Goldman Sachs GQG Partners International Opportunities Fund—Summary

INVESTMENT OBJECTIVE

The Goldman Sachs GQG Partners International Opportunities Fund (the “Fund”) seeks long-term capital appreciation.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy, hold and sell Shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.** You may qualify for sales charge discounts on purchases of Class A Shares if you invest at least \$50,000 in Goldman Sachs Funds. More information about these and other discounts is available from your financial professional and in “Shareholder Guide—Common Questions Applicable to the Purchase of Class A Shares” beginning on page 31 and in Appendix C—Additional Information About Sales Charge Variations, Waivers and Discounts on page 68 of the Prospectus and “Other Information Regarding Maximum Sales Charge, Purchases, Redemptions, Exchanges and Dividends” beginning on page B-149 of the Fund’s Statement of Additional Information (“SAI”).

Shareholder Fees

(fees paid directly from your investment)

	Class A	Class C	Institutional	Investor	Class R	Class R6
Maximum Sales Charge (Load) Imposed on Purchases (as a percentage of offering price)	5.50%	None	None	None	None	None
Maximum Deferred Sales Charge (Load) (as a percentage of the lower of original purchase price or sale proceeds) ¹	None	1.00%	None	None	None	None

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

	Class A	Class C	Institutional	Investor	Class R	Class R6
Management Fees	0.71%	0.71%	0.71%	0.71%	0.71%	0.71%
Distribution and/or Service (12b-1) Fees	0.25%	0.75%	None	None	0.50%	None
Other Expenses	0.19%	0.44%	0.08%	0.19%	0.19%	0.07%
Service Fees	None	0.25%	None	None	None	None
Acquired Fund Fees and Expenses	0.01%	0.01%	0.01%	0.01%	0.01%	0.01%
Total Annual Fund Operating Expenses²	1.16%	1.91%	0.80%	0.91%	1.41%	0.79%
Fee Waivers and Expense Limitation ³	(0.02%)	(0.02%)	(0.02%)	(0.02%)	(0.02%)	(0.03%)
Total Annual Fund Operating Expenses After Fee Waivers and Expense Limitation²	1.14%	1.89%	0.78%	0.89%	1.39%	0.76%

¹ A contingent deferred sales charge (“CDSC”) of 1.00% is imposed on Class C Shares redeemed within 12 months of purchase.

² The “Total Annual Fund Operating Expenses” and “Total Annual Fund Operating Expenses After Fee Waivers and Expense Limitation” do not correlate to the ratios of net and total expenses to average net assets provided in the Financial Highlights, which reflect the operating expenses of the Fund and do not include “Acquired Fund Fees and Expenses.”

³ The Investment Adviser has agreed to (i) waive a portion of its management fee in an amount equal to any management fees it earns as an investment adviser to the affiliated funds in which the Fund invests, except those management fees it earns from the Fund’s investments of cash collateral received in connection with securities lending transactions in affiliated funds; and (ii) reduce or limit “Other Expenses” (excluding acquired fund fees and expenses, transfer agency fees and expenses, service fees, taxes, dividend and interest payments on securities sold short, interest, brokerage fees, expenses of shareholder meetings, litigation and indemnification, and extraordinary expenses) to 0.014% of the Fund’s average daily net assets. Additionally, Goldman Sachs & Co. LLC (“Goldman Sachs”), the Fund’s transfer agent, has agreed to waive a portion of its transfer agency fee equal to 0.01% as an annual percentage rate of the average daily net assets attributable to Class R6 Shares of the Fund. These arrangements will remain in effect through at least February 28, 2027, and prior to such date the Investment Adviser and Goldman Sachs (as applicable) may not terminate the arrangements without the approval of the Board of Trustees.

EXPENSE EXAMPLE

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in Class A, Class C, Institutional, Investor, Class R and/or Class R6 Shares of the Fund for the time periods indicated and then redeem all of your Class A, Class C, Institutional, Investor, Class R and/or Class R6 Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same (except that the Example incorporates any applicable fee waiver and/or expense limitation arrangements for only the first year). Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Class A Shares	\$660	\$896	\$1,151	\$1,880
Class C Shares	\$292	\$598	\$1,030	\$2,231
Institutional Shares	\$80	\$253	\$442	\$988
Investor Shares	\$91	\$288	\$502	\$1,118
Class R Shares	\$142	\$444	\$769	\$1,689
Class R6 Shares	\$78	\$249	\$436	\$975
Class C Shares – Assuming no redemption	\$192	\$598	\$1,030	\$2,231

PORTFOLIO TURNOVER

The Fund pays transaction costs when it buys and sells securities or instruments (*i.e.*, “turns over” its portfolio). A high rate of portfolio turnover may result in increased transaction costs, including brokerage commissions, which must be borne by the Fund and its shareholders, and is also likely to result in higher short-term capital gains for taxable shareholders. These costs are not reflected in the annual fund operating expenses or in the expense example above, but are reflected in the Fund’s performance. The Fund’s portfolio turnover rate for the fiscal year ended October 31, 2025 was 68% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund seeks to achieve its investment objective by investing primarily in equity investments in non-U.S. issuers. A non-U.S. issuer is an issuer economically tied to a country other than the United States. The Fund intends to have investments economically tied to at least three countries, not including the United States, and may invest in the securities of issuers in emerging market countries. The Fund’s equity investments may include common stock, preferred stock, securities convertible into common stock, warrants, rights and American Depositary Receipts and Global Depositary Receipts (collectively “Depositary Receipts”). The Fund’s equity investments may also include participation notes and other derivatives, which are used primarily to gain broad access to markets and/or individual securities that may be difficult to access via direct investment in equity securities.

The Fund seeks to invest in securities that GQG Partners LLC (the “Sub-Adviser” or “GQG Partners”) believes have favorable long-term economic prospects. The Sub-Adviser selects securities issued by companies that, in its view, can sustain relative earnings growth over the long-term and are available at a reasonable price. Over a full market cycle, the Sub-Adviser’s investment style seeks to capture a portion of market increases while providing some protection when the market declines. The Sub-Adviser’s style seeks to identify companies with strong fundamental business characteristics which it believes will outperform peers over a full market cycle and whose securities will better sustain their value in a market downturn.

The Fund’s equity investments may also include other investment companies and other pooled investment vehicles (including mutual funds, exchange-traded funds (“ETFs”) and publicly traded partnerships (“PTPs”). The Fund is not subject to any limits on the market capitalization of securities in which it may invest and, from time to time, may invest in shares of companies through initial public offerings (“IPOs”).

The Fund may invest without limitation in securities or obtain exposure to securities that are denominated in currencies other than the U.S. dollar. The Fund may use currency management techniques, such as forward foreign currency contracts, for investment or hedging purposes.

The Fund may also invest in fixed income securities, such as government, corporate and bank debt obligations and may engage in other techniques consistent with its overall investment objective.

MANAGEMENT PROCESS

The Investment Adviser and the Fund have received an exemptive order from the Securities and Exchange Commission (“SEC”). Under the exemptive order, the Investment Adviser has the ultimate responsibility, subject to oversight by the Fund’s Board of Trustees, to oversee the Sub-Adviser and recommend its hiring, termination and replacement. The initial shareholder of the Fund approved the Fund’s operation in this manner and reliance by the Fund on this exemptive order.

In accordance with a separate exemptive order that the Fund and the Investment Adviser have obtained from the SEC, the Board of Trustees may enter into a new sub-advisory agreement or materially amend its existing sub-advisory agreement with the Sub-Adviser at a meeting that is not in person, subject to certain conditions, including that the Board of Trustees is able to participate in the meeting using a means of communication that allows them to hear each other simultaneously during the meeting.

Additional Information

The Investment Adviser measures the Fund's performance against the MSCI ACWI ex USA Index (Net, USD, Unhedged).

PRINCIPAL RISKS OF THE FUND

Loss of money is a risk of investing in the Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation ("FDIC") or any government agency. The Fund should not be relied upon as a complete investment program. There can be no assurance that the Fund will achieve its investment objective. Investments in the Fund involve substantial risks which prospective investors should consider carefully before investing. The Fund's principal risks are presented below in alphabetical order, and not in the order of importance or potential exposure.

Asian Investment Risk. Investing in certain Asian issuers may involve a higher degree of risk and special considerations not typically associated with investing in issuers from more established economies or securities markets. The Fund's investments in Asian issuers increase the risks to the Fund of conditions and developments that may be particular to Asian countries, such as: volatile economic cycles and/or securities markets; adverse changes to exchange rates; social, political, military, regulatory, economic or environmental developments; or natural disasters.

Depository Receipts Risk. Foreign securities may trade in the form of depository receipts, including American Depository Receipts ("ADRs") and Global Depository Receipts ("GDRs") (collectively "Depository Receipts"). To the extent the Fund acquires Depository Receipts through banks which do not have a contractual relationship with the foreign issuer of the security underlying the Depository Receipts to issue and service such unsponsored Depository Receipts, there may be an increased possibility that the Fund would not become aware of and be able to respond to corporate actions such as stock splits or rights offerings involving the foreign issuer in a timely manner. In addition, the lack of information may result in inefficiencies in the valuation of such instruments. Investment in Depository Receipts does not eliminate all the risks inherent in investing in securities of non-U.S. issuers. The market value of Depository Receipts is dependent upon the market value of the underlying securities and fluctuations in the relative value of the currencies in which the Depository Receipts and the underlying securities are quoted. The issuers of Depository Receipts may discontinue issuing new Depository Receipts and withdraw existing Depository Receipts at any time, which may result in costs and delays in the distribution of the underlying assets to the Fund and may negatively impact the Fund's performance.

Foreign and Emerging Countries Risk. Foreign securities may be subject to risk of loss because of more or less foreign government regulation; less public information; less stringent investor protections; less stringent accounting, corporate governance, financial reporting and disclosure standards; and less economic, political and social stability in the countries in which the Fund invests. The imposition of sanctions, exchange controls (including repatriation restrictions), confiscations, trade restrictions (including tariffs) and other government restrictions by the United States and other governments, or from problems in share registration, settlement or custody, may also result in losses. The type and severity of sanctions and other similar measures, including counter sanctions and other retaliatory actions, that may be imposed could vary broadly in scope, and their impact is impossible to predict. For example, the imposition of sanctions and other similar measures could, among other things, cause a decline in the value and/or liquidity of securities issued by the sanctioned country or companies located in or economically tied to the sanctioned country and increase market volatility and disruption in the sanctioned country and throughout the world. Sanctions and other similar measures could limit or prevent the Fund from buying and selling securities (in the sanctioned country and other markets), significantly delay or prevent the settlement of securities transactions, and significantly impact the Fund's liquidity and performance. Foreign risk also involves the risk of negative foreign currency exchange rate fluctuations, which may cause the value of securities denominated in such foreign currency (or other instruments through which the Fund has exposure to foreign currencies) to decline in value. Currency exchange rates may fluctuate significantly over short periods of time. These risks are more pronounced in connection with the Fund's investments in securities of issuers located in, or otherwise economically tied to, emerging countries.

Geographic Risk. If the Fund focuses its investments in issuers located in a particular country or geographic region, it will subject the Fund, to a greater extent than if its investments were less focused, to the risks of volatile economic cycles and/or conditions and developments that may be particular to that country or region, such as: adverse securities markets; adverse exchange rates; adverse social, political, regulatory, economic, business, environmental or other developments; or natural disasters.

Initial Public Offering Risk. The market value of IPO shares will fluctuate considerably due to factors such as the absence of a prior public market, unseasoned trading, the small number of shares available for trading and limited information about the issuer. The purchase of IPO shares may involve high transaction costs. IPO shares are subject to market risk and liquidity risk.

Investment Style Risk. Different investment styles (e.g., "growth", "value" or "quantitative") tend to shift in and out of favor depending upon market and economic conditions and investor sentiment. The Fund may outperform or underperform other funds that invest in similar asset classes but employ different investment styles.

Large Shareholder Transactions Risk. The Fund may experience adverse effects when certain large shareholders purchase or redeem large amounts of shares of the Fund. Such large shareholder redemptions, which may occur rapidly or unexpectedly, may cause the Fund to sell portfolio securities at times when it would not otherwise do so, which may negatively impact the Fund's net asset value ("NAV") and liquidity. Similarly, large Fund share purchases may adversely affect the Fund's performance to the extent that the Fund is

delayed in investing new cash or otherwise maintains a larger cash position than it ordinarily would. These transactions may also accelerate the realization of taxable income to shareholders if such sales of investments resulted in gains, and may also increase transaction costs. In addition, a large redemption could result in the Fund's current expenses being allocated over a smaller asset base, leading to an increase in the Fund's expense ratio.

Management Risk. A strategy used by the Sub-Adviser may fail to produce the intended results.

Market Risk. The value of the securities in which the Fund invests may go up or down in response to the prospects of individual companies, particular sectors, governments or countries and/or general economic conditions throughout the world due to increasingly interconnected global economies and financial markets. Events such as war, military conflict, geopolitical disputes, acts of terrorism, social or political unrest, natural disasters, recessions, inflation, rapid interest rate changes, supply chain disruptions, tariffs and other restrictions on trade, sanctions or the spread of infectious illness or other public health threats, or the threat or potential of one or more such events and developments, could also significantly impact the Fund and its investments.

Mid-Cap and Small-Cap Risk. Investments in mid-capitalization and small-capitalization companies involve greater risks than those associated with larger, more established companies. These securities may be subject to more abrupt or erratic price movements and may lack sufficient market liquidity, and these issuers often face greater business risks.

Other Investment Companies Risk. By investing in other investment companies (including ETFs) indirectly through the Fund, investors will incur a proportionate share of the expenses of the other investment companies held by the Fund (including operating costs and investment management fees) in addition to the fees and expenses regularly borne by the Fund. In addition, the Fund will be affected by the investment policies, practices and performance of such investment companies in direct proportion to the amount of assets the Fund invests therein.

Participation Notes Risk. Participation notes are designed to track the return of a particular underlying equity or debt security, currency or market. Investments in participation notes involve the same risks associated with a direct investment in the underlying security, currency or market that they seek to replicate. The Fund has no rights under participation notes against the issuer of the underlying security and must rely on the creditworthiness of the counterparty to the transaction.

Stock Risk. Stock prices have historically risen and fallen in periodic cycles. U.S. and foreign stock markets have experienced periods of substantial price volatility in the past and may do so again in the future.

PERFORMANCE

The bar chart and table below provide an indication of the risks of investing in the Fund by showing: (a) changes in the performance of the Fund's Institutional Shares from year to year; and (b) how the average annual total returns of the Fund's Class A, Class C, Institutional, Investor, Class R and Class R6 Shares compare to those of a broad-based securities market index. The Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. Updated performance information is available at no cost at am.gs.com or by calling the appropriate phone number on the back cover of the Prospectus.

Performance reflects applicable fee waivers and/or expense limitations in effect during the periods shown.

CALENDAR YEAR (INSTITUTIONAL)

During the periods shown in the chart above:	Returns	Quarter ended
Best Quarter Return	17.49%	June 30, 2020
Worst Quarter Return	-13.62%	March 31, 2020

AVERAGE ANNUAL TOTAL RETURN

For the period ended December 31, 2025	1 Year	5 Years	Since Inception	Inception Date
Class A Shares				12/15/2016
Returns Before Taxes	13.80%	7.57%	10.99%	
Returns After Taxes on Distributions	12.69%	6.78%	10.67%	
Returns After Taxes on Distributions and Sale of Fund Shares	9.22%	5.99%	9.23%	
Class C Shares				12/15/2016
Returns Before Taxes	18.30%	7.98%	10.85%*	
Institutional Shares				12/15/2016
Returns Before Taxes	20.84%	9.20%	12.10%	
Investor Shares				12/15/2016

Returns	20.08%	8.52%	11.39%	
Class R6 Shares				12/15/2016
Returns Before Taxes	20.88%	9.22%	12.12%	
MSCI ACWI ex USA Index (Net, USD, Unhedged)	32.39%	7.90%	8.93%	

Benchmark returns do not reflect any deductions for fees or expenses.

* Class C Shares automatically convert into Class A Shares eight years after the purchase date. The since inception performance for Class C Shares does not reflect the conversion to Class A Shares after the first eight years of performance.

The after-tax returns are for Class A Shares only. The after-tax returns for Class C, Institutional, Investor and Class R6 Shares, and returns for Class R Shares (which are offered exclusively to employee benefit plans), will vary. After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. In addition, the after-tax returns shown are not relevant to investors who hold Fund Shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

PORTFOLIO MANAGEMENT

Goldman Sachs Asset Management, L.P. is the investment adviser for the Fund (the "Investment Adviser" or "GSAM"). GQG Partners LLC serves as sub-adviser for the Fund (the "Sub-Adviser" or "GQG Partners").

Portfolio Managers: Rajiv Jain, Chairman and Chief Investment Officer, GQG Partners, has managed the Fund since December 2016; Brian Kersmanc, Portfolio Manager, GQG Partners, has managed the Fund since September 2019; Sudarshan Murthy, CFA, Portfolio Manager, GQG Partners, has managed the Fund since July 2022 and Siddharth Jain, Deputy Portfolio Manager, GQG Partners, has managed the Fund since January 2024.

BUYING AND SELLING FUND SHARES

The minimum initial investment for Class A and Class C Shares is, generally, \$1,000. The minimum initial investment for Institutional Shares is, generally, \$1,000,000 for individual or certain institutional investors or certain wrap account sponsors, alone or in combination with other assets under the management of the Investment Adviser and its affiliates. There is no minimum for initial purchases of Investor, Class R and Class R6 Shares, except for certain institutional investors who purchase Class R6 Shares directly with the Fund's transfer agent for which the minimum initial investment is \$5,000,000. Those share classes with a minimum initial investment requirement do not impose it on certain employee benefit plans, and Institutional Shares do not impose it on certain investment advisers investing on behalf of other accounts.

The minimum subsequent investment for Class A and Class C shareholders is \$50, except for certain employee benefit plans, for which there is no minimum. There is no minimum subsequent investment for Institutional, Investor, Class R or Class R6 shareholders.

You may purchase and redeem (sell) shares of the Fund on any business day through certain intermediaries that have a relationship with Goldman Sachs & Co. LLC ("Goldman Sachs"), including banks, trust companies, brokers, registered investment advisers and other financial institutions ("Intermediaries").

TAX INFORMATION

The Fund's distributions are taxable, and will be taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. Investments made through tax-deferred arrangements may become taxable upon withdrawal from such arrangements.

**PAYMENTS TO BROKER-DEALERS AND
OTHER FINANCIAL INTERMEDIARIES**

If you purchase shares of the Fund through an Intermediary, the Fund and/or its related companies may pay the Intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your Intermediary's website for more information.

Investment Management Approach

INVESTMENT OBJECTIVE

The Goldman Sachs GQG Partners International Opportunities Fund seeks long-term capital appreciation.

The Fund's investment objective may be changed without shareholder approval upon 60 days' notice.

PRINCIPAL INVESTMENT STRATEGIES

The Fund seeks to achieve its investment objective by investing primarily in equity investments in non-U.S. issuers. A non-U.S. issuer is an issuer economically tied to a country other than the United States. The Fund intends to have investments economically tied to at least three countries, not including the United States, and may invest in the securities of issuers in emerging market countries. In determining whether an issuer is economically tied to a country other than the United States, the Investment Adviser or the Sub-Adviser will consider whether the issuer:

- Has a class of securities whose principal securities market is in a country other than the United States;
- Has its principal office in a country other than the United States;
- Derives 50% or more of its total revenue or profit from goods produced, sales made or services provided in one or more countries other than the United States;
- Maintains 50% or more of its assets in one or more countries other than the United States; or
- Is otherwise determined to be economically tied to a country other than the United States by the Investment Adviser or Sub-Adviser in their discretion. For example, the Investment Adviser or Sub-Adviser may use the classifications assigned by third parties, including an issuer's "country of risk" as determined by Bloomberg or the classifications assigned to an issuer by the Fund's benchmark index provider. These classifications are generally based on a number of criteria, including an issuer's country of domicile, the primary stock exchange on which an issuer's securities trade, the location from which the majority of an issuer's revenue is derived, and an issuer's reporting currency. Although the Investment Adviser or Sub-Adviser may rely on these classifications, they are not required to do so.

The Fund's equity investments may include common stock, preferred stock, securities convertible into common stock, warrants, rights and American Depositary Receipts and Global Depositary Receipts (collectively "Depositary Receipts"). The Fund's equity investments may also include participation notes and other derivatives, which are used primarily to gain broad access to markets and/or individual securities that may be difficult to access via direct investment in equity securities.

The Fund seeks to invest in securities that the Sub-Adviser believes have favorable long-term economic prospects. The Sub-Adviser selects securities issued by companies that, in its view, have strong fundamental business characteristics, can sustain relative earnings growth over the long-term and are available at a reasonable price. Over a full market cycle, the Sub-Adviser's investment style seeks to capture a portion of market increases while providing some protection when the market declines.

The Fund's equity investments may also include other investment companies and other pooled investment vehicles (including mutual funds, ETFs and PTPs). The Fund is not subject to any limits on the market capitalization of securities in which it may invest and, from time to time, may invest in shares of companies through IPOs.

The Fund may invest without limitation in securities or obtain exposure to securities that are denominated in currencies other than the U.S. dollar. The Fund may use currency management techniques, such as forward foreign currency contracts, for investment or hedging purposes.

The Fund may also invest in fixed income securities, such as government, corporate and bank debt obligations and may engage in other techniques consistent with its overall investment objective.

The Fund may, from time to time, take temporary defensive positions that are inconsistent with the Fund's principal investment strategies in attempting to respond to adverse market, political or other conditions. For temporary defensive purposes, the Fund may invest up to 100% of its total assets in securities issued or guaranteed by the U.S. government, its agencies, instrumentalities or sponsored enterprises ("U.S. Government Securities"), commercial paper rated at least A-2 by S&P Global Ratings, P-2 by Moody's Investors Service, Inc. ("Moody's"), or having a comparable credit rating from another nationally recognized statistical rating organization ("NRSRO") (or if unrated, determined by the Sub-Adviser to be of comparable credit quality), certificates of deposit, bankers' acceptances, repurchase agreements, non-convertible preferred stocks and non-convertible corporate bonds with a remaining maturity of less than one year, ETFs and other investment companies and cash items. **When the Fund's assets are invested in such instruments, the Fund may not be achieving its investment objective.**

The Investment Adviser measures the Fund's performance against the MSCI ACWI ex USA Index (Net, USD, Unhedged). The MSCI ACWI ex USA Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets.

Management Process

The Investment Adviser and the Fund have received an exemptive order from the Securities and Exchange Commission ("SEC"). Under the exemptive order, the Investment Adviser has the ultimate responsibility, subject to oversight by the Fund's Board of Trustees, to oversee the Sub-Adviser and recommend its hiring, termination and replacement. The initial shareholder of the Fund approved the Fund's operation in this manner and reliance by the Fund on this exemptive order.

In accordance with a separate exemptive order that the Fund and the Investment Adviser have obtained from the SEC, the Board of Trustees may enter into a new sub-advisory agreement or materially amend its existing sub-advisory agreement with the Sub-Adviser at a meeting that is not in person, subject to certain conditions, including that the Board of Trustees is able to participate in the meeting using a means of communication that allows them to hear each other simultaneously during the meeting.

ADDITIONAL FEES AND EXPENSES INFORMATION

Differences in the "Expense Limitation" ratios across the Fund's share classes are the result of, among other things, the effect of mathematical rounding on the daily accrual of expense reimbursement, particularly, in respect to share classes with small amounts of assets.

Differences in the "Other Expenses" ratios across the Fund's share classes are the result of, among other things, contractual differences in transfer agency fees and/or the effect of mathematical rounding on the daily accrual of certain expenses, particularly, in respect to share classes with small amounts of assets.

ADDITIONAL PERFORMANCE AND BENCHMARK INFORMATION

Note that the "Best Quarter" and "Worst Quarter" figures shown in the "Performance" section of the Fund's Summary section are applicable only to the time period covered by the bar chart.

These definitions apply to the after-tax returns shown in the "Performance" section of the Fund's Summary section.

Average Annual Total Returns Before Taxes. These returns do not reflect taxes on distributions on the Fund's Class A Shares nor do they show how performance can be impacted by taxes when shares are redeemed (sold) by you.

Average Annual Total Returns After Taxes on Distributions. These returns assume that taxes are paid on distributions on the Fund's Class A Shares (i.e., dividends and capital gains) but do not reflect taxes that may be incurred upon redemption (sale) of the Class A Shares at the end of the performance period.

Average Annual Total Returns After Taxes on Distributions and Sale of Shares. These returns reflect taxes paid on distributions on the Fund's Class A Shares and taxes applicable when the shares are redeemed (sold).

Note on Tax Rates. The after-tax performance figures are calculated using the historically highest individual federal marginal income tax rates at the time of the distributions and do not reflect state and local taxes. In calculating the federal income taxes due on redemptions, capital gains taxes resulting from a redemption are subtracted from the redemption proceeds and the tax benefits from capital losses resulting from the redemption are added to the redemption proceeds. Under certain circumstances, the addition of the tax benefits from capital losses resulting from redemptions may cause the Returns After Taxes on Distributions and Sale of Fund Shares to be greater than the Returns After Taxes on Distributions or even the Returns Before Taxes.

Note on Benchmark. References in the Prospectus to the Fund's regulatory benchmark or performance benchmark (or any other benchmark) are for informational purposes only, and unless otherwise noted, are not an indication of how the Fund is managed or the Fund's risk characteristics.

OTHER INVESTMENT PRACTICES AND SECURITIES

Although the Fund's principal investment strategies are described in the Fund's Summary—Principal Investment Strategies and Investment Management Approach - Principal Investment Strategies sections of the Prospectus, the following tables identify some of the investment techniques that may (but are not required to) be used by the Fund in seeking to achieve its investment objective. The Fund may be subject to additional limitations on its investments not shown here. Numbers in these tables show allowable usage only; for actual usage, consult the Fund's most recently filed Form N-CSR. For more information about these and other investment practices and securities, see Appendix A.

The Fund publishes on its website (am.gs.com) complete portfolio holdings as of the end of each calendar quarter subject to a sixty day lag between the date of the information and the date on which the information is disclosed. The Fund may disclose portfolio holdings information more frequently if it has a legitimate business purpose for doing so. In addition, the Fund publishes on its website month-end top ten holdings subject to a fifteen calendar day lag between the date of the information and the date on which the information is disclosed. In addition, a description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's Statement of Additional Information ("SAI").

Risks of the Fund

Loss of money is a risk of investing in the Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the FDIC or any other governmental agency. The principal risks of the Fund are discussed in the Summary section of the Prospectus. The following section provides additional information on the risks that apply to the Fund, which may result in a loss of your investment. The risks applicable to the Fund are presented below in alphabetical order, and not in the order of importance or potential exposure. The Fund should not be relied upon as a complete investment program. There can be no assurance that the Fund will achieve its investment objective.

■ **Absence of Regulation Risk**—The Fund engages in OTC transactions, which trade in a dealer network, rather than on an exchange. In general, there is less governmental regulation and supervision of transactions in the OTC markets (in which option contracts and certain options on swaps are generally traded) than of transactions entered into on organized exchanges.

■ **Asian Investment Risk**—Investing in certain Asian issuers may involve a higher degree of risk and special considerations not typically associated with investing in issuers from more established economies or securities markets. Many Asian countries can be

characterized as either developing or newly industrialized economies and tend to experience more volatile economic cycles than developed countries. Some countries in the region have in the past experienced currency devaluations that resulted in high interest rate levels, sharp reductions in economic activity and significant drops in securities prices. Some countries in the region have in the past imposed restrictions on converting local currency which prevented foreign firms from selling assets and repatriating funds. Many countries in the region have historically encountered political uncertainty, corruption, military intervention, social unrest and regional armed conflict. Examples include territorial disputes with China, ethnic and sectarian violence in Indonesia and India, armed conflict between India and Pakistan and between North Korea and South Korea, and insurgencies in the Philippines.

- **Call/Prepayment Risk**—An issuer could exercise its right to pay principal on an obligation held by the Fund (such as a mortgage-backed security) earlier than expected. This may happen when there is a decline in interest rates, when credit spreads change, or when an issuer's credit quality improves. Under these circumstances, the Fund may be unable to recoup all of its initial investment and will also suffer from having to reinvest in lower-yielding securities.
- **Commodity Sector Risk**—Exposure to the commodities markets may subject the Fund to greater volatility than investments in more traditional securities. The value of commodity-linked investments may be affected by changes in overall market movements, commodity index volatility, changes in interest rates, or sectors affecting a particular industry or commodity, such as drought, floods, weather, livestock disease, embargoes, tariffs and other restrictions on trade, sanctions and international economic, business, political and regulatory developments. The prices of energy, industrial metals, precious metals, agriculture and livestock sector commodities may fluctuate widely due to factors such as changes in value, supply and demand and governmental regulatory policies and global events such as war, military conflict and geopolitical disputes. The energy sector can be significantly affected by changes in the prices and supplies of oil and other energy fuels, energy conservation, the success of exploration projects, and tax and other government regulations, policies of the Organization of Petroleum Exporting Countries (“OPEC”) and relationships among OPEC members and between OPEC and oil-importing nations. The metals sector can be affected by sharp price volatility over short periods caused by global economic, financial and political factors, resource availability, government regulation, economic cycles, changes in inflation or expectations about inflation in various countries, interest rates, currency fluctuations, metal sales by governments, central banks or international agencies, investment speculation and fluctuations in industrial and commercial supply and demand. Commodity-linked investments are often offered by companies in the financial services sector, including the banking, brokerage and insurance sectors. As a result, events affecting issuers in the financial services sector may cause the Fund's share value to fluctuate. Although investments in commodities typically move in different directions than traditional equity and debt securities, when the value of those traditional securities is declining due to adverse economic conditions, there is no guarantee that these investments will perform in that manner, and at certain times the price movements of commodity-linked investments have been parallel to those of debt and equity securities.
- **Counterparty Risk**—Many of the protections afforded to cleared transactions, such as the security afforded by transacting through a clearing house, might not be available in connection with certain OTC transactions. Therefore, in those instances in which the Fund enters into certain OTC transactions, the Fund will be subject to the risk that its direct counterparty will not perform its obligations under the transactions and that the Fund will sustain losses. However, recent regulatory developments require margin on certain uncleared OTC transactions which may reduce, but not eliminate, this risk.
- **Credit/Default Risk**—An issuer or guarantor of fixed income securities or instruments held by the Fund (which may have low credit ratings) may default on its obligation to pay interest and repay principal or default on any other obligation. The credit quality of the Fund's portfolio securities or instruments may meet the Fund's credit quality requirements at the time of purchase but then deteriorate thereafter, and such a deterioration can occur rapidly. In certain instances, the downgrading or default of a single holding or guarantor of the Fund's holdings may impair the Fund's liquidity and have the potential to cause significant NAV deterioration. These risks are heightened in market environments where interest rates are rising as well as in connection with the Fund's investments in non-investment grade fixed income securities.
- **Cybersecurity Risk**—The Fund may be susceptible to operational and information security risks resulting from cyber-attacks. Cyber-attacks include, among others, stealing or corrupting confidential information and other data that is maintained online or digitally for financial gain, denial-of-service attacks on websites causing operational disruption, and the unauthorized release of confidential information and other data. Cyber-attacks have the ability to cause significant disruptions and impact business operations; to result in financial losses; to prevent shareholders from transacting business; to interfere with the Fund's calculation of NAV; and to lead to violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs and/or additional compliance costs. Cyber-attacks affecting the Fund or its Investment Adviser, custodian, Transfer Agent, or other third-party service providers may adversely impact the Fund and its shareholders.
- **Depository Receipts Risk**—Foreign securities may trade in the form of Depository Receipts. To the extent the Fund acquires Depository Receipts through banks which do not have a contractual relationship with the foreign issuer of the security underlying the Depository Receipts to issue and service such unsponsored Depository Receipts, there may be an increased possibility that the Fund would not become aware of and be able to respond to corporate actions such as stock splits or rights offerings involving the foreign issuer in a timely manner. In addition, the lack of information may result in inefficiencies in the valuation of such

instruments. Investment in Depositary Receipts does not eliminate all the risks inherent in investing in securities of non-U.S. issuers. The market value of Depositary Receipts is dependent upon the market value of the underlying securities and fluctuations in the relative value of the currencies in which the Depositary Receipts and the underlying securities are quoted. The issuers of Depositary Receipts may discontinue issuing new Depositary Receipts and withdraw existing Depositary Receipts at any time, which may result in costs and delays in the distribution of the underlying assets to the Fund and may negatively impact the Fund's performance.

- **Derivatives Risk**—The Fund's use of forwards, options, futures, options on futures, swaps, options on swaps, structured securities and other similar instruments (collectively referred to in this paragraph as "derivatives") may result in losses, including due to adverse market movements. Derivatives, which may pose risks in addition to and greater than those associated with investing directly in securities, currencies or other instruments, may increase market exposure and be illiquid or less liquid, volatile, difficult to price and leveraged so that small changes in the value of the underlying assets or instruments may produce disproportionate losses to the Fund. Certain derivatives are also subject to counterparty risk, which is the risk that the other party in the transaction will not fulfill, or lacks the capacity or authority to fulfill, its contractual obligations, liquidity risk, which includes the risk that the Fund will not be able to close its derivatives position when it is advantageous to do so, and risks arising from margin requirements, which include the risk that the Fund will be required to pay additional margin or set aside additional collateral to maintain open derivative positions. Derivatives may be used for both hedging and non-hedging purposes.

The use of derivatives is a highly specialized activity that involves investment techniques and risks different from those associated with investments in more traditional securities and instruments, and there is no guarantee that the use of derivatives will achieve their intended result. If the Sub-Adviser is incorrect in its expectation of the timing or level of fluctuation in securities prices, interest rates, currency prices or other variables, the use of derivatives could result in losses, which in some cases may be significant. A lack of correlation between changes in the value of derivatives and the value of the portfolio assets (if any) being hedged could also result in losses. In addition, there is a risk that the performance of the derivatives or other instruments used by the Sub-Adviser to replicate the performance of a particular asset class may not accurately track the performance of that asset class.

The use of derivatives is also subject to operational and legal risks. Operational risks generally refer to risks related to potential operational issues, including documentation issues, settlement issues, system failures, inadequate controls, and human error. Legal risks generally refer to risks of loss resulting from insufficient documentation or legality or enforceability of a contract.

- **Emerging Countries Risk**—Investments in securities of issuers located in, or otherwise economically tied to, emerging countries are subject to the risks associated with investments in foreign securities. The securities markets of most emerging countries are less liquid, developed and efficient, are subject to greater price volatility, and have smaller market capitalizations. In addition, emerging markets and frontier countries may have more or less government regulation and generally do not impose as extensive and frequent accounting, auditing, financial and other reporting requirements as the securities markets of more developed countries. As a result, there could be less information available about issuers in emerging and frontier market countries, which could negatively affect the Investment Adviser's ability to evaluate local companies or their potential impact on the Fund's performance. Further, investments in securities of issuers located in certain emerging countries involve the risk of loss resulting from problems in share registration, settlement or custody, substantial economic, political and social disruptions and the imposition of sanctions or exchange controls (including repatriation restrictions). The legal remedies for investors in emerging and frontier markets may be more limited than the remedies available in the U.S., and the ability of U.S. authorities (*e.g.*, SEC and the U.S. Department of Justice) to bring actions against bad actors may be limited. These risks are not normally associated with investments in more developed countries. These risks may be greater for frontier markets. For more information about these risks, see Appendix A.
- **Expenses Risk**—By investing in pooled investment vehicles (including investment companies and ETFs), partnerships (including PTPs) and REITs indirectly through the Fund, the investor will incur not only a proportionate share of the expenses of the other pooled investment vehicles, partnerships and REITs held by the Fund (including operating costs and investment management fees), but also expenses of the Fund.
- **Foreign Risk**—When the Fund invests in foreign securities, it may be subject to risk of loss not typically associated with U.S. issuers. Loss may result because of more or less foreign government regulation; less public information; less stringent investor protections; less stringent accounting, corporate governance, financial reporting and disclosure standards; less liquid, developed or efficient trading markets; greater volatility; and less economic, political and social stability in the countries in which the Fund invests. Loss may also result from, among other things, deteriorating economic and business conditions in other countries, including the United States, regional and global conflicts, the imposition of sanctions, exchange controls (including repatriation restrictions), foreign taxes, confiscation of assets and property, trade restrictions (including tariffs), expropriations and other government restrictions by the United States and other governments, higher transaction costs, difficulty enforcing contractual obligations or from problems in share registration, settlement or custody. The type and severity of sanctions and other similar measures, including counter sanctions and other retaliatory actions, that may be imposed could vary broadly in scope, and their impact is impossible to predict. These types of measures may include, but are not limited to, banning a sanctioned country from global payment systems that facilitate cross-border payments, restricting the settlement of securities transactions by certain

investors, and freezing the assets of particular countries, entities, or persons. The imposition of sanctions and other similar measures could, among other things, cause a decline in the value and/or liquidity of securities issued by the sanctioned country or companies located in or economically tied to the sanctioned country, downgrades in the credit ratings of the sanctioned country or companies located in or economically tied to the sanctioned country, devaluation of the sanctioned country's currency, and increased market volatility and disruption in the sanctioned country and throughout the world. Sanctions and other similar measures could limit or prevent the Fund from buying and selling securities (in the sanctioned country and other markets), significantly delay or prevent the settlement of securities transactions, and significantly impact the Fund's liquidity and performance. The Fund or the Sub-Adviser may determine not to invest in, or may limit its overall investment in, a particular issuer, country or geographic region due to, among other things, heightened risks regarding sanctions, repatriation restrictions, confiscation of assets and property, expropriation or nationalization. Geopolitical developments in certain countries in which the Fund may invest have caused, or may in the future cause, significant volatility in financial markets and could negatively impact the value of the Fund's investments.

The Fund's investments in foreign securities may also be subject to foreign currency risk, as described above, the risk of negative foreign currency rate fluctuations, which may cause the value of securities denominated in such foreign currency (or other instruments through which the Fund may have exposure to foreign currencies) to decline in value. Foreign risks will normally be greatest when the Fund invests in securities of issuers located in emerging countries. For more information about these risks, see Appendix A.

- **Geographic Risk**—If the Fund focuses its investments in securities of issuers located in a particular country or geographic region, the Fund may be subjected, to a greater extent than if its investments were less focused, to the risks of volatile economic cycles and/or conditions and developments that may be particular to that country or region, such as: adverse securities markets; adverse exchange rates; adverse social, political, regulatory, economic, business, environmental or other developments; or natural disasters.
- **IPO Risk**—The market value of shares issued in an IPO will fluctuate considerably due to factors such as the absence of a prior public market, unseasoned trading, the small number of shares available for trading and limited information about a company's business model, quality of management, earnings growth potential, and other criteria used to evaluate its investment prospects. The purchase of IPO shares may involve high transaction costs. Investments in IPO shares, which are subject to market risk and liquidity risk, involve greater risks than investments in shares of companies that have traded publicly on an exchange for extended periods of time. When the Fund's asset base is small, a significant portion of the Fund's performance could be attributable to investments in IPOs, because such investments would have a magnified impact on the Fund. As the Fund's assets grow, the effect of the Fund's investments in IPOs on the Fund's performance probably will decline, which could reduce the Fund's performance.
- **Investing Through Stock Connect Risk**—Investing in China A Shares through the Shanghai-Hong Kong and Shenzhen-Hong Kong Stock Connect ("Stock Connect") program is subject to trading, clearance, settlement, and other procedures, which could pose risks to the Fund. Trading through Stock Connect is subject to market-wide trading volume and market cap quota limitations, each of which may restrict or preclude the Fund's ability to invest in A Shares through Stock Connect. A primary feature of Stock Connect is the application of the home market's laws and rules applicable to investors in A Shares. Therefore, the Fund's investments in Stock Connect A Shares are generally subject to securities regulations and listing rules, among other restrictions, of the government of the People's Republic of China. Additionally, restrictions on the timing of permitted trading activity in A Shares, including the imposition of local holidays in either Hong Kong or Mainland China and restrictions on purchasing and selling the same security on the same day, may subject the Fund to the risk of price fluctuations of China A Shares at times when the Fund is unable to add to or exit its position.

The risks related to investments in China A Shares through Stock Connect are heightened to the extent that the Fund invests in China A Shares listed on the Science and Technology Innovation Board of the Shanghai Stock Exchange ("STAR Market") and/or the ChiNext Market of the Shenzhen Stock Exchange ("ChiNext Market"). Listed companies on the STAR Market and ChiNext Market are usually of an emerging nature with smaller operating scale. They are subject to higher fluctuation in stock prices and liquidity. It may be more common and faster for companies listed on the STAR Market and ChiNext Market to delist.

- **Investment Style Risk**—Different investment styles (e.g., "growth," "value" or "quantitative") tend to shift in and out of favor depending upon market and economic conditions and investor sentiment. The Fund employs various non-traditional and alternative investment styles, and may outperform or underperform other funds that invest in similar asset classes but employ different investment styles.
- **Large Shareholder Transactions Risk**—The Fund may experience adverse effects when certain large shareholders, such as other funds, institutional investors (including those trading by use of non-discretionary mathematical formulas), financial intermediaries (who may make investment decisions on behalf of underlying clients and/or include the Fund in their investment model), individuals, accounts and Goldman Sachs affiliates, purchase or redeem large amounts of shares of the Fund. Such large shareholder redemptions, which may occur rapidly or unexpectedly, may cause the Fund to sell portfolio securities at times when it would not otherwise do so, which may negatively impact the Fund's NAV and liquidity. Similarly, large Fund share purchases may adversely affect the Fund's performance to the extent that the Fund is delayed in investing new cash or otherwise maintains a larger

cash position than it ordinarily would. These transactions may also accelerate the realization of taxable income to shareholders if such sales of investments resulted in gains, and may also increase transaction costs. In addition, a large redemption could result in the Fund's current expenses being allocated over a smaller asset base, leading to an increase in the Fund's expense ratio.

- **Leverage Risk**—Leverage creates exposure to potential gains and losses in excess of the initial amount invested. Borrowing and the use of derivatives may result in leverage and may increase market exposure and make the Fund more volatile. When the Fund uses leverage, the sum of the Fund's investment exposures may significantly exceed the amount of assets invested in the Fund, although these exposures may vary over time. Relatively small market movements may result in large changes in the value of a leveraged investment. The use of leverage may cause the Fund to liquidate portfolio positions to satisfy its obligations or to meet margin/collateral requirements when it may not be advantageous to do so. The use of leverage by the Fund can substantially increase the Fund's investment risks and cause losses to be realized more quickly.
- **Liquidity Risk**—The Fund may invest in securities or instruments that trade in lower volumes, that are less liquid than other investments and/or that may become illiquid or less liquid in response to market developments or adverse investor perceptions. Investments that are illiquid or that trade in lower volumes may be more difficult to value and more difficult to sell at the desired times and prices. The Fund's transactions in securities that trade in lower volumes may be executed over a period of time, which could impact the prices at which the Fund transacts. When there is no willing buyer and investments cannot be readily sold at the desired time or price, the Fund may have to accept a lower price or may not be able to sell the security or instrument at all. An inability to sell one or more portfolio positions can adversely affect the Fund's value or prevent the Fund from being able to take advantage of other investment opportunities.

Illiquidity can be caused by a drop in overall market trading volume, an inability to find a willing buyer, or legal restrictions on the securities' resale. In addition, during certain periods, the liquidity of particular issuers or industries in which the Fund may invest, or all securities within a particular investment category in which the Fund may invest, may shrink or disappear suddenly and without warning as a result of adverse economic, market or political events (including periods of rapid interest rate changes), or adverse investor perceptions whether or not accurate. Liquidity risk is heightened during these periods.

To the extent that the traditional dealer counterparties that engage in fixed income trading do not maintain inventories of bonds (which provide an important indication of their ability to "make markets") that keep pace with the growth of the bond markets over time, relatively low levels of dealer inventories could lead to decreased liquidity and increased volatility in the fixed income markets. Additionally, market participants other than the Fund may attempt to sell fixed income holdings at the same time as the Fund, which could cause downward pricing pressure and contribute to decreased liquidity.

Liquidity risk may also refer to the risk that the Fund will not be able to pay redemption proceeds within the allowable time period stated in the Fund's prospectus or without significant dilution to remaining investors' interests because of unusual market conditions, declining prices of the securities sold, an unusually high volume of redemption requests or other reasons. While the Fund reserves the right to meet redemption requests through in-kind distributions, the Fund may instead choose to raise cash to meet redemption requests through sales of portfolio securities or permissible borrowings. If the Fund is forced to sell securities at an unfavorable time and/or under unfavorable conditions and prices, such sales may adversely affect the Fund's NAV and dilute remaining investors' interests.

Certain shareholders, including clients or affiliates of the Investment Adviser and/or other funds managed by the Investment Adviser, may from time to time own or control a significant percentage of the Fund's shares. Redemptions by these shareholders of their shares of the Fund may further increase the Fund's liquidity risk and may impact the Fund's NAV. These shareholders may include, for example, institutional investors, funds of funds, discretionary advisory clients, accounts or Goldman Sachs affiliates and other shareholders, whose buy-sell decisions are controlled by a single decision-maker.

- **Management Risk**—The strategy used by the Sub-Adviser may fail to produce the intended results. In addition, the Sub-Adviser may rely on certain key personnel to carry out its investment strategy and a loss of services of any of these personnel may adversely impact the Sub-Adviser and the Fund.
- **Market Risk**—The value of the securities in which the Fund invests may go up or down in response to the prospects of individual companies, particular sectors, governments or countries and/or general economic conditions throughout the world. Price changes may be temporary or last for extended periods. The Fund's investments may be overweighted from time to time in one or more sectors, countries or regions, which will increase the Fund's exposure to risk of loss from adverse developments affecting those sectors, countries or regions.

Global economies and financial markets are becoming increasingly interconnected, and conditions and events in one country, region or financial market may adversely impact issuers in a different country, region or financial market. Furthermore, local, regional and global events such as war, military conflict, geopolitical disputes, acts of terrorism, social or political unrest, natural disasters, recessions, inflation, rapid interest rate changes, supply chain disruptions, tariffs and other restrictions on trade, sanctions or the spread of infectious illness or other public health threats, or the threat or potential of one or more such events and

developments, could also adversely impact issuers, markets and economies, including in ways that cannot necessarily be foreseen. The Fund could be negatively impacted if the value of a portfolio holding were harmed by such political or economic conditions or events. In addition, governmental and quasi-governmental organizations have taken a number of unprecedented actions designed to support the markets. Such conditions, events and actions may result in greater market risk.

- **Mid-Cap and Small-Cap Risk**—The securities of mid-capitalization and small-capitalization companies involve greater risks than those associated with larger, more established companies and may be subject to more abrupt or erratic price movements. Securities of such issuers may lack sufficient market liquidity to enable the Fund to effect sales at an advantageous time or without a substantial drop in price. Both mid-capitalization and small-capitalization companies often have narrower markets and more limited managerial and financial resources than larger, more established companies. As a result, their performance can be more volatile and they face greater risk of business failure, which could increase the volatility of the Fund’s portfolio. Generally, the smaller the company size, the greater these risks become.
- **Mortgage-Backed and Other Asset-Backed Securities Risk**—Mortgage-related and other asset-backed securities are subject to credit/default, interest rate and certain additional risks. Generally, rising interest rates tend to extend the duration of fixed rate mortgage-backed securities, making them more sensitive to changes in interest rates. As a result, in a period of rising interest rates, if the Fund holds mortgage-backed securities, it may exhibit additional volatility. This is known as extension risk. In addition, adjustable and fixed rate mortgage-backed securities are subject to prepayment risk. When interest rates decline, borrowers may pay off their mortgages sooner than expected. This can reduce the returns of the Fund because the Fund may have to reinvest that money at the lower prevailing interest rates. Due to these risks, asset-backed securities may become more volatile in certain interest rate environments.

The Fund’s investments in other asset-backed securities are subject to risks similar to those associated with mortgage-backed securities, as well as additional risks associated with the nature of the assets and the servicing of those assets. Asset-backed securities may not have the benefit of a security interest in collateral comparable to that of mortgage assets, resulting in additional credit risk.

The Fund may invest in mortgage-backed securities issued by the U.S. Government (see “U.S. Government Securities Risk”). To the extent that the Fund invests in mortgage-backed securities offered by non-governmental issuers, such as commercial banks, savings and loan institutions, private mortgage insurance companies, mortgage bankers and other secondary market issuers, the Fund may be subject to additional risks. Timely payment of interest and principal of non-governmental issuers are supported by various forms of private insurance or guarantees, including individual loan, title, pool and hazard insurance purchased by the issuer. There can be no assurance that the private insurers can meet their obligations under the policies. An unexpectedly high rate of defaults on the mortgages held by a mortgage pool may adversely affect the value of a mortgage-backed security and could result in losses to the Fund. The risk of such defaults is generally higher in the case of mortgage pools that include subprime mortgages or during periods of rising interest rates. Subprime mortgages refer to loans made to borrowers with weakened credit histories or with a lower capacity to make timely payments on their mortgages.

The values of, and income generated by, commercial mortgage-backed securities (“CMBS”) may be adversely affected by changing interest rates and other developments impacting the commercial real estate market, such as population shifts and other demographic changes, increasing vacancies (potentially for extended periods) and reduced demand for commercial and office space as well as maintenance or tenant improvement costs and costs to convert properties for other uses. These developments could result from, among other things, changing tastes and preferences (such as for remote work arrangements) as well as cultural, technological, global or local economic and market developments. In addition, changing interest rate environments and associated changes in lending standards and higher refinancing rates may adversely affect the commercial real estate and CMBS markets. The occurrence of any of the foregoing developments would likely increase default risk for the properties and loans underlying these investments as well as impact the value of, and income generated by, these investments. These developments could also result in reduced liquidity for CMBS and other real estate-related investments.

- **NAV Risk**—The NAV of the Fund and the value of your investment will fluctuate.
- **Non-Hedging Foreign Currency Trading Risk**—The Fund may engage in forward foreign currency transactions for both hedging and non-hedging purposes. The Fund’s Sub-Adviser may purchase or sell foreign currencies through the use of forward contracts based on the Sub-Adviser’s judgment regarding the direction of the market for a particular foreign currency or currencies. In pursuing this strategy, the Sub-Adviser seeks to profit from anticipated movements in currency rates by establishing “long” and/or “short” positions in forward contracts on various foreign currencies. Foreign exchange rates can be extremely volatile and a variance in the degree of volatility of the market or in the direction of the market from the Sub-Adviser’s expectations may produce significant losses to the Fund. Some of the transactions may also be subject to interest rate risk.
- **Non-Investment Grade Fixed Income Securities Risk**—Non-investment grade fixed income securities and unrated securities of comparable credit quality (commonly known as “junk bonds”) are considered speculative and are subject to the increased risk of an issuer’s inability to meet principal and interest payment obligations. These securities may be subject to greater price volatility due to

such factors as specific issuer developments, interest rate sensitivity, negative perceptions of the junk bond markets generally and less liquidity. These securities structured as zero-coupon bonds or pay-in-kind securities may require the Fund to make taxable distributions of imputed income without receiving any corresponding cash. Investments in these types of instruments may present special tax issues for the Fund. U.S. federal income tax rules are not entirely clear about issues such as when the Fund may cease to accrue interest, original issue discount or market discount, when and to what extent deductions may be taken for bad debts or worthless instruments, how payments received on obligations in default should be allocated between principal and income and whether exchanges of debt obligations in a bankruptcy or workout context are taxable. These and other issues will be addressed by the Fund to the extent necessary in order to seek to ensure that it distributes sufficient income that it does not become subject to U.S. federal income or excise tax.

- **Other Investment Companies Risk**—By investing in other investment companies (including ETFs) indirectly through the Fund, investors will incur a proportionate share of the expenses of the other investment companies held by the Fund (including operating costs and investment management fees) in addition to the fees and expenses regularly borne by the Fund. In addition, the Fund will be affected by the investment policies, practices and performance of such investment companies in direct proportion to the amount of assets the Fund invests therein.
- **Participation Notes Risk**—The Fund may use participation notes to gain exposure to certain markets in which it cannot invest directly. Participation notes are designed to track the return of a particular underlying equity or debt security, currency, or market. Investments in participation notes involve the same risks associated with a direct investment in the underlying security, currency, or market that they seek to replicate. In addition, the Fund has no rights under participation notes against the issuer of the underlying security and must rely on the creditworthiness of the counterparty to the transaction.
- **Publicly Traded Partnerships (“PTP”) Risk**—The PTPs in which the Fund intends to invest are limited partnerships, the interests (or “units”) in which are traded on public exchanges, just like ETFs. The Fund will invest primarily in PTPs that are commodity pools. In addition to the risks associated with the underlying assets and exposures within a PTP (which in the case of the Fund’s expected PTP investments, include derivatives and commodity sector risks), risks of investments in PTPs may include, among others, dependence upon specialized skills of the PTP’s manager, potential lack of liquidity, and limitations on voting and distribution rights.
- **REIT Risk**—Investing in REITs involves certain unique risks in addition to those risks associated with investing in the real estate industry in general. REITs whose underlying properties are concentrated in a particular industry or geographic region are also subject to risks affecting such industries and regions. The securities of REITs involve greater risks than those associated with larger, more established companies and may be subject to more abrupt or erratic price movements because of interest rate changes, economic conditions and other factors. For example, the value of these securities may decline when interest rates rise and will also be affected by the real estate market and by the management or development of the underlying properties. The underlying properties may be subject to mortgage loans, which may also be subject to the risks of default. REITs may also fail to qualify for tax free pass-through of income or may fail to maintain their exemptions from investment company registration. Securities of such issuers may lack sufficient market liquidity to enable the Fund to effect sales at an advantageous time or without a substantial drop in price.
- **Short Selling Risk**—The Fund may engage in short selling. Short selling involves leverage of the Fund’s assets and presents various risks. In order to establish a short position in a financial instrument, the Fund must first borrow the instrument from a lender, such as a broker or other institution. The Fund may not always be able to borrow an instrument at a particular time or at an acceptable price. Thus, there is risk that the Fund may be unable to implement their investment strategies due to the lack of available financial instruments or for other reasons.

After selling a borrowed financial instrument, the Fund is then obligated to “cover” the short sale by purchasing and returning the instrument to the lender on a later date. The Fund cannot guarantee that the financial instrument necessary to cover a short position will be available for purchase at the time the Fund wishes to close a short position or, if available, that the instrument will be available at an acceptable price. If the borrowed instrument has appreciated in value, the Fund will be required to pay more for the replacement instrument than the amount it received for selling the instrument short. Moreover, purchasing a financial instrument to cover a short position can itself cause the price of the instrument to rise further, thereby exacerbating the loss. The potential loss on a short sale is unlimited because the loss increases as the price of the instrument sold short increases and the price may rise indefinitely. If the price of a borrowed financial instrument declines before the short position is covered, the Fund may realize a gain. The Fund’s gain on a short sale, before transaction and other costs, is generally limited to the difference between the price at which it sold the borrowed instrument and the price it paid to purchase the instrument to return to the lender.

While the Fund has an open short position, it is subject to the risk that the financial instrument’s lender will terminate the loan at a time when the Fund is unable to borrow the same instrument from another lender. If this happens, the Fund may be required to buy the replacement instrument immediately at the instrument’s then current market price or “buy in” by paying the lender an amount equal to the cost of purchasing the instrument to close out the short position.

Short sales also involve other costs. The Fund must normally repay to the lender an amount equal to any dividends or interest that accrues while a loan is outstanding. In addition, to borrow a financial instrument, the Fund may be required to pay a premium. The Fund also will incur transaction costs in effecting short sales. The amount of any ultimate gain for the Fund resulting from a short sale will be decreased, and the amount of any ultimate loss will be increased, by the amount of premiums, dividends, interest or expenses the Fund may be required to pay in connection with the short sale.

Until the Fund replaces a borrowed instrument, the Fund may be required to maintain short sale proceeds with the lending broker as collateral. Moreover, the Fund will be required to make margin payments to the lender during the term of the borrowing if the value of the security it borrowed (and sold short) increases. Thus, short sales involve credit exposure to the broker that executes the short sales. In the event of the bankruptcy or other similar insolvency with respect to a broker with whom the Fund has an open short position, the Fund may be unable to recover, or delayed in recovering, any margin or other collateral held with or for the lending broker.

- **Sovereign Default Risk**—The issuer of non-U.S. sovereign debt held by the Fund or the governmental authorities that control the repayment of the debt may be unable or unwilling to repay the principal or interest when due. This may result from political or social factors, the general economic environment of a country or levels of borrowing rates, foreign debt, or foreign currency exchange rates. Sovereign Default Risk includes the following risks:
 - **Economic Risk**—The risks associated with the general economic environment of a country. These can encompass, among other things, low quality and growth rate of Gross Domestic Product (“GDP”), high inflation or deflation, high government deficits as a percentage of GDP, weak financial sector, overvalued exchange rate, and high current account deficits as a percentage of GDP.
 - **Political Risk**—The risks associated with the general political and social environment of a country. These factors may include among other things government instability, poor socioeconomic conditions, corruption, lack of law and order, lack of democratic accountability, poor quality of the bureaucracy, internal and external conflict, the imposition of international sanctions, and religious and ethnic tensions. High political risk can impede the economic welfare of a country.
 - **Repayment Risk**—A country may be unable to pay its external debt obligations in the immediate future. Repayment risk factors may include but are not limited to high foreign debt as a percentage of GDP, high borrowing rates (which may increase in market environments where interest rates are rising), high foreign debt service as a percentage of exports, low foreign exchange reserves as a percentage of short-term debt or exports, and an unsustainable exchange rate structure.
- **Stock Risk**—Stock prices have historically risen and fallen in periodic cycles. U.S. and foreign stock markets have experienced periods of substantial price volatility in the past and may do so again in the future. Stock prices may fluctuate from time to time in response to the activities of individual companies and in response to general market and economic conditions. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments, and the stock prices of such companies may suffer a decline in response.
- **Swaps Risk**—The use of swaps is a highly specialized activity which involves investment techniques, risk analyses and tax planning different from those associated with ordinary portfolio securities transactions. The Fund’s transactions in swaps may be significant. These transactions can result in sizeable realized and unrealized capital gains and losses relative to the gains and losses from the Fund’s direct investments in securities and short sales.

Transactions in swaps can involve greater risks than if the Fund had invested in securities directly since, in addition to general market risks, swaps may be leveraged and subject to illiquidity risk, counterparty risk, credit risk and pricing risk. Regulators also may impose limits on an entity’s or group of entities’ positions in certain swaps. However, certain risks are reduced (but not eliminated) if the Fund invests in cleared swaps, which are transacted through FCM and cleared through a clearinghouse that serves as a central counterparty. Because uncleared, bilateral swap agreements are two-party contracts and because they may have terms of greater than seven days, these swaps may be considered to be illiquid. Moreover, the Fund bears the risk of loss of the amount expected to be received under a swap in the event of the default or bankruptcy of a swap counterparty. Many swaps are complex and valued subjectively. Swaps and other derivatives may also be subject to pricing or “basis” risk, which exists when the price of a particular derivative diverges from the price of corresponding cash market instruments. Under certain market conditions it may not be economically feasible to initiate a transaction or liquidate a position in time to avoid a loss or take advantage of an opportunity. If a swap transaction is particularly large or if the relevant market is illiquid, it may not be possible to initiate a transaction or liquidate a position at an advantageous time or price, which may result in significant losses.

The value of swaps can be very volatile, and a variance in the degree of volatility or in the direction of securities prices from the Sub-Adviser’s expectations may produce significant losses in the Fund’s investments in swaps. In addition, a perfect correlation between a swap and a security position may be impossible to achieve. As a result, the Sub-Adviser’s use of swaps may not be effective in fulfilling the Sub-Adviser’s investment strategies and may contribute to losses that would not have been incurred otherwise.

- **U.S. Government Securities Risk**—The U.S. government may not provide financial support to U.S. government agencies,

instrumentalities or sponsored enterprises if it is not obligated to do so by law. U.S. Government Securities issued by those agencies, instrumentalities and sponsored enterprises, including those issued by Fannie Mae, Freddie Mac and the Federal Home Loan Banks, are neither issued nor guaranteed by the U.S. Treasury and, therefore, are not backed by the full faith and credit of the United States. The maximum potential liability of the issuers of some U.S. Government Securities held by the Fund may greatly exceed their current resources, including their legal right to support from the U.S. Treasury. It is possible that issuers of U.S. Government Securities will not have the funds to meet their payment obligations in the future. Fannie Mae and Freddie Mac have been operating under conservatorship, with the Federal Housing Finance Agency (“FHFA”) acting as their conservator, since September 2008. The entities are dependent upon the continued support of the U.S. Treasury and FHFA in order to continue their business operations. These factors, among others, could affect the future status and role of Fannie Mae and Freddie Mac and the value of their securities and the securities which they guarantee. Additionally, the U.S. government and its agencies and instrumentalities do not guarantee the market values of their securities, which may fluctuate.

More information about the Fund’s portfolio securities and investment techniques, and their associated risks, is provided in Appendix A. You should consider the investment risks discussed in this section and in Appendix A. Both are important to your investment choice.

Service Providers

INVESTMENT ADVISER

Investment Adviser	Fund
Goldman Sachs Asset Management, L.P. 200 West Street New York, NY 10282	Goldman Sachs GQG Partners International Opportunities Fund

GSAM has been registered as an investment adviser with the SEC since 1990 and is an indirect, wholly-owned subsidiary of The Goldman Sachs Group, Inc. and an affiliate of Goldman Sachs. Founded in 1869, The Goldman Sachs Group, Inc. is a publicly-held financial holding company and a leading global investment banking, securities and investment management firm. As of December 31, 2025, GSAM, including its investment advisory affiliates, had assets under supervision of approximately \$3.35 trillion.

The Investment Adviser oversees the provision of investment advisory and portfolio management services to the Fund, including developing the Fund's investment program. In this regard, the Investment Adviser may impose investment, risk or other parameters that are more restrictive than those described in the Prospectus. The Investment Adviser selects, subject to the approval of the Fund's Board of Trustees, the Sub-Adviser for the Fund, allocates Fund assets to the Sub-Adviser, monitors and evaluates its performance results. While the Investment Adviser is ultimately responsible for overseeing the management of the Fund, it is able to draw upon the research and expertise of its asset management affiliates for portfolio decisions and management. In addition, the Investment Adviser has access to the research and certain proprietary technical models developed by Goldman Sachs and leverages the resources of Goldman Sachs, in each instance subject to legal, internal, and regulatory restrictions.

Pursuant to its Management Agreement with the Fund, the Investment Adviser, directly or through a sub-adviser, is responsible for overseeing the Fund's investment program. In addition, the Investment Adviser supervises the Sub-Adviser of the Fund.

In addition to overseeing the Fund's investment program, the Investment Adviser selects the Fund's Sub-Adviser and provides general oversight of the Sub-Adviser. The Investment Adviser also performs the following additional services for the Fund (to the extent not performed by others pursuant to agreements with the Fund):

- Supervises non-advisory operations of the Fund, including oversight of vendors hired by the Fund, oversight of Fund liquidity and risk management, oversight of regulatory inquiries and requests with respect to the Fund made to the Investment Adviser, valuation and accounting oversight and oversight of ongoing compliance with federal and state securities laws, tax regulations, and other applicable law
- Provides personnel to perform such executive, administrative and clerical services as are reasonably necessary to provide effective administration of the Fund
- Arranges for, at the Fund's expense: (a) the preparation of all required tax returns, (b) the preparation and submission of reports to existing shareholders, (c) the periodic updating of prospectuses and statements of additional information and (d) the preparation of reports to be filed with the SEC and other regulatory authorities
- Maintains the Fund's records
- Provides office space and necessary office equipment and services
- Markets the Fund
- Supervises the Sub-Adviser of the Fund

An investment in the Fund may be negatively impacted because of the operational risks arising from factors such as processing errors and human errors, inadequate or failed internal or external processes, failures in systems and technology, changes in personnel, and errors caused by third-party service providers or trading counterparties. The use of certain investment strategies that involve manual or additional processing, such as over-the-counter derivatives, increases these risks. Although the Fund attempts to minimize such failures through controls and oversight, it is not possible to identify all of the operational risks that may affect the Fund or to develop processes and controls that completely eliminate or mitigate the occurrence of such failures. The Fund and its shareholders could be negatively impacted as a result.

From time to time, Goldman Sachs or its affiliates may invest "seed" capital in the Fund. These investments are generally intended to enable the Fund to commence investment operations and achieve sufficient scale. Goldman Sachs and its affiliates may hedge the exposure of the seed capital invested in the Fund by, among other things, taking an offsetting position in the benchmark of the Fund.

INVESTMENT SUB-ADVISER

GQG Partners LLC, with offices at 350 East Las Olas Boulevard, 18th Floor, Fort Lauderdale, Florida, 33301, serves as the Sub-Adviser to the Fund and provides the day-to-day advice regarding the Fund's portfolio transactions. As of December 31, 2025, GQG Partners had approximately \$163.9 billion in assets under management. GQG Partners is a wholly owned subsidiary of GQG Partners Inc., a Delaware corporation that is listed on the Australian Securities Exchange. The majority owner of GQG Partners Inc. is QVFT, LLC, which is controlled by Rajiv Jain, GQG's Chairman and Chief Investment Officer. GQG Partners makes the investment decisions for the Fund and places purchase and sale orders for the Fund's portfolio transactions in the U.S. and foreign markets. As permitted by applicable law, these orders may be directed to any executing brokers, dealers, futures commission merchants or clearing brokers, including Goldman Sachs and its affiliates. GQG Partners provides investment management services for institutions, mutual funds, and other investors using emerging markets, global, international and U.S. equity investment strategies.

MANAGEMENT FEES AND OTHER EXPENSES

As compensation for its services and its assumption of certain expenses, the Investment Adviser is entitled to a management fee, computed daily and payable monthly, at an annual rate listed below (as a percentage of the Fund's average daily net assets). The Sub-Adviser will be paid by the Investment Adviser out of its management fee a percentage of the Fund's average daily net assets.

Fund	Contractual Management Fee Annual Rate	Average Daily Net Assets	Actual Rate For the Fiscal Year Ended October 31, 2025*
GQG Partners International Opportunities Fund	0.85%	First \$1 Billion	0.70%
	0.77%	Next \$1 Billion	
	0.73%	Next \$3 Billion	
	0.71%	Next \$3 Billion	
	0.70%	Next \$62 Billion	
	0.68%	Over \$70 Billion	

* *The Actual Rate may not correlate to the Contractual Management Fee Annual Rate as a result of management fee waivers that may be in effect from time to time.*

The Investment Adviser has agreed to waive a portion of its management fee in an amount equal to any management fees it earns, as an investment adviser to any of the affiliated funds in which the Fund invests, except those management fees it earns from the Fund's investments of cash collateral received in connection with securities lending transactions in affiliated funds. This arrangement will remain in effect through at least February 28, 2027, and prior to such date, the Investment Adviser may not terminate the arrangement without the approval of the Board of Trustees. The management fee waiver may be modified or terminated by the Investment Adviser at its discretion and without shareholder approval after such date, although the Investment Adviser does not presently intend to do so.

In addition to the management fee waiver described above, the Investment Adviser may waive a portion of its management fee from time to time, and may discontinue or modify such waiver in the future, consistent with the terms of any fee waiver arrangements in place.

A discussion regarding the basis for the Board of Trustees' approval of the Management Agreement and the Sub-Advisory Agreement for the Fund is available in the Fund's Form N-CSR dated October 31, 2025.

The Investment Adviser has agreed to reduce or limit "Other Expenses" (excluding acquired (underlying) fund fees and expenses, transfer agency fees and expenses, taxes, interest, brokerage fees, expenses of shareholder meetings, litigation and indemnification, and extraordinary expenses) equal on an annualized basis to 0.014% of the Fund's average daily net assets, through at least February 28, 2027, and prior to such date, the Investment Adviser may not terminate the arrangement without the approval of the Board of Trustees. The expense limitations may be modified or terminated by the Investment Adviser at its discretion and without shareholder approval after such date, although the Investment Adviser does not presently intend to do so. The Fund's "Other Expenses" may be further reduced by any custody and transfer agency fee credits received by the Fund.

FUND MANAGERS

The individuals jointly and primarily responsible for the day-to-day management of the Fund are listed below. The Fund's portfolio managers' individual responsibilities may differ and may include, among other things, security selection, asset allocation, risk budgeting and general oversight of the management of the Fund's portfolio.

Sub-Adviser Portfolio Management Team

GQG Partner's Portfolio Managers are responsible for the day-to-day management of the Fund under normal circumstances, with the Deputy Portfolio Manager providing support for all aspects of security selection, portfolio construction and risk management with respect to the Fund. Investment decisions are typically made collaboratively by the Portfolio Managers, although, as Chief Investment Officer, Rajiv Jain has the right to act unilaterally on any investment decision-making.

Name and Title	Fund Responsibility	Years Primarily Responsible	Five Year Employment History
Rajiv Jain Chairman and Chief Investment Officer, GQG Partners LLC	Portfolio Manager—GQG Partners International Opportunities Fund	Since 2016	Mr. Jain joined GQG Partners in June 2016. He is the Chairman, Chief Investment Officer and Portfolio Manager of GQG Partners.
Brian Kersmanc Portfolio Manager and Senior Investment Analyst, GQG Partners LLC	Portfolio Manager—GQG Partners International Opportunities Fund	Since 2022	Mr. Kersmanc joined GQG Partners in 2016. He is a Portfolio Manager.
Sudarshan Murthy, CFA Portfolio Manager and Senior Investment Analyst, GQG Partners LLC	Portfolio Manager—GQG Partners International Opportunities Fund	Since 2022	Mr. Murthy joined GQG Partners in 2016. He is a Portfolio Manager.
Siddharth Jain Deputy Portfolio Manager and Investment Analyst, GQG Partners LLC	Deputy Portfolio Manager—GQG Partners International Opportunities Fund	Since 2024	Mr. Jain joined GQG Partners in 2021. He is a Deputy Portfolio Manager.

For information about the portfolio managers' compensation, other accounts managed by the portfolio managers and the portfolio managers' ownership of securities in the Fund, see the SAI.

DISTRIBUTOR AND TRANSFER AGENT

Goldman Sachs, 200 West Street, New York, NY 10282, serves as the exclusive distributor (the "Distributor") of the Fund's shares. Goldman Sachs, 71 South Wacker Drive, Suite 1200, Chicago, IL 60606, also serves as the Fund's transfer agent (the "Transfer Agent") and, as such, performs various shareholder servicing functions.

For its transfer agency services, Goldman Sachs is entitled to receive a transfer agency fee equal, on an annualized basis, to 0.03% of average daily net assets with respect to Class R6 Shares, 0.04% of average daily net assets with respect to Institutional Shares and 0.15% of average daily net assets with respect to Class A, Class C, Investor and Class R Shares.

Additionally, Goldman Sachs has agreed to waive a portion of its transfer agency fee equal to 0.01% as an annual percentage rate of the average daily net assets attributable to Class R6 Shares. This arrangement will remain in effect through at least February 28, 2027, and prior to such date Goldman Sachs may not terminate the arrangement without the approval of the Board of Trustees.

From time to time, Goldman Sachs or any of its affiliates may purchase and hold shares of the Fund. Goldman Sachs and its affiliates reserve the right to redeem at any time some or all of the shares acquired for their own accounts.

ACTIVITIES OF GOLDMAN SACHS AND ITS AFFILIATES AND OTHER ACCOUNTS MANAGED BY GOLDMAN SACHS

The involvement of the Investment Adviser, Goldman Sachs and their affiliates in the management of, or their interest in, other accounts and other activities of Goldman Sachs will present conflicts of interest with respect to the Fund and will, under certain circumstances, limit the Fund's investment activities. Goldman Sachs is a worldwide, full service investment banking, broker dealer, asset management and financial services organization and a major participant in global financial markets that provides a wide range of financial services to a substantial and diversified client base that includes corporations, financial institutions, governments and individuals. As such, it acts as a broker-dealer, investment adviser, investment banker, underwriter, research provider, administrator, financier, adviser, market maker, trader, prime broker, derivatives dealer, clearing agent, lender, custodian, counterparty, agent, principal, distributor, investor or in other commercial capacities for accounts or companies (including Fund portfolio companies) or affiliated or unaffiliated investment funds (including pooled investment vehicles and private funds) in which one or more accounts, including the Fund, invest. In those and other capacities, Goldman Sachs and its affiliates advise and deal with clients and third parties in all markets and transactions and purchase, sell, hold and recommend a broad array of investments, including securities, derivatives, loans, commodities, currencies, credit default swaps, indices, baskets and other financial instruments and products for their own accounts or for the accounts of their customers and have other direct and indirect interests in the global fixed income, currency,

commodity, equities, bank loans and other markets and the securities and issuers in which the Fund may directly and indirectly invest. Thus, it is expected that the Fund will have multiple business relationships with and will invest in, engage in transactions with, make voting decisions with respect to, or obtain services from entities for which Goldman Sachs and its affiliates perform or seek to perform investment banking or other services. The Investment Adviser and/or certain of its affiliates are the managers of the Goldman Sachs Funds. The Investment Adviser and its affiliates earn fees from this and other relationships with the Fund. Although management fees paid by the Fund to the Investment Adviser and certain other fees paid to the Investment Adviser's affiliates are based on asset levels, the fees are not directly contingent on Fund performance, and the Investment Adviser and its affiliates will still receive significant compensation from the Fund even if shareholders lose money. Goldman Sachs and its affiliates engage in proprietary trading and advise accounts and funds which have investment objectives similar to those of the Fund and/or which engage in and compete for transactions in the same types of securities, currencies and instruments as the Fund. Goldman Sachs and its affiliates will not have any obligation to make available any information regarding their proprietary activities or strategies, or the activities or strategies used for other accounts managed by them, for the benefit of the management of the Fund. The results of the Fund's investment activities, therefore, will likely differ from those of Goldman Sachs, its affiliates, and other accounts managed by Goldman Sachs, and it is possible that the Fund could sustain losses during periods in which Goldman Sachs and its affiliates and other accounts achieve significant profits on their trading for proprietary or other accounts. In addition, the Fund may enter into transactions in which Goldman Sachs and its affiliates or their other clients have an adverse interest. For example, the Fund may take a long position in a security at the same time that Goldman Sachs and its affiliates or other accounts managed by the Investment Adviser or its affiliates take a short position in the same security (or vice versa). These and other transactions undertaken by Goldman Sachs, its affiliates or Goldman Sachs-advised clients may, individually or in the aggregate, adversely impact the Fund. Transactions by one or more Goldman Sachs-advised clients or the Investment Adviser may have the effect of diluting or otherwise disadvantaging the values, prices or investment strategies of the Fund. The Fund's activities will, under certain circumstances, be limited because of regulatory restrictions applicable to Goldman Sachs and its affiliates, and/or their internal policies designed to comply with such restrictions. As a global financial services firm, Goldman Sachs and its affiliates also provide a wide range of investment banking and financial services to issuers of securities and investors in securities. Goldman Sachs, its affiliates and others associated with it are expected to create markets or specialize in, have positions in and/or effect transactions in, securities of issuers held by the Fund, and will likely also perform or seek to perform investment banking and financial services for one or more of those issuers. Goldman Sachs and its affiliates are expected to have business relationships with and purchase or distribute or sell services or products from or to distributors, consultants or others who recommend the Fund or who engage in transactions with or for the Fund. For more information about conflicts of interest, see the section titled "Potential Conflicts of Interest" in the SAI.

Under a securities lending program approved by the Fund's Board of Trustees, the Fund has retained an affiliate of the Investment Adviser to serve as the securities lending agent for the Fund to the extent that the Fund engages in the securities lending program. For these services, the lending agent would receive a fee from the Fund, including a fee based on the returns earned on the Fund's investment of the cash received as collateral for the loaned securities. The Board of Trustees periodically reviews reports on portfolio securities loan transactions for which an affiliated lending agent has acted lending agent. In addition, the Fund may make brokerage and other payments to Goldman Sachs and its affiliates in connection with the Fund's portfolio investment transactions, in accordance with applicable law.

Distributions

The Fund pays distributions from its investment income and from net realized capital gains. You may choose to have distributions paid in:

- Cash
- Additional shares of the same class of the same Fund
- Shares of the same or an equivalent class of another fund managed by the Investment Adviser and/or certain of its advisory affiliates (each, a “Goldman Sachs Fund”). Special restrictions may apply. See the SAI.

You may indicate your election on your account application. Any changes may be submitted in writing or via telephone, in some instances, to the Transfer Agent (either directly or through your Intermediary) at any time before the record date for a particular distribution. If you do not indicate any choice, your distributions will be reinvested automatically in the Fund. Distributions from net investment income and net capital gains, if any, are normally declared and paid annually for the Fund. In addition the Fund may occasionally make a distribution at a time when it is not normally made. If cash distributions are elected with respect to the Fund’s distributions from net investment income, then cash distributions must also be elected with respect to the net short-term capital gains component, if any, of the Fund’s distributions.

The election to reinvest distributions in additional shares will not affect the tax treatment of such distributions, which will be treated as received by you and then used to purchase the shares.

The Fund’s investments in foreign securities may be subject to foreign withholding taxes. Under certain circumstances, the Fund may elect to pass-through these taxes to you. If this election is made, a proportionate amount of such taxes will constitute a distribution to you, which would allow you either (i) to credit such proportionate amount of foreign taxes against your U.S. federal income tax liability or (ii) to take such amount as an itemized deduction.

From time to time a portion of the Fund’s distributions may constitute a return of capital for tax purposes, and/or may include amounts in excess of the Fund’s net investment income for the period calculated in accordance with generally accepted accounting principles (GAAP).

When you purchase shares of the Fund, part of the NAV per share may be represented by undistributed income and/or realized gains that have previously been earned by the Fund. Therefore, subsequent distributions on such shares from such income and/or realized gains may be taxable to you even if the NAV of the shares is, as a result of the distributions, reduced below the cost of such shares and the distributions (or portions thereof) represent a return of a portion of the purchase price.

Shareholder Guide

The following section will provide you with answers to some of the most frequently asked questions regarding buying and selling the Fund's shares.

HOW TO BUY SHARES

Shares Offering

Shares of the Fund are continuously offered through the Distributor. The Fund and the Distributor will have the sole right to accept orders to purchase shares and reserve the right to reject any purchase order in whole or in part.

How Can I Purchase Shares Of The Fund?

You may purchase shares of the Fund through certain intermediaries that have a relationship with Goldman Sachs, including banks, trust companies, brokers, registered investment advisers and other financial institutions ("Intermediaries"). Certain Intermediaries have been authorized by Goldman Sachs Trust II (the "Trust") to accept purchase, redemption or exchange orders on behalf of the Fund for its customers ("Authorized Institutions"), and if approved by the Fund, may designate other financial intermediaries to accept such orders. You should contact your Intermediary to learn whether it is authorized to accept orders on behalf of the Fund (i.e., an Authorized Institution). In order to make an initial investment in the Fund you must furnish to your Intermediary the information in the account application.

The decision as to which class to purchase depends on the amount you invest, the intended length of the investment and your personal situation. You should contact your Intermediary to discuss which share class option is right for you.

Note: Intermediaries may receive different compensation for selling different share classes.

To open an account, contact your Intermediary. Customers of an Intermediary will normally give their order instructions to the Intermediary, and the Intermediary will, in turn, place the order with the Transfer Agent. Intermediaries are responsible for transmitting accepted orders and payments to the Transfer Agent within the time period agreed upon by them and will set times by which orders and payments must be received by them from their customers. The Trust, Transfer Agent, Investment Adviser and their affiliates will not be responsible for any loss in connection with orders that are not transmitted to the Transfer Agent by an Intermediary on a timely basis.

The Fund will be deemed to have received an order for purchase, redemption or exchange of Fund shares when the order is accepted in "proper form" by the Transfer Agent (or, if applicable, by an Authorized Institution) on a business day, and the order will be priced at the Fund's current NAV per share (adjusted for any applicable sales charge) next determined after acceptance by the Transfer Agent (or, if applicable, by an Authorized Institution). For shareholders that place trades directly with the Fund's Transfer Agent, proper form generally means that specific trade details and customer identifying information must be received by the Transfer Agent at the time an order is submitted. Intermediaries of the Fund may have different requirements regarding what constitutes proper form for trade instructions. Please contact your Intermediary for more information.

For purchases by check, the Fund will not accept checks drawn on foreign banks, third party checks, temporary checks, cash or cash equivalents; e.g., cashier's checks, official bank checks, money orders, traveler's cheques or credit card checks. In limited situations involving the transfer of retirement assets, the Fund may accept cashier's checks or official bank checks.

Investor and Class R Shares are not sold directly to the public. Instead, Investor and Class R Shares generally are available only to Section 401(k), 403(b), 457, profit sharing, money purchase pension, tax-sheltered annuity, defined benefit pension, non-qualified deferred compensation plans and non-qualified pension plans or other employee benefit plans (including health savings accounts) or SIMPLE plans that are sponsored by one or more employers (including governmental or church employers) or employee organizations ("Employee Benefit Plans"). Investor Shares may also be sold to accounts established under a fee-based program that is sponsored and maintained by an Intermediary that has entered into a contractual relationship with Goldman Sachs to offer such shares through such programs ("Eligible Fee-Based Program"). Investor and Class R Shares are not available to traditional and Roth Individual Retirement Accounts ("IRAs"), SEPs and SARSEPs; except that Investor Shares are available to such accounts or plans to the extent they are purchased through an Eligible Fee-Based Program. Employee Benefit Plans and Eligible Fee-Based Programs must purchase Investor or Class R Shares through an Intermediary using a plan level or omnibus account.

Employee Benefit Plans generally may open an account and purchase Investor and/or Class R Shares through Intermediaries, financial planners, Employee Benefit Plan administrators and other financial intermediaries. Investor and/or Class R Shares may not be available through certain Intermediaries.

Class R6 Shares are generally available to the following investors who purchase shares of the Fund through certain Intermediaries that have a contractual relationship with Goldman Sachs, including banks, trust companies, brokers, registered investment advisers and other financial institutions, using a plan level or omnibus account, unless otherwise noted below.

- Investors who purchase Class R6 Shares through an Eligible Fee-Based Program;
- Employee Benefit Plans;
- Registered investment companies or bank collective trusts investing directly with the Transfer Agent;
- Institutional investors, including companies, foundations, endowments, municipalities, trusts and other entities, investing at least \$5,000,000 directly with the Transfer Agent; and
- Other investors at the discretion of the Trust's officers.

Class R6 Shares may not be available through certain Intermediaries. For the purposes of Class R6 Shares eligibility, the term "Intermediary" does not include Goldman Sachs or its affiliates and Class R6 Shares will not be available to clients of Goldman Sachs Private Wealth Management, The Goldman Sachs Trust Company, N.A., The Goldman Sachs Trust Company of Delaware or Goldman Sachs Wealth Services, L.P.

What Is My Minimum Investment In The Fund?

For each of your accounts investing in Class A or Class C Shares, the following investment minimums must be met:

	Initial	Additional*
Regular Accounts	\$1,000	\$50
Employee Benefit Plans	No Minimum	No Minimum
Uniform Gift/Transfer to Minors Accounts (UGMA/UTMA)	\$250	\$50
Individual Retirement Accounts and Coverdell ESAs	\$250	\$50
Automatic Investment Plan Accounts	\$250	\$50

* No minimum additional investment requirements are imposed with respect to investors trading through Intermediaries who aggregate shares in omnibus or similar accounts (e.g., employee benefit plan accounts, wrap program accounts or traditional brokerage house accounts). A maximum purchase limitation of \$1,000,000 in the aggregate normally applies to purchases of Class C Shares across all Goldman Sachs Funds.

For Institutional Shares, the minimum initial investment is \$1,000,000 for individual or Institutional Investors, alone or in combination with other assets under the management of the Investment Adviser and its affiliates, except that no initial minimum will be imposed on (i) Employee Benefit Plans that hold their Institutional Shares through plan-level or omnibus accounts; or (ii) investment advisers investing for accounts for which they receive asset-based fees where the investment adviser or its Intermediary purchases Institutional Shares through an omnibus account. For this purpose, "Institutional Investors" shall include "wrap" account sponsors (provided they have an agreement covering the arrangement with the Distributor); corporations; qualified non-profit organizations, charitable trusts, foundations and endowments; any state, county or city, or any instrumentality, department, authority or agency thereof; and banks, trust companies or other depository institutions investing for their own account or on behalf of their clients.

No minimum amount is required for initial purchases in Investor, Class R and Class R6 Shares (except as provided below) or additional investments in Institutional, Investor, Class R or Class R6 Shares.

For Class R6 Shares, the minimum initial investment is \$5,000,000 for institutional investors, including companies, foundations, endowments, municipalities, trusts and other entities who purchase Class R6 Shares directly with the Transfer Agent.

The minimum investment requirement for Class A, Class C and Institutional Shares may be waived for: (i) Goldman Sachs, its affiliates (including the Trust) or their respective Trustees, officers, partners, directors or employees (including retired employees and former partners), as well as certain individuals related to such investors, including spouses or domestic partners, minor children including those of their domestic partners, other family members residing in the same household, and/or financial dependents, provided that all of the above are designated as such with an Intermediary or the Fund's Transfer Agent; (ii) advisory clients of Goldman Sachs Private Wealth Management and accounts for which The Goldman Sachs Trust Company, N.A. acts in a fiduciary capacity (i.e., as agent or trustee); (iii) certain mutual fund "wrap" programs at the discretion of the Trust's officers; and (iv) other investors at the discretion of the Trust's officers. Additionally, the minimum investment requirement for Institutional Shares may be waived for employees of the Sub-Adviser subject to approval by the Fund. No minimum amount is required for additional investments in such accounts.

What Should I Know When I Purchase Shares Through An Intermediary?

If shares of the Fund are held in an account maintained and serviced by your Intermediary, all recordkeeping, transaction processing and payments of distributions relating to your account will be performed by your Intermediary, and not by the Fund and its Transfer Agent. Since the Fund will have no record of your transactions, you should contact your Intermediary to purchase, redeem or exchange

shares, to make changes in or give instructions concerning your account or to obtain information about your account. The transfer of shares from an account with one Intermediary to an account with another Intermediary involves special procedures and may require you to obtain historical purchase information about the shares in the account from your Intermediary. If your Intermediary's relationship with Goldman Sachs is terminated, and you do not transfer your account to another Intermediary, the Trust reserves the right to redeem your shares. The Trust will not be responsible for any loss in an investor's account or tax liability resulting from a redemption. Certain Intermediaries may be authorized to accept, on behalf of the Trust, purchase, redemption and exchange orders placed by or on behalf of their customers, and if approved by the Trust, to designate other financial intermediaries to accept such orders.

Intermediaries that invest in shares on behalf of their customers may charge brokerage commissions or other fees directly to their customer accounts in connection with their investments. You should contact your Intermediary for information regarding such charges, as these fees, if any, may affect the return such customers realize with respect to their investments.

The Investment Adviser, Distributor and/or their affiliates may make payments or provide services to Intermediaries and other persons to promote the sale, distribution and/or servicing of shares of the Fund and other Goldman Sachs Funds, except that the Investment Adviser, Distributor and their affiliates do not make such payments on behalf of Class R6 Shares. These payments are made out of the Investment Adviser's, Distributor's and/or their affiliates' own assets, and are not an additional charge to the Fund. The payments are in addition to the distribution and service fees, service fees and shareholder administration fees and sales charges described in the Prospectus. Such payments are intended to compensate Intermediaries and other persons for, among other things: marketing shares of the Fund and other Goldman Sachs Funds, which may consist of payments relating to the Fund's inclusion on preferred or recommended fund lists or in certain sales programs sponsored by the recipients; access to the Intermediaries' registered representatives or salespersons, including at conferences and other meetings; assistance in training and education of personnel; marketing support; the provision of analytical or other data to the Investment Adviser or its affiliates relating to sales of shares of the Fund and other Goldman Sachs Funds; the support or purchase of technology platforms/software; and/or other specified services intended to assist in the distribution and marketing of the Fund and other Goldman Sachs Funds, including provision of consultative services to the Investment Adviser or its affiliates relating to marketing and/or sale of shares of the Fund and other Goldman Sachs Funds. The payments may also, to the extent permitted by applicable regulations, sponsor various trainings and educational programs. The payments by the Investment Adviser, Distributor and/or their affiliates, which are in addition to the fees paid for these services by the Fund, may also compensate Intermediaries and other persons for sub-accounting, sub-transfer agency, administrative, shareholder processing and/or recordkeeping services. These additional payments may exceed amounts earned on these assets by the Investment Adviser, Distributor and/or their affiliates for the performance of these or similar services. The amount of these additional payments is normally not expected to exceed 0.50% (annualized) of the amount sold or invested through the recipients. In addition, certain Intermediaries may have access to certain services from the Investment Adviser, Distributor and/or their affiliates, including research reports, economic analysis, portfolio analysis, portfolio construction and similar tools and software. In certain cases, the Intermediaries may not pay for these products or services or may only pay for a portion of the total cost of these products or services. Please refer to the "Payments to Others (Including Intermediaries)" section of the SAI for more information about these and similar payments and services.

The payments made by the Investment Adviser, Distributor and/or their affiliates and the services provided by an Intermediary or other person may differ for different Intermediaries and other persons. The presence of these and similar payments, receipt of these services and the basis on which an Intermediary compensates its registered representatives or salespersons may create an incentive for a particular Intermediary, registered representative, salesperson or other person to highlight, feature or recommend the Fund based, at least in part, on the level of compensation paid. You should contact your Intermediary, or any other person that provides services to you, for more information about the payments it receives and any potential conflicts of interest.

You may be required to pay a commission directly to a broker or financial intermediary for effecting transactions in Institutional Shares. In addition to Institutional Shares, the Fund also offers other classes of shares to investors. These other share classes are subject to different fees and expenses (which affect performance) and are entitled to different services than Institutional Shares. Information regarding these other share classes is included in the Prospectus for the applicable share class and may also be obtained from your Intermediary or from Goldman Sachs by calling the number on the back cover of the Prospectus.

What Else Should I Know About Share Purchases?

The Trust reserves the right to:

- Refuse to open an account or require an Intermediary to refuse to open an account if you fail to (i) provide a taxpayer identification number, a Social Security Number or other government-issued identification (e.g., for an individual, a driver's license or passport) or (ii) certify that such number or other information is correct (if required to do so under applicable law).
- Reject or restrict any purchase or exchange order by a particular purchaser (or group of related purchasers) for any reason in its discretion. Without limiting the foregoing, the Trust may reject or restrict purchase and exchange orders by a particular purchaser (or group of related purchasers) when a pattern of frequent purchases, sales or exchanges of shares of the Fund is evident, or if purchases, sales or exchanges are, or a subsequent redemption might be, of a size that would disrupt the management of the Fund.

- Close the Fund to new investors from time to time and reopen the Fund whenever it is deemed appropriate by the Fund's Investment Adviser.
- Provide for, modify or waive the minimum investment requirements.
- Modify the manner in which shares are offered.
- Modify the sales charge rate applicable to future purchases of shares.

Shares of the Fund are only registered for sale in the United States and certain of its territories. Generally, shares of the Fund will only be offered or sold to "U.S. persons" and all offerings or other solicitation activities will be conducted within the United States, in accordance with the rules and regulations of the Securities Act of 1933, as amended ("Securities Act").

The Fund may allow you to purchase shares through an Intermediary with securities instead of cash if consistent with the Fund's investment policies and operations and approved by the Investment Adviser.

Notwithstanding the foregoing, the Trust and Goldman Sachs reserve the right to reject or restrict purchase or exchange requests from any investor. The Trust and Goldman Sachs will not be liable for any loss resulting from rejected purchase or exchange orders.

Please be advised that abandoned or unclaimed property laws for certain states (to which your account may be subject) require financial organizations to transfer (escheat) unclaimed property (including shares of the Fund) to the appropriate state if no activity occurs in an account for a period of time specified by state law. For IRA accounts escheated to a state under these abandoned property laws, the escheatment will generally be treated as a taxable distribution to you; federal and any applicable state income tax will be withheld. This may apply to your Roth IRA as well.

Customer Identification Program. Federal law requires the Fund to obtain, verify and record identifying information for certain investors, which will be reviewed solely for customer identification purposes, which may include the name, residential or business street address, date of birth (for an individual), Social Security Number or taxpayer identification number or other information, for each investor who opens an account directly with the Fund. Applications without the required information may not be accepted by the Fund. Throughout the life of your account, the Fund may request updated identifying information in accordance with their Customer Identification Program. After accepting an application, to the extent permitted by applicable law or their Customer Identification Program, the Fund reserves the right to: (i) place limits on transactions in any account until the identity of the investor is verified; (ii) refuse an investment in the Fund; or (iii) involuntarily redeem an investor's shares and close an account in the event that the Fund is unable to verify an investor's identity or is unable to obtain all required information. The Fund and its agents will not be responsible for any loss or tax liability in an investor's account resulting from the investor's delay in providing all required information or from closing an account and redeeming an investor's shares pursuant to its Customer Identification Program.

How Are Shares Priced?

The price you pay when you buy shares is the Fund's next-determined NAV per share (as adjusted for any applicable sales charge) after the Transfer Agent (or, if applicable, an Authorized Institution) has received and accepted your order in proper form. The price you receive when you sell shares is the Fund's next-determined NAV per share (adjusted for any applicable CDSCs) after the Transfer Agent (or, if applicable, an Authorized Institution) has received and accepted your order in proper form, with the redemption proceeds reduced by any applicable charges (e.g., CDSCs). Each class generally calculates its NAV as follows:

$$\text{NAV} = \frac{\begin{array}{l} \text{(Value of Assets of the Class)} \\ - \text{(Liabilities of the Class)} \end{array}}{\text{Number of Outstanding Shares of the Class}}$$

The Fund's investments for which market quotations are readily available are valued at market value on the basis of quotations provided by pricing sources. If accurate quotations are not readily available, if the Fund's fund accounting agent is unable for other reasons to facilitate pricing of individual securities or calculate the Fund's NAV, or if the Investment Adviser believes that such quotations do not accurately reflect fair value, the fair value of the Fund's investments may be determined in good faith under valuation procedures approved by the Board of Trustees. Thus, such pricing may be based on subjective judgments and it is possible that the prices resulting from such valuation procedures may differ materially from such value realized on a sale. Cases where there is no clear indication of the value of the Fund's investments include, among others, situations where a security or other asset or liability does not have a price source or a price is unavailable.

Equity securities listed on an exchange are generally valued at the last available sale price on the exchange on which they are principally traded. To the extent the Fund invests in foreign equity securities, "fair value" prices will be provided by an independent third-party pricing (fair value) service in accordance with the fair value procedures approved by the Board of Trustees. Fair value prices are used because many foreign markets operate at times that do not coincide with those of the major U.S. markets. Events that could affect the values of foreign portfolio holdings may occur between the close of the foreign market and the time of determining the NAV, and would not otherwise be reflected in the NAV.

Fixed income securities are generally valued on the basis of prices (including evaluated prices) and quotations provided by pricing services or securities dealers. Pricing services may use matrix pricing or valuation models, which utilize certain inputs and assumptions, including, but not limited to, yield or price with respect to comparable fixed income securities, to determine current value. Pricing services generally value fixed income securities assuming orderly transactions of an institutional round lot size, but the Fund may hold or transact in such securities in smaller odd lot sizes. Odd lots may trade at lower prices than institutional round lots.

Investments in other open-end registered investment companies (if any), excluding investments in ETFs, are valued based on the NAV of those open-end registered investment companies (which may use fair value pricing as discussed in their prospectuses). Investments in ETFs will generally be valued at the last sale price or official closing price on the exchange on which they are principally traded.

In addition, the Investment Adviser, consistent with its procedures and applicable regulatory guidance, may (but need not) determine to make an adjustment to the previous closing prices of either domestic or foreign securities in light of significant events, to reflect what it believes to be the fair value of the securities at the time of determining the Fund's NAV. Significant events that could affect a large number of securities in a particular market may include, but are not limited to: situations relating to one or more single issuers in a market sector; significant fluctuations in U.S. or foreign markets; market dislocations; market disruptions or unscheduled market closings; equipment failures; natural or man-made disasters or acts of God; armed conflicts; governmental actions or other developments; as well as the same or similar events which may affect specific issuers or the securities markets even though not tied directly to the securities markets. Other significant events that could relate to a single issuer may include, but are not limited to: corporate actions such as reorganizations, mergers and buy-outs; corporate announcements, including those relating to earnings, products and regulatory news; significant litigation; ratings downgrades; bankruptcies; and trading limits or suspensions.

One effect of using an independent third-party pricing (fair value) service and fair valuation may be to reduce stale pricing arbitrage opportunities presented by the pricing of Fund shares. However, it involves the risk that the values used by the Fund to price its investments may be different from those used by other investment companies and investors to price the same investments.

Please note the following with respect to the price at which your transactions are processed:

- NAV per share of each share class is generally calculated by the Fund's fund accounting agent on each business day as of the close of regular trading on the New York Stock Exchange (normally 4:00 p.m. Eastern time) or such other times as the New York Stock Exchange or NASDAQ market may officially close. Fund shares will generally not be priced on any day the New York Stock Exchange is closed.
- The Trust reserves the right to reprocess purchase (including dividend reinvestments), redemption and exchange transactions that were processed at a NAV that is subsequently adjusted, and to recover amounts from (or distribute amounts to) shareholders accordingly based on the official closing NAV, as adjusted.
- The Trust reserves the right to advance the time by which purchase and redemption orders must be received for same business day credit as otherwise permitted by the SEC.

Consistent with industry practice, investment transactions not settling on the same day are recorded and factored into the Fund's NAV on the business day following trade date (T+1). The use of T+1 accounting generally does not, but may, result in a NAV that differs materially from the NAV that would result if all transactions were reflected on their trade dates.

Note: The time at which transactions and shares are priced and the time by which orders must be received may be changed in case of an emergency or if regular trading on the New York Stock Exchange is stopped at a time other than its regularly scheduled closing time. In the event the New York Stock Exchange does not open for business, the Trust may, but is not required to, open the Fund for purchase, redemption and exchange transactions if the Federal Reserve wire payment system is open. To learn whether the Fund is open for business during this situation, please call the appropriate phone number located on the back cover of the Prospectus.

Foreign securities may trade in their local markets on days the Fund is closed. As a result, if the Fund holds foreign securities, its NAV may be impacted on days when investors may not purchase or redeem Fund shares.

The Fund relies on various sources to calculate its NAV. The ability of the Fund's fund accounting agent to calculate the NAV per share of each share class of the Fund is subject to operational risks associated with processing or human errors, systems or technology failures, cyber attacks and errors caused by third party service providers, data sources, or trading counterparties. Such failures may result in delays in the calculation of the Fund's NAV and/or the inability to calculate NAV over extended time periods. The Fund may be unable to recover any losses associated with such failures. In addition, if the third party service providers and/or data sources upon which the Fund directly or indirectly relies to calculate its NAV or price individual securities are unavailable or otherwise unable to calculate the NAV correctly, it may be necessary for alternative procedures to be utilized to price the securities at the time of determining the Fund's NAV.

COMMON QUESTIONS APPLICABLE TO THE PURCHASE OF CLASS A SHARES

What Is The Offering Price Of Class A Shares?

The offering price of Class A Shares of the Fund is the next determined NAV per share plus an initial sales charge paid to Goldman Sachs at the time of purchase of shares. The sales charge varies depending upon the amount you purchase. In some cases, described below, the initial sales charge may be eliminated altogether, and the offering price will be the NAV per share. The current sales charges and commissions paid to Intermediaries for Class A Shares of the Fund are as follows:

Amount of Purchase (including sales charge, if any)	Sales Charge as Percentage of Offering Price	Sales Charge as Percentage of Net Amount Invested	Maximum Dealer Allowance as Percentage of Offering Price*
Less than \$50,000	5.50%	5.82%	5.00%
\$50,000 up to (but less than) \$100,000	4.75	4.99	4.00
\$100,000 up to (but less than) \$250,000	3.75	3.90	3.00
\$250,000 up to (but less than) \$500,000	2.75	2.83	2.25
\$500,000 up to (but less than) \$1 million	2.00	2.04	1.75
\$1 million or more	0.00**	0.00**	***

* Dealer's allowance may be changed periodically. During special promotions, the entire sales charge may be reallocated to Intermediaries. Intermediaries to whom substantially the entire sales charge is reallocated may be deemed to be "underwriters" under the Securities Act.

** No sales charge is payable at the time of purchase of Class A Shares of \$1 million or more, but a CDSC of 1.00% may be imposed in the event of certain redemptions within 18 months. For more information about Class A Shares' CDSCs, please see "What Else Do I Need To Know About Class A Shares' CDSC?" below.

*** The Distributor may pay a one-time commission to Intermediaries who initiate or are responsible for purchases of \$1 million or more of shares of the Fund equal to 1.00% of the amount under \$3 million, 0.50% of the next \$2 million, and 0.25% thereafter. In instances where this one-time commission is not paid to a particular Intermediary (including Goldman Sachs' Private Wealth Management Unit and Employee Benefit Plan), the CDSC on Class A Shares, generally, will be waived. The Distributor may also pay, with respect to all or a portion of the amount purchased, a commission in accordance with the foregoing schedule to Intermediaries who initiate or are responsible for purchases of \$1 million or more by certain "wrap" accounts. Purchases by such accounts will be made at NAV with no initial sales charge, but if shares are redeemed within 18 months, a CDSC of 1.00% may be imposed upon the account. In addition, Intermediaries will remit to the Distributor such payments received in connection with "wrap" accounts in the event that shares are redeemed within 18 months.

Different Intermediaries may impose different sales charges. These variations are described in "Appendix C—Additional Information About Sales Charge Variations, Waivers and Discounts."

You should note that the actual sales charge that appears in your mutual fund transaction confirmation may differ slightly from the rate disclosed above in this Prospectus due to rounding calculations.

As indicated in the preceding chart, and as discussed further below and in the section titled "How Can The Sales Charge On Class A Shares Be Reduced?" and in "Appendix C—Additional Information About Sales Charge Variations, Waivers and Discounts," you may, under certain circumstances, be entitled to pay reduced sales charges on your purchases of Class A Shares or have those charges waived entirely. To take advantage of these discounts, your Intermediary must notify the Fund's Transfer Agent at the time of your purchase order that a discount may apply to your current purchases. You may also be required to provide appropriate documentation to receive these discounts, including:

- (i) Information or records regarding shares of the Fund or other Goldman Sachs Funds held in all accounts (e.g., retirement accounts) of the shareholder at all Intermediaries; or
- (ii) Information or records regarding shares of the Fund or other Goldman Sachs Funds held at any Intermediary by related parties of the shareholder, such as members of the same family or household.

What Else Do I Need To Know About Class A Shares' CDSC?

Purchases of \$1 million or more of Class A Shares will be made at NAV with no initial sales charge. However, if you redeem shares within 18 months after the beginning of the month in which the purchase was made, a CDSC of 1.00% may be imposed. The CDSC may not be imposed if your Intermediary agrees with the Distributor to return all or an applicable prorated portion of its commission to the Distributor. The CDSC is waived on redemptions in certain circumstances. See "In What Situations May The CDSC On Class A Or C Shares Be Waived Or Reduced?" below and, if you hold shares through an Intermediary, see "Appendix C—Additional Information About Sales Charge Variations, Waivers and Discounts."

When Are Class A Shares Not Subject To A Sales Load?

Class A Shares of the Fund may be sold at NAV without payment of any sales charge to the following individuals and entities:

- Goldman Sachs, its affiliates or their respective officers, partners, directors or employees (including retired employees and former partners), any partnership of which Goldman Sachs is a general partner, any Trustee or officer of the Trust and designated family members of any of these individuals;
- Qualified employee benefit plans of Goldman Sachs;
- Trustees or directors of investment companies for which Goldman Sachs or an affiliate acts as sponsor;
- Any employee or registered representative of any Intermediary (or such Intermediaries' affiliates and subsidiaries) or their respective spouses or domestic partners, children and parents;
- Banks, trust companies or other types of depository institutions;
- Any state, county or city, or any instrumentality, department, authority or agency thereof, which is prohibited by applicable investment laws from paying a sales charge or commission in connection with the purchase of shares of the Fund;
- Employee Benefit Plans other than Employee Benefit Plans that purchase Class A Shares through brokerage relationships in which sales charges are customarily imposed. Under such circumstances, Plans will be assessed sales charges as described further in "Shareholder Guide—Common Questions Applicable To The Purchase of Class A Shares;"
- Investors who purchase Class A Shares through an omnibus account sponsored by an Intermediary that has an agreement with the Distributor covering such investors to offer Class A Shares without charging an initial sales charge;
- Insurance company separate accounts that make the Fund available as an underlying investment in certain group annuity contracts;
- "Wrap" accounts for the benefit of clients of broker-dealers, financial institutions or financial planners, provided they have entered into an agreement with GSAM specifying aggregate minimums and certain operating policies and standards;
- Investment advisers investing for accounts for which they receive asset-based fees;
- Accounts over which GSAM or its advisory affiliates have investment discretion;
- Shareholders who roll over distributions from any tax-qualified Employee Benefit Plan or tax-sheltered annuity to an IRA which invests in the Goldman Sachs Funds if the tax-qualified Employee Benefit Plan or tax-sheltered annuity receives administrative services provided by certain third party administrators that have entered into a special service arrangement with Goldman Sachs relating to such plan or annuity;
- State sponsored 529 college savings plans;
- Investors that purchase Class A Shares through the GS Retirement Plan Plus and Goldman Sachs 401(k) Programs;
- Former shareholders of certain funds who (i) received shares of a Goldman Sachs Fund in connection with a reorganization of an acquired fund into a Goldman Sachs Fund, (ii) had previously qualified for purchases of Class A Shares of the acquired funds without the imposition of a sales load under the guidelines of the applicable acquired fund family, and (iii) as of August 24, 2012 held their Goldman Sachs Fund shares directly with the Goldman Sachs Funds' Transfer Agent, as long as they continue to hold the shares directly at the Transfer Agent; or
- Investors who purchase Class A Shares in accounts that are no longer associated with an Intermediary and held direct at the Transfer Agent, including retirement accounts.

You must certify eligibility for any of the above exemptions on your account application and notify your Intermediary and the Fund if you no longer are eligible for the exemption. You may be eligible for different or additional exemptions based on your Intermediary; see "Appendix C—Additional Information About Sales Charge Variations, Waivers and Discounts."

The Fund will grant you an exemption subject to confirmation of your eligibility by your Intermediary. You may be charged a fee by your Intermediary.

How Can The Sales Charge On Class A Shares Be Reduced?

- **Right of Accumulation:** When buying Class A Shares in Goldman Sachs Funds, your current aggregate investment determines the initial sales load you pay. You may qualify for reduced sales charges when the current market value of holdings across Class A Shares and/or Class C Shares, plus new purchases, reaches \$50,000 or more. Class A Shares and/or Class C Shares of any of the Goldman Sachs Funds may be combined under the Right of Accumulation. If the Fund's Transfer Agent is properly notified, the "Amount of Purchase" in the chart in the section "What Is The Offering Price Of Class A Shares?" will be deemed to include all Class A Shares and/or Class C Shares of the Goldman Sachs Funds that were held at the time of purchase by any of the following persons: (i) you, your spouse or domestic partner, your parents and your children; and (ii) any trustee, guardian or other fiduciary of a single trust estate or a single fiduciary account. This includes, for example, any Class A Shares and/or Class C Shares held at an Intermediary other than the one handling your current purchase. For purposes of applying the Right of Accumulation, shares of the Fund and any other Goldman Sachs Funds purchased by an existing client of Goldman Sachs Private Wealth Management or GS Ayco Holding LLC will be combined with Class A Shares and/or Class C Shares and other assets held by all other Goldman Sachs Private Wealth Management accounts or accounts of GS Ayco Holding LLC, respectively. In addition, under some circumstances, Class A Shares and/or Class C Shares of the Fund and Class A Shares and/or Class C Shares of any other Goldman Sachs Fund

purchased by partners, directors, officers or employees of certain organizations may be combined for the purpose of determining whether a purchase will qualify for the Right of Accumulation and, if qualifying, the applicable sales charge level. To qualify for a reduced sales load, you or your Intermediary must notify the Fund's Transfer Agent at the time of investment that a quantity discount is applicable. If you do not notify your Intermediary at the time of your current purchase or a future purchase that you qualify for a quantity discount, you may not receive the benefit of a reduced sales charge that might otherwise apply. Use of this option is subject to a check of appropriate records.

In some circumstances, other Class A Shares and/or Class C Shares may be aggregated with your current purchase under the Right of Accumulation as described in the SAI. For purposes of determining the "Amount of Purchase," all Class A Shares and/or Class C Shares currently held will be valued at their current market value.

- **Statement of Intention:** You may obtain a reduced sales charge by means of a written Statement of Intention which expresses your non-binding commitment to invest (not counting reinvestments of dividends and distributions) in the aggregate \$50,000 or more within a period of 13 months in Class A Shares of one or more of the Goldman Sachs Funds. Any investments you make during the period will receive the discounted sales load based on the full amount of your investment commitment. Purchases made during the previous 90 days may be included; however, capital appreciation does not apply toward these combined purchases. If the investment commitment of the Statement of Intention is not met prior to the expiration of the 13-month period, the entire amount will be subject to the higher applicable sales charge unless the failure to meet the investment commitment is due to the death of the investor. By selecting the Statement of Intention, you authorize the Transfer Agent to escrow and redeem Class A Shares in your account to pay this additional charge if the Statement of Intention is not met. You must, however, inform the Transfer Agent (either directly or through your Intermediary) that the Statement of Intention is in effect each time shares are purchased. Each purchase will be made at the public offering price applicable to a single transaction of the dollar amount specified on the Statement of Intention. The SAI has more information about the Statement of Intention, which you should read carefully.

Different Intermediaries may have different policies regarding Rights of Accumulation and Statements of Intention. These variations are described in "Appendix C—Additional Information About Sales Charge Variations, Waivers and Discounts."

COMMON QUESTIONS APPLICABLE TO THE PURCHASE OF CLASS C SHARES

What Is The Offering Price Of Class C Shares?

You may purchase Class C Shares of the Fund at the next determined NAV without paying an initial sales charge. However, if you redeem Class C Shares within 12 months of purchase, a CDSC of 1.00% will normally be deducted from the redemption proceeds. In connection with purchases by Employee Benefit Plans, where Class C Shares are redeemed within 12 months of purchase, a CDSC of 1.00% may be imposed upon the plan sponsor or third party administrator. Class C Shares acquired in exchange for shares subject to a CDSC will be subject to the CDSC, if any, of the shares originally held. No CDSC is imposed in connection with an exchange of Class C Shares at the time of such exchange. When Class C Shares are exchanged for Class C Shares of another fund, the period of time that such shares will be subject to a CDSC (if any) will be measured as of the date of the original purchase. With respect to such shares held by Employee Benefit Plans, the CDSC may be imposed on the plan sponsor or third party administrator.

Different Intermediaries may impose different sales charges. These variations are described in "Appendix C—Additional Information About Sales Charge Variations, Waivers and Discounts."

Proceeds from the CDSC are payable to the Distributor and may be used in whole or in part to defray the Distributor's expenses related to providing distribution-related services to the Fund in connection with the sale of Class C Shares, including the payment of compensation to Intermediaries. A commission equal to 1% of the amount invested is normally paid by the Distributor to Intermediaries.

What Should I Know About The Automatic Conversion Of Class C Shares?

Class C Shares of the Fund will automatically convert into Class A Shares (which bear lower distribution and service (12b-1) fees and do not bear additional personal and account maintenance services fees) of the same Fund on or about the fifteenth day of the last month of the quarter that is eight years after the purchase date. No sales charges or other charges will apply in connection with any conversion.

If you acquire Class C Shares of the Fund by exchange from Class C Shares of another Goldman Sachs Fund, your Class C Shares will convert into Class A Shares of such Fund based on the date of the initial purchase. If you acquire Class C Shares through reinvestment of distributions, your Class C Shares will convert into Class A Shares based on the date of the initial purchase of the shares on which the distribution was paid.

Shareholders will not recognize a gain or loss for federal income tax purposes upon the conversion of Class C Shares for Class A Shares of the same Fund. The automatic conversion of Class C Shares to Class A Shares will not apply to shares held through group retirement plan recordkeeping platforms of certain Intermediaries who hold such shares in an omnibus account and do not track participant level share lot aging to facilitate such a conversion.

New employee benefit plans are not eligible to purchase Class C Shares. Employee benefit plans which had this share class of the Fund available to participants on or before September 18, 2018, may continue to open accounts for new participants in such share class of the Fund and purchase additional shares in existing participant accounts.

If you purchased your shares through an Intermediary, it is the responsibility of your Intermediary to work with the Transfer Agent to effect the conversion and to ensure that Class C Shares are automatically converted after the appropriate period of time. In addition, if your shares are no longer subject to a CDSC, you may be able to exchange your Class C Shares for Class A Shares without the payment of a sales charge prior to the automatic conversion subject to the policies and procedures of the Intermediary through whom you have purchased your shares. Please contact your Intermediary with questions regarding your eligibility to exchange Class C Shares for Class A Shares.

COMMON QUESTIONS APPLICABLE TO THE PURCHASE OF CLASS A AND C SHARES

What Else Do I Need To Know About The CDSC On Class A Or C Shares?

- The CDSC is based on the lesser of the NAV of the shares at the time of redemption or the original offering price (which is the original NAV).
 - No CDSC is charged on shares acquired from reinvested dividends or capital gains distributions.
 - No CDSC is charged on the per share appreciation of your account over the initial purchase price.
 - When counting the number of months since a purchase of Class A or Class C Shares was made, all purchases made during a month will be combined and considered to have been made on the first day of that month.
- To keep your CDSC as low as possible, each time you place a request to sell shares, the Fund will first sell any shares in your account that do not carry a CDSC and then the shares in your account that have been held the longest.

In What Situations May The CDSC On Class A Or C Shares Be Waived Or Reduced?

The CDSC on Class A and Class C Shares that are subject to a CDSC may be waived or reduced if the redemption relates to:

- Mandatory retirement distributions or loans to participants or beneficiaries from Employee Benefit Plans;
- Hardship withdrawals by a participant or beneficiary in an Employee Benefit Plan;
- The separation from service by a participant or beneficiary in an Employee Benefit Plan;
- Excess contributions distributed from an Employee Benefit Plan;
- Distributions from a qualified Employee Benefit Plan invested in the Goldman Sachs Funds which are being rolled over to an IRA in the same share class of a Goldman Sachs Fund;
- The death or disability (as defined in Section 72(m)(7) of the Internal Revenue Code of 1986, as amended (the “Code”)) of a shareholder, participant or beneficiary in an Employee Benefit Plan;
- Satisfying the minimum distribution requirements of the Code;
- Establishing “substantially equal periodic payments” as described under Section 72(t)(2) of the Code;
- Redemption proceeds which are to be reinvested in accounts or non-registered products over which GSAM or its advisory affiliates have investment discretion;
- A systematic withdrawal plan. The Fund reserves the right to limit such redemptions, on an annual basis, to 12% of the value of your Class C Shares and 10% of the value of your Class A Shares;
- Redemptions or exchanges of Fund shares held through an Employee Benefit Plan using the Fund as part of a qualified default investment alternative or “QDIA”; or
- Other redemptions, at the discretion of the Trust’s officers, relating to shares purchased through Employee Benefit Plans.

You may be eligible for different or additional exemptions based on your Intermediary; see “Appendix C—Additional Information About Sales Charge Variations, Waivers and Discounts.”

HOW TO SELL SHARES

How Can I Sell Shares Of The Fund?

Generally, Shares may be sold (redeemed) only through Intermediaries. Customers of an Intermediary will normally give their redemption instructions to the Intermediary, and the Intermediary will, in turn, place the order with the Transfer Agent. On any business day the Fund is open, the Fund will generally redeem its Shares upon request at their next-determined NAV per share (subject to any applicable CDSC) after the Transfer Agent (or, if applicable, the Authorized Institution) has received and accepted a redemption order in proper form, as described under “How To Buy Shares—How Can I Purchase Shares Of The Fund?” above. Redemptions may be requested by electronic trading platform (through your Intermediary), in writing or by telephone (unless the Intermediary opts out of the telephone redemption privilege on the account application). You should contact your Intermediary to discuss redemptions and redemption proceeds. The Fund may transfer redemption proceeds to an account with your Intermediary. In the alternative, your Intermediary may request that redemption proceeds be sent to you by check or wire (if the wire instructions are designated in the current records of the Transfer Agent).

When Do I Need A Medallion Signature Guarantee To Redeem Shares?

Generally, a redemption request must be in writing and signed by an authorized person with a Medallion signature guarantee if:

- A request is made in writing to redeem Class A, Class C, Investor or Class R Shares in an amount over \$50,000 via check;
- You would like the redemption proceeds sent to an address that is not your address of record; or
- You would like the redemption proceeds sent to a domestic bank account that is not designated in the current records of the Transfer Agent.

A Medallion signature guarantee must be obtained from a bank, brokerage firm or other financial intermediary that is a member of an approved Medallion Guarantee Program or that is otherwise approved by the Trust. A notary public cannot provide a Medallion signature guarantee. The written request may be confirmed by telephone with both the requesting party and the designated Intermediary to verify instructions. Additional documentation may be required.

What Do I Need To Know About Telephone Redemption Requests?

The Trust, the Distributor and the Transfer Agent will not be liable for any loss or tax liability you may incur in the event that the Trust accepts unauthorized telephone redemption requests that the Trust reasonably believes to be genuine. The Trust may accept telephone redemption instructions from any person identifying himself or herself as the owner of an account or the owner’s registered representative where the owner has not declined in writing to use this service. Thus, you risk possible losses if a telephone redemption is not authorized by you.

In an effort to prevent unauthorized or fraudulent redemption and exchange requests by telephone, Goldman Sachs and SS&C Global Investor & Distribution Solutions, Inc. (“SS&C”) each employ reasonable procedures specified by the Trust to confirm that such instructions are genuine. The following general policies are currently in effect:

- Telephone requests are recorded.
- Proceeds of telephone redemption requests will be sent to your address of record or authorized account designated in the current records of the Transfer Agent (unless you provide written instructions and a Medallion signature guarantee indicating another address or account).
- For the 30-day period following a change of address, telephone redemptions will only be filled by a wire transfer to the authorized account designated in the current records of the Transfer Agent (see immediately preceding bullet point). In order to receive the redemption by check during this time period, the redemption request must be in the form of a written, Medallion signature guaranteed letter.
- The telephone redemption option does not apply to Shares held in an account maintained and serviced by your Intermediary. If your Shares are held in an account with an Intermediary, you should contact your registered representative of record, who may make telephone redemptions on your behalf.
- The telephone redemption option may be modified or terminated at any time without prior notice.
- The Fund may allow redemptions via check up to \$50,000 in Class A, Class C, Investor and Class R Shares requested via telephone.

Note: It may be difficult to make telephone redemptions in times of unusual economic or market conditions.

How Are Redemption Proceeds Paid?

By Wire: You may arrange for your redemption proceeds to be paid as federal funds to an account with your Intermediary or to a domestic bank account designated in the current records of the Transfer Agent. In addition, redemption proceeds may be transmitted through an electronic trading platform to an account with your Intermediary. The following general policies govern wiring redemption proceeds:

- Redemption proceeds will normally be paid in federal funds within one business day (or such other times in accordance with the requirements of your Intermediary) following receipt of a properly executed wire transfer redemption request. In certain circumstances, however (such as unusual market conditions or in cases of very large redemptions or excessive trading), it may take up to seven days to pay redemption proceeds.
- Redemption requests may only be postponed or suspended for longer than seven days as permitted under Section 22(e) of the Investment Company Act of 1940 (the “Investment Company Act”) if (i) the New York Stock Exchange is closed for trading or trading is restricted; (ii) an emergency exists which makes the disposal of securities owned by the Fund or the fair determination of the value of the Fund’s net assets not reasonably practicable; or (iii) the SEC, by order or regulation, permits the suspension of the right of redemption.
- If you are selling shares you recently paid for by check or purchased by Automated Clearing House (“ACH”), the Fund will pay you when your check or ACH has cleared, which may take up to 15 days.
- If the Federal Reserve Bank is closed on the day that the redemption proceeds would ordinarily be wired, wiring the redemption proceeds may be delayed until the Federal Reserve Bank reopens.
- To change the bank wiring instructions designated in the current records of the Transfer Agent, you must send written instructions signed by an authorized person designated in the current records of the Transfer Agent. A Medallion signature guarantee may be required if you are requesting a redemption in conjunction with the change.
- None of the Trust, the Investment Adviser or Goldman Sachs assumes any responsibility for the performance of your bank or Intermediary in the transfer process. If a problem with such performance arises, you should deal directly with your bank or Intermediary.

By Check: You may elect to receive your redemption proceeds by check. Redemption proceeds paid by check will normally be mailed to the address of record within one business day (or such other times in accordance with the requirements of your Intermediary) following receipt of a properly executed redemption request, except in certain circumstances (such as those set forth above with respect to wire transfer redemption requests). If you are selling shares you recently paid for by check or ACH, the Fund will pay you when your check or ACH has cleared, which may take up to 15 days.

What Else Do I Need To Know About Redemptions?

The following generally applies to redemption requests:

- Additional documentation may be required when deemed appropriate by the Transfer Agent. A redemption request will not be in proper form until such additional documentation has been received.
- Intermediaries are responsible for the timely transmittal of redemption requests by their customers to the Transfer Agent. In order to facilitate the timely transmittal of redemption requests, Intermediaries may set times by which they must receive redemption requests. Intermediaries may also require additional documentation from you.

The Trust reserves the right to:

- Redeem your shares in the event your Intermediary’s relationship with Goldman Sachs is terminated, and you do not transfer your account to another Intermediary or in the event that the Fund is no longer an option in your Employee Benefit Plan or no longer available through your Eligible Fee-Based Program.
- Redeem your shares if your account balance is below the required Fund minimum. The Fund will not redeem your shares on this basis if the value of your account falls below the minimum account balance solely as a result of market conditions. The Fund will give you 60 days prior written notice to allow you to purchase sufficient additional shares of the Fund in order to avoid such redemption. Different rules may apply to investors who have established brokerage accounts with Goldman Sachs in accordance with the terms and conditions of their account agreements.
- Redeem your shares in the case of actual or suspected threatening conduct or actual or suspected fraudulent, suspicious or illegal activity by you or any other individual associated with your account.
- Subject to applicable law, redeem your shares in other circumstances determined by the Board of Trustees to be in the best interest of the Trust.
- Pay redemptions by a distribution in-kind of securities (instead of cash). If you receive redemption proceeds in-kind, you should expect to incur transaction costs upon the disposition of those securities. In addition, if you receive redemption proceeds in-kind, you will be subject to market gains or losses upon the disposition of those securities.
- Reinvest any amounts (e.g., dividends, distributions or redemption proceeds) which you have elected to receive by check should your check remain uncashed for more than 180 days. No interest will accrue on amounts represented by uncashed checks. Your

check will be reinvested in your account at the NAV on the day of the reinvestment. When reinvested, those amounts are subject to the risk of loss like any Fund investment. If you elect to receive distributions in cash and a check remains uncashed for more than 180 days, your cash election may be changed automatically to reinvest and your future dividend and capital gains distributions will be reinvested in the Fund at the NAV as of the date of payment of the distribution. This provision may not apply to certain retirement or qualified accounts, accounts with a non-U.S. address or closed accounts. Your participation in a systematic withdrawal program may be terminated if a check remains uncashed.

- Charge an additional fee in the event a redemption is made via wire transfer.

The Fund typically expects to meet redemption requests by using holdings of cash or cash equivalents and/or proceeds from the sale of portfolio holdings. In addition, under stressed market conditions, as well as for other temporary or emergency purposes, the Fund may distribute redemption proceeds in-kind (instead of cash), access a line of credit or overdraft facility, or borrow through other sources to meet redemption requests.

None of the Trust, the Investment Adviser or Goldman Sachs will be responsible for any loss in an investor's account or tax liability resulting from an involuntary redemption.

Can I Reinvest Redemption Proceeds In The Same Or Another Goldman Sachs Fund?

For Class A and Class C Shares you may redeem shares of the Fund and reinvest a portion or all of the redemption proceeds in the same share class of another Goldman Sachs Fund at NAV. To be eligible for this privilege, you must have held the shares you want to redeem for at least 30 days and you must reinvest the share proceeds within 90 days after you redeem. You should obtain and read the applicable prospectus before investing in any other Goldman Sachs Fund.

You may reinvest redemption proceeds as follows:

- If you pay a CDSC upon redemption of Class A or Class C Shares and then reinvest in Class A or Class C Shares of another Goldman Sachs Fund as described above, your account will be credited with the amount of the CDSC you paid. The reinvested shares will, however, continue to be subject to a CDSC. The holding period of the shares acquired through reinvestment will include the holding period of the redeemed shares for purposes of computing the CDSC payable upon a subsequent redemption.
- The reinvestment privilege may be exercised at any time in connection with transactions in which the proceeds are reinvested at NAV in a tax-sheltered Employee Benefit Plan. In other cases, the reinvestment privilege may be exercised once per year upon receipt of a written request.
- You may be subject to tax as a result of a redemption. You should consult your tax adviser concerning the tax consequences of a redemption and reinvestment.

Can I Exchange My Investment From One Goldman Sachs Fund To Another Goldman Sachs Fund?

You may exchange shares of a Goldman Sachs Fund at NAV without the imposition of an initial sales charge or CDSC, if applicable, at the time of exchange for certain shares of another Goldman Sachs Fund. Redemption (including by exchange) of certain Goldman Sachs Funds offered in other prospectuses may, however, be subject to a redemption fee for shares that are held for either 30 or 60 days or less, subject to certain exceptions as described in those Goldman Sachs Funds' prospectuses. The exchange privilege may be materially modified or withdrawn at any time upon 60 days' written notice. You should contact your Intermediary to arrange for exchanges of shares of the Fund for shares of another Goldman Sachs Fund.

You should keep in mind the following factors when making or considering an exchange:

- You should obtain and carefully read the prospectus of the Goldman Sachs Fund you are acquiring before making an exchange. You should be aware that not all Goldman Sachs Funds may offer all share classes.
- Currently, the Fund does not impose any charge for exchanges although the Fund may impose a charge in the future.
- The exchanged shares of the new Goldman Sachs Fund may later be exchanged for shares of the same class of the original Fund held at the next determined NAV without the imposition of an initial sales charge or CDSC (but subject to any applicable redemption fee). However, if additional shares of the new Goldman Sachs Fund were purchased after the initial exchange, and that Fund's shares do not impose a sales charge or CDSC, then the applicable sales charge or CDSC of the original Fund's shares will be imposed upon the exchange of those shares.
- When you exchange shares subject to a CDSC, no CDSC will be charged at that time. However, for purposes of determining the amount of CDSC applicable to those shares acquired in the exchange, the length of time you have owned the shares will be measured from the date you acquired the original shares subject to a CDSC, and the amount and terms of the CDSC will be those applicable to the original shares acquired and will not be affected by a subsequent exchange.
- Eligible investors may exchange certain classes of shares for another class of shares of the same Fund. For further information, contact your Intermediary.

- All exchanges which represent an initial investment in a Goldman Sachs Fund must satisfy the minimum initial investment requirement of that Fund. This requirement may be waived at the discretion of the Trust. Exchanges into a Goldman Sachs Fund need not meet the traditional minimum investment requirement for that Fund if the entire balance of the original Fund account is exchanged.
- Exchanges are available only in states where exchanges may be legally made.
- It may be difficult to make telephone exchanges in times of unusual economic or market conditions.
- Goldman Sachs and SS&C may use reasonable procedures described above in “How To Sell Shares—What Do I Need To Know About Telephone Redemption Requests?” in an effort to prevent unauthorized or fraudulent telephone exchange requests.
- Normally, a telephone exchange will be made only to an identically registered account.
- Exchanges into Goldman Sachs Funds or certain share classes of Goldman Sachs Funds that are closed to new investors may be restricted.

For federal income tax purposes, an exchange from one Goldman Sachs Fund to another is treated as a redemption of the shares surrendered in the exchange, on which you may be subject to tax, followed by a purchase of shares received in the exchange. Exchanges within Employee Benefit Plan accounts will not result in capital gains or loss for federal or state income tax purposes. You should consult your tax adviser concerning the tax consequences of an exchange.

SHAREHOLDER SERVICES

Can I Arrange To Have Automatic Investments Made On A Regular Basis?

You may be able to make automatic investments in Class A and Class C Shares through your bank via ACH transfer or via bank draft or through your Intermediary each month. The minimum dollar amount for this service is \$250 for the initial investment and \$50 per month for additional investments. Forms for this option are available online at am.gs.com and from your Intermediary, or you may check the appropriate box on the account application.

Can My Distributions From The Fund Be Invested In Other Goldman Sachs Funds?

You may elect to cross-reinvest distributions paid by a Goldman Sachs Fund in shares of the same class of other Goldman Sachs Funds.

- Shares will be purchased at NAV.
- You may elect cross-reinvestment into an identically registered account or a similarly registered account provided that at least one name on the account is registered identically.
- You cannot make cross-reinvestments into a Goldman Sachs Fund unless that Fund’s minimum initial investment requirement is met.
- You should obtain and read the prospectus of the Goldman Sachs Fund into which distributions are invested.

Can I Arrange To Have Automatic Exchanges Made On A Regular Basis?

You may elect to exchange automatically a specified dollar amount of Class A or Class C Shares of the Fund for shares of the same class of other Goldman Sachs Funds.

- Shares will be purchased at NAV if a sales charge had been imposed on the initial purchase.
- You may elect to exchange into an identically registered account or a similarly registered account provided that at least one name on the account is registered identically.
- Shares subject to a CDSC acquired under this program may be subject to a CDSC at the time of redemption from the Goldman Sachs Fund into which the exchange is made depending upon the date and value of your original purchase.
- Automatic exchanges are made monthly on the 15th day of each month or the first business day thereafter.
- Minimum dollar amount: \$50 per month.
- You cannot make automatic exchanges into a Goldman Sachs Fund unless that Fund’s minimum initial investment requirement is met.
- You should obtain and read the prospectus of the Goldman Sachs Fund into which automatic exchanges are made.
- An exchange is considered a redemption and a purchase and therefore may be a taxable transaction.

Can I Have Systematic Withdrawals Made On A Regular Basis?

You may redeem from your Class A or Class C Share account systematically via check or ACH transfer or through your Intermediary in any amount of \$50 or more.

- It is normally undesirable to maintain a systematic withdrawal plan at the same time that you are purchasing additional Class A or Class C Shares because of the sales charges that are imposed on certain purchases of Class A Shares and because of the CDSCs that are imposed on certain redemptions of Class A and Class C Shares.

- Checks are normally mailed within two business days after your selected systematic withdrawal date of either the 15th or 25th of the month. ACH payments may take up to three business days to post to your account after your selected systematic withdrawal date between, and including, the 3rd and 26th of the month.
- Each systematic withdrawal is a redemption and therefore may be a taxable transaction.
- The CDSC applicable to Class A or Class C Shares redeemed under the systematic withdrawal plan may be waived. The Fund reserves the right to limit such redemptions, on an annual basis, to 12% each of the value of your Class C Shares and 10% of the value of your Class A Shares.

What Types Of Reports Will I Be Sent Regarding My Investment?

Intermediaries are responsible for providing any communication from the Fund to shareholders, including but not limited to, prospectuses, prospectus supplements, proxy materials and notices regarding the source of dividend payments under Section 19 of the Investment Company Act. They may charge additional fees not described in the Prospectus to their customers for such services.

You will be provided with a printed confirmation of each transaction in your account and a quarterly account statement if you invest in Class A, Class C, Investor or Class R Shares and a monthly account statement if you invest in Institutional or Class R6 Shares. If your account is held through your Intermediary, you will receive this information from your Intermediary.

You will also receive an annual shareholder report and a semi-annual shareholder report. If you have consented to the delivery of a single copy of shareholder reports, prospectuses and other information to all shareholders who share the same mailing address with your account, you may revoke your consent at any time by contacting your Intermediary or Goldman Sachs Funds at the appropriate phone number or address found on the back cover of the Prospectus. The Fund will begin sending individual copies to you within 30 days after receipt of your revocation. If your account is held through an Intermediary, please contact the Intermediary to revoke your consent.

DISTRIBUTION AND SERVICE FEES

What Are The Different Distribution And/Or Service Fees Paid By The Fund's Shares?

The Trust has adopted distribution and service plans (each a "Plan") under which Class A, Class C and Class R Shares bear distribution and/or service fees paid to Goldman Sachs, some of which Goldman Sachs may pay to Intermediaries. Intermediaries seek distribution and/or servicing fee revenues to, among other things, offset the cost of servicing small and medium sized plan investors and providing information about the Fund. If the fees received by Goldman Sachs pursuant to the Plans exceed its expenses, Goldman Sachs may realize a profit from these arrangements. Goldman Sachs generally receives and pays the distribution and service fees on a quarterly basis.

Under the Plans, Goldman Sachs is entitled to a monthly fee from the Fund for distribution services equal, on an annual basis, to 0.25%, 0.75% and 0.50% of the Fund's average daily net assets attributed to Class A, Class C and Class R Shares, respectively. Because these fees are paid out of the Fund's assets on an ongoing basis, over time, these fees will increase the cost of your investment and may cost you more than paying other types of such charges.

The distribution fees are subject to the requirements of Rule 12b-1 under the Investment Company Act, and may be used (among other things) for:

- Compensation paid to and expenses incurred by Intermediaries, Goldman Sachs and their respective officers, employees and sales representatives;
- Commissions paid to Intermediaries;
- Allocable overhead;
- Telephone and travel expenses;
- Interest and other costs associated with the financing of such compensation and expenses;
- Printing of prospectuses for prospective shareholders;
- Preparation and distribution of sales literature or advertising of any type; and
- All other expenses incurred in connection with activities primarily intended to result in the sale of Class A, Class C and Class R Shares.

In connection with the sale of Class C Shares, Goldman Sachs normally begins paying the 0.75% distribution fee as an ongoing commission to Intermediaries after the shares have been held for one year. Goldman Sachs normally begins accruing the annual 0.25% and 0.50% distribution fees for the Class A and Class R Shares, respectively, as ongoing commissions to Intermediaries, immediately. Goldman Sachs generally pays the distribution fee on a quarterly basis.

CLASS C PERSONAL AND ACCOUNT MAINTENANCE SERVICES AND FEES

Under the Class C Plan, Goldman Sachs is also entitled to receive a separate fee equal on an annual basis to 0.25% of the Fund's average daily net assets attributed to Class C Shares. This fee is for personal and account maintenance services, and may be used to make payments to Goldman Sachs, Intermediaries and their officers, sales representatives and employees for responding to inquiries of, and furnishing assistance to, shareholders regarding ownership of their shares or their accounts or similar services not otherwise provided on behalf of the Fund. If the fees received by Goldman Sachs pursuant to the Plan exceed its expenses, Goldman Sachs may realize a profit from this arrangement.

In connection with the sale of Class C Shares, Goldman Sachs normally begins paying the 0.25% ongoing service fee to Intermediaries after the shares have been held for one year.

RESTRICTIONS ON EXCESSIVE TRADING PRACTICES

Policies and Procedures on Excessive Trading Practices. In accordance with the policy adopted by the Board of Trustees, the Trust discourages frequent purchases and redemptions of Fund shares and does not permit market timing or other excessive trading practices. Purchases and exchanges should be made with a view to longer-term investment purposes only that are consistent with the investment policies and practices of the respective Fund. Excessive, short-term (market timing) trading practices may disrupt portfolio management strategies, increase brokerage and administrative costs, harm Fund performance and result in dilution in the value of Fund shares held by longer-term shareholders. The Trust and Goldman Sachs reserve the right to reject or restrict purchase or exchange requests from any investor. The Trust and Goldman Sachs will not be liable for any loss resulting from rejected purchase or exchange orders. To minimize harm to the Trust and its shareholders (or Goldman Sachs), the Trust (or Goldman Sachs) will exercise this right if, in the Trust's (or Goldman Sachs') judgment, an investor has a history of excessive trading or if an investor's trading, in the judgment of the Trust (or Goldman Sachs), has been or may be disruptive to the Fund. In making this judgment, trades executed in multiple accounts under common ownership or control may be considered together to the extent they can be identified. No waivers of the provisions of the policy established to detect and deter market timing and other excessive trading activity are permitted that would harm the Trust or its shareholders or would subordinate the interests of the Trust or its shareholders to those of Goldman Sachs or any affiliated person or associated person of Goldman Sachs.

As a deterrent to excessive trading, many foreign equity securities held by the Goldman Sachs Funds are priced by an independent pricing service using fair valuation. For more information on fair valuation, please see "How To Buy Shares—How Are Shares Priced?"

Pursuant to the policy adopted by the Board of Trustees of the Trust, Goldman Sachs has developed criteria that it uses to identify trading activity that may be excessive. Excessive trading activity in the Fund is measured by the number of "round trip" transactions in a shareholder's account. A "round trip" includes a purchase or exchange into the Fund followed or preceded by a redemption or exchange out of the same Fund. If the Fund detects that a shareholder has completed two or more round trip transactions in a single Fund within a rolling 90-day period, the Fund may reject or restrict subsequent purchase or exchange orders by that shareholder permanently. In addition, the Fund may, in its sole discretion, permanently reject or restrict purchase or exchange orders by a shareholder if the Fund detects other trading activity that is deemed to be disruptive to the management of the Fund or otherwise harmful to the Fund. For purposes of these transaction surveillance procedures, the Fund may consider trading activity in multiple accounts under common ownership, control, or influence. A shareholder that has been restricted from participation in the Fund pursuant to this policy will be allowed to apply for re-entry after one year. A shareholder applying for re-entry must provide assurances acceptable to the Fund that the shareholder will not engage in excessive trading activities in the future.

Goldman Sachs may modify its surveillance procedures and criteria from time to time without prior notice regarding the detection of excessive trading or to address specific circumstances. Goldman Sachs will apply the criteria in a manner that, in Goldman Sachs' judgment, will be uniform.

Fund shares may be held through omnibus arrangements maintained by Intermediaries, such as broker-dealers, investment advisers and insurance companies. In addition, Fund shares may be held in omnibus Employee Benefit Plans, Eligible Fee-Based Programs and other group accounts. Omnibus accounts include multiple investors and such accounts typically provide the Fund with a net purchase or redemption request on any given day where the purchases and redemptions of Fund shares by the investors are netted against one another. The identity of individual investors whose purchase and redemption orders are aggregated are ordinarily not tracked by the Fund on a regular basis. A number of these Intermediaries may not have the capability or may not be willing to apply the Fund's market timing policies. While Goldman Sachs may monitor share turnover at the omnibus account level, the Fund's ability to monitor and detect market timing by shareholders in these omnibus accounts may be limited in certain circumstances, and certain of these Intermediaries may charge the Fund a fee for providing certain shareholder financial information requested as part of the Fund's surveillance process. The netting effect makes it more difficult to identify, locate and eliminate market timing activities. In addition,

those investors who engage in market timing and other excessive trading activities may employ a variety of techniques to avoid detection. There can be no assurance that the Fund and Goldman Sachs will be able to identify all those who trade excessively or employ a market timing strategy, and curtail their trading in every instance. If necessary, the Trust may prohibit additional purchases of Fund shares by an Intermediary or by certain customers of the Intermediary. Intermediaries may also monitor their customers' trading activities in the Fund. The criteria used by Intermediaries to monitor for excessive trading may differ from the criteria used by the Fund. If an Intermediary fails to cooperate in the implementation or enforcement of the Trust's excessive trading policies, the Trust may take certain actions including terminating the relationship.

Taxation

As with any investment, you should consider how your investment in the Fund will be taxed. The tax information below is provided as general information. More tax information is available in the SAI. You should consult your tax adviser about the federal, state, local or foreign tax consequences of your investment in the Fund. Except as otherwise noted, the tax information provided assumes that you are a U.S. citizen or resident.

Unless your investment is through an IRA or other tax-advantaged account, you should carefully consider the possible tax consequences of Fund distributions and the sale of your Fund shares.

DISTRIBUTIONS

The Fund contemplates declaring as dividends each year all or substantially all of its taxable income. Distributions you receive from the Fund are generally subject to federal income tax, and may also be subject to state or local taxes. This is true whether you reinvest your distributions in additional Fund shares or receive them in cash. For federal tax purposes, the Fund's distributions attributable to net investment income and short-term capital gains are taxable to you as ordinary income while distributions of long-term capital gains are taxable to you as long-term capital gains, no matter how long you have owned your Fund shares.

Under current provisions of the Code, the maximum individual rate applicable to long-term capital gains is generally either 15% or 20%, depending on whether the individual's income exceeds certain threshold amounts. Fund distributions to noncorporate shareholders attributable to dividends received by the Fund from U.S. and certain qualified foreign corporations will generally be taxed at the long-term capital gain rate, as long as certain other requirements are met. For these lower rates to apply, the non-corporate shareholder must own their Fund shares for at least 61 days during the 121-day period beginning 60 days before the Fund's ex-dividend date. The amount of the Fund's distributions that would otherwise qualify for this favorable tax treatment will be reduced as a result of the Fund's securities lending activities or high portfolio turnover rate.

A percentage of the Fund's dividends paid to corporate shareholders may be eligible for the corporate dividends-received deduction. This percentage may, however, be reduced as a result of the Fund's securities lending activities or high portfolio turnover rate. Character and tax status of all distributions will be available to shareholders after the close of each calendar year.

Distributions in excess of the Fund's current and accumulated earnings and profits are treated as a tax-free return of your investment to the extent of your basis in the shares, and generally as capital gain thereafter. A return of capital, which for tax purposes is treated as a return of your investment, reduces your basis in shares, thus reducing any loss or increasing any gain on a subsequent taxable disposition of shares. A distribution will reduce the Fund's NAV per share and may be taxable to you as ordinary income or capital gain even though, from an economic standpoint, the distribution may constitute a return of capital.

An additional 3.8% Medicare tax is imposed on certain net investment income (including ordinary dividends and capital gain distributions received from the Fund and net gains from redemptions or other taxable dispositions of Fund shares) of U.S. individuals, estates and trusts to the extent that such person's "modified adjusted gross income" (in the case of an individual) or "adjusted gross income" (in the case of an estate or trust) exceeds certain threshold amounts.

The Fund's transactions in derivatives (such as futures contracts and swaps) will be subject to special tax rules, the effect of which may be to accelerate income to the Fund, defer losses to the Fund, cause adjustments in the holding periods of the Fund's securities and convert short-term capital losses into long-term capital losses. These rules could therefore affect the amount, timing and character of distributions to you. The Fund's use of derivatives may result in the Fund realizing more short-term capital gains and ordinary income subject to tax at ordinary income tax rates than it would if it did not use derivatives.

Although distributions are generally treated as taxable to you in the year they are paid, distributions declared in October, November or December but paid in January are taxable as if they were paid in December.

The Fund may be subject to foreign withholding or other foreign taxes on income or gain from certain foreign securities. In general, the Fund may deduct these taxes in computing its taxable income. Rather than deducting these foreign taxes, the Fund may make an election to treat a proportionate amount of those taxes as constituting a distribution to each shareholder, which would generally allow you either (i) to credit (subject to certain holding period and other limitations) that proportionate amount of taxes against your U.S. Federal income tax liability as a foreign tax credit or (ii) to take that amount as an itemized deduction.

If you buy shares of the Fund before it makes a distribution, the distribution will be taxable to you even though it may actually be a return of a portion of your investment. This is known as "buying into a dividend."

SALES

Your sale of Fund shares is a taxable transaction for federal income tax purposes, and may also be subject to state and local taxes. For tax purposes, the exchange of your Fund shares for shares of a different Goldman Sachs Fund is the same as a sale. When you sell your shares, you will generally recognize a capital gain or loss in an amount equal to the difference between your adjusted tax basis in the shares and the amount received. Generally, this capital gain or loss is long-term or short-term depending on whether your holding period exceeds one year, except that any loss realized on shares held for six months or less will be treated as a long-term capital loss to the extent of any long-term capital gain dividends that were received on the shares. Additionally, any loss realized on a sale, exchange or redemption of shares of the Fund may be disallowed under “wash sale” rules to the extent the shares disposed of are replaced with other shares of the Fund within a period of 61 days beginning 30 days before and ending 30 days after the date of disposition, such as pursuant to a dividend reinvestment in shares of that Fund. If disallowed, the loss will be reflected in an adjustment to the basis of the shares acquired.

OTHER INFORMATION

When you open your account, you should provide your Social Security Number or taxpayer identification number on your account application. By law, the Fund must withhold 24% of your taxable distributions and any redemption proceeds if you do not provide your correct taxpayer identification number, or certify that it is correct, or if the Internal Revenue Service (“IRS”) instructs the Fund to do so.

The Fund is required to report to you and the IRS annually on Form 1099-B not only the gross proceeds of Fund shares you sell or redeem but also, their cost basis. **Cost basis will be calculated using the Fund’s default method of average cost, unless you instruct the Fund to use a different methodology.** If you would like to use the average cost method of calculation, no action is required. To elect an alternative method, you should contact Goldman Sachs Funds at the address or phone number on the back cover of the Prospectus. If your account is held with an Intermediary, contact your representative with respect to reporting of cost basis and available elections for your account.

You should carefully review the cost basis information provided by the Fund and make any additional basis, holding period or other adjustments that are required when reporting these amounts on your federal income tax returns.

Non-U.S. investors are generally subject to U.S. withholding tax and may be subject to estate tax with respect to their Fund shares. However, withholding is generally not required on properly reported distributions to non-U.S. investors of long-term capital gains. Non-U.S. investors generally are not subject to U.S. federal income tax withholding on distributions of certain qualified interest income and/or short-term capital gains that are designated by the Fund. It is expected that the Fund will generally report long-term and short-term gains, to the extent permitted, but the Fund does not intend to report any distributions attributable to qualified interest income. Therefore, all distributions of interest income will be subject to withholding when paid to non-U.S. investors.

The Fund is required to withhold U.S. tax (at a 30% rate) on payments of dividends made to certain non-U.S. entities that fail to comply (or be deemed compliant) with extensive reporting and withholding requirements designed to inform the U.S. Department of the Treasury of U.S.-owned foreign investment accounts. Shareholders may be requested to provide additional information to enable the Fund to determine whether withholding is required.

Appendix A

Additional Information on Portfolio Risks, Securities and Techniques

A. GENERAL PORTFOLIO RISKS

The Fund will be subject to the risks associated with equity investments. “Equity investments” may include common stocks, preferred stocks, partnerships, joint ventures, limited liability companies and similar enterprises, other investment companies (including ETFs), warrants, stock purchase rights and synthetic and derivative instruments (such as swaps and futures contracts) that have economic characteristics similar to equity securities. In general, the values of equity investments fluctuate in response to the activities of individual companies and in response to general market and economic conditions. Accordingly, the values of such investments may decline over short or extended periods. The stock markets tend to be cyclical, with periods when stock prices generally rise and periods when prices generally decline. This volatility means that the value of your investment in the Fund may increase or decrease. In recent years, certain stock markets have experienced substantial price volatility. To the extent the Fund’s net assets decrease or increase in the future due to price volatility or share redemption or purchase activity, the Fund’s expense ratio may correspondingly increase or decrease from the expense ratio disclosed in the Prospectus.

To the extent the Fund invests in pooled investment vehicles (including investment companies and ETFs) and partnerships, the Fund will be affected by the investment policies, practices and performance of such entities in direct proportion to the amount of assets the Fund invests therein.

To the extent it invests in fixed income securities, the Fund will also be subject to the risks associated with fixed income securities. These risks include interest rate risk, credit/default risk and call/extension risk. In general, interest rate risk involves the risk that when interest rates decline, the market value of fixed income securities tends to increase (although many mortgage-related securities will have less potential than other debt securities for capital appreciation during periods of declining rates). Conversely, when interest rates increase, the market value of fixed income securities tends to decline. Credit/default risk involves the risk that an issuer or guarantor could default on its obligations, and the Fund will not recover its investment. Call risk and extension risk are normally present in adjustable rate mortgage loans (“ARMs”), mortgage-backed securities and asset-backed securities. For example, homeowners have the option to prepay their mortgages. Therefore, the duration of a security backed by home mortgages can either shorten (call risk) or lengthen (extension risk). In general, if interest rates on new mortgage loans fall sufficiently below the interest rates on existing outstanding mortgage loans, the rate of prepayment would be expected to increase. Conversely, if mortgage loan interest rates rise above the interest rates on existing outstanding mortgage loans, the rate of prepayment would be expected to decrease. In either case, a change in the prepayment rate can result in losses to investors. The same would be true of asset-backed securities such as securities backed by car loans.

A rising interest rate environment could cause the value of the Fund’s fixed income securities to decrease, and fixed income markets to experience increased volatility in addition to heightened levels of liquidity risk. Additionally, decreases in the value of fixed income securities could lead to increased shareholder redemptions, which could impair the Fund’s ability to achieve its investment objective. The risks associated with increasing rates are heightened given that interest rates are near historic lows, but are expected to increase in the future with unpredictable effects on the markets and the Fund’s investments.

The Fund may invest in non-investment grade fixed income securities (commonly known as “junk bonds”), which are rated below investment grade (or determined to be of comparable credit quality, if not rated) at the time of purchase and are therefore considered speculative. Because non-investment grade fixed income securities are issued by issuers with low credit ratings, they pose a greater risk of default than investment grade securities.

The Investment Adviser will not consider the portfolio turnover rate a limiting factor in making investment decisions for the Fund (in this section of the Prospectus, all references to the Investment Adviser shall be meant to include the Fund’s Sub-Adviser). A high rate of portfolio turnover (100% or more) involves correspondingly greater expenses which must be borne by the Fund and its shareholders, and is also likely to result in higher short-term capital gains taxable to certain shareholders. The portfolio turnover rate is calculated by dividing the lesser of the dollar amount of sales or purchases of portfolio securities by the average monthly value of the Fund’s portfolio securities, excluding securities having a maturity at the date of purchase of one year or less.

The Fund’s investments in derivative instruments, including financial futures contracts, options and swaps, can be significant. These transactions can result in sizeable realized and unrealized capital gains and losses relative to the gains and losses from the Fund’s investments in bonds and other securities. Short-term and long-term realized capital gains distributions paid by the Fund are taxable to its shareholders.

Interest rates, fixed income securities prices, the prices of futures and other derivatives, and currency exchange rates can be volatile, and a variance in the degree of volatility or in the direction of the market from the Investment Adviser's expectations may produce significant losses in the Fund's investments in derivatives. In addition, a perfect correlation between a derivatives position and a fixed income security position is generally impossible to achieve. As a result, the Investment Adviser's use of derivatives may not be effective in fulfilling the Investment Adviser's investment strategies and may contribute to losses that would not have been incurred otherwise.

Financial futures contracts used by the Fund may include interest rate futures contracts. Further information is included in the Prospectus regarding futures contracts, swaps and other derivative instruments used by the Fund, including information on the risks presented by these instruments and other purposes for which they may be used by the Fund.

The Fund may, from time to time, enter into arrangements with certain brokers or other counterparties that require the segregation of collateral. For operational, cost or other reasons, when setting up arrangements relating to the execution/clearing of trades, the Fund may choose to select a segregation model which may not be the most protective option available in the case of a default by a broker or counterparty.

The following sections provide further information on certain types of securities and investment techniques that may be used by the Fund, including their associated risks. Additional information is provided in the SAI, which is available upon request. Among other things, the SAI describes certain fundamental investment restrictions that cannot be changed without shareholder approval. You should note, however, that all investment objectives, and all investment policies not specifically designated as fundamental are non-fundamental and may be changed without shareholder approval. If there is a change in the Fund's investment objective, you should consider whether the Fund remains an appropriate investment in light of your then current financial position and needs.

B. OTHER PORTFOLIO RISKS

Risks of Derivative Investments. The Fund may, to the extent consistent with its investment policies, invest in derivative instruments including without limitation, forwards, options, futures, options on futures, swaps, options on swaps, structured securities and other derivatives relating to foreign currency transactions. Derivatives may be used for both hedging and non-hedging purposes (that is, to seek to increase total return) although suitable derivative instruments may not always be available to the Investment Adviser for these purposes. Losses from derivative instruments can result from a lack of correlation between changes in the value of derivative instruments and the portfolio assets (if any) being hedged, the potential illiquidity of the markets for derivative instruments, the failure of the counterparty to perform its contractual obligations, or the risks related to leverage factors associated with such transactions. Derivatives are also subject to risks arising from margin requirements, which include the risk that the Fund will be required to pay additional margin or set aside additional collateral to maintain open derivative positions and the risk of loss by the Fund of margin deposits in the event of the bankruptcy or other similar insolvency with respect to a broker or counterparty with whom the Fund has an open derivative position. Losses may also arise if the Fund receives cash collateral under the transactions and some or all of that collateral is invested in the market. To the extent that cash collateral is so invested, such collateral will be subject to market depreciation or appreciation, and the Fund may be responsible for any loss that might result from its investment of the counterparty's cash collateral. If cash collateral is not invested, the Fund may be exposed to additional risk of loss in the event of the insolvency of its custodian holding such collateral. The use of these management techniques also involves the risk of loss if the Investment Adviser is incorrect in its expectation of the timing or level of fluctuations in securities prices, interest rates, currency prices or other variables. Derivative instruments may be harder to value, subject to greater volatility and more likely subject to changes in tax treatment than other investments. For these reasons, the Investment Adviser's attempts to hedge portfolio risks through the use of derivative instruments may not be successful, and the Investment Adviser may choose not to hedge portfolio risks. Using derivatives for non-hedging purposes is considered a speculative practice and presents greater risk of loss than derivatives used for hedging purposes.

Risks of Illiquid Investments. The Fund may not acquire any "illiquid investment" if, immediately after the acquisition, the Fund would have invested more than 15% of its net assets in illiquid investments that are assets. An "illiquid investment" is an investment that the Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment. In determining whether an investment is an illiquid investment, the Investment Adviser will take into account actual or estimated daily transaction volume of an investment, group of related investments or asset class and other relevant market, trading, and investment-specific considerations. In addition, in determining the liquidity of an investment, the Investment Adviser must determine whether trading varying portions of a position in a particular portfolio investment or asset class, in sizes that the Fund would reasonably anticipate trading, is reasonably expected to significantly affect its liquidity, and if so, the Fund must take this determination into account when classifying the liquidity of that investment or asset class.

Investments purchased by the Fund that are liquid at the time of purchase may subsequently become illiquid. If one or more investments in the Fund's portfolio become illiquid, the Fund may exceed the 15% limitation in illiquid investments. In the event that changes in the portfolio or other external events cause the Fund to exceed this limit, the Fund must take steps to bring its illiquid investments that are assets to or below 15% of its net assets within a reasonable period of time. This requirement would not force the Fund to liquidate any portfolio instrument where the Fund would suffer a loss on the sale of that instrument.

In cases where no clear indication of the value of the Fund's portfolio instruments is available, the portfolio instruments will be valued at their fair value according to the valuation procedures approved by the Board of Trustees. These cases include, among others, situations where a security or other asset or liability does not have a price source, or the secondary markets on which an investment has previously been traded are no longer viable, due to its lack of liquidity. For more information on fair valuation, please see "Shareholder Guide—How To Buy Shares—How Are Shares Priced?"

Risks of Foreign Investments. The Fund will make foreign investments. Foreign investments involve special risks that are not typically associated with U.S. dollar denominated or quoted securities of U.S. issuers. Foreign investments may be affected by changes in currency rates, changes in foreign or U.S. laws or restrictions applicable to such investments and changes in exchange control regulations (e.g., currency blockage). A decline in the exchange rate of the currency (i.e., weakening of the currency against the U.S. dollar) in which a portfolio security is quoted or denominated relative to the U.S. dollar would reduce the value of the portfolio security. In addition, if the currency in which the Fund receives dividends, interest or other payments declines in value against the U.S. dollar before such income is distributed as dividends to shareholders or converted to U.S. dollars, the Fund may have to sell portfolio securities to obtain sufficient cash to pay such dividends.

Certain foreign markets may rely heavily on particular industries or foreign capital and are more vulnerable to diplomatic developments, the imposition of economic sanctions against a particular country or countries, organizations, entities and/or individuals, changes in international trading patterns, trade barriers, and other protectionist or retaliatory measures. International trade barriers or economic sanctions against foreign countries, organizations, entities and/or individuals may adversely affect the Fund's foreign holdings or exposures.

Brokerage commissions, custodial services and other costs relating to investment in international securities markets generally are more expensive than in the United States. In addition, clearance and settlement procedures may be different in foreign countries and, in certain markets, such procedures have been unable to keep pace with the volume of securities transactions, thus making it difficult to conduct such transactions.

Foreign issuers are not generally subject to uniform accounting, auditing and financial reporting standards comparable to those applicable to U.S. issuers. There may be less publicly available information about a foreign issuer than about a U.S. issuer. In addition, there is generally less government regulation of foreign markets, companies and securities dealers than in the United States, and the legal remedies for investors may be more limited than the remedies available in the United States. Foreign securities markets may have substantially less volume than U.S. securities markets and securities of many foreign issuers are less liquid and more volatile than securities of comparable domestic issuers. Furthermore, with respect to certain foreign countries, there is a possibility of nationalization, expropriation or confiscatory taxation, imposition of withholding or other taxes on dividend or interest payments (or, in some cases, capital gains distributions), limitations on the removal of funds or other assets from such countries, and risks of political or social instability or diplomatic developments which could adversely affect investments in those countries.

Certain foreign investments may become less liquid in response to social, political or market developments or adverse investor perceptions, or become illiquid after purchase by the Fund, particularly during periods of market turmoil. Certain foreign investments may become illiquid when, for instance, there are few, if any, interested buyers and sellers or when dealers are unwilling to make a market for certain securities. When the Fund holds illiquid investments, its portfolio may be harder to value, especially in changing markets.

If the Fund focuses its investments in one or a few countries and currencies, the Fund may be subjected to greater risks than if the Fund's assets were not geographically focused.

Foreign Custody Risk. The Fund may hold foreign securities and cash with foreign banks, agents, and securities depositories appointed by the Fund's custodian (each a "Foreign Custodian"). Some Foreign Custodians may be recently organized or new to the foreign custody business. In some countries, Foreign Custodians may be subject to little or no regulatory oversight over or independent evaluation of their operations. Further, the laws of certain countries may place limitations on the Fund's ability to recover assets if a Foreign Custodian enters bankruptcy. Investments in emerging market countries may be subject to even greater custody risks than investments in more developed markets. Custody services in emerging market countries are very often undeveloped and may be considerably less well-regulated than in more developed countries, and thus may not afford the same level of investor protection as would apply in developed countries.

Depository Receipts Risk. Foreign securities may trade in the form of depository receipts, including American Depository Receipts (“ADRs”), Global Depository Receipts (“GDRs”), and European Depository Receipts (“EDRs”) (collectively “Depository Receipts”). To the extent the Fund acquires Depository Receipts through banks which do not have a contractual relationship with the foreign issuer of the security underlying the Depository Receipts to issue and service such unsponsored Depository Receipts, there may be an increased possibility that the Fund would not become aware of and be able to respond to corporate actions such as stock splits or rights offerings involving the foreign issuer in a timely manner. In addition, the lack of information may result in inefficiencies in the valuation of such instruments. Investment in Depository Receipts does not eliminate all the risks inherent in investing in securities of non-U.S. issuers. The market value of Depository Receipts is dependent upon the market value of the underlying securities and fluctuations in the relative value of the currencies in which the Depository Receipts and the underlying securities are quoted. The issuers of Depository Receipts may discontinue issuing new Depository Receipts and withdraw existing Depository Receipts at any time, which may result in costs and delays in the distribution of the underlying assets to the Fund and may negatively impact the Fund’s performance.

Risks of Emerging Countries. The Fund may invest in securities of issuers located in, or otherwise economically tied to, emerging countries. The risks of foreign investment are heightened when the issuer is located in an emerging country. Emerging countries are generally located in Africa, Asia, the Middle East, Eastern and Central Europe, and Central and South America. The Fund’s purchase and sale of portfolio securities in certain emerging countries may be constrained by limitations relating to daily changes in the prices of listed securities, periodic trading or settlement volume and/or limitations on aggregate holdings of foreign investors. Such limitations may be computed based on the aggregate trading volume by or holdings of the Fund, the Investment Adviser, its affiliates and their respective clients and other service providers. The Fund may not be able to sell securities in circumstances where price, trading or settlement volume limitations have been reached.

Foreign investment in the securities markets of certain emerging countries is restricted or controlled to varying degrees which may limit investment in such countries or increase the administrative costs of such investments. For example, certain Asian countries require governmental approval prior to investments by foreign persons or limit investment by foreign persons to only a specified percentage of an issuer’s outstanding securities or a specific class of securities which may have less advantageous terms (including price) than securities of the issuer available for purchase by nationals. In addition, certain countries may restrict or prohibit investment opportunities in issuers or industries deemed important to national interests. Such restrictions may affect the market price, liquidity and rights of securities that may be purchased by the Fund. The repatriation of investment income, capital or the proceeds of securities sales from certain emerging countries is subject to restrictions such as the need for governmental consents, which may make it difficult for the Fund to invest in such emerging countries. The Fund could be adversely affected by delays in, or a refusal to grant, any required governmental approval for such repatriation. In situations where a country restricts direct investment in securities (which may occur in certain Asian and other countries), the Fund may invest in such countries through other investment funds in such countries.

Emerging market countries may have more or less government regulation and generally do not impose as extensive and frequent accounting, auditing, financial and other reporting requirements as the securities markets of more developed countries. The degree of cooperation between issuers in emerging and frontier market countries with foreign and U.S. financial regulators may vary significantly. Accordingly, regulators may not have sufficient access to audit and oversee issuers, and there could be less information available about issuers in certain emerging market countries. As a result, the Investment Adviser’s ability to evaluate local companies or their potential impact on the Fund’s performance could be inhibited.

Many emerging countries have recently experienced currency devaluations and substantial (and, in some cases, extremely high) rates of inflation. Other emerging countries have experienced economic recessions. These circumstances have had a negative effect on the economies and securities markets of those emerging countries. Economies in emerging countries generally are dependent heavily upon commodity prices and international trade and, accordingly, have been and may continue to be affected adversely by the economies of their trading partners, trade barriers, exchange controls, managed adjustments in relative currency values and other protectionist measures imposed or negotiated by the countries with which they trade.

Many emerging countries are subject to a substantial degree of economic, political and social instability. Governments of some emerging countries are authoritarian in nature or have been installed or removed as a result of military coups, while governments in other emerging countries have periodically used force to suppress civil dissent. Disparities of wealth, the pace and success of democratization, and ethnic, religious and racial disaffection, among other factors, have also led to social unrest, violence and/or labor unrest in some emerging countries. Unanticipated political or social developments may result in sudden and significant investment losses. Investing in emerging countries involves greater risk of loss due to expropriation, nationalization, confiscation of assets and property or the imposition of restrictions on foreign investments and on repatriation of capital invested. As an example, in the past some Eastern European governments have expropriated substantial amounts of private property, and many claims of the property owners have never been fully settled. There is no assurance that similar expropriations will not occur in other countries.

The Fund’s investment in emerging countries may also be subject to withholding or other taxes, which may be significant and may reduce the return to the Fund from an investment in issuers in such countries.

Settlement procedures in emerging countries are frequently less developed and reliable than those in the United States and may involve the Fund's delivery of securities before receipt of payment for their sale. In addition, significant delays may occur in certain markets in registering the transfer of securities. Settlement or registration problems may make it more difficult for the Fund to value its portfolio securities and could cause the Fund to miss attractive investment opportunities, to have a portion of its assets uninvested or to incur losses due to the failure of a counterparty to pay for securities the Fund has delivered or the Fund's inability to complete its contractual obligations because of theft or other reasons.

The creditworthiness of the local securities firms used by the Fund in emerging countries may not be as sound as the creditworthiness of firms used in more developed countries. As a result, the Fund may be subject to a greater risk of loss if a securities firm defaults in the performance of its responsibilities.

The small size and inexperience of the securities markets in certain emerging countries and the limited volume of trading in securities in those countries may make the Fund's investments in such countries less liquid and more volatile than investments in countries with more developed securities markets (such as the United States, Japan and most Western European countries). The Fund's investments in emerging countries are subject to the risk that the liquidity of a particular investment, or investments generally, in such countries will shrink or disappear suddenly and without warning as a result of adverse economic, market or political conditions or adverse investor perceptions, whether or not accurate. Because of the lack of sufficient market liquidity, the Fund may incur losses because it will be required to effect sales at a disadvantageous time and only then at a substantial drop in price. Investments in emerging countries may be more difficult to value precisely because of the characteristics discussed above and lower trading volumes.

The Fund's use of foreign currency management techniques in emerging countries may be limited. Due to the limited market for these instruments in emerging countries, all or a significant portion of the Fund's currency exposure in emerging countries may not be covered by those techniques.

Risks Specific to Greater China. Investments in Greater China are generally subject to a higher degree of risk than investments in the U.S. and other developed countries. The economies of Greater China—which includes Mainland China, Hong Kong and Taiwan—differ from the U.S. economy in terms of legal and regulatory controls, the rate of growth of gross domestic product, the rate of inflation, capital reinvestment, resource self-sufficiency and balance of payments position, among other factors. Greater China is also subject to heightened risk of adverse environmental events and natural disasters, including earthquakes, droughts, and floods, and may demonstrate economic sensitivity to such events.

Mainland China. Investments in Mainland China are subject to the risks associated with greater governmental control over the economy, political and legal uncertainties and currency fluctuations or blockage. In particular, the Chinese Communist Party exercises significant control over economic growth in Mainland China through the allocation of resources, controlling payment of foreign currency-denominated obligations, setting monetary policy and providing preferential treatment to particular industries or companies.

Because the local legal system is still developing, it may be more difficult to obtain or enforce judgments with respect to investments in Mainland China. Chinese companies may not be subject to the same disclosure, accounting, auditing and financial reporting standards and practices as U.S. companies. Thus, there may be less information publicly available about Chinese companies than about most U.S. companies. Government supervision and regulation of Chinese stock exchanges, currency markets, trading systems and brokers may be more or less rigorous than that present in the U.S. The procedures and rules governing transactions and custody in Mainland China also may involve delays in payment, delivery or recovery of money or investments. The imposition of tariffs or other trade barriers by the U.S. or other foreign governments on exports from Mainland China and any retaliatory measures taken by the Chinese government may also have an adverse impact on Chinese issuers and China's economy as a whole.

Foreign investments in Mainland China are somewhat restricted. Securities listed on the Shanghai and Shenzhen Stock Exchanges are divided into two classes of shares: A shares and B Shares. Ownership of A Shares is restricted to Chinese investors, Qualified Foreign Institutional Investors ("QFIIs") who have obtained a QFII license, and participants in the Shanghai-Hong Kong and Shenzhen-Hong Kong Stock Connect programs ("Stock Connect"). B shares may be owned by Chinese and foreign investors. The Fund may obtain exposure to the A share market in the People's Republic of China ("PRC") by investing directly in A shares through participation in Stock Connect, by investing in participatory notes issued by banks, broker-dealers and other financial institutions, or through other structured or derivative instruments (including Variable Interest Entities ("VIEs")) that are designed to replicate, or otherwise provide exposure to, the performance of A shares of Chinese companies. The Fund may also invest directly in B shares on the Shanghai and Shenzhen Stock Exchanges.

As a result of investing in the PRC, the Fund may be subject to withholding and various other taxes imposed by the PRC, including value added taxes and withholding taxes levied on cash dividends, distributions and interest payments from companies listed in the PRC to foreign investors, unless the withholding tax can be reduced by an applicable income tax treaty.

The tax law and regulations of the PRC are constantly changing, and they may be changed with retrospective effect to the advantage or disadvantage of shareholders. Any changes in the tax law and regulations of the PRC, future clarifications thereof, and/or subsequent retroactive enforcement by the PRC tax authorities may result in a loss which could be material to the Fund. There is a risk the PRC tax

authorities may withdraw any tax exemptions that may be applicable to the Fund in the future and seek to collect taxes realized on the sale of investments without giving any prior notice. If any such tax exemptions are withdrawn, any taxes may be directly borne by or indirectly passed on to the Fund and may result in a substantial impact to its net asset value. As with any net asset value adjustment, shareholders may be advantaged or disadvantaged depending on when the shareholders purchased and/or sold their shares of the Fund. There will be no retrospective restatement of the Fund's net asset value. The interpretation and applicability of the tax law and regulations by tax authorities may not be as consistent and transparent as those of more developed nations, and may vary from region to region. It should also be noted that any provision for taxation made by the Investment Adviser may be excessive or inadequate to meet final tax liabilities. Consequently, shareholders may be advantaged or disadvantaged depending upon the final tax liabilities, the level of provision and when they purchased and/or sold their shares of the Fund.

Hong Kong. Hong Kong is a Special Administrative Region of the PRC. Since Hong Kong reverted to Chinese sovereignty in 1997, it has been governed by the Basic Law, a “quasi-constitution.” The Basic Law guarantees a high degree of autonomy in certain matters, including economic matters, until 2047. Attempts by the government of the PRC to exert greater control over Hong Kong's economic, political or legal structures or its existing social policy, could negatively affect investor confidence in Hong Kong, which in turn could negatively affect markets and business performance.

In addition, the Hong Kong dollar trades within a fixed trading band rate to (or is “pegged” to) the U.S. dollar. This fixed exchange rate has contributed to the growth and stability of the economy, but could be discontinued. It is uncertain what effect any discontinuance of the currency peg and the establishment of an alternative exchange rate system would have on the Hong Kong economy.

Taiwan. The prospect of political reunification of the PRC and Taiwan has engendered hostility between the two regions' governments. This situation poses a significant threat to Taiwan's economy, as heightened conflict could potentially lead to distortions in Taiwan's capital accounts and have an adverse impact on the value of investments throughout Greater China.

Investing through Stock Connect. The Fund may invest in eligible securities (“Stock Connect Securities”) listed and traded on the Shanghai and Shenzhen Stock Exchanges through Stock Connect. Stock Connect is a mutual market access program that allows Chinese investors to trade Stock Connect Securities listed on the Hong Kong Stock Exchange via Chinese brokers and non-Chinese investors (such as the Fund) to purchase China A Shares via brokers in Hong Kong. Although Stock Connect allows non-Chinese investors to trade Chinese equities without obtaining a special license (in contrast to earlier direct investment programs), purchases of securities through Stock Connect are subject to market-wide trading volume and market cap quota limitations, which may prevent the Fund from purchasing Stock Connect Securities when it is otherwise desirable to do so.

The eligibility of China A Shares to be accessed through Stock Connect is subject to change by Chinese regulators. Only certain securities are accessible through Stock Connect and such eligibility may be revoked at any time, resulting in the Fund's inability to add to (but not subtract from) any existing positions in Stock Connect Securities. There can be no assurance that further regulations will not affect the availability of securities in the program or impose other limitations.

Because Stock Connect is relatively new, its effects on the market for trading China A Shares are uncertain. In addition, the trading, settlement and information technology systems used to operate Stock Connect are relatively new and are continuing to evolve. In the event that these systems do not function properly, trading through Stock Connect could be disrupted.

Stock Connect is subject to regulation by both Hong Kong and Mainland China. Regulators in both jurisdictions may suspend or terminate Stock Connect trading in certain circumstances. In addition, Chinese regulators have previously suspended trading in Chinese issuers (or permitted such issuers to suspend trading) during market disruptions and may do so again in the event of future disruptions and/or various company-specific events. Such suspensions may be widespread and may adversely affect the Fund's ability to trade Stock Connect Securities during periods of heightened market volatility. There can be no assurance that any such suspensions or terminations will not be exercised against certain market participants.

Stock Connect transactions are not subject to the investor protection programs of the Hong Kong, Shanghai or Shenzhen Stock Exchanges, though established Hong Kong law may provide other remedies as to any default by a Hong Kong broker. In China, Stock Connect Securities are held on behalf of ultimate investors (such as the Fund) by the Hong Kong Securities Clearing Company Limited (“HKSCC”) as nominee. Although Chinese regulators have affirmed that ultimate investors hold a beneficial interest in Stock Connect Securities, the legal mechanisms available to beneficial owners for enforcing their rights are untested and therefore may expose ultimate investors to risks. Further, Chinese law surrounding the rights of beneficial owners of securities is relatively underdeveloped and courts in China have relatively limited experience in applying the concept of beneficial ownership. As the law continues to evolve, there is a risk that the Fund's ability to enforce its ownership rights may be uncertain, which could subject the Fund to significant losses.

The Fund may be unable to participate in corporate actions affecting Stock Connect Securities due to time constraints or for other operational reasons. In addition, the Fund will not be able to vote in shareholders' meetings except through HKSCC and will not be able to attend shareholders' meetings.

Trades in Stock Connect Securities are subject to certain pre-trade requirements and checks designed to confirm that, for purchases, there is sufficient Stock Connect quota to complete the purchase, and, for sales, the seller has sufficient Stock Connect Securities to complete the sale. Investment quota limitations are subject to change. In addition, these pre-trade requirements may, in practice, limit the number of brokers that the Fund may use to execute trades. While the Fund may use special segregated accounts in lieu of pre-trade requirements and checks, some market participants in Stock Connect Securities, either in China or others investing through Stock Connect or other foreign direct investment programs, have yet to fully implement information technology systems necessary to complete trades involving shares in such accounts in a timely manner. Market practice with respect to special segregated accounts is continuing to evolve.

The Fund will not be able to buy or sell Stock Connect Securities when either the Chinese and Hong Kong markets are closed for trading, and the Chinese and/or Hong Kong markets may be closed for trading for extended periods of time because of local holidays. When the Chinese and Hong Kong markets are not both open on the same day, the Fund may be unable to buy or sell a Stock Connect Security at the desired time. Stock Connect trades are settled in RMB, the official Chinese currency, and investors must have timely access to a reliable supply of RMB in Hong Kong, which cannot be guaranteed.

The Fund and the Investment Adviser (on behalf of itself and its other clients) will also be subject to restrictions on trading (including restriction on retention of proceeds) in China A Shares as a result of their interest in China A Shares and are responsible for compliance with all notifications, reporting and other applicable requirements in connection with such interests. For example, under current Chinese law, once an investor (and, potentially, related investors) holds up to 5% of the shares of a Chinese-listed company, the investor is required to disclose its interest within three days in accordance with applicable regulations and during the reporting period it cannot trade the shares of that company. The investor is also required to disclose any change in its holdings and comply with applicable trading restrictions in accordance with Chinese law.

Trades in Stock Connect Securities may also be subject to various fees, taxes and market charges imposed by Chinese market participants and regulatory authorities. These fees may result in greater trading expenses, which could be borne by the Fund.

The risks related to investments in China A Shares through Stock Connect are heightened to the extent that the Fund invests in China A Shares listed on the Science and Technology Innovation Board of the Shanghai Stock Exchange (“STAR Market”) and/or the ChiNext Market of the Shenzhen Stock Exchange (“ChiNext Market”). Listed companies on the STAR Market and ChiNext Market are usually of an emerging nature with smaller operating scale. They are subject to higher fluctuation in stock prices and liquidity. It may be more common and faster for companies listed on the STAR Market and ChiNext Market to delist.

Investing through VIEs. The Fund may obtain exposure to companies based or operated in the PRC by investing through legal structures known as VIEs. Because of Chinese governmental restrictions on non-Chinese ownership of companies in certain industries in the PRC, certain Chinese companies have used VIEs to facilitate foreign investment without distributing direct ownership of companies based or operated in the PRC. In such cases, the Chinese operating company establishes an offshore company, and the offshore company enters into contractual arrangements (such as powers of attorney, equity pledge agreements and other services or business cooperation agreements) with the operating company. These contractual arrangements are intended to give the offshore company the ability to exercise power over and obtain economic rights from the operating company. Shares of the offshore company, in turn, are listed and traded on exchanges outside of the PRC and are available to non-Chinese investors such as the Fund. This arrangement allows non-Chinese investors in the offshore company to obtain economic exposure to the Chinese company without direct equity ownership in the Chinese company. The VIE contractual arrangements permit the VIE structure to consolidate its financial statements with those of the underlying Chinese company. The offshore companies in VIE structures may be constituents of an index against which the Fund measures its performance. To the extent the Fund declines or is otherwise unable to seek exposure to companies based or operated in the PRC through VIE structures, the Fund may underperform its performance benchmark.

On February 17, 2023, the China Securities Regulatory Commission (“CSRC”) released the “Trial Administrative Measures of Overseas Securities Offering and Listing by Domestic Companies” (the “Trial Measures”) which went into effect on March 31, 2023. The Trial Measures and its implementing guidelines require Chinese companies that pursue listings outside of Mainland China, including those that do so using the VIE structure, to make a filing with the CSRC. While the Trial Measures and its implementing guidelines do not prohibit the use of VIE structures, they do not serve as a formal endorsement either. There is a risk that the government of the PRC may cease to tolerate VIEs at any time or impose new restrictions on the structure, in each case either generally or with respect to specific industries, sectors or companies. Investments involving a VIE may also pose additional risks because such investments are made through a company whose interests in the underlying operating company are established through contract rather than through direct equity ownership. For example, in the event of a dispute, the offshore company’s contractual claims with respect to the operating company may be deemed unenforceable in the PRC, thus limiting (or eliminating) the remedies and rights available to the offshore company and its investors. Such legal uncertainty may also be exploited against the interests of the offshore company and its investors (such as the Fund). Further, the interests of the equity owners of the operating company may conflict with the interests of the investors of the offshore company, and the fiduciary duties of the officers and directors of the operating company may differ from, or conflict with, the fiduciary duties of the officers and directors of the offshore company. Foreign companies listed on U.S. exchanges, including offshore companies that utilize a VIE structure, also could face delisting or other ramifications for failure to meet the

requirements of the SEC, the Public Company Accounting Oversight Board (“PCAOB”) or other U.S. regulators. Any of the foregoing risks and events could negatively impact the Fund’s performance. Additionally, investment in a VIE structure subjects the Fund to the risks associated with the underlying Chinese company, which could also negatively impact the Fund’s performance.

Risks of Investing in Mid-Capitalization and Small-Capitalization Companies. The Fund may invest in mid- and small- capitalization companies. Investments in mid- and small-capitalization companies involve greater risk and portfolio price volatility than investments in larger capitalization stocks. Among the reasons for the greater price volatility of these investments are the less certain growth prospects of smaller firms and the lower degree of liquidity in the markets for such securities. Mid- and small-capitalization companies may be thinly traded and may have to be sold at a discount from current market prices or in small lots over an extended period of time. In addition, these securities are subject to the risk that during certain periods the liquidity of particular issuers or industries, or all securities in particular investment categories, will shrink or disappear suddenly and without warning as a result of adverse economic or market conditions, or adverse investor perceptions whether or not accurate. Because of the lack of sufficient market liquidity, the Fund may incur losses because it will be required to effect sales at a disadvantageous time and only then at a substantial drop in price. Mid- and small-capitalization companies include “unseasoned” issuers that do not have an established financial history; often have limited product lines, markets or financial resources; may depend on or use a few key personnel for management; and may be susceptible to losses and risks of bankruptcy. Mid- and small-capitalization companies may be operating at a loss or have significant variations in operating results; may be engaged in a rapidly changing business with products subject to a substantial risk of obsolescence; may require substantial additional capital to support their operations, to finance expansion or to maintain their competitive position; and may have substantial borrowings or may otherwise have a weak financial condition. In addition, these companies may face intense competition, including competition from companies with greater financial resources, more extensive development, manufacturing, marketing, and other capabilities, and a larger number of qualified managerial and technical personnel. Transaction costs for these investments are often higher than those of larger capitalization companies. Investments in small- and mid-capitalization companies may be more difficult to price precisely than other types of securities because of their characteristics and lower trading volumes.

Risks of Sovereign Debt. Investment in sovereign debt obligations by the Fund involves risks not present in debt obligations of corporate issuers. The issuer of the debt or the governmental authorities that control the repayment of the debt may be unable or unwilling to repay principal or pay interest when due in accordance with the terms of such debt, and the Fund may have limited recourse to compel payment in the event of a default. Periods of economic uncertainty may result in the volatility of market prices of sovereign debt, and in turn the Fund’s NAV, to a greater extent than the volatility inherent in debt obligations of U.S. issuers.

A sovereign debtor’s willingness or ability to repay principal and pay interest in a timely manner may be affected by, among other factors, its cash flow situation, the extent of its foreign currency reserves, the availability of sufficient foreign exchange on the date a payment is due, the relative size of the debt service burden to the economy as a whole, the sovereign debtor’s policy toward international lenders, and the political constraints to which a sovereign debtor may be subject.

Risks of Initial Public Offerings. The Fund may invest in IPOs. An IPO is a company’s first offering of stock to the public. IPO risk is the risk that the market value of IPO shares will fluctuate considerably due to factors such as the absence of a prior public market, unseasoned trading, the small number of shares available for trading and limited information about a company’s business model, quality of management, earnings growth potential, and other criteria used to evaluate its investment prospects. The purchase of IPO shares may involve high transaction costs. Investments in IPO shares, which are subject to market risk and liquidity risk, involve greater risks than investments in shares of companies that have tracked publicly on an exchange for extended periods of time. IPO shares are subject to market risk and liquidity risk. When the Fund’s asset base is small, a significant portion of the Fund’s performance could be attributable to investments in IPOs, because such investments would have a magnified impact on the Fund. As the Fund’s assets grow, the effect of the Fund’s investments in IPOs on the Fund’s performance probably will decline, which could reduce the Fund’s performance. Because of the price volatility of IPO shares, the Fund may choose to hold IPO shares for a very short period of time. This may increase the turnover of the Fund’s portfolio and may lead to increased expenses to the Fund, such as commissions and transaction costs. By selling IPO shares, the Fund may realize taxable gains it will subsequently distribute to shareholders. In addition, the market for IPO shares can be speculative and/or inactive for extended periods of time. There is no assurance that the Fund will be able to obtain allocable portions of IPO shares. The limited number of shares available for trading in some IPOs may make it more difficult for the Fund to buy or sell significant amounts of shares without an unfavorable impact on prevailing prices. Investors in IPO shares can be affected by substantial dilution in the value of their shares, by sales of additional shares and by concentration of control in existing management and principal shareholders.

Risks of Participation Notes. The Fund may invest in participation notes. Some countries, especially emerging markets countries, do not permit foreigners to participate directly in their securities markets or otherwise present difficulties for efficient foreign investment. The Fund may use participation notes to establish a position in such markets as a substitute for direct investment. Participation notes are issued by banks or broker-dealers and are designed to track the return of a particular underlying equity or debt security, currency or market. When the participation note matures, the issuer of the participation note will pay to, or receive from, the Fund the difference between the nominal value of the underlying instrument at the time of purchase and that instrument’s value at maturity. Investments in participation notes involve the same risks as are associated with a direct investment in the underlying security, currency or market that

they seek to replicate. In addition, participation notes are generally traded over-the-counter and are subject to counterparty risk. Counterparty risk is the risk that the broker-dealer or bank that issues them will not fulfill its contractual obligation to complete the transaction with the Fund. Participation notes constitute general unsecured contractual obligations of the banks or broker-dealers that issue them, and the Fund would be relying on the creditworthiness of such banks or broker-dealers and would have no rights under a participation note against the issuer of the underlying assets. In addition, participation notes may trade at a discount to the value of the underlying securities or markets that they seek to replicate.

Risks of Short Selling. The Fund may engage in short selling. In these transactions, the Fund sells an instrument it does not own in anticipation of a decline in the market value of the instrument, then must borrow the instrument to make delivery to the buyer.

The Fund is obligated to replace the instrument borrowed by purchasing it at the market price at the time of replacement. The value at such time may be more or less than the value at which the instrument was sold by the Fund, which may result in a loss or gain, respectively. Unlike purchasing an instrument like a stock, where potential losses are limited to the purchase price and there is no upside limit on potential gain, short sales involve no cap on maximum losses, while gains are limited to the value of the stock at the time of the short sale.

The Fund may, during the term of any short sale, withdraw the cash proceeds of such short sale and use these cash proceeds to purchase additional securities or for any other Fund purposes. Because cash proceeds are Fund assets which are typically used to satisfy the collateral requirements for the short sale, the reinvestment of these cash proceeds may require the Fund to post as collateral other securities that it owns. If the Fund reinvests the cash proceeds, the Fund might be required to post an amount greater than its net assets (but less than its total assets) as collateral. For these or other reasons, the Fund might be required to liquidate long and short positions at times or in amounts that may be disadvantageous to the Fund.

The Fund may also make short sales against the box, in which the Fund enters into a short sale of an instrument which it owns or has the right to obtain at no additional cost.

The SEC and financial industry regulatory authorities in other countries have imposed temporary prohibitions and restrictions on certain types of short sale transactions. These prohibitions and restrictions, or the imposition of other regulatory requirements on short selling in the future, could inhibit the ability of the Sub-Adviser to sell securities short on behalf of the Fund.

Risks of Exchange-Traded Notes. Exchange-traded notes (“ETNs”) are senior, unsecured, unsubordinated debt securities issued by a sponsoring financial institution. The returns on an ETN are linked to the performance of particular securities, market indices, or strategies, minus applicable fees. ETNs are traded on an exchange (e.g., the NYSE) during normal trading hours; however, investors may also hold an ETN until maturity. At maturity, the issuer of an ETN pays to the investor a cash amount equal to the principal amount, subject to application of the relevant securities, index or strategy factor. Similar to other debt securities, ETNs have a maturity date and are backed only by the credit of the sponsoring institution. ETNs are subject to credit risk. The value of an ETN may be influenced by time to maturity, level of supply and demand for the ETN, volatility and lack of liquidity in underlying assets, changes in the applicable interest rates, changes in the issuer’s credit rating, and economic, legal, political or geographic events that affect the underlying assets. When the Fund invests in ETNs, it will bear its proportionate share of any fees and expenses borne by the ETN. Although an ETN is a debt security, it is unlike a typical bond, in that there are no periodic interest payments and principal is not protected. The timing and character of income and gains from ETNs may be affected by future legislation.

Temporary Investment Risks. The Fund may, for temporary defensive purposes (and to the extent it is permitted to invest in the following), invest up to 100% of its total assets in:

- U.S. Government Securities
- Commercial paper rated at least A-2 by S&P Global Ratings, P-2 by Moody’s or having a comparable rating by another NRSRO (or, if unrated, determined by the Investment Adviser to be of comparable credit quality)
- Certificates of deposit
- Bankers’ acceptances
- Repurchase agreements
- Non-convertible preferred stocks and non-convertible corporate bonds with a remaining maturity of less than one year
- ETFs
- Other investment companies
- Cash items

When the Fund’s assets are invested in such instruments, the Fund may not be achieving its investment objective.

Credit/Default Risks. Debt securities purchased by the Fund may include U.S. Government Securities (including zero coupon bonds), and securities issued by foreign governments, domestic and foreign corporations, banks and other issuers. Some of these fixed income securities are described in the next section below. Further information is provided in the SAI.

Debt securities rated BBB– or higher by S&P Global Ratings or Baa3 or higher by Moody’s or having a comparable rating by another NRSRO are considered “investment grade.” Securities rated BBB– or Baa3 are considered medium-grade obligations with speculative characteristics, and adverse economic conditions or changing circumstances may weaken the issuers’ capacity to pay interest and repay principal. The Fund assigns a security, at the time of purchase, the highest rating by an NRSRO if the security is rated by more than one NRSRO. If a security is downgraded after the time of purchase, the Investment Adviser will consider what action, including the sale of the security, is in the best interest of the Fund and its shareholders.

The Fund may invest in fixed income securities rated BB+ or Ba1 or below (or comparable unrated securities) which are commonly referred to as “junk bonds.” Junk bonds are considered speculative and may be questionable as to principal and interest payments.

In some cases, junk bonds may be highly speculative, have poor prospects for reaching investment grade standing and be in default. As a result, investment in such bonds will present greater speculative risks than those associated with investment in investment grade bonds. Also, to the extent that the rating assigned to a security in the Fund’s portfolio is downgraded by a rating organization, the market price and liquidity of such security may be adversely affected.

C. PORTFOLIO SECURITIES AND TECHNIQUES

This section provides further information on certain types of securities and investment techniques that may be used by the Fund, including their associated risks.

The Fund may purchase other types of securities or instruments similar to those described in this section if otherwise consistent with the Fund’s investment objective and policies. Further information is provided in the SAI, which is available upon request.

U.S. Government Securities. The Fund may invest in U.S. Government Securities. U.S. Government Securities include U.S. Treasury obligations and obligations issued or guaranteed by U.S. government agencies, instrumentalities or sponsored enterprises. U.S. Government Securities may be supported by (i) the full faith and credit of the U.S. Treasury; (ii) the right of the issuer to borrow from the U.S. Treasury; (iii) the discretionary authority of the U.S. government to purchase certain obligations of the issuer; or (iv) only the credit of the issuer. U.S. Government Securities also include Treasury receipts, zero coupon bonds and other stripped U.S. Government Securities, where the interest and principal components are traded independently.

U.S. Government Securities may also include Treasury inflation-protected securities whose principal value is periodically adjusted according to the rate of inflation.

U.S. Treasury obligations include, among other things, the separately traded principal and interest components of securities guaranteed or issued by the U.S. Treasury if such components are traded independently under the Separate Trading of Registered Interest and Principal of Securities program.

U.S. Government Securities are deemed to include (i) securities for which the payment of principal and interest is backed by an irrevocable letter of credit issued by the U.S. government, its agencies, authorities or instrumentalities; and (ii) participations in loans made to foreign governments or their agencies that are so guaranteed. Certain of these participations may be regarded as illiquid.

U.S. Treasury obligations have historically involved little risk of loss of principal if held to maturity. However, no assurance can be given that the U.S. government will be able or willing to repay the principal or interest when due, or provide financial support to U.S. government agencies, authorities, instrumentalities or sponsored enterprises that issue U.S. Government Securities if it is not obligated to do so by law.

Custodial Receipts and Trust Certificates. The Fund may invest in custodial receipts and trust certificates representing interests in securities held by a custodian or trustee. The securities so held may include U.S. Government Securities, fixed income securities issued by or on behalf of states, territories and possessions of the United States (including the District of Columbia) and the political subdivisions, agencies and instrumentalities thereof (“Municipal Securities”), as applicable, or other types of securities in which the Fund may invest. The custodial receipts or trust certificates may evidence ownership of future interest payments, principal payments or both on the underlying securities, or, in some cases, the payment obligation of a third party that has entered into an interest rate swap or other arrangement with the custodian or trustee. For certain securities laws purposes, custodial receipts and trust certificates may not be considered obligations of the U.S. government or other issuer of the securities held by the custodian or trustee. If for tax purposes the Fund is not considered to be the owner of the underlying securities held in the custodial or trust account, the Fund may suffer adverse tax consequences. As a holder of custodial receipts and trust certificates, the Fund will bear its proportionate share of the fees and expenses charged to the custodial account or trust. The Fund may also invest in separately issued interests in custodial receipts and trust certificates.

REITs. The Fund may invest in REITs. REITs are pooled investment vehicles that invest primarily in either real estate or real estate related loans. The value of a REIT is affected by changes in the value of the properties owned by the REIT or securing mortgage loans held by the REIT. REITs are dependent upon the ability of the REITs’ managers, and are subject to heavy cash flow dependency,

default by borrowers and the qualification of the REITs under applicable regulatory requirements for favorable income tax treatment. REITs are also subject to risks generally associated with investments in real estate including possible declines in the value of real estate, general and local economic conditions, environmental problems and changes in interest rates.

To the extent that assets underlying a REIT are concentrated geographically, by property type or in certain other respects, these risks may be heightened. The Fund will indirectly bear its proportionate share of any expenses, including management fees, paid by a REIT in which it invests.

Lending of Portfolio Securities. The Fund may engage in securities lending. Securities lending involves the lending of securities owned by the Fund to financial institutions such as certain broker-dealers including, as permitted by the SEC, Goldman Sachs. The borrowers are required to secure their loans continuously with cash, cash equivalents, U.S. government securities or letters of credit in an amount at least equal to the market value of the securities loaned. Cash collateral may be invested by the Fund in short-term investments, including registered and unregistered investment pools managed by the Investment Adviser, its affiliates or the Fund's custodian and from which the Investment Adviser or its affiliates may receive fees. To the extent that cash collateral is so invested, such collateral will be subject to market depreciation or appreciation, and the Fund will be responsible for any loss that might result from its investment of the borrowers' collateral. If the Investment Adviser determines to make securities loans, the value of the securities loaned may not exceed 33 1/3% of the value of the total assets of the Fund (including the loan collateral). Loan collateral (including any investment of the collateral) is not subject to the percentage limitations described elsewhere in the Prospectus regarding investments in fixed income securities and cash equivalents.

The Fund may lend its securities to increase its income. The Fund may, however, experience delay in the recovery of its securities or incur a loss if the institution with which it has engaged in a portfolio loan transaction breaches its agreement with the Fund or its agent, or becomes insolvent.

Foreign Currency Transactions. The Fund may, to the extent consistent with its investment policies, purchase or sell foreign currencies on a cash basis or through forward contracts. A forward contract involves an obligation to purchase or sell a specific currency at a future date at a price set at the time of the contract.

The Fund may engage in foreign currency transactions for both hedging and non-hedging purposes and to seek to protect against anticipated changes in future foreign currency exchange rates. In addition, the Fund may enter into foreign currency transactions to seek a closer correlation between the Fund's overall currency exposures and the currency exposures of the Fund's performance benchmark. The Fund may also enter into such transactions to seek to increase total return, which presents additional risk.

The Fund may also engage in cross-hedging by using forward contracts in a currency different from that in which the hedged security is denominated or quoted. The Fund may hold foreign currency received in connection with investments in foreign securities when, in the judgment of the Investment Adviser, it would be beneficial to convert such currency into U.S. dollars at a later date (e.g., the Investment Adviser may anticipate that the foreign currency will appreciate against the U.S. dollar).

The Fund may, from time to time, engage in non-deliverable forward transactions to manage currency risk or to gain exposure to a currency without purchasing securities denominated in that currency. A non-deliverable forward is a transaction that represents an agreement between the Fund and a counterparty (usually a commercial bank) to pay the other party the amount that it would cost based on current market rates as of the termination date to buy or sell a specified (notional) amount of a particular currency at an agreed upon foreign exchange rate on an agreed upon future date. If the counterparty defaults, the Fund will have contractual remedies pursuant to the agreement related to the transaction, but the Fund may be delayed or prevented from obtaining payments owed to it pursuant to non-deliverable forward transactions. Such non-deliverable forward transactions will be settled in cash.

Currency exchange rates may fluctuate significantly over short periods of time causing, along with other factors, the Fund's NAV to fluctuate (when the Fund's NAV fluctuates, the value of your shares may go up or down). Currency exchange rates also can be affected unpredictably by the intervention of U.S. or foreign governments or central banks, or the failure to intervene, or by currency controls or political developments in the United States or abroad.

Certain forward foreign currency exchange contracts and other currency transactions are not exchange traded or cleared. The market in such forward foreign currency exchange contracts, currency swaps and other privately negotiated currency instruments offers less protection against defaults by the other party to such instruments than is available for currency instruments traded on an exchange. Such contracts are subject to the risk that the counterparty to the contract will default on its obligations. Because these contracts are not guaranteed by an exchange or clearinghouse, a default on a contract would deprive the Fund of unrealized profits, transaction costs or the benefits of a currency hedge or could force the Fund to cover its purchase or sale commitments, if any, at the current market price.

The Fund is not required to post cash collateral with its counterparties in certain foreign currency transactions. Accordingly, the Fund may remain more fully invested (and more of the Fund's assets may be subject to investment and market risk) than if it were required to post cash collateral with its counterparties (which is the case with certain transactions). Where the Fund's counterparties are not required to post cash collateral with the Fund, the Fund will be subject to additional counterparty risk.

Options on Securities, Securities Indices and Foreign Currencies. A put option gives the purchaser of the option the right to sell, and the writer (seller) of the option the obligation to buy, the underlying instrument during the option period. A call option gives the purchaser of the option the right to buy, and the writer (seller) of the option the obligation to sell, the underlying instrument during the option period. The Fund may write (sell) call and put options and purchase put and call options on any securities in which the Fund may invest or on any securities index consisting of securities in which it may invest. The Fund may also, to the extent consistent with its investment policies, purchase and sell (write) put and call options on foreign currencies.

The writing and purchase of options is a highly specialized activity which involves special investment risks. Options may be used for either hedging or cross-hedging purposes, or to seek to increase total return (which presents additional risk). The successful use of options depends in part on the ability of the Investment Adviser to anticipate future price fluctuations and the degree of correlation between the options and securities (or currency) markets. The potential for losses depends on the Investment Adviser's analysis and decision making processes around, but not limited to, expectations of changes in market prices or determination of the correlation between the instruments or indices on which options are written and purchased and the instruments in the Fund's investment portfolio. The use of options can also increase the Fund's transaction costs. Options written or purchased by the Fund may be traded on either U.S. or foreign exchanges or over-the-counter. Foreign and over-the-counter options will present greater possibility of loss because of their greater illiquidity and credit risks.

Futures Contracts and Options and Swaps on Futures Contracts. Futures contracts are standardized, exchange-traded contracts that provide for the sale or purchase of a specified financial instrument or currency at a future time at a specified price. An option on a futures contract gives the purchaser the right (and the writer of the option the obligation) to assume a position in a futures contract at a specified exercise price within a specified period of time. A swap on a futures contract provides an investor with the ability to gain economic exposure to a particular futures market. A futures contract may be based on particular securities, foreign currencies, securities indices and other financial instruments and indices. The Fund may engage in futures transactions on U.S. exchanges and foreign exchanges.

The Fund may purchase and sell futures contracts, purchase and write call and put options on futures contracts and enter into swaps on futures contracts, in order to seek to increase total return or to hedge against changes in interest rates, securities prices or currency exchange rates, or to otherwise manage its term structure, sector selections and duration in accordance with its investment objective and policies. The Fund may also enter into closing purchase and sale transactions with respect to such contracts and options.

Futures contracts and related options and swaps present the following risks:

- While the Fund may benefit from the use of futures and options and swaps on futures, unanticipated changes in interest rates, securities prices or currency exchange rates may result in poorer overall performance than if the Fund had not entered into any futures contracts, options transactions or swaps.
- Because perfect correlation between a futures position and a portfolio position that is intended to be protected is impossible to achieve, the desired protection may not be obtained and the Fund may be exposed to additional risk of loss.
- The loss incurred by the Fund in entering into futures contracts and in writing call options and entering into swaps on futures is potentially unlimited and may exceed the amount of the premium received.
- Futures markets are highly volatile and the use of futures may increase the volatility of the Fund's NAV.
- As a result of the low margin deposits normally required in futures trading, a relatively small price movement in a futures contract may result in substantial losses to the Fund.
- Futures contracts and options and swaps on futures may be illiquid, and exchanges may limit fluctuations in futures contract prices during a single day.
- Foreign exchanges may not provide the same protection as U.S. exchanges.

Corporate Debt Obligations and Convertible Securities. The Fund may invest in corporate debt obligations and convertible securities. Corporate debt obligations include bonds, notes, debentures, commercial paper and other obligations of corporations to pay interest and repay principal. The Fund may also invest in other short-term obligations issued or guaranteed by U.S. corporations, non-U.S. corporations or other entities.

Convertible securities are preferred stock or debt obligations that are convertible into common stock. Convertible securities generally offer lower interest or dividend yields than non-convertible securities of similar quality. Convertible securities have both equity and fixed income risk characteristics. Like all fixed income securities, the value of convertible securities is susceptible to the risk of market losses attributable to changes in interest rates. Generally, the market value of convertible securities tends to decline as interest rates increase and, conversely, to increase as interest rates decline. However, when the market price of the common stock underlying a convertible security exceeds the conversion price of the convertible security, the convertible security tends to reflect the market price of the underlying common stock. As the market price of the underlying common stock declines, the convertible security, like a fixed income security, tends to trade increasingly on a yield basis, and thus may not decline in price to the same extent as the underlying common stock.

Structured Securities. The Fund may invest in structured securities. Structured securities are securities whose value is determined by reference to changes in the value of specific currencies, securities, interest rates, commodities, indices or other financial indicators (the “Reference”) or the relative change in two or more References. Investments in structured securities may provide exposure to certain securities or markets in situations where regulatory or other restrictions prevent direct investments in such issuers or markets.

The interest rate or the principal amount payable upon maturity or redemption may be increased or decreased depending upon changes in the applicable Reference. Structured securities may be positively or negatively indexed, so that appreciation of the Reference may produce an increase or decrease in the interest rate or value of the security at maturity. In addition, changes in the interest rates or the value of the security at maturity may be a multiple of changes in the value of the Reference effectively leveraging the Fund’s investments so that small changes in the value of the Reference may result in disproportionate gains or losses to the Fund.

Consequently, structured securities may present a greater degree of market risk than many types of securities and may be more volatile, less liquid and more difficult to price accurately than less complex securities. Structured securities are also subject to the risk that the issuer of the structured securities may fail to perform its contractual obligations. Certain issuers of structured products may be deemed to be investment companies as defined in the Investment Company Act. As a result the Fund’s investments in structured securities may be subject to the limits applicable to investments in other investment companies.

Structured securities are considered hybrid instruments because they are derivative instruments the value of which depends on, or is derived from or linked to, the value of an underlying asset, interest rate index or commodity. Commodity-linked notes are hybrid instruments because the principal and/or interest payments on those notes is linked to the value of the individual commodities, futures contracts or the performance of one or more commodity indices.

Structured securities include, but are not limited to, equity linked notes. An equity linked note is a note whose performance is tied to a single stock, a stock index or a basket of stocks. Equity linked notes combine the principal protection normally associated with fixed income investments with the potential for capital appreciation normally associated with equity investments. Upon the maturity of the note, the holder generally receives a return of principal based on the capital appreciation of the linked securities. Depending on the terms of the note, equity linked notes may also have a “cap” or “floor” on the maximum principal amount to be repaid to holders, irrespective of the performance of the underlying linked securities. For example, a note may guarantee the repayment of the original principal amount invested (even if the underlying linked securities have negative performance during the note’s term), but may cap the maximum payment at maturity at a certain percentage of the issuance price or the return of the underlying linked securities. Alternatively, the note may not guarantee a full return on the original principal, but may offer a greater participation in any capital appreciation of the underlying linked securities. The terms of an equity linked note may also provide for periodic interest payments to holders at either a fixed or floating rate. The secondary market for equity linked notes may be limited, and the lack of liquidity in the secondary market may make these securities difficult to dispose of and to value. Equity linked notes will be considered equity securities for purposes of the Fund’s investment objective and policies.

The Fund may invest in credit linked notes. Credit linked notes are securities with embedded credit default swaps. An investor holding a credit linked note generally receives a fixed or floating coupon and the note’s par value upon maturity, unless the referred credit defaults or declares bankruptcy, in which case the investor receives the amount recovered. In effect, investors holding credit linked notes receive a higher yield in exchange for assuming the risk of a specified credit event.

Other Investment Companies. The Fund may invest in securities of other investment companies, including ETFs and money market funds, subject to statutory limitations prescribed by the Investment Company Act or rules, regulations or exemptive relief thereunder. These statutory limitations include in certain circumstances a prohibition on the Fund acquiring more than 3% of the voting shares of any other investment company, and a prohibition on investing more than 5% of the Fund’s total assets in securities of any one investment company or more than 10% of total assets in securities of all investment companies.

Subject to applicable law and/or pursuant to an exemptive order obtained from the SEC or under an exemptive rule adopted by the SEC, the Fund may invest in certain other investment companies (including ETFs and money market funds) and business development companies beyond the statutory limits described above or otherwise provided that certain conditions are met. Some of those investment companies may be funds for which the Investment Adviser or the Investment Adviser or any of their affiliates serves as investment adviser, administrator or distributor.

Additionally, to the extent that the Fund serves as an “acquired fund” to another Goldman Sachs Fund or unaffiliated investment company, the Fund’s ability to invest in other investment companies and private funds may be limited and, under these circumstances, the Fund’s investments in other investment companies and private funds will be consistent with applicable law and/or exemptive rules adopted by or exemptive orders obtained from the SEC. For example, to the extent the Fund serves as an acquired fund in the Fund of funds arrangement in reliance on Rule 12d1-4 under the Investment Company Act, the Fund would be prohibited from purchasing or otherwise acquiring the securities of an investment company or private fund if, after such purchase or acquisition, the aggregate value of the Fund’s investments in such investment companies and private funds would exceed 10% of the value of the Fund’s total assets, subject to limited exceptions (including for investments in money market funds).

The use of ETFs is generally intended to help the Fund match the total return of the particular market segments or indices represented by those ETFs, although that may not be the result. Most ETFs are passively managed investment companies whose shares are purchased and sold on a securities exchange. An ETF generally represents a portfolio of securities designed to track a particular market segment or index. An investment in an ETF generally presents the same primary risks as an investment in a conventional fund (i.e., one that is not exchange-traded) that has the same investment objectives, strategies and policies. In addition, an ETF may fail to accurately track the market segment or index that underlies its investment objective. The price of an ETF can fluctuate, and the Fund could lose money investing in an ETF. Moreover, ETFs are subject to the following risks that do not apply to conventional funds: (i) the market price of the ETF's shares may trade at a premium or a discount to their NAV; (ii) an active trading market for an ETF's shares may not develop or be maintained; and (iii) there is no assurance that the requirements of the exchange necessary to maintain the listing of an ETF will continue to be met or remain unchanged.

The Fund will indirectly bear its proportionate share of any management fees and other expenses paid by such other investment companies, in addition to the fees and expenses regularly borne by the Fund. Although the Fund does not expect to do so in the foreseeable future, the Fund is authorized to invest substantially all of its assets in a single open-end investment company or series thereof that has substantially the same investment objective, policies and fundamental restrictions as the Fund.

Mortgage-Backed Securities. The Fund may invest in mortgage-backed securities. Mortgage-backed securities represent direct or indirect participations in, or are collateralized by and payable from, mortgage loans secured by real property. Mortgage-backed securities can be backed by either fixed rate mortgage loans or adjustable rate mortgage loans, and may be issued by either a governmental or non-governmental entity. The value of some mortgage-backed securities may be particularly sensitive to changes in prevailing interest rates. The value of these securities may also fluctuate in response to the market's perception of the creditworthiness of the issuers. Early repayment of principal on mortgage- or asset-backed securities may expose the Fund to the risk of earning a lower rate of return upon reinvestment of principal.

The Fund may invest in privately-issued mortgage pass-through securities that represent interests in pools of mortgage loans that are issued by trusts formed by originators of and institutional investors in mortgage loans (or represent interests in custodial arrangements administered by such institutions). These originators and institutions include commercial banks, savings and loans associations, credit unions, savings banks, mortgage bankers, insurance companies, investment banks or special purpose subsidiaries of the foregoing. The pools underlying privately-issued mortgage pass-through securities consist of mortgage loans secured by mortgages or deeds of trust creating a first lien on commercial, residential, residential multi-family and mixed residential/commercial properties. These mortgage-backed securities typically do not have the same credit standing as U.S. government guaranteed mortgage-backed securities.

Privately-issued mortgage pass-through securities generally offer a higher yield than similar securities issued by a government entity because of the absence of any direct or indirect government or agency payment guarantees. However, timely payment of interest and principal on mortgage loans in these pools may be supported by various other forms of insurance or guarantees, including individual loan, pool and hazard insurance, subordination and letters of credit. Such insurance and guarantees may be issued by private insurers, banks and mortgage poolers. There is no assurance that private guarantors or insurers, if any, will meet their obligations.

Mortgage-backed securities without insurance or guarantees may also be purchased by the Fund if they have the required rating from an NRSRO. Some mortgage-backed securities issued by private organizations may not be readily marketable, may be more difficult to value accurately and may be more volatile than similar securities issued by a government entity.

Mortgage-backed securities may include multiple class securities, including collateralized mortgage obligations ("CMOs") and Real Estate Mortgage Investment Conduit ("REMIC") pass-through or participation certificates. A REMIC is a CMO that qualifies for special tax treatment under the Code and invests in certain mortgages principally secured by interests in real property and other permitted investments. CMOs provide an investor with a specified interest in the cash flow from a pool of underlying mortgages or of other mortgage-backed securities. CMOs are issued in multiple classes each with a specified fixed or floating interest rate and a final scheduled distribution date. In many cases, payments of principal are applied to the CMO classes in the order of their respective stated maturities, so that no principal payments will be made on a CMO class until all other classes having an earlier stated maturity date are paid in full.

Sometimes, however, CMO classes are "parallel pay," i.e., payments of principal are made to two or more classes concurrently. In some cases, CMOs may have the characteristics of a stripped mortgage-backed security whose price can be highly volatile. CMOs may exhibit more or less price volatility and interest rate risk than other types of mortgage-backed securities, and under certain interest rate and payment scenarios, the Fund may fail to recoup fully its investment in certain of these securities regardless of their credit quality.

To the extent the Fund concentrates its investments in pools of mortgage-backed securities sponsored by the same sponsor or serviced by the same servicer, it may be subject to additional risks. Servicers of mortgage-related pools collect payments on the underlying mortgage assets for pass-through to the pool on a periodic basis. Upon insolvency of the servicer, the pool may be at risk with respect to collections received by the servicer but not yet delivered to the pool.

Asset-Backed Securities. The Fund may invest in asset-backed securities. Asset-backed securities are securities whose principal and interest payments are collateralized by pools of assets such as auto loans, credit card receivables, leases, installment contracts and personal property. Asset-backed securities may also include home equity line of credit loans and other second-lien mortgages. Asset-backed securities are often subject to more rapid repayment than their stated maturity date would indicate as a result of the pass-through of prepayments of principal on the underlying loans. During periods of declining interest rates, prepayment of loans underlying asset-backed securities can be expected to accelerate. Accordingly, the Fund's ability to maintain positions in such securities will be affected by reductions in the principal amount of such securities resulting from prepayments, and its ability to reinvest the returns of principal at comparable yields is subject to generally prevailing interest rates at that time. Asset-backed securities present credit risks that are not presented by mortgage-backed securities. This is because asset-backed securities generally do not have the benefit of a security interest in collateral that is comparable to mortgage assets. Some asset-backed securities have only a subordinated claim or security interest in collateral. If the issuer of an asset-backed security defaults on its payment obligations, there is the possibility that, in some cases, the Fund will be unable to possess and sell the underlying collateral and that the Fund's recoveries on repossessed collateral may not be available to support payments on the securities. In the event of a default, the Fund may suffer a loss if it cannot sell collateral quickly and receive the amount it is owed. The value of some asset-backed securities may be particularly sensitive to changes in the prevailing interest rates. There is no guarantee that private guarantors or insurers of an asset-backed security, if any, will meet their obligations. Asset-backed securities may also be subject to increased volatility and may become illiquid and more difficult to value even when there is no default or threat of default due to the market's perception of the creditworthiness of the issuers and market conditions impacting asset-backed securities more generally.

Brady Bonds and Similar Instruments. The Fund may invest in debt obligations commonly referred to as "Brady Bonds." Brady Bonds are created through the exchange of existing commercial bank loans to foreign borrowers for new obligations in connection with debt restructurings under a plan introduced by former U.S. Secretary of the Treasury, Nicholas F. Brady (the "Brady Plan").

Brady Bonds involve various risk factors including the history of defaults with respect to commercial bank loans by public and private entities of countries issuing Brady Bonds. There can be no assurance that Brady Bonds in which the Fund may invest will not be subject to restructuring arrangements or to requests for new credit, which may cause the Fund to suffer a loss of interest or principal on its holdings.

In addition, the Fund may invest in other interests issued by entities organized and operated for the purpose of restructuring the investment characteristics of instruments issued by emerging country issuers. These types of restructuring involve the deposit with or purchase by an entity of specific instruments and the issuance by that entity of one or more classes of securities backed by, or representing interests in, the underlying instruments. Certain issuers of such structured securities may be deemed to be "investment companies" as defined in the Investment Company Act. As a result, the Fund's investment in such securities may be limited by certain investment restrictions contained in the Investment Company Act.

Unseasoned Companies. The Fund may invest in companies which (together with their predecessors) have operated less than three years. The securities of such companies may have limited liquidity, which can result in their being priced higher or lower than might otherwise be the case. In addition, investments in unseasoned companies are more speculative and entail greater risk than do investments in companies with an established operating record.

When-Issued Securities and Forward Commitments. The Fund may purchase when-issued securities and make contracts to purchase or sell securities for a fixed price at a future date beyond customary settlement time. When-issued securities are securities that have been authorized, but not yet issued. When-issued securities are purchased in order to secure what is considered to be an advantageous price or yield to the Fund at the time of entering into the transaction. A forward commitment involves entering into a contract to purchase or sell securities for a fixed price at a future date beyond the customary settlement period. The purchase of securities on a when-issued or forward commitment basis involves a risk of loss if the value of the security to be purchased declines before the settlement date. Conversely, the sale of securities on a forward commitment basis involves the risk that the value of the securities sold may increase before the settlement date. Although the Fund will generally purchase securities on a when-issued or forward commitment basis with the intention of acquiring the securities for its portfolio, the Fund may dispose of when-issued securities or forward commitments prior to settlement if the Investment Adviser deems it appropriate.

Bank Obligations. The Fund may invest in obligations issued or guaranteed by U.S. or foreign banks. Bank obligations, including without limitation, time deposits, bankers' acceptances and certificates of deposit, may be general obligations of the parent bank or may be limited to the issuing branch by the terms of the specific obligations or by government regulations. Banks are subject to extensive but different governmental regulations which may limit both the amount and types of loans which may be made and interest rates which may be charged. In addition, the profitability of the banking industry is largely dependent upon the availability and cost of funds for the purpose of financing lending operations under prevailing money market conditions. General economic conditions as well as exposure to credit losses arising from possible financial difficulties of borrowers play an important part in the operation of this industry.

Non-Investment Grade Fixed Income Securities. Non-investment grade fixed income securities and unrated securities of comparable credit quality (commonly known as “junk bonds”) are considered speculative. In some cases, these obligations may be highly speculative and have poor prospects for reaching investment grade standing. Non-investment grade fixed income securities are subject to the increased risk of an issuer’s inability to meet principal and interest obligations. These securities, also referred to as high yield securities, may be subject to greater price volatility due to such factors as specific issuer developments, interest rate sensitivity, negative perceptions of the junk bond markets generally and less liquidity.

Non-investment grade fixed income securities are also issued in connection with a corporate reorganization or restructuring or as part of a merger, acquisition, takeover or similar event. They are also issued by less established companies seeking to expand. Such issuers are often highly leveraged and generally less able than more established or less leveraged entities to make scheduled payments of principal and interest in the event of adverse developments or business conditions. Non-investment grade securities are also issued by governmental bodies that may have difficulty in making all scheduled interest and principal payments.

The market value of non-investment grade fixed income securities tends to reflect individual corporate or municipal developments to a greater extent than that of higher rated securities which react primarily to fluctuations in the general level of interest rates. As a result, the Fund’s ability to achieve its investment objectives may depend to a greater extent on the Investment Adviser’s judgment concerning the creditworthiness of issuers than funds which invest in higher-rated securities. Issuers of non-investment grade fixed income securities may not be able to make use of more traditional methods of financing and their ability to service debt obligations may be affected more adversely than issuers of higher-rated securities by economic downturns, specific corporate or financial developments or the issuer’s inability to meet specific projected business forecasts. Negative publicity about the junk bond market and investor perceptions regarding lower rated securities, whether or not based on fundamental analysis, may depress the prices for such securities.

A holder’s risk of loss from default is significantly greater for non-investment grade fixed income securities than is the case for holders of other debt securities because such non-investment grade securities are generally unsecured and are often subordinated to the rights of other creditors of the issuers of such securities. Investment by the Fund in defaulted securities poses additional risk of loss should nonpayment of principal and interest continue in respect of such securities. Even if such securities are held to maturity, recovery by the Fund of its initial investment and any anticipated income or appreciation is uncertain.

The secondary market for non-investment grade fixed income securities is concentrated in relatively few market makers and is dominated by institutional investors, including mutual funds, insurance companies and other financial institutions. Accordingly, the secondary market for such securities is not as liquid as, and is more volatile than, the secondary market for higher-rated securities. In addition, market trading volume for high yield fixed income securities is generally lower and the secondary market for such securities could shrink or disappear suddenly and without warning as a result of adverse market or economic conditions, independent of any specific adverse changes in the condition of a particular issuer. The lack of sufficient market liquidity may cause the Fund to incur losses because it will be required to effect sales at a disadvantageous time and then only at a substantial drop in price. These factors may have an adverse effect on the market price and the Fund’s ability to dispose of particular portfolio investments. A less liquid secondary market also may make it more difficult for the Fund to obtain precise valuations of the high yield securities in its portfolio.

Credit ratings issued by credit rating agencies are designed to evaluate the safety of principal and interest payments of rated securities. They do not, however, evaluate the market value risk of non-investment grade securities and, therefore, may not fully reflect the true risks of an investment. In addition, credit rating agencies may or may not make timely changes in a rating to reflect changes in the economy or in the conditions of the issuer that affect the market value of the security. Consequently, credit ratings are used only as a preliminary indicator of investment quality.

Preferred Stock, Warrants and Stock Purchase Rights. The Fund may invest in preferred stock, warrants and stock purchase rights (or “rights”). Preferred stocks are securities that represent an ownership interest providing the holder with claims on the issuer’s earnings and assets before common stock owners but after bond owners. Unlike debt securities, the obligations of an issuer of preferred stock, including dividend and other payment obligations, may not typically be accelerated by the holders of such preferred stock on the occurrence of an event of default or other non-compliance by the issuer of the preferred stock.

Warrants and other rights are options to buy a stated number of shares of common stock at a specified price at any time during the life of the warrant or right. The holders of warrants and rights have no voting rights, receive no dividends and have no rights with respect to the assets of the issuer.

Repurchase Agreements. Repurchase agreements involve the purchase of securities subject to the seller’s agreement to repurchase them at a mutually agreed upon date and price. The Fund may enter into repurchase agreements with eligible counterparties that furnish collateral at least equal in value or market price to the amount of their repurchase obligation. The collateral may consist of any type of security in which the Fund is eligible to invest directly. Repurchase agreements involving obligations other than U.S. Government Securities may be subject to additional risks.

If the other party or “seller” defaults, the Fund might suffer a loss to the extent that the proceeds from the sale of the underlying securities and other collateral held by the Fund are less than the repurchase price and the Fund’s costs associated with delay and enforcement of the repurchase agreement. In addition, in the event of bankruptcy of the seller, the Fund could suffer additional losses if a court determines that the Fund’s interest in the collateral is not enforceable.

The Fund, together with other registered investment companies having advisory agreements with the Investment Adviser or any of its affiliates, may transfer uninvested cash balances into a single joint account, the daily aggregate balance of which will be invested in one or more repurchase agreements.

Borrowings and Reverse Repurchase Agreements. The Fund can borrow money from banks and other financial institutions in amounts not exceeding one-third of its total assets (including the amount borrowed). The Fund also may enter into reverse repurchase agreements.

Reverse repurchase agreements involve the sale of securities held by the Fund subject to the Fund’s agreement to repurchase them at a mutually agreed upon date and price (including interest). These transactions may be entered into as a temporary measure for emergency purposes or to meet redemption requests. Reverse repurchase agreements may also be entered into when the Investment Adviser expects that the interest income to be earned from the investment of the transaction proceeds will be greater than the related interest expense.

Borrowings and reverse repurchase agreements involve leveraging. If the securities held by the Fund decline in value while these transactions are outstanding, the NAV of the Fund’s outstanding shares will decline in value by proportionately more than the decline in value of the securities. In addition, reverse repurchase agreements involve the risk that the investment return earned by the Fund (from the investment of the proceeds) will be less than the interest expense of the transaction, that the market value of the securities sold by the Fund will decline below the price the Fund is obligated to pay to repurchase the securities, and that the securities may not be returned to the Fund.

Equity Swaps, Currency Swaps, Index Swaps and Total Return Swaps. The Fund may enter into the following swap transactions and options agreements. Equity swaps allow the parties to a swap agreement to exchange the dividend income or other components of return on an equity investment (for example, a group of equity securities or an index) for another payment stream. An equity swap may be used by the Fund to invest in a market without owning or taking physical custody of securities in circumstances in which direct investment may be restricted for legal reasons or is otherwise deemed impractical or disadvantageous. Index swaps allow one party or both parties to a swap agreement to receive one or more payments based off of the return, performance or volatility of an index or of certain securities which comprise the index.

Currency swaps involve the exchange of the parties’ respective rights to make or receive payments in specified currencies. Total return swaps give a party the right to receive the appreciation in the value of a specified security, index or other instrument in return for a fee paid to the counterparty, which will typically be based on an agreed upon interest rate. If the underlying asset in a total return swap declines in value over the term of the swap, the party may also be required to pay the dollar value of that decline to the counterparty.

The Fund may enter into the transactions described above for hedging purposes or to seek to increase total return.

The use of equity, currency, index and total return swaps is a highly specialized activity which involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. If the Sub-Adviser is incorrect in its forecasts of market values, interest rates and currency exchange rates, or in its evaluation of the creditworthiness of swap counterparties and the issuers of the underlying assets, the investment performance of the Fund would be less favorable than it would have been if these investment techniques were not used.

Currently, certain standardized swap transactions are subject to mandatory central clearing and exchange trading. Although central clearing and exchange trading are expected to decrease counterparty risk and increase liquidity compared to bilaterally negotiated swaps, central clearing and exchange trading do not eliminate counterparty risk or illiquidity risk entirely. Depending on the size of the Fund and other factors, the margin required under the rules of a clearinghouse and by a clearing member may be in excess of the collateral required to be posted by the Fund to support its obligations under a similar bilateral, uncleared swap. However, certain applicable regulators have adopted rules imposing certain margin requirements, including minimums, on uncleared swaps which may result in the Fund and its counterparties posting higher amounts for uncleared swaps.

Collateralized Debt Obligations. The Fund may invest in collateralized debt obligations (“CDOs”), which include collateralized loan obligations (“CLOs”), CBOs, and other similarly structured securities. CBOs and CLOs are types of asset-backed securities. A CBO is a trust which is backed by a diversified pool of high risk, below investment grade fixed income securities. A CLO is a trust typically collateralized by a pool of loans, which may include, among others, domestic and foreign senior secured loans, senior unsecured loans, and subordinate corporate loans, including loans that may be rated below investment grade or equivalent unrated loans. Collateralized debt obligations (“CDOs”) may charge management fees and other administrative expenses.

For both CBOs and CLOs, the cash flows from the trust are split into two or more portions, called tranches, varying in risk and yield. The riskiest portion is the “equity” tranche which bears the bulk of defaults from the bonds or loans in the trust and serves to protect the other, more senior tranches from default in all but the most severe circumstances. Because it is partially protected from defaults, a senior tranche from a CBO trust or CLO trust typically has higher ratings and lower yields than its underlying securities, and can be rated investment grade. Despite the protection from the equity tranche, CBO or CLO tranches can experience substantial losses due to actual defaults, increased sensitivity to defaults due to collateral default and disappearance of protecting tranches, market anticipation of defaults, as well as aversion to CLO securities as a class.

The risks of an investment in a CDO depend largely on the type of the collateral securities and the class of the CDO in which the Fund invests. Normally, CBOs, CLOs and other CDOs are privately offered and sold, and thus, are not registered under the securities laws. As a result, investments in CDOs may be characterized by the Fund as illiquid investments. However, an active dealer market may exist for CDOs that qualify under the Rule 144A “safe harbor” from the registration requirements of the Securities Act for resales of certain securities to qualified institutional buyers, and such CDOs may be characterized by the Fund as liquid securities. In addition to the normal risks associated with fixed income securities discussed elsewhere in the Prospectus (e.g., interest rate risk and default risk), CDOs carry additional risks including, but not limited to, the risk that: (i) distributions from collateral securities may not be adequate to make interest or other payments; (ii) the quality of the collateral may decline in value or default; (iii) the Fund may invest in CDOs that are subordinate to other classes; and (iv) the complex structure of the security may not be fully understood at the time of investment and may produce disputes with the issuer or unexpected investment results.

Appendix B

Financial Highlights

The financial highlights tables are intended to help you understand the Fund's financial performance for the past five years (or less if the Fund has been in operation for less than five years). Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have earned or lost on an investment in the Fund (assuming reinvestment of all dividends and distributions). The information for the Fund has been audited by PricewaterhouseCoopers LLP, whose report, along with the Fund's financial statements, is included in the Fund's Form N-CSR dated October 31, 2025.

Portfolio turnover rate ^(c)	68%	88%	62%	137%	94%

(a) Calculated based on the average shares outstanding methodology.

(b) Assumes investment at the NAV at the beginning of the year, reinvestment of all dividends and distributions, a complete redemption of the investment at the NAV at the end of the year and no sales or redemption charges (if any). Total returns would be reduced if a sales or redemption charge was taken into account. Returns do not reflect the impact of taxes to shareholders relating to Fund distributions or the redemption of Fund shares.

(c) The Fund's portfolio turnover rate is calculated in accordance with regulatory requirements, without regard to transactions involving short term investments. If such transactions were included, the Fund's portfolio turnover rate may be higher.

Appendix C

Additional Information About Sales Charge Variations, Waivers and Discounts

The availability of certain sales charge variations, waivers and discounts will depend on whether you purchase your shares directly from the Fund or through an Intermediary. Intermediaries may impose different sales charges and have unique policies and procedures regarding the availability of sales charge waivers and/or discounts (including based on account type), which differ from those described in the Prospectus and are disclosed below. All sales charges and sales charge variations, waivers and discounts available to investors, other than those set forth below, are described in the Prospectus. To the extent an Intermediary notifies the Investment Adviser or Distributor of its intention to impose sales charges or have sales charge waivers and/or discounts that differ from those described in the Prospectus, such information provided by that Intermediary will be disclosed in this Appendix.

In all instances, it is your responsibility to notify your Intermediary at the time of purchase of any relationship or other facts qualifying you for sales charge waivers or discounts. Please contact your Intermediary with questions regarding your eligibility for applicable sales charge variations, waivers and discounts or for additional information regarding your Intermediary's policies for implementing particular sales charge variations, waivers and discounts. For waivers and discounts not available through a particular Intermediary, shareholders will have to purchase shares directly from a Fund or through another Intermediary to receive these waivers or discounts.

In addition to different sales charge variations, waivers and discounts, Intermediaries may have different share class exchange privileges that vary from those described in the Prospectus. You should contact your Intermediary to understand the exchange privileges available to you. The information provided below for a particular Intermediary is reproduced based on information provided by that Intermediary. An Intermediary's administration and implementation of its particular policies with respect to any variations, waivers and/or discounts is neither supervised nor verified by the Fund, the Investment Adviser or the Distributor.

MERRILL LYNCH

Purchases or sales of front-end (i.e. Class A) or level-load (i.e., Class C) mutual fund shares through a Merrill platform or account will be eligible only for the following sales load waivers (front-end, contingent deferred, or back-end waivers) and discounts, which differ from those disclosed elsewhere in this Fund's prospectus. Purchasers will have to buy mutual fund shares directly from the mutual fund company or through another intermediary to be eligible for waivers or discounts not listed below.

It is the client's responsibility to notify Merrill at the time of purchase or sale of any relationship or other facts that qualify the transaction for a waiver or discount. A Merrill representative may ask for reasonable documentation of such facts and Merrill may condition the granting of a waiver or discount on the timely receipt of such documentation.

Additional information on waivers and discounts is available in the Merrill Sales Load Waiver and Discounts Supplement (the "Merrill SLWD Supplement") and in the Mutual Fund Investing at Merrill pamphlet at ml.com/funds (the referenced Merrill documents and website do not form a part of this prospectus). Clients are encouraged to review these documents and speak with their financial advisor to determine whether a transaction is eligible for a waiver or discount.

Front-end Load Waivers Available at Merrill

- Shares of mutual funds available for purchase by employer-sponsored retirement, deferred compensation, and employee benefit plans (including health savings accounts) and trusts used to fund those plans provided the shares are not held in a commission-based brokerage account and shares are held for the benefit of the plan. For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs, SAR-SEPs or Keogh plans
- Shares purchased through a Merrill investment advisory program
- Brokerage class shares exchanged from advisory class shares due to the holdings moving from a Merrill investment advisory program to a Merrill brokerage account
- Shares purchased through the Merrill Edge Self-Directed platform
- Shares purchased through the systematic reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same mutual fund in the same account
- Shares exchanged from level-load shares to front-end load shares of the same mutual fund in accordance with the description in the Merrill SLWD Supplement
- Shares purchased by eligible employees of Merrill or its affiliates and their family members who purchase shares in accounts within the employee's Merrill Household (as defined in the Merrill SLWD Supplement)
- Shares purchased by eligible persons associated with the fund as defined in this prospectus (e.g. the fund's officers or trustees)

- Shares purchased from the proceeds of a mutual fund redemption in front-end load shares provided (1) the repurchase is in a mutual fund within the same fund family; (2) the repurchase occurs within 90 calendar days from the redemption trade date, and (3) the redemption and purchase occur in the same account (known as Rights of Reinstatement). Automated transactions (i.e. systematic purchases and withdrawals) and purchases made after shares are automatically sold to pay Merrill's account maintenance fees are not eligible for Rights of Reinstatement

Contingent Deferred Sales Charge ("CDSC") Waivers on Front-end, Back-end, and Level Load Shares Available at Merrill

- Shares sold due to the client's death or disability (as defined by Internal Revenue Code Section 22e(3))
- Shares sold pursuant to a systematic withdrawal program subject to Merrill's maximum systematic withdrawal limits as described in the Merrill SLWD Supplement
- Shares sold due to return of excess contributions from an IRA account
- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the investor reaching the qualified age based on applicable IRS regulation
- Front-end or level-load shares held in commission-based, non-taxable retirement brokerage accounts (e.g. traditional, Roth, rollover, SEP IRAs, Simple IRAs, SAR-SEPs or Keogh plans) that are transferred to fee-based accounts or platforms and exchanged for a lower cost share class of the same mutual fund

Front-end Load Discounts Available at Merrill: Breakpoints, Rights of Accumulation & Letters of Intent

- Breakpoint discounts, as described in this prospectus, where the sales load is at or below the maximum sales load that Merrill permits to be assessed to a front-end load purchase, as described in the Merrill SLWD Supplement
- Rights of Accumulation (ROA), as described in the Merrill SLWD Supplement, which entitle clients to breakpoint discounts based on the aggregated holdings of mutual fund family assets held in accounts in their Merrill Household
- Letters of Intent (LOI), which allow for breakpoint discounts on eligible new purchases based on anticipated future eligible purchases within a fund family at Merrill, in accounts within your Merrill Household, as further described in the Merrill SLWD Supplement

AMERIPRISE FINANCIAL

Front-end sales charge reductions on Class A shares purchased through Ameriprise Financial

Shareholders purchasing Class A shares of the fund through an Ameriprise Financial platform or account are eligible only for the following sales charge reductions, which may differ from those disclosed elsewhere in this prospectus or the SAI. Such shareholders can reduce their initial sales charge on the purchase of Class A shares as follows:

- *Transaction size breakpoints*, as described in this prospectus or the SAI.
- *Rights of accumulation (ROA)*, as described in this prospectus or the SAI.
- *Letter of intent*, as described in this prospectus or the SAI.

Front-end sales charge waivers on Class A shares purchased through Ameriprise Financial

Shareholders purchasing Class A shares of the fund through an Ameriprise Financial platform or account are eligible only for the following sales charge waivers, which may differ from those disclosed elsewhere in this prospectus or the SAI. Such shareholders may purchase Class A shares at NAV without payment of a sales charge as follows:

- Shares purchased by employer-sponsored retirement plans (e.g., 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans). For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs or SAR-SEPs.
- Shares purchased through reinvestment of capital gains and dividend reinvestment when purchasing shares of the same fund (but not any other fund within the same fund family).
- Shares exchanged from Class C shares of the same fund in the month of or following the seven-year anniversary of the purchase date. To the extent that this prospectus elsewhere provides for a waiver with respect to such shares following a shorter holding period, that waiver will apply to exchanges following such shorter period. To the extent that this prospectus elsewhere provides for a waiver with respect to exchanges of Class C shares for load waived shares, that waiver will also apply to such exchanges.
- Shares purchased by employees and registered representatives of Ameriprise Financial or its affiliates and their immediate family members.
- Shares purchased by or through qualified accounts (including IRAs, Coverdell Education Savings Accounts, 401(k)s, 403(b) TSCAs subject to ERISA and defined benefit plans) that are held by a covered family member, defined as an Ameriprise Financial advisor and/or the advisor's spouse, advisor's lineal ascendant (mother, father, grandmother, grandfather, great grandmother, great grandfather), advisor's lineal descendant (son, step-son, daughter, step-daughter, grandson, granddaughter, great grandson, great granddaughter) or any spouse of a covered family member who is a lineal descendant.

- Shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (i.e. Rights of Reinstatement).

CDSC waivers on Class A and C shares purchased through Ameriprise Financial

Fund shares purchased through an Ameriprise Financial platform or account are eligible only for the following CDSC waivers, which may differ from those disclosed elsewhere in this prospectus or the SAI:

- Redemptions due to death or disability of the shareholder.
- Shares sold as part of a systematic withdrawal plan as described in this prospectus or the SAI.
- Redemptions made in connection with a return of excess contributions from an IRA account.
- Shares purchased through a Right of Reinstatement (as defined above).
- Redemptions made as part of a required minimum distribution for IRA and retirement accounts pursuant to the Internal Revenue Code.

MORGAN STANLEY WEALTH MANAGEMENT

Effective July 1, 2018, shareholders purchasing Fund shares through a Morgan Stanley Wealth Management transactional brokerage account will be eligible only for the following front-end sales charge waivers with respect to Class A Shares, which may differ from and may be more limited than those disclosed elsewhere in this Fund's Prospectus or SAI.

Front-End Sales Charge Waivers on Class A Shares Available at Morgan Stanley Wealth Management

- Employer-sponsored retirement plans (e.g., 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans). For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs, SAR-SEPs or Keogh plans
- Morgan Stanley employee and employee-related accounts according to Morgan Stanley's account linking rules
- Shares purchased through reinvestment of dividends and capital gains distributions when purchasing shares of the same fund
- Shares purchased through a Morgan Stanley self-directed brokerage account
- Class C (i.e., level-load) Shares that are no longer subject to a contingent deferred sales charge and are converted to Class A Shares of the same fund pursuant to Morgan Stanley Wealth Management's share class conversion program
- Shares purchased from the proceeds of redemptions within the same fund family, provided (i) the repurchase occurs within 90 days following the redemption, (ii) the redemption and purchase occur in the same account, and (iii) redeemed shares were subject to a front-end or deferred sales charge.

RAYMOND JAMES & ASSOCIATES, INC., RAYMOND JAMES FINANCIAL SERVICES, INC. AND EACH ENTITY'S AFFILIATES ("RAYMOND JAMES")

Effective March 1, 2019, shareholders purchasing Fund shares through a Raymond James platform or account, or through an introducing broker-dealer or independent registered investment adviser for which Raymond James provides trade execution, clearance, and/or custody services, will be eligible only for the following load waivers (front-end sales charge waivers and contingent deferred, or back-end, sales charge waivers) and discounts, which may differ from those disclosed elsewhere in this Fund's Prospectus or SAI.

Front-End Sales Load Waivers on Class A Shares Available at Raymond James

- Shares purchased in an investment advisory program.
- Shares purchased within the same fund family through a systematic reinvestment of capital gains and dividend distributions.
- Employees and registered representatives of Raymond James or its affiliates and their family members as designated by Raymond James.
- Shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (known as Rights of Reinstatement).
- A Shareholder in the Fund's Class C shares will have their shares converted at net asset value to Class A shares (or the appropriate share class) of the Fund if the shares are no longer subject to a CDSC and the conversion is in line with the policies and procedures of Raymond James.

CDSC Waivers on Class A and Class C Shares Available at Raymond James

- Death or disability of the shareholder.
- Shares sold as part of a systematic withdrawal plan as described in the Fund's Prospectus.
- Return of excess contributions from an IRA Account.

- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the shareholder reaching the qualified age based on applicable IRS regulations as described in the Fund's Prospectus.
- Shares sold to pay Raymond James fees but only if the transaction is initiated by Raymond James.
- Shares acquired through a Right of Reinstatement.

Front-End Load Discounts Available at Raymond James: Breakpoints, Rights of Accumulation, and/or Letters of Intent

- Breakpoints as described in this Prospectus.
- Rights of accumulation which entitle shareholders to breakpoint discounts will be automatically calculated based on the aggregated holding of fund family assets held by accounts within the purchaser's household at Raymond James. Eligible fund family assets not held at Raymond James may be included in the calculation of rights of accumulation only if the shareholder notifies his or her financial advisor about such assets.
- Letters of intent which allow for breakpoint discounts based on anticipated purchases within a fund family, over a 13-month time period. Eligible fund family assets not held at Raymond James may be included in the calculation of letters of intent only if the shareholder notifies his or her financial advisor about such assets.

JANNEY MONTGOMERY SCOTT LLC

Effective May 1, 2020, if you purchase Fund shares through a Janney Montgomery Scott LLC ("Janney") brokerage account, you will be eligible for the following load waivers (front-end sales charge waivers and contingent deferred sales charge ("CDSC"), or back-end sales charge, waivers) and discounts, which may differ from those disclosed elsewhere in the Fund's Prospectus or SAI.

Front-End Sales Charge* Waivers on Class A Shares Available at Janney

- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same fund (but not any other fund within the fund family).
- Shares purchased by employees and registered representatives of Janney or its affiliates and their family members as designated by Janney.
- Shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within ninety (90) days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (i.e., right of reinstatement).
- Employer-sponsored retirement plans (e.g., 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans). For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs, SAR-SEPs or Keogh plans.
- Shares acquired through a right of reinstatement.
- Class C Shares that are no longer subject to a contingent deferred sales charge and are converted to Class A Shares of the same fund pursuant to Janney's policies and procedures.

CDSC Waivers on Class A and C Shares Available at Janney

- Shares sold upon the death or disability of the shareholder.
- Shares sold as part of a systematic withdrawal plan as described in the Fund's Prospectus.
- Shares purchased in connection with a return of excess contributions from an IRA account.
- Shares sold as part of a required minimum distribution for IRA and other retirement accounts due to the shareholder reaching age 70½ as described in the Fund's Prospectus.
- Shares sold to pay Janney fees but only if the transaction is initiated by Janney.
- Shares acquired through a right of reinstatement.
- Shares exchanged into the same share class of a different fund.

Front-End Sales Charge* Discounts Available at Janney: Breakpoints, Rights of Accumulation, and/or Letters of Intent

- Breakpoints as described in the Fund's Prospectus.
- Rights of accumulation ("ROA"), which entitle shareholders to breakpoint discounts, will be automatically calculated based on the aggregated holding of fund family assets held by accounts within the purchaser's household at Janney. Eligible fund family assets not held at Janney may be included in the ROA calculation only if the shareholder notifies his or her financial advisor about such assets.
- Letters of intent which allow for breakpoint discounts based on anticipated purchases within a fund family, over a 13-month time period. Eligible fund family assets not held at Janney may be included in the calculation of letters of intent only if the shareholder notifies his or her financial advisor about such assets.

* Also referred to as an "initial sales charge."

Policies Regarding Transactions Through Edward Jones

The following information has been provided by Edward Jones:

Effective on or after August 16, 2024, the following information supersedes prior information with respect to transactions and positions held in fund shares through an Edward Jones system. Clients of Edward Jones (also referred to as "shareholders") purchasing fund shares on the Edward Jones commission and fee-based platforms are eligible only for the following sales charge discounts (also referred to as "breakpoints") and waivers, which can differ from discounts and waivers described elsewhere in the mutual fund prospectus or statement of additional information ("SAI") or through another broker-dealer. In all instances, it is the shareholder's responsibility to inform Edward Jones at the time of purchase of any relationship, holdings of Goldman Sachs Funds, or other facts qualifying the purchaser for discounts or waivers. Edward Jones can ask for documentation of such circumstance. Shareholders should contact Edward Jones if they have questions regarding their eligibility for these discounts and waivers.

Breakpoints

- Breakpoint pricing, otherwise known as volume pricing, at dollar thresholds as described in the prospectus.

Rights of Accumulation ("ROA")

- The applicable sales charge on a purchase of Class A shares is determined by taking into account all share classes (except certain money market funds and any assets held in group retirement plans) of Goldman Sachs Funds held by the shareholder or in an account grouped by Edward Jones with other accounts for the purpose of providing certain pricing considerations ("pricing groups"). If grouping assets as a shareholder, this includes all share classes held on the Edward Jones platform and/or held on another platform. The inclusion of eligible fund family assets in the ROA calculation is dependent on the shareholder notifying Edward Jones of such assets at the time of calculation. Money market funds are included only if such shares were sold with a sales charge at the time of purchase or acquired in exchange for shares purchased with a sales charge.
- The employer maintaining a SEP IRA plan and/or SIMPLE IRA plan may elect to establish or change ROA for the IRA accounts associated with the plan to a plan-level grouping as opposed to including all share classes at a shareholder or pricing group level.
- ROA is determined by calculating the higher of cost minus redemptions or market value (current shares x NAV).

Letter of Intent ("LOI")

- Through a LOI, shareholders can receive the sales charge and breakpoint discounts for purchases shareholders intend to make over a 13-month period from the date Edward Jones receives the LOI. The LOI is determined by calculating the higher of cost or market value of qualifying holdings at LOI initiation in combination with the value that the shareholder intends to buy over a 13-month period to calculate the front-end sales charge and any breakpoint discounts. Each purchase the shareholder makes during that 13-month period will receive the sales charge and breakpoint discount that applies to the total amount. The inclusion of eligible fund family assets in the LOI calculation is dependent on the shareholder notifying Edward Jones of such assets at the time of calculation. Purchases made before the LOI is received by Edward Jones are not adjusted under the LOI and will not reduce the sales charge previously paid. Sales charges will be adjusted if LOI is not met.
- If the employer maintaining a SEP IRA plan and/or SIMPLE IRA plan has elected to establish or change ROA for the IRA accounts associated with the plan to a plan-level grouping, LOIs will also be at the plan-level and may only be established by the employer.

Sales Charge Waivers

Sales charges are waived for the following shareholders and in the following situations:

- Associates of Edward Jones and its affiliates and other accounts in the same pricing group (as determined by Edward Jones under its policies and procedures) as the associate. This waiver will continue for the remainder of the associate's life if the associate retires from Edward Jones in good-standing and remains in good standing pursuant to Edward Jones' policies and procedures.
- Shares purchased in an Edward Jones fee-based program.
- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment.
- Shares purchased from the proceeds of redeemed shares of the same fund family so long as the following conditions are met: the proceeds are from the sale of shares within 60 days of the purchase, the sale and purchase are made from a share class that charges a front load and one of the following ("Right of Reinstatement"):
 - The redemption and repurchase occur in the same account.
 - The redemption proceeds are used to process an: IRA contribution, excess contributions, conversion, recharacterizing of contributions, or distribution, and the repurchase is done in an account within the same Edward Jones grouping for ROA.

- The Right of Reinstatement excludes systematic or automatic transactions including, but not limited to, purchases made through payroll deductions, liquidations to cover account fees, and reinvestments from non-mutual fund products.
- Shares exchanged into Class A shares from another share class so long as the exchange is into the same fund and was initiated at the discretion of Edward Jones. Edward Jones is responsible for any remaining CDSC due to the fund company, if applicable. Any future purchases are subject to the applicable sales charge as disclosed in the prospectus.
- Exchanges from Class C shares to Class A shares of the same fund, generally, in the 84th month following the anniversary of the purchase date or earlier at the discretion of Edward Jones.

Contingent Deferred Sales Charge (“CDSC”) Waivers

If the shareholder purchases shares that are subject to a CDSC and those shares are redeemed before the CDSC is expired, the shareholder is responsible to pay the CDSC except in the following conditions:

- The death or disability of the shareholder.
- Systematic withdrawals with up to 10% per year of the account value.
- Return of excess contributions from an Individual Retirement Account (IRA).
- Shares redeemed as part of a required minimum distribution for IRA and retirement accounts if the redemption is taken in or after the year the shareholder reaches qualified age based on applicable IRS regulations.
- Shares redeemed to pay Edward Jones fees or costs in such cases where the transaction is initiated by Edward Jones.
- Shares exchanged in an Edward Jones fee-based program.
- Shares acquired through NAV reinstatement.
- Shares redeemed at the discretion of Edward Jones for Minimum Balances, as described below.

Other Important Information Regarding Transactions Through Edward Jones

Minimum Purchase Amounts

- Initial purchase minimum: \$250
- Subsequent purchase minimum: none

Minimum Balances

- Edward Jones has the right to redeem at its discretion fund holdings with a balance of \$250 or less. The following are examples of accounts that are not included in this policy:
 - A fee-based account held on an Edward Jones platform
 - A 529 account held on an Edward Jones platform
 - An account with an active systematic investment plan or LOI

Exchanging Share Classes

- At any time it deems necessary, Edward Jones has the authority to exchange at NAV a shareholder’s holdings in a fund to Class A shares of the same fund.

OPPENHEIMER & CO. INC.

Effective May 1, 2020, shareholders purchasing Fund shares through an Oppenheimer & Co. Inc. (“OPCO”) platform or account are eligible only for the following load waivers (front-end sales charge waivers and contingent deferred, or back-end, sales charge waivers) and discounts, which may differ from those disclosed elsewhere in this Fund’s prospectus or SAI.

Front-end Sales Load Waivers on Class A Shares available at OPCO

- Employer-sponsored retirement, deferred compensation and employee benefit plans (including health savings accounts) and trusts used to fund those plans, provided that the shares are not held in a commission-based brokerage account and shares are held for the benefit of the plan
- Shares purchased by or through a 529 Plan
- Shares purchased through a OPCO affiliated investment advisory program
- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same fund (but not any other fund within the fund family)
- Shares purchased from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same account, and (3) redeemed shares were subject to a front-end or deferred sales load (known as Rights of Restatement).
- A shareholder in the Fund’s Class C shares will have their shares converted at net asset value to Class A shares (or the appropriate share class) of the Fund if the shares are no longer subject to a CDSC and the conversion is in line with the policies and procedures of OPCO

- Employees and registered representatives of OPCO or its affiliates and their family members
- Directors or Trustees of the Fund, and employees of the Fund's investment adviser or any of its affiliates, as described in this prospectus

CDSC Waivers on Class A and C Shares available at OPCO

- Death or disability of the shareholder
- Shares sold as part of a systematic withdrawal plan as described in the Fund's prospectus
- Return of excess contributions from an IRA Account
- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the shareholder reaching the qualified age based on applicable IRS regulations as described in the prospectus
- Shares sold to pay OPCO fees but only if the transaction is initiated by OPCO
- Shares acquired through a right of reinstatement

Front-end load Discounts Available at OPCO: Breakpoints, Rights of Accumulation & Letters of Intent

- Breakpoints as described in this prospectus.
- Rights of Accumulation (ROA) which entitle shareholders to breakpoint discounts will be automatically calculated based on the aggregated holding of fund family assets held by accounts within the purchaser's household at OPCO. Eligible fund family assets not held at OPCO may be included in the ROA calculation only if the shareholder notifies his or her financial advisor about such assets.

ROBERT W. BAIRD & CO. ("BAIRD")

Effective June 15, 2020, shareholders purchasing Fund shares through a Baird platform or account will only be eligible for the following sales charge waivers (front-end sales charge waivers and CDSC waivers) and discounts, which may differ from those disclosed elsewhere in this prospectus or the SAI

Front-End Sales Charge Waivers on Class A Shares Available at Baird

- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing share of the same fund
- Share purchase by employees and registers representatives of Baird or its affiliate and their family members as designated by Baird
- Shares purchase from the proceeds of redemptions within the same fund family, provided (1) the repurchase occurs within 90 days following the redemption, (2) the redemption and purchase occur in the same accounts, and (3) redeemed shares were subject to a front-end or deferred sales charge (known as rights of reinstatement)
- A shareholder in the Fund's Class C shares will have their shares converted at net asset value to Class A shares of the fund if the shares are no longer subject to CDSC and the conversion is in line with the policies and procedures of Baird
- Employer-sponsored retirement plans or charitable accounts in a transactional brokerage account at Baird, including 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans. For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, Simple IRAs or SAR-SEPs

CDSC Waivers on Class A and C Shares Available at Baird

- Shares sold due to death or disability of the shareholder
- Shares sold as part of a systematic withdrawal plan as described in the Fund's Prospectus
- Shares bought due to returns of excess contributions from an IRA Account
- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the shareholder reaching age 72 as described in the Fund's prospectus
- Shares sold to pay Baird fees but only if the transaction is initiated by Baird
- Shares acquired through a right of reinstatement

Front-End Sales Charge Discounts Available at Baird: Breakpoints and/or Rights of Accumulations

- Breakpoints as described in this prospectus
- Rights of accumulations which entitles shareholders to breakpoint discounts will be automatically calculated based on the aggregated holding of fund family assets held by accounts within the purchaser's household at Baird. Eligible fund family assets not held at Baird may be included in the rights of accumulations calculation only if the shareholder notifies his or her financial advisor about such assets
- Letters of Intent (LOI) allow for breakpoint discounts based on anticipated purchases within a fund family through Baird, over a 13-month period of time

J.P. MORGAN SECURITIES LLC

- Effective September 29, 2023, if you purchase or hold fund shares through an applicable J.P. Morgan Securities LLC brokerage account, you will be eligible for the following sales charge waivers (front-end sales charge waivers and contingent deferred sales charge (“CDSC”), or back-end sales charge, waivers), share class conversion policy and discounts, which may differ from those disclosed elsewhere in this fund’s prospectus or Statement of Additional Information.

Front-end sales charge waivers on Class A shares available at J.P. Morgan Securities LLC

- Shares exchanged from Class C (i.e. level-load) shares that are no longer subject to a CDSC and are exchanged into Class A shares of the same fund pursuant to J.P. Morgan Securities LLC’s share class exchange policy.
- Qualified employer-sponsored defined contribution and defined benefit retirement plans, nonqualified deferred compensation plans, other employee benefit plans and trusts used to fund those plans. For purposes of this provision, such plans do not include SEP IRAs, SIMPLE IRAs, SAR-SEPs or 501(c)(3) accounts.
- Shares of funds purchased through J.P. Morgan Securities LLC Self-Directed Investing accounts.
- Shares purchased through rights of reinstatement.
- Shares purchased through reinvestment of capital gains distributions and dividend reinvestment when purchasing shares of the same fund (but not any other fund within the fund family).
- Shares purchased by employees and registered representatives of J.P. Morgan Securities LLC or its affiliates and their spouse or financial dependent as defined by J.P. Morgan Securities LLC.

Class C to Class A share conversion

- A shareholder in the fund’s Class C shares will have their shares converted to Class A shares (or the appropriate share class) of the same fund if the shares are no longer subject to a CDSC and the conversion is consistent with J.P. Morgan Securities LLC’s policies and procedures.

CDSC waivers on Class A and C shares available at J.P. Morgan Securities LLC

- Shares sold upon the death or disability of the shareholder.
- Shares sold as part of a systematic withdrawal plan as described in the fund’s prospectus.
- Shares purchased in connection with a return of excess contributions from an IRA account.
- Shares sold as part of a required minimum distribution for IRA and retirement accounts pursuant to the Internal Revenue Code.
- Shares acquired through a right of reinstatement.

Front-end load discounts available at J.P. Morgan Securities LLC: breakpoints, rights of accumulation & letters of intent

- Breakpoints as described in the prospectus.
- Rights of Accumulation (“ROA”) which entitle shareholders to breakpoint discounts as described in the fund’s prospectus will be automatically calculated based on the aggregated holding of fund family assets held by accounts within the purchaser’s household at J.P. Morgan Securities LLC. Eligible fund family assets not held at J.P. Morgan Securities LLC (including 529 program holdings, where applicable) may be included in the ROA calculation only if the shareholder notifies their financial advisor about such assets.
- Letters of Intent (“LOI”) which allow for breakpoint discounts based on anticipated purchases within a fund family, through J.P. Morgan Securities LLC, over a 13-month period of time (if applicable).

STIFEL, NICOLAUS & COMPANY, INC. (“STIFEL”)

Effective March 30, 2025, shareholders purchasing or holding Fund shares, including existing fund shareholders, through a Stifel or affiliated platform that provides trade execution, clearance, and/or custody services, will be eligible for the following sales charge load waivers (including front-end sales charge waivers and contingent deferred, or back-end, (CDSC) sales charge waivers) and discounts, which may differ from those disclosed elsewhere in this prospectus or the Fund’s SAI.

CLASS A SHARES

As described elsewhere in this prospectus, Stifel may receive compensation out of the front-end sales charge if you purchase Class A shares through Stifel.

Rights of accumulation

Rights of accumulation (ROA) that entitle shareholders to breakpoint discounts on front-end sales charges will be calculated by Stifel based on the aggregated holding of eligible assets in the Fund held by accounts within the purchaser’s household at Stifel. Ineligible assets include Class A Shares of the Goldman Sachs Money Market Funds not assessed a sales charge. Fund assets not held at Stifel may be included in the calculation of ROA only if the shareholder notifies his or her financial advisor about such assets.

The employer maintaining a SEP IRA plan and/or SIMPLE IRA plan may elect to establish or change ROA for the IRA accounts associated with the plan to a plan-level grouping as opposed to including all share classes at a shareholder or pricing group level.

Front-end sales charge waivers on Class A shares available at Stifel

- Class C shares that have been held for more than seven (7) years may be converted to Class A shares or other front-end share class(es) of the same fund pursuant to Stifel's policies and procedures. To the extent that this prospectus elsewhere provides for a waiver with respect to the exchange or conversion of such shares following a shorter holding period, those provisions shall continue to apply.
- Shares purchased by employees and registered representatives of Stifel or its affiliates and their family members as designated by Stifel.
- Shares purchased in a Stifel fee-based advisory program, often referred to as a "wrap" program.
- Shares purchased through reinvestment of capital gains, distributions and dividend reinvestment when purchasing shares of the same or other fund within the fund family.
- Shares purchased from the proceeds of redeemed shares of the fund family so long as the proceeds are from the sale of shares from an account with the same owner/beneficiary within 90 days of the purchase. For the absence of doubt, automated transactions (i.e. systematic purchases, including salary deferral transactions and withdrawals) and purchases made after shares are sold to cover Stifel Nicolaus' account maintenance fees are not eligible for rights of reinstatement.
- Shares from rollovers into Stifel from retirement plans to IRAs.
- Shares exchanged into Class A shares from another share class so long as the exchange is into the same fund and was initiated at the direction of Stifel. Stifel is responsible for any remaining CDSC due to the fund company, if applicable. Any future purchases are subject to the applicable sales charge as disclosed in this prospectus.
- Employer-sponsored retirement plans (e.g., 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans). For purposes of this provision, employer sponsored retirement plans do not include SEP IRAs, Simple IRAs or SAR-SEPs.
- Charitable organizations and foundations, notably 501(c)(3) organizations.

Contingent Deferred Sales Charges Waivers on Class A and C Shares

- Death or disability of the shareholder.
- Shares sold as part of a systematic withdrawal plan not to exceed 12% annually.
- Return of excess contributions from an IRA Account.
- Shares sold as part of a required minimum distribution for IRA and retirement accounts due to the shareholder reaching the qualified age based on applicable IRS regulations.
- Shares acquired through a right of reinstatement.
- Shares sold to pay Stifel fees or costs in such cases where the transaction is initiated by Stifel.
- Shares exchanged or sold in a Stifel fee-based program.

Share Class Conversions in Advisory Accounts

- Stifel continually looks to provide our clients with the lowest cost share class available based on account type. Stifel reserves the right to convert shares to the lowest cost share class available at Stifel upon transfer of shares into an advisory program.

WELLS FARGO CLEARING SERVICES, LLC AND WELLS FARGO ADVISORS FINANCIAL NETWORK, LLC (COLLECTIVELY, "WELLS FARGO ADVISORS")

Wells Fargo Clearing Services, LLC operates a First Clearing business, but these rules are not intended to include First Clearing firms.

Effective April 1, 2026, Clients of Wells Fargo Advisors purchasing fund shares through Wells Fargo Advisors are eligible for the following sales charge discounts (also referred to as "breakpoints") and waivers, which can differ from discounts and waivers described elsewhere in the prospectus or statement of additional information ("SAI"). In all instances, it is the investor's responsibility to inform Wells Fargo Advisors at the time of purchase of any relationship, holdings, or other facts qualifying the investor for discounts or waivers. Wells Fargo Advisors can ask for documentation supporting the qualification.

Wells Fargo Advisors Class A shares front-end sales charge waivers information

Wells Fargo Advisors clients purchasing or converting to Class A shares of the fund in a Wells Fargo Advisors brokerage account are entitled to a waiver of the front-end load in the following circumstances:

- Wells Fargo Advisors employee and employee-related accounts according to Wells Fargo Advisor's employee account linking rules. Legacy accounts and positions receiving affiliate discounts prior to the effective date will continue to receive discounts. Going forward employees of affiliate businesses will not be offered NAV.

- Shares purchased through reinvestment of dividends and capital gains distributions when purchasing shares of the same fund.

WellsTrade, the firm's online self-directed brokerage account, generally offers no-load share classes but there could be instances where a Class A share is offered without a front-end sales charge.

Wells Fargo Advisors Contingent Deferred Sales Charge information

- Contingent deferred sales charges (CDSC) imposed on fund redemptions will not be rebated based on future purchases.

Wells Fargo Advisors Class A front-end load discounts

Wells Fargo Advisors Clients purchasing Class A shares of the fund through Wells Fargo Advisors brokerage accounts will follow the following aggregation rules for breakpoint discounts:

- Effective April 1, 2026, SEP or SIMPLE IRAs will not be aggregated as a group plan. They will aggregate with the client's personal accounts based on Social Security Number. Previously established SEP and SIMPLE IRAs may still be aggregated as a group plan.
- Effective April 1, 2026, Employer-sponsored retirement plan (e.g., 401(k) plans, 457 plans, employer-sponsored 403(b) plans, profit sharing and money purchase pension plans and defined benefit plans) accounts will aggregate with other plan accounts under the same Tax ID and will not be aggregated with other retirement plan accounts under a different Tax ID or personal accounts. For purposes of this provision, employer-sponsored retirement plans do not include SEP IRAs, SIMPLE IRAs, SAR-SEPs or Keogh plans.
- Gift of shares will not be considered when determining breakpoint discounts.
