extent the Fund serves as an acquired fund in a fund of funds arrangement in reliance on Rule 12d1-4 under the Investment Company Act, the Fund would be prohibited from purchasing or otherwise acquiring the securities of an investment company or private fund if, after such purchase or acquisition, the aggregate value of the Fund's investments in such investment companies and private funds would exceed 10% of the value of the Fund's total assets, subject to limited exceptions (including for investments in money market funds).

The use of ETFs is generally intended to help a Fund match the total return of the particular market segments or indices represented by those ETFs, although that may not be the result. Most ETFs are passively-managed investment companies whose shares are purchased and sold on a securities exchange. An ETF generally represents a portfolio of securities designed to track a particular market segment or index. An investment in an ETF generally presents the same primary risks as an investment in a conventional fund (i.e., one that is not exchange-traded) that has the same investment objectives, strategies and policies. In addition, an ETF may fail to accurately track the market segment or index that underlies its investment objective. The price of an ETF can fluctuate, and a Fund could lose money

investing in an ETF. Moreover, ETFs are subject to the following risks that do not apply to conventional funds: (i) the market price of the ETF's shares may trade at a premium or a discount to their NAV; (ii) an active trading market for an ETF's shares may not develop or be maintained; and (iii) there is no assurance that the requirements of the exchange necessary to maintain the listing of an ETF will continue to be met or remain unchanged.

A Fund will indirectly bear its proportionate share of any management fees and other expenses paid by such other investment companies, in addition to the fees and expenses regularly borne by the Fund. Although the Funds do not expect to do so in the foreseeable future, each Fund is authorized to invest substantially all of its assets in a single open-end investment company or series thereof that has substantially the same investment objective, policies and fundamental restrictions as the Fund.

Unseasoned Companies. Each Fund may invest in companies which (together with their predecessors) have operated less than three years. The securities of such companies may have limited liquidity, which can result in their being priced higher or lower than might otherwise be the case. In addition, investments in unseasoned companies are more speculative and entail greater risk than do investments in companies with an established operating record.

Direct Equity Investment. The Fund may invest up to 15% of its net assets in direct equity investments. The Fund may invest in direct equity investments that the Investment Adviser expects will become listed or otherwise publicly traded securities. Direct equity investments consist of (i) the private purchase from an enterprise of an equity interest in the enterprise in the form of shares of common stock or equity interests in trusts, partnerships, joint ventures or similar enterprises, and (ii) the purchase of such an equity interest in an enterprise from a principal investor in the enterprise. Direct equity investments are generally considered to be illiquid. To the degree that a Fund invests in direct equity investments that it considers to be illiquid, it will limit such investments so that they, together with the Fund's other illiquid investments, comply with the investment restriction on illiquid investments.

In most cases, a Fund will, at the time of making a direct equity investment, enter into a shareholder or similar agreement with the enterprise and one or more other holders of equity interests in the enterprise. The Investment Adviser anticipates that these agreements may, in appropriate circumstances, provide the Fund with the ability to appoint a representative to the board of directors or similar body of the enterprise, and eventually to dispose of the Fund's investment in the enterprise through, for example, the listing of the securities or the sale of the securities to the issuer or another investor. In cases where a Fund appoints a representative, the representative would be expected to provide the Fund with the ability to monitor its investment and protect its rights in the investment and will not be appointed for the purpose of exercising management or control of the enterprise. In addition, the Funds intend to make their direct equity investments in such a manner as to avoid subjecting the Funds to unlimited liability with respect to the investments. There can be no assurance that the Funds' direct equity investments will become listed, or that it will be able to sell any direct equity investment to the issuer or another investor. The extent to which a Fund may make direct equity investments may be limited by considerations relating to its status as a regulated investment company.

Direct equity investments in Chinese companies and companies in other emerging or frontier market countries may involve a high degree of business and financial risk that can result in substantial losses. Because of the absence of a public trading market for these investments, the Funds may take longer to liquidate these positions than would be the case for publicly traded securities and the prices on these sales could be less than those originally paid by the Funds or less than what may be considered the fair value of such securities. Further, issuers whose securities are not publicly traded may not be subject to disclosure and other investor protection requirements applicable to publicly traded securities. If such securities are required to be registered under the securities laws of one or more jurisdictions before being resold, the Funds may be required to bear the expenses of registration. Certain of the Funds' direct equity investments, particularly in China and other emerging or frontier market countries, may include investments in smaller, less-seasoned companies, which may involve greater risks. These companies may have limited product lines, markets of financial resources, or they may be dependent on a limited management group.

Convertible Securities. Each Fund may invest in convertible securities. Convertible securities are preferred stock or debt obligations that are convertible into common stock. Convertible securities generally offer lower interest or dividend yields than non-convertible securities of similar quality. Convertible securities in which a Fund invests are subject to the same rating criteria as its other investments in fixed income securities. Convertible securities have both equity and fixed income risk characteristics. Like all fixed income securities, the value of convertible securities is susceptible to the risk of market losses attributable to changes in interest rates. Generally, the market value of convertible securities tends to decline as interest rates increase and, conversely, to increase as interest rates decline. However, when the market price of the common stock underlying a convertible security exceeds the conversion price of the convertible security, the convertible security tends to reflect the market price of the underlying common stock. As the market price of the underlying common stock declines, the convertible security, like a fixed income security, tends to trade increasingly on a yield basis, and thus may not decline in price to the same extent as the underlying common stock.

Foreign Currency Transactions. A Fund may, to the extent consistent with its investment policies, purchase or sell foreign currencies on a cash basis or through forward contracts. A forward contract involves an obligation to purchase or sell a specific currency at a future date at a price set at the time of the contract. A Fund may engage in foreign currency transactions for hedging purposes and to

seek to protect against anticipated changes in future foreign currency exchange rates. In addition, a Fund may enter into foreign currency transactions to seek a closer correlation between the Fund's overall currency exposures and the currency exposures of the Fund's performance benchmark. The Funds may also enter into such transactions to seek to increase total return, which presents additional risk.

The Funds may also engage in cross-hedging by using forward contracts in a currency different from that in which the hedged security is denominated or quoted. A Fund may hold foreign currency received in connection with investments in foreign securities when, in the judgment of the Investment Adviser, it would be beneficial to convert such currency into U.S. dollars at a later date (e.g., the Investment Adviser may anticipate the foreign currency to appreciate against the U.S. dollar).

The Funds may, from time to time, engage in non-deliverable forward transactions to manage currency risk or to gain exposure to a currency without purchasing securities denominated in that currency. A non-deliverable forward is a transaction that represents an agreement between a Fund and a counterparty (usually a commercial bank) to pay the other party the amount that it would cost based on current market rates as of the termination date to buy or sell a specified (notional) amount of a particular currency at an agreed upon foreign exchange rate on an agreed upon future date. If the counterparty defaults, a Fund will have contractual remedies pursuant to the agreement related to the transaction, but the Fund may be delayed or prevented from obtaining payments owed to it pursuant to non-deliverable forward transactions. Such non-deliverable forward transactions will be settled in cash.

Currency exchange rates may fluctuate significantly over short periods of time, causing, along with other factors, a Fund's NAV to fluctuate (when the Fund's NAV fluctuates, the value of your shares may go up or down). Currency exchange rates also can be affected unpredictably by the intervention of U.S. or foreign governments or central banks, or the failure to intervene, or by currency controls or political developments in the United States or abroad.

Certain forward foreign currency exchange contracts and other currency transactions are not exchange traded or cleared. The market in such forward foreign currency exchange contracts, currency swaps and other privately negotiated currency instruments offers less protection against defaults by the other party to such instruments than is available for currency instruments traded on an exchange. Such contracts are subject to the risk that the counterparty to the contract will default on its obligations. Because these contracts are not guaranteed by an exchange or clearinghouse, a default on a contract would deprive a Fund of unrealized profits, transaction costs or the benefits of a currency hedge or could force the Fund to cover its purchase or sale commitments, if any, at the current market price.

A Fund is not required to post cash collateral with its counterparties in certain foreign currency transactions. Accordingly, a Fund may remain more fully invested (and more of the Fund's assets may be subject to investment and market risk) than if it were required to post collateral with its counterparties (which is the case with certain transactions). Where a Fund's counterparties are not required to post cash collateral with the Fund, the Fund will be subject to additional counterparty risk.

Corporate Debt Obligations. Corporate debt obligations include bonds, notes, debentures, commercial paper and other obligations of corporations to pay interest and repay principal. Each Fund may invest in corporate debt obligations issued by U.S. and certain non-U.S. issuers which issue securities denominated in the U.S. dollar (including Yankee and Euro obligations as well as other non-U.S. dollar currencies). In addition to obligations of corporations, corporate debt obligations include securities issued by banks and other financial institutions and supranational entities (i.e., the World Bank, the International Monetary Fund, etc.).

Bank Obligations. Each Fund may invest in obligations issued or guaranteed by U.S. or foreign banks. Bank obligations, including without limitation, time deposits, bankers' acceptances and certificates of deposit, may be general obligations of the parent bank or may be limited to the issuing branch by the terms of the specific obligations or by government regulations. Banks are subject to extensive but different governmental regulations which may limit both the amount and types of loans which may be made and interest rates which may be charged. In addition, the profitability of the banking industry is largely dependent upon the availability and cost of funds for the purpose of financing lending operations under prevailing money market conditions. General economic conditions as well as exposure to credit losses arising from possible financial difficulties of borrowers play an important part in the operation of this industry.

U.S. Government Securities. Each Fund may invest in U.S. Government Securities. U.S. Government Securities include U.S. Treasury obligations and obligations issued or guaranteed by U.S. government agencies, instrumentalities or sponsored enterprises.

U.S. Government Securities may be supported by (i) the full faith and credit of the U.S. Treasury; (ii) the right of the issuer to borrow from the U.S. Treasury; (iii) the discretionary authority of the U.S. government to purchase certain obligations of the issuer; or (iv) only the credit of the issuer. U.S. Government Securities also include Treasury receipts, zero coupon bonds and other stripped U.S. Government Securities, where the interest and principal components are traded independently. U.S. Government Securities may also include Treasury inflation-protected securities whose principal value is periodically adjusted according to the rate of inflation.

U.S. Government Securities are deemed to include (i) securities for which the payment of principal and interest is backed by an irrevocable letter of credit issued by the U.S. government, its agencies, authorities or instrumentalities; and (ii) participations in loans made to foreign governments or their agencies that are so guaranteed. Certain of these participations may be regarded as illiquid. U.S. Government Securities also include zero coupon bonds.

U.S. Treasury Securities, which include, among other things, the separately traded principal and interest components of securities guaranteed or issued by the U.S. Treasury if such components are traded independently under the Separate Trading of Registered Interest and Principal of Securities program, have historically involved little risk of loss of principal if held to maturity. However, no assurance can be given that the U.S. government will be able or willing to repay the principal or interest when due, or provide financial support to U.S. government agencies, authorities, instrumentalities or sponsored enterprises that issue U.S. Government Securities if it is not obligated to do so by law.

Custodial Receipts and Trust Certificates. Each Fund may invest in custodial receipts and trust certificates representing interests in securities held by a custodian or trustee. The securities so held may include U.S. Government Securities or other types of securities in which a Fund may invest. The custodial receipts or trust certificates may evidence ownership of future interest payments, principal payments or both on the underlying securities, or, in some cases, the payment obligation of a third party that has entered into an interest rate swap or other arrangement with the custodian or trustee. For certain securities laws purposes, custodial receipts and trust certificates may not be considered obligations of the U.S. government or other issuer of the securities held by the custodian or trustee. If for tax purposes a Fund is not considered to be the owner of the underlying securities held in the custodial or trust account, the Fund may suffer adverse tax consequences. As a holder of custodial receipts and trust certificates, a Fund will bear its proportionate share of the fees and expenses charged to the custodial account or trust. Each Fund may also invest in separately issued interests in custodial receipts and trust certificates.

Borrowings. Each Fund can borrow money from banks and other financial institutions in amounts not exceeding one-third of its total assets (including the amount borrowed) for temporary or emergency purposes.

Borrowings involve leveraging. If the securities held by the Fund decline in value while these transactions are outstanding, the NAV of the Fund's outstanding shares will decline in value by proportionately more than the decline in value of the securities.

Structured Securities. Each Fund may invest in structured securities. Structured securities are securities whose value is determined by reference to changes in the value of specific currencies, securities, interest rates, commodities, indices or other financial indicators (the "Reference") or the relative change in two or more References. Investments in structured securities may provide exposure to certain securities or markets in situations where regulatory or other restrictions prevent direct investments in such issuers or markets.

The interest rate or the principal amount payable upon maturity or redemption may be increased or decreased depending upon changes in the applicable Reference. Structured securities may be positively or negatively indexed, so that appreciation of the Reference may produce an increase or decrease in the interest rate or value of the security at maturity. In addition, changes in the interest rates or the value of the security at maturity may be a multiple of changes in the value of the Reference, effectively leveraging the Fund's investments so that small changes in the value of the Reference may result in disproportionate gains or losses to the Fund.

Consequently, structured securities may present a greater degree of market risk than many types of securities and may be more volatile, less liquid and more difficult to price accurately than less complex securities. Structured securities are also subject to the risk that the issuer of the structured securities may fail to perform its contractual obligations. Certain issuers of structured products may be deemed to be investment companies as defined in the Investment Company Act. As a result, the Fund's investments in structured securities may be subject to the limits applicable to investments in other investment companies.

Structured securities are considered hybrid instruments because they are derivative instruments the value of which depends on, or is derived from or linked to, the value of an underlying asset, interest rate index or commodity. Commodity-linked notes are hybrid instruments because the principal and/or interest payments on those notes is linked to the value of the individual commodities, futures contracts or the performance of one or more commodity indices.

Structured securities include, but are not limited to, equity linked notes. An equity linked note is a note whose performance is tied to a single stock, a stock index or a basket of stocks. Equity linked notes combine the principal protection normally associated with fixed income investments with the potential for capital appreciation normally associated with equity investments. Upon the maturity of the note, the holder generally receives a return of principal based on the capital appreciation of the linked securities. Depending on the terms of the note, equity linked notes may also have a "cap" or "floor" on the maximum principal amount to be repaid to holders, irrespective of the performance of the underlying linked securities. For example, a note may guarantee the repayment of the original principal amount invested (even if the underlying linked securities have negative performance during the note's term), but may cap the maximum payment at maturity at a certain percentage of the issuance price or the return of the underlying linked securities. Alternatively, the note may not guarantee a full return on the original principal, but may offer a greater participation in any capital appreciation of the underlying linked securities. The terms of an equity linked note may also provide for periodic interest payments to

holders at either a fixed or floating rate. The secondary market for equity linked notes may be limited, and the lack of liquidity in the secondary market may make these securities difficult to dispose of and to value. Equity linked notes will be considered equity securities for purposes of a Fund's investment objective and policies.

REITs. Each Fund may invest in REITs. REITs are pooled investment vehicles that invest primarily in either real estate or real estate related loans. The value of a REIT is affected by changes in the value of the properties owned by the REIT or securing mortgage loans held by the REIT. REITs are dependent upon the ability of the REITs' managers, and are subject to heavy cash flow dependency, default by borrowers and the qualification of the REITs under applicable regulatory requirements for favorable income tax treatment. REITs are also subject to risks generally associated with investments in real estate including possible declines in the value of real estate, general and local economic conditions, environmental problems and changes in interest rates. To the extent that assets underlying a REIT are concentrated geographically, by property type or in certain other respects, these risks may be heightened. A Fund will indirectly bear its proportionate share of any expenses, including management fees, paid by a REIT in which it invests.

Options on Securities, Securities Indices and Foreign Currencies. A put option gives the purchaser of the option the right to sell, and the writer (seller) of the option the obligation to buy, the underlying instrument during the option period. A call option gives the purchaser of the option the right to buy, and the writer (seller) of the option the obligation to sell, the underlying instrument during the option period. Each Fund may write (sell) call and put options and purchase put and call options, on any securities and other instruments in which the Fund may invest or any index consisting of securities or other instruments in which it may invest. A Fund may also, to the extent consistent with its investment policies, purchase and write (sell) put and call options on foreign currencies.

The writing and purchase of options is a highly specialized activity which involves special investment risks. Options may be used for either hedging or cross-hedging purposes, or to seek to increase total return (which presents additional risk). The successful use of options depends in part on the ability of the Investment Adviser to anticipate future price fluctuations and the degree of correlation between the options and securities (or currency) markets. If the Investment Adviser is incorrect in its expectation of changes in market prices or determination of the correlation between the instruments or indices on which options are written and purchased and the instruments in a Fund's investment portfolio, the Fund may incur losses that it would not otherwise incur. The use of options can also increase a Fund's transaction costs. Options written or purchased by the Funds may be traded on either U.S. or foreign exchanges or over-the-counter. Foreign and over-the-counter options will present greater possibility of loss because of their greater illiquidity and credit risks.

Futures Contracts and Options and Swaps on Futures Contracts. Futures contracts are standardized, exchange-traded contracts that provide for the sale or purchase of a specified financial instrument or currency at a future time at a specified price. An option on a futures contract gives the purchaser the right (and the writer of the option the obligation) to assume a position in a futures contract at a specified exercise price within a specified period of time. A swap on a futures contract provides an investor with the ability to gain economic exposure to a particular futures market. A futures contract may be based on particular securities, foreign currencies, securities indices and other financial instruments and indices. The Funds may engage in futures transactions on both U.S. and foreign exchanges.

Each Fund may, to the extent consistent with its investment policies, purchase and sell futures contracts, purchase and write call and put options on futures contracts and enter into swaps on futures contracts, in order to seek to increase total return or to hedge against changes in interest rates, securities prices or currency exchange rates, or to otherwise manage its term structure, sector selections and duration in accordance with its investment objective and policies. Each Fund may also, to the extent consistent with its investment policies, enter into closing purchase and sale transactions with respect to such contracts and options.

Futures contracts and related options and swaps present the following risks:

- While a Fund may benefit from the use of futures and options and swaps on futures, unanticipated changes in interest rates, securities prices or currency exchange rates may result in poorer overall performance than if the Fund had not entered into any futures contracts, options transactions or swaps.
- Because perfect correlation between a futures position and a portfolio position that is intended to be protected is impossible to achieve, the desired protection may not be obtained and a Fund may be exposed to additional risk of loss.
- The loss incurred by a Fund in entering into futures contracts and in writing call options and entering into swaps on futures is potentially unlimited and may exceed the amount of the premium received.
- Futures markets are highly volatile and the use of futures may increase the volatility of a Fund's NAV.
- As a result of the low margin deposits normally required in futures trading, a relatively small price movement in a futures contract may result in substantial losses to a Fund.
- Futures contracts and options and swaps on futures may be illiquid, and exchanges may limit fluctuations in futures contract prices during a single day.
- Foreign exchanges may not provide the same protection as U.S. exchanges.

Equity Swaps, Index Swaps and Currency Swaps. Each Fund may invest in equity swaps, index swaps and currency swaps. Equity swaps allow the parties to a swap agreement to exchange the dividend income or other components of return on an equity investment (for example, a group of equity securities or an index) for another payment stream. An equity swap may be used by a Fund to invest in a market without owning or taking physical custody of securities in circumstances in which direct investment may be restricted for legal reasons or is otherwise deemed impractical or disadvantageous. Index swaps allow one party or both parties to a swap agreement to receive one or more payments based off of the return, performance or volatility of an index or of certain securities which comprise the index. Currency swaps involve the exchange of the parties' respective rights to make or receive payments in specified currencies.

The value of swaps can be very volatile. To the extent that the Investment Adviser does not accurately analyze and predict the potential relative fluctuation of the components swapped with another party, or the creditworthiness of the counterparty, a Fund may suffer a loss, which may be substantial. The value of some components of a swap (such as the dividends on a common stock) may also be sensitive to changes in interest rates. Furthermore, swaps may be illiquid, and a Fund may be unable to terminate its obligations when desired.

Currently, certain standardized swap transactions are subject to mandatory central clearing and exchange trading. Although central clearing and exchange trading is expected to decrease counterparty risk and increase liquidity compared to bilaterally negotiated swaps, central clearing and exchange trading does not eliminate counterparty risk or illiquidity risk entirely. Depending on the size of the Fund and other factors, the margin required under the rules of a clearinghouse and by a clearing member may be in excess of the collateral required to be posted by the Fund to support its obligations under a similar bilateral, uncleared swap. However, certain applicable regulators have adopted rules imposing certain margin requirements, including minimums, on uncleared swaps which may result in the Fund and its counterparties posting higher amounts for uncleared swaps.

When-Issued Securities and Forward Commitments. Each Fund may purchase when-issued securities and make contracts to purchase or sell securities for a fixed price at a future date beyond customary settlement time. When-issued securities are securities that have been authorized, but not yet issued. When-issued securities are purchased in order to secure what is considered to be an advantageous price and yield to the Fund at the time of entering into the transaction. A forward commitment involves the entering into a contract to purchase or sell securities for a fixed price at a future date beyond the customary settlement period.

The purchase of securities on a when-issued or forward commitment basis involves a risk of loss if the value of the security to be purchased declines before the settlement date. Conversely, the sale of securities on a forward commitment basis involves the risk that the value of the securities sold may increase before the settlement date. Although a Fund will generally purchase securities on a when-issued or forward commitment basis with the intention of acquiring the securities for its portfolio, a Fund may dispose of when-issued securities or forward commitments prior to settlement if the Investment Adviser deems it appropriate.

Non-Investment Grade Fixed Income Securities. Non-investment grade fixed income securities and unrated securities of comparable credit quality (commonly known as "junk bonds") are considered speculative. In some cases, these obligations may be highly speculative and have poor prospects for reaching investment grade standing. Non-investment grade fixed income securities are subject to the increased risk of an issuer's inability to meet principal and interest obligations. These securities, also referred to as high yield securities, may be subject to greater price volatility due to such factors as specific issuer developments, interest rate sensitivity, negative perceptions of the junk bond markets generally and less liquidity.

Non-investment grade fixed income securities are often issued in connection with a corporate reorganization or restructuring or as part of a merger, acquisition, takeover or similar event. They are also issued by less established companies seeking to expand. Such issuers are often highly leveraged and generally less able than more established or less leveraged entities to make scheduled payments of principal and interest in the event of adverse developments or business conditions. Non-investment grade securities are also issued by governmental bodies that may have difficulty in making all scheduled interest and principal payments. The market value of non-investment grade fixed income securities tends to reflect individual issuer developments to a greater extent than that of higher rated securities which react primarily to fluctuations in the general level of interest rates. As a result, a Fund's ability to achieve its investment objectives may depend to a greater extent on the Investment Adviser's judgment concerning the creditworthiness of issuers than funds which invest in higher-rated securities. Issuers of non-investment grade fixed income securities may not be able to make use of more traditional methods of financing and their ability to service debt obligations may be affected more adversely than issuers of higher-rated securities by economic downturns, specific corporate or financial developments or the issuer's inability to meet specific projected business forecasts. Negative publicity about the junk bond market and investor perceptions regarding lower rated securities, whether or not based on fundamental analysis, may depress the prices for such securities.

A holder's risk of loss from default is significantly greater for non-investment grade fixed income securities than is the case for holders of other debt securities because such non-investment grade securities are generally unsecured and are often subordinated to the rights of other creditors of the issuers of such securities. Investment by a Fund in defaulted securities poses additional risk of loss should nonpayment of principal and interest continue in respect of such securities. Even if such securities are held to maturity, recovery by a Fund of its initial investment and any anticipated income or appreciation is uncertain.

The secondary market for non-investment grade fixed income securities is concentrated in relatively few market makers and is dominated by institutional investors, including mutual funds, insurance companies and other financial institutions. Accordingly, the secondary market for such securities is not as liquid as, and is more volatile than, the secondary market for higher-rated securities. In addition, market trading volume for high yield fixed income securities is generally lower and the secondary market for such securities could shrink or disappear suddenly and without warning as a result of adverse market or economic conditions, independent of any specific adverse changes in the condition of a particular issuer. The lack of sufficient market liquidity may cause a Fund to incur losses because it will be required to effect sales at a disadvantageous time and then only at a substantial drop in price. These factors may have an adverse effect on the market price and the Funds' ability to dispose of particular portfolio investments. A less liquid secondary market also may make it more difficult for the Funds to obtain precise valuations of the high yield securities in their portfolios.

Credit ratings issued by credit rating agencies are designed to evaluate the safety of principal and interest payments of rated securities. They do not, however, evaluate the market value risk of non-investment grade securities and, therefore, may not fully reflect the true risks of an investment. In addition, credit rating agencies may or may not make timely changes in a rating to reflect changes in the economy or in the conditions of the issuer that affect the market value of the security. Consequently, credit ratings are used only as a preliminary indicator of investment quality.

Lending of Portfolio Securities. Each Fund may engage in securities lending. Securities lending involves the lending of securities owned by a Fund to financial institutions such as certain broker-dealers including, as permitted by the SEC, Goldman Sachs. The borrowers are required to secure their loans continuously with cash, cash equivalents, U.S. Government Securities or letters of credit in an amount at least equal to the market value of the securities loaned. Cash collateral may be invested by a Fund in short-term investments, including registered and unregistered investment pools managed by the Investment Adviser, its affiliates or the Funds' custodian and from which the Investment Adviser or its affiliates may receive fees. To the extent that cash collateral is so invested, such collateral will be subject to market depreciation or appreciation, and a Fund will be responsible for any loss that might result from its investment of the borrowers' collateral. If the Investment Adviser determines to make securities loans, the value of the securities loaned may not exceed 33 1/3% of the value of the total assets of a Fund (including the loan collateral). Loan collateral (including any investment of the collateral) is not subject to the percentage limitations described elsewhere in the Prospectus regarding investments in fixed income securities and cash equivalents.

A Fund may lend its securities to increase its income. A Fund may, however, experience delay in the recovery of its securities or incur a loss if the institution with which it has engaged in a portfolio loan transaction breaches its agreement with the Fund or its agent, or becomes insolvent.

Repurchase Agreements. Repurchase agreements involve the purchase of securities subject to the seller's agreement to repurchase them at a mutually agreed upon date and price. Each Fund may enter into repurchase agreements with counterparties approved by the Investment Adviser pursuant to procedures approved by the Board of Trustees that furnish collateral at least equal in value or market price to the amount of their repurchase obligation. Repurchase agreements involving obligations other than U.S. Government Securities may be subject to additional risks.

If the other party or "seller" defaults, a Fund might suffer a loss to the extent that the proceeds from the sale of the underlying securities and other collateral held by the Fund are less than the repurchase price and the Fund's costs associated with delay and enforcement of the repurchase agreement. In addition, in the event of bankruptcy of the seller, a Fund could suffer additional losses if a court determines that the Fund's interest in the collateral is not enforceable.

Certain Funds, together with other registered investment companies having advisory agreements with the Investment Adviser or any of its affiliates, may transfer uninvested cash balances into a single joint account, the daily aggregate balance of which will be invested in one or more repurchase agreements.

Short Sales Against-the-Box. The Funds may make short sales against-the-box. A short sale against-the-box means that at all times when a short position is open the Fund will own an equal amount of securities sold short, or securities convertible into or exchangeable for, without payment of any further consideration, an equal amount of the securities of the same issuer as the securities sold short.

Preferred Stock, Warrants and Stock Purchase Rights. Each Fund may invest in preferred stock, warrants and stock purchase rights (or "rights"). Preferred stocks are securities that represent an ownership interest providing the holder with claims on the issuer's earnings and assets before common stock owners but after bond owners. Unlike debt securities, the obligations of an issuer of preferred stock, including dividend and other payment obligations, may not typically be accelerated by the holders of such preferred stock on the occurrence of an event of default or other non-compliance by the issuer of the preferred stock.

Warrants and other rights are options to buy a stated number of shares of common stock at a specified price at any time during the life of the warrant or right. The holders of warrants and rights have no voting rights, receive no dividends and have no rights with respect to the assets of the issuer.

Equity Investments. After its purchase, a portfolio investment (such as a convertible debt obligation) may convert to an equity security. Alternatively, a Fund may acquire equity securities in connection with a restructuring or other similar event related to one or more of its investments. If this occurs, a Fund may continue to hold the investment (or make additional purchases of that equity investment) if the Investment Adviser believes it is in the best interest of the Fund and its shareholders.

Appendix B

Financial Highlights

The financial highlights tables are intended to help you understand the Fund's financial performance for the past five years (or less if the Fund or a Share Class has been in operation for less than five years). Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have earned or lost on an investment in the Fund (assuming reinvestment of all dividends and distributions). The information for the Fund has been audited by PricewaterhouseCoopers LLP, whose report, along with the Fund's financial statements, is included in the Fund's Form N-CSR dated October 31, 2024. Because the Emerging Markets Equity ex. China Fund had not commenced investment operations as of the end of the Fund's fiscal year, financial highlights are not available.

Appendix C

Additional Information About Sales Charge Variations, Waivers and Discounts

The availability of certain sales charge variations, waivers and discounts will depend on whether you purchase your shares directly from a Fund or through an Intermediary. Intermediaries may impose different sales charges and have unique policies and procedures regarding the availability of sales charge waivers and/or discounts (including based on account type), which differ from those described in the Prospectus and are disclosed below. All sales charges and sales charge variations, waivers and discounts available to investors, other than those set forth below, are described in the Prospectus. To the extent an Intermediary notifies the Investment Adviser or Distributor of its intention to impose sales charges or have sales charge waivers and/or discounts that differ from those described in the Prospectus, such information provided by that Intermediary will be disclosed in this Appendix.

In all instances, it is your responsibility to notify your Intermediary at the time of purchase of any relationship or other facts qualifying you for sales charge waivers or discounts. Please contact your Intermediary with questions regarding your eligibility for applicable sales charge variations, waivers and discounts or for additional information regarding your Intermediary's policies for implementing particular sales charge variations, waivers and discounts. For waivers and discounts not available through a particular Intermediary, shareholders will have to purchase shares directly from a Fund or through another Intermediary to receive these waivers or discounts.

In addition to different sales charge variations, waivers and discounts, Intermediaries may have different share class exchange privileges that vary from those described in the Prospectus. You should contact your Intermediary to understand the exchange privileges available to you.

The information provided below for a particular Intermediary is reproduced based on information provided by that Intermediary. An Intermediary's administration and implementation of its particular policies with respect to any variations, waivers and/or discounts is neither supervised nor verified by the Fund, the Investment Adviser or the Distributor.

MERRILL LYNCH

Purchases or sales of front-end (i.e. Class A) or level-load (i.e., Class C) mutual fund shares through a Merrill platform or account will be eligible only for the following sales load waivers (front-end, contingent deferred, or back-end waivers) and discounts, which differ from those disclosed elsewhere in this Fund's prospectus. Purchasers will have to buy mutual fund shares directly from the mutual fund company or through another intermediary to be eligible for waivers or discounts not listed below.

It is the client's responsibility to notify Merrill at the time of purchase or sale of any relationship or other facts that qualify the transaction for a waiver or discount. A Merrill representative may ask for reasonable documentation of such facts and Merrill may condition the granting of a waiver or discount on the timely receipt of such documentation.

Additional information on waivers and discounts is available in the Merrill Sales Load Waiver and Discounts Supplement (the "Merrill SLWD Supplement") and in the Mutual Fund Investing at Merrill pamphlet at ml.com/funds (the referenced Merrill documents and website do not form a part of this prospectus). Clients are encouraged to review these documents and speak with their financial advisor to determine whether a transaction is eligible for a waiver or discount.

Front-end Load Waivers Available at Merrill

- Shares of mutual funds available for purchase by employer-sponsored retirement, deferred compensation, and employee benefit plans (including health savings accounts) and trusts used to fund those plans provided the shares are not held in a commission-based brokerage account and shares are held for the benefit of the plan. For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs, SAR-SEPs or Keogh plans
- Shares purchased through a Merrill investment advisory program
- Brokerage class shares exchanged from advisory class shares due to the holdings moving from a Merrill investment advisory program to a Merrill brokerage account
- Shares purchased through the Merrill Edge Self-Directed platform
- Shares purchased through the systematic reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same mutual fund in the same account
- Shares exchanged from level-load shares to front-end load shares of the same mutual fund in accordance with the description in the Merrill SLWD Supplement
- Shares purchased by eligible employees of Merrill or its affiliates and their family members who purchase shares in accounts within the employee's Merrill Household (as defined in the Merrill SLWD Supplement)
- Shares purchased by eligible persons associated with the fund as defined in this prospectus (e.g. the fund's officers or trustees)

- Shares purchased from the proceeds of a mutual fund redemption in front-end load shares provided (1) the repurchase is in a mutual fund within the same fund family; (2) the repurchase occurs within 90 calendar days from the redemption trade date, and (3) the redemption and purchase occur in the same account (known as Rights of Reinstatement). Automated transactions (i.e. systematic purchases and withdrawals) and purchases made after shares are automatically sold to pay Merrill's account maintenance fees are not eligible for Rights of Reinstatement

Contingent Deferred Sales Charge ("CDSC") Waivers on Front-end, Back-end, and Level Load Shares Available at Merrill

- Shares sold due to the client's death or disability (as defined by Internal Revenue Code Section 22e(3))
- Shares sold pursuant to a systematic withdrawal program subject to Merrill's maximum systematic withdrawal limits as described in the Merrill SLWD Supplement
- Shares sold due to return of excess contributions from an IRA account
- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the investor reaching the qualified age based on applicable IRS regulation
- Front-end or level-load shares held in commission-based, non-taxable retirement brokerage accounts (e.g. traditional, Roth, rollover, SEP IRAs, Simple IRAs, SAR-SEPs or Keogh plans) that are transferred to fee-based accounts or platforms and exchanged for a lower cost share class of the same mutual fund

Front-end Load Discounts Available at Merrill: Breakpoints, Rights of Accumulation & Letters of Intent

- Breakpoint discounts, as described in this prospectus, where the sales load is at or below the maximum sales load that Merrill permits to be assessed to a front-end load purchase, as described in the Merrill SLWD Supplement
- Rights of Accumulation (ROA), as described in the Merrill SLWD Supplement, which entitle clients to breakpoint discounts based on the aggregated holdings of mutual fund family assets held in accounts in their Merrill Household
- Letters of Intent (LOI), which allow for breakpoint discounts on eligible new purchases based on anticipated future eligible purchases within a fund family at Merrill, in accounts within your Merrill Household, as further described in the Merrill SLWD Supplement

AMERIPRISE FINANCIAL

Front-end sales charge reductions on Class A shares purchased through Ameriprise Financial

Shareholders purchasing Class A shares of the fund through an Ameriprise Financial platform or account are eligible only for the following sales charge reductions, which may differ from those disclosed elsewhere in this prospectus or the SAI. Such shareholders can reduce their initial sales charge on the purchase of Class A shares as follows:

- *Transaction size breakpoints*, as described in this prospectus or the SAI.
- *Rights of accumulation (ROA)*, as described in this prospectus or the SAI.
- *Letter of intent*, as described in this prospectus or the SAI.

Front-end sales charge waivers on Class A shares purchased through Ameriprise Financial

Shareholders purchasing Class A shares of the fund through an Ameriprise Financial platform or account are eligible only for the following sales charge waivers, which may differ from those disclosed elsewhere in this prospectus or the SAI. Such shareholders may purchase Class A shares at NAV without payment of a sales charge as follows:

- Shares purchased by employer-sponsored retirement plans (e.g., 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans). For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs or SAR-SEPs.
- Shares purchased through reinvestment of capital gains and dividend reinvestment when purchasing shares of the same fund (but not any other fund within the same fund family).
- Shares exchanged from Class C shares of the same fund in the month of or following the seven-year anniversary of the purchase date. To the extent that this prospectus elsewhere provides for a waiver with respect to such shares following a shorter holding period, that waiver will apply to exchanges following such shorter period. To the extent that this prospectus elsewhere provides for a waiver with respect to exchanges of Class C shares for load waived shares, that waiver will also apply to such exchanges.
- Shares purchased by employees and registered representatives of Ameriprise Financial or its affiliates and their immediate family members.
- Shares purchased by or through qualified accounts (including IRAs, Coverdell Education Savings Accounts, 401(k)s, 403(b) TSCAs subject to ERISA and defined benefit plans) that are held by a covered family member, defined as an Ameriprise Financial advisor and/or the advisor's spouse, advisor's lineal ascendant (mother, father, grandmother, grandfather, great grandmother, great grandfather), advisor's lineal descendant (son, step-son, daughter, step-daughter, grandson, granddaughter, great grandson, great granddaughter) or any spouse of a covered family member who is a lineal descendant.

- Shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (i.e. Rights of Reinstatement).

CDSC waivers on Class A and C shares purchased through Ameriprise Financial

Fund shares purchased through an Ameriprise Financial platform or account are eligible only for the following CDSC waivers, which may differ from those disclosed elsewhere in this prospectus or the SAI:

- Redemptions due to death or disability of the shareholder.
- Shares sold as part of a systematic withdrawal plan as described in this prospectus or the SAI.
- Redemptions made in connection with a return of excess contributions from an IRA account.
- Shares purchased through a Right of Reinstatement (as defined above).
- Redemptions made as part of a required minimum distribution for IRA and retirement accounts pursuant to the Internal Revenue Code.

MORGAN STANLEY WEALTH MANAGEMENT

Effective July 1, 2018, shareholders purchasing Fund shares through a Morgan Stanley Wealth Management transactional brokerage account will be eligible only for the following front-end sales charge waivers with respect to Class A shares, which may differ from and may be more limited than those disclosed elsewhere in this Fund's Prospectus or SAI.

Front-End Sales Charge Waivers on Class A Shares Available at Morgan Stanley Wealth Management

- Employer-sponsored retirement plans (e.g., 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans). For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs, SAR-SEPs or Keogh plans
- Morgan Stanley employee and employee-related accounts according to Morgan Stanley's account linking rules
- Shares purchased through reinvestment of dividends and capital gains distributions when purchasing shares of the same fund
- Shares purchased through a Morgan Stanley self-directed brokerage account
- Class C (i.e., level-load) shares that are no longer subject to a contingent deferred sales charge and are converted to Class A shares of the same fund pursuant to Morgan Stanley Wealth Management's share class conversion program
- Shares purchased from the proceeds of redemptions within the same fund family, provided (i) the repurchase occurs within 90 days following the redemption, (ii) the redemption and purchase occur in the same account, and (iii) redeemed shares were subject to a front-end or deferred sales charge.

RAYMOND JAMES & ASSOCIATES, INC., RAYMOND JAMES FINANCIAL SERVICES, INC. AND EACH ENTITY'S AFFILIATES ("RAYMOND JAMES")

Effective March 1, 2019, shareholders purchasing Fund shares through a Raymond James platform or account, or through an introducing broker-dealer or independent registered investment adviser for which Raymond James provides trade execution, clearance, and/or custody services, will be eligible only for the following load waivers (front-end sales charge waivers and contingent deferred, or back-end, sales charge waivers) and discounts, which may differ from those disclosed elsewhere in this Fund's Prospectus or SAI.

Front-End Sales Load Waivers on Class A Shares Available at Raymond James

- Shares purchased in an investment advisory program.
- Shares purchased within the same fund family through a systematic reinvestment of capital gains and dividend distributions.
- Employees and registered representatives of Raymond James or its affiliates and their family members as designated by Raymond James.
- Shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (known as Rights of Reinstatement).
- A Shareholder in the Fund's Class C shares will have their shares converted at net asset value to Class A shares (or the appropriate share class) of the Fund if the shares are no longer subject to a CDSC and the conversion is in line with the policies and procedures of Raymond James.

CDSC Waivers on Class A and Class C Shares Available at Raymond James

- Death or disability of the shareholder.
- Shares sold as part of a systematic withdrawal plan as described in the Fund's Prospectus.
- Return of excess contributions from an IRA Account.

- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the shareholder reaching the qualified age based on applicable IRS regulations as described in the Fund's Prospectus.
- Shares sold to pay Raymond James fees but only if the transaction is initiated by Raymond James.
- Shares acquired through a Right of Reinstatement.

Front-End Load Discounts Available at Raymond James: Breakpoints, Rights of Accumulation, and/or Letters of Intent

- Breakpoints as described in this Prospectus.
- Rights of accumulation which entitle shareholders to breakpoint discounts will be automatically calculated based on the aggregated holding of fund family assets held by accounts within the purchaser's household at Raymond James. Eligible fund family assets not held at Raymond James may be included in the calculation of rights of accumulation only if the shareholder notifies his or her financial advisor about such assets.
- Letters of intent which allow for breakpoint discounts based on anticipated purchases within a fund family, over a 13-month time period. Eligible fund family assets not held at Raymond James may be included in the calculation of letters of intent only if the shareholder notifies his or her financial advisor about such assets.

J.P. MORGAN SECURITIES LLC

- Effective September 29, 2023, if you purchase or hold fund shares through an applicable J.P. Morgan Securities LLC brokerage account, you will be eligible for the following sales charge waivers (front-end sales charge waivers and contingent deferred sales charge ("CDSC"), or back-end sales charge, waivers), share class conversion policy and discounts, which may differ from those disclosed elsewhere in this fund's prospectus or Statement of Additional Information.

Front-end sales charge waivers on Class A shares available at J.P. Morgan Securities LLC

- Shares exchanged from Class C (i.e. level-load) shares that are no longer subject to a CDSC and are exchanged into Class A shares of the same fund pursuant to J.P. Morgan Securities LLC's share class exchange policy.
- Qualified employer-sponsored defined contribution and defined benefit retirement plans, nonqualified deferred compensation plans, other employee benefit plans and trusts used to fund those plans. For purposes of this provision, such plans do not include SEP IRAs, SIMPLE IRAs, SAR-SEPs or 501(c)(3) accounts.
- Shares of funds purchased through J.P. Morgan Securities LLC Self-Directed Investing accounts.
- Shares purchased through rights of reinstatement.
- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same fund (but not any other fund within the fund family).
- Shares purchased by employees and registered representatives of J.P. Morgan Securities LLC or its affiliates and their spouse or financial dependent as defined by J.P. Morgan Securities LLC.

Class C to Class A share conversion

- A shareholder in the fund's Class C shares will have their shares converted to Class A shares (or the appropriate share class) of the same fund if the shares are no longer subject to a CDSC and the conversion is consistent with J.P. Morgan Securities LLC's policies and procedures.

CDSC waivers on Class A and C shares available at J.P. Morgan Securities LLC

- Shares sold upon the death or disability of the shareholder.
- Shares sold as part of a systematic withdrawal plan as described in the fund's prospectus.
- Shares purchased in connection with a return of excess contributions from an IRA account.
- Shares sold as part of a required minimum distribution for IRA and retirement accounts pursuant to the Internal Revenue Code.
- Shares acquired through a right of reinstatement.

Front-end load discounts available at J.P. Morgan Securities LLC: breakpoints, rights of accumulation & letters of intent

- Breakpoints as described in the prospectus.
- Rights of Accumulation ("ROA") which entitle shareholders to breakpoint discounts as described in the fund's prospectus will be automatically calculated based on the aggregated holding of fund family assets held by accounts within the purchaser's household at J.P. Morgan Securities LLC. Eligible fund family assets not held at J.P. Morgan Securities LLC (including 529 program holdings, where applicable) may be included in the ROA calculation only if the shareholder notifies their financial advisor about such assets.
- Letters of Intent ("LOI") which allow for breakpoint discounts based on anticipated purchases within a
- fund family, through J.P. Morgan Securities LLC, over a 13-month period of time (if applicable).

JANNEY MONTGOMERY SCOTT LLC

Effective May 1, 2020, if you purchase Fund shares through a Janney Montgomery Scott LLC (“Janney”) brokerage account, you will be eligible for the following load waivers (front-end sales charge waivers and contingent deferred sales charge (“CDSC”), or back-end sales charge, waivers) and discounts, which may differ from those disclosed elsewhere in the Fund’s Prospectus or SAI.

Front-End Sales Charge* Waivers on Class A Shares Available at Janney

- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same fund (but not any other fund within the fund family).
- Shares purchased by employees and registered representatives of Janney or its affiliates and their family members as designated by Janney.
- Shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within ninety (90) days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (i.e., right of reinstatement).
- Employer-sponsored retirement plans (e.g., 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans). For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs, SAR-SEPs or Keogh plans.
- Shares acquired through a right of reinstatement.
- Class C Shares that are no longer subject to a contingent deferred sales charge and are converted to Class A Shares of the same fund pursuant to Janney’s policies and procedures.

CDSC Waivers on Class A and C Shares Available at Janney

- Shares sold upon the death or disability of the shareholder.
- Shares sold as part of a systematic withdrawal plan as described in the Fund’s Prospectus.
- Shares purchased in connection with a return of excess contributions from an IRA account.
- Shares sold as part of a required minimum distribution for IRA and other retirement accounts due to the shareholder reaching age 70½ as described in the Fund’s Prospectus.
- Shares sold to pay Janney fees but only if the transaction is initiated by Janney.
- Shares acquired through a right of reinstatement.
- Shares exchanged into the same share class of a different fund.

Front-End Sales Charge* Discounts Available at Janney: Breakpoints, Rights of Accumulation, and/or Letters of Intent

- Breakpoints as described in the Fund’s Prospectus.
- Rights of accumulation (“ROA”), which entitle shareholders to breakpoint discounts, will be automatically calculated based on the aggregated holding of fund family assets held by accounts within the purchaser’s household at Janney. Eligible fund family assets not held at Janney may be included in the ROA calculation only if the shareholder notifies his or her financial advisor about such assets.
- Letters of intent which allow for breakpoint discounts based on anticipated purchases within a fund family, over a 13-month time period. Eligible fund family assets not held at Janney may be included in the calculation of letters of intent only if the shareholder notifies his or her financial advisor about such assets.

* Also referred to as an “initial sales charge.”

EDWARD D. JONES & CO., L.P. (“EDWARD JONES”)

Policies Regarding Transactions Through Edward Jones

The following information has been provided by Edward Jones:

Effective on or after August 16, 2024, the following information supersedes prior information with respect to transactions and positions held in fund shares through an Edward Jones system. Clients of Edward Jones (also referred to as “shareholders”) purchasing fund shares on the Edward Jones commission and fee-based platforms are eligible only for the following sales charge discounts (also referred to as “breakpoints”) and waivers, which can differ from discounts and waivers described elsewhere in the mutual fund prospectus or statement of additional information (“SAI”) or through another broker-dealer. In all instances, it is the shareholder’s responsibility to inform Edward Jones at the time of purchase of any relationship, holdings of Goldman Sachs Funds, or other facts qualifying the purchaser for discounts or waivers. Edward Jones can ask for documentation of such circumstance. Shareholders should contact Edward Jones if they have questions regarding their eligibility for these discounts and waivers.

Breakpoints

- Breakpoint pricing, otherwise known as volume pricing, at dollar thresholds as described in the prospectus.

Rights of Accumulation ("ROA")

- The applicable sales charge on a purchase of Class A shares is determined by taking into account all share classes (except certain money market funds and any assets held in group retirement plans) of Goldman Sachs Funds held by the shareholder or in an account grouped by Edward Jones with other accounts for the purpose of providing certain pricing considerations ("pricing groups"). If grouping assets as a shareholder, this includes all share classes held on the Edward Jones platform and/or held on another platform. The inclusion of eligible fund family assets in the ROA calculation is dependent on the shareholder notifying Edward Jones of such assets at the time of calculation. Money market funds are included only if such shares were sold with a sales charge at the time of purchase or acquired in exchange for shares purchased with a sales charge.
- The employer maintaining a SEP IRA plan and/or SIMPLE IRA plan may elect to establish or change ROA for the IRA accounts associated with the plan to a plan-level grouping as opposed to including all share classes at a shareholder or pricing group level.
- ROA is determined by calculating the higher of cost minus redemptions or market value (current shares x NAV).

Letter of Intent ("LOI")

- Through a LOI, shareholders can receive the sales charge and breakpoint discounts for purchases shareholders intend to make over a 13-month period from the date Edward Jones receives the LOI. The LOI is determined by calculating the higher of cost or market value of qualifying holdings at LOI initiation in combination with the value that the shareholder intends to buy over a 13-month period to calculate the front-end sales charge and any breakpoint discounts. Each purchase the shareholder makes during that 13-month period will receive the sales charge and breakpoint discount that applies to the total amount. The inclusion of eligible fund family assets in the LOI calculation is dependent on the shareholder notifying Edward Jones of such assets at the time of calculation. Purchases made before the LOI is received by Edward Jones are not adjusted under the LOI and will not reduce the sales charge previously paid. Sales charges will be adjusted if LOI is not met.
- If the employer maintaining a SEP IRA plan and/or SIMPLE IRA plan has elected to establish or change ROA for the IRA accounts associated with the plan to a plan-level grouping, LOIs will also be at the plan-level and may only be established by the employer.

Sales Charge Waivers

Sales charges are waived for the following shareholders and in the following situations:

- Associates of Edward Jones and its affiliates and other accounts in the same pricing group (as determined by Edward Jones under its policies and procedures) as the associate. This waiver will continue for the remainder of the associate's life if the associate retires from Edward Jones in good-standing and remains in good standing pursuant to Edward Jones' policies and procedures.
- Shares purchased in an Edward Jones fee-based program.
- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment.
- Shares purchased from the proceeds of redeemed shares of the same fund family so long as the following conditions are met: the proceeds are from the sale of shares within 60 days of the purchase, the sale and purchase are made from a share class that charges a front load and one of the following ("Right of Reinstatement"):
 - The redemption and repurchase occur in the same account.
 - The redemption proceeds are used to process an: IRA contribution, excess contributions, conversion, recharacterizing of contributions, or distribution, and the repurchase is done in an account within the same Edward Jones grouping for ROA.
 - The Right of Reinstatement excludes systematic or automatic transactions including, but not limited to, purchases made through payroll deductions, liquidations to cover account fees, and reinvestments from non-mutual fund products.
- Shares exchanged into Class A shares from another share class so long as the exchange is into the same fund and was initiated at the discretion of Edward Jones. Edward Jones is responsible for any remaining CDSC due to the fund company, if applicable. Any future purchases are subject to the applicable sales charge as disclosed in the prospectus.
- Exchanges from Class C shares to Class A shares of the same fund, generally, in the 84th month following the anniversary of the purchase date or earlier at the discretion of Edward Jones.

Contingent Deferred Sales Charge ("CDSC") Waivers

If the shareholder purchases shares that are subject to a CDSC and those shares are redeemed before the CDSC is expired, the shareholder is responsible to pay the CDSC except in the following conditions:

- The death or disability of the shareholder.
- Systematic withdrawals with up to 10% per year of the account value.
- Return of excess contributions from an Individual Retirement Account (IRA).
- Shares redeemed as part of a required minimum distribution for IRA and retirement accounts if the redemption is taken in or after the year the shareholder reaches qualified age based on applicable IRS regulations.

- Shares redeemed to pay Edward Jones fees or costs in such cases where the transaction is initiated by Edward Jones.
- Shares exchanged in an Edward Jones fee-based program.
- Shares acquired through NAV reinstatement.
- Shares redeemed at the discretion of Edward Jones for Minimum Balances, as described below.

Other Important Information Regarding Transactions Through Edward Jones

Minimum Purchase Amounts

- Initial purchase minimum: \$250
- Subsequent purchase minimum: none

Minimum Balances

- Edward Jones has the right to redeem at its discretion fund holdings with a balance of \$250 or less. The following are examples of accounts that are not included in this policy:
 - A fee-based account held on an Edward Jones platform
 - A 529 account held on an Edward Jones platform
 - An account with an active systematic investment plan or LOI

Exchanging Share Classes

- At any time it deems necessary, Edward Jones has the authority to exchange at NAV a shareholder's holdings in a fund to Class A shares of the same fund.

OPPENHEIMER & CO. INC.

Effective May 1, 2020, shareholders purchasing Fund shares through an Oppenheimer & Co. Inc. ("OPCO") platform or account are eligible only for the following load waivers (front-end sales charge waivers and contingent deferred, or back-end, sales charge waivers) and discounts, which may differ from those disclosed elsewhere in this Fund's prospectus or SAI.

Front-end Sales Load Waivers on Class A Shares available at OPCO

- Employer-sponsored retirement, deferred compensation and employee benefit plans (including health savings accounts) and trusts used to fund those plans, provided that the shares are not held in a commission-based brokerage account and shares are held for the benefit of the plan
- Shares purchased by or through a 529 Plan
- Shares purchased through a OPCO affiliated investment advisory program
- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same fund (but not any other fund within the fund family)
- Shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (known as Rights of Restatement).
- A shareholder in the Fund's Class C shares will have their shares converted at net asset value to Class A shares (or the appropriate share class) of the Fund if the shares are no longer subject to a CDSC and the conversion is in line with the policies and procedures of OPCO
- Employees and registered representatives of OPCO or its affiliates and their family members
- Directors or Trustees of the Fund, and employees of the Fund's investment adviser or any of its affiliates, as described in this prospectus

CDSC Waivers on Class A and C Shares available at OPCO

- Death or disability of the shareholder
- Shares sold as part of a systematic withdrawal plan as described in the Fund's prospectus
- Return of excess contributions from an IRA Account
- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the shareholder reaching the qualified age based on applicable IRS regulations as described in the prospectus
- Shares sold to pay OPCO fees but only if the transaction is initiated by OPCO
- Shares acquired through a right of reinstatement

Front-end load Discounts Available at OPCO: Breakpoints, Rights of Accumulation & Letters of Intent

- Breakpoints as described in this prospectus.

- Rights of Accumulation (ROA) which entitle shareholders to breakpoint discounts will be automatically calculated based on the aggregated holding of fund family assets held by accounts within the purchaser's household at OPCO. Eligible fund family assets not held at OPCO may be included in the ROA calculation only if the shareholder notifies his or her financial advisor about such assets.

ROBERT W. BAIRD & CO. ("BAIRD")

Effective June 15, 2020, shareholders purchasing Fund shares through a Baird platform or account will only be eligible for the following sales charge waivers (front-end sales charge waivers and CDSC waivers) and discounts, which may differ from those disclosed elsewhere in this prospectus or the SAI

Front-End Sales Charge Waivers on Class A Shares Available at Baird

- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing share of the same fund
- Share purchase by employees and registers representatives of Baird or its affiliate and their family members as designated by Baird
- Shares purchase from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same accounts, and (3) redeemed shares were subject to a front-end or deferred sales charge (known as rights of reinstatement)
- A shareholder in the Fund's Class C shares will have their shares converted at net asset value to Class A shares of the fund if the shares are no longer subject to CDSC and the conversion is in line with the policies and procedures of Baird
- Employer-sponsored retirement plans or charitable accounts in a transactional brokerage account at Baird, including 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans. For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs or SAR-SEPs

CDSC Waivers on Class A and C Shares Available at Baird

- Shares sold due to death or disability of the shareholder
- Shares sold as part of a systematic withdrawal plan as described in the Fund's Prospectus
- Shares bought due to returns of excess contributions from an IRA Account
- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the shareholder reaching age 72 as described in the Fund's prospectus
- Shares sold to pay Baird fees but only if the transaction is initiated by Baird
- Shares acquired through a right of reinstatement

Front-End Sales Charge Discounts Available at Baird: Breakpoints and/or Rights of Accumulations

- Breakpoints as described in this prospectus
- Rights of accumulations which entitles shareholders to breakpoint discounts will be automatically calculated based on the aggregated holding of fund family assets held by accounts within the purchaser's household at Baird. Eligible fund family assets not held at Baird may be included in the rights of accumulations calculation only if the shareholder notifies his or her financial advisor about such assets
- Letters of Intent (LOI) allow for breakpoint discounts based on anticipated purchases within a fund family through Baird, over a 13-month period of time
