

GOLDMAN SACHS VARIABLE INSURANCE TRUST

Institutional and Service Shares of the

Goldman Sachs U.S. Equity Insights Fund
(the “Fund”)

*Supplement dated February 13, 2026 to the
Prospectuses, Summary Prospectuses and Statement of Additional Information (“SAI”), dated April 30, 2025, as
supplemented to date*

The Board of Trustees of Goldman Sachs Variable Insurance Trust (the “Board”) recently approved a change to the Fund’s sub-classification under the Investment Company Act of 1940 from “diversified” to “non-diversified” and the elimination of any related fundamental investment restrictions.

These changes are subject to approval by the shareholders of the Fund at a meeting that will be held on or about June 12, 2026 (the “Meeting”). Changing the Fund’s status to “non-diversified” would provide Goldman Sachs Asset Management, L.P., the Fund’s investment adviser, with enhanced flexibility to invest a greater portion of the Fund’s assets in individual issuers. Market appreciation among issuers in certain industry segments has expanded their market capitalizations, increasing their weightings in major stock benchmarks. Given the weightings of the largest holdings in the Fund’s benchmark and the appreciation of the Fund’s largest holdings, the portfolio managers of the Fund believe that it is important to have flexibility to continue to invest in these holdings, and that they will be better able to execute the Fund’s investment strategy and other policies with this additional flexibility. If approved by shareholders of the Fund at the Meeting, the Fund, as a non-diversified fund, would be more susceptible to adverse developments affecting any single issuer held in its portfolio to the extent that the Fund accumulates a larger position in that issuer, and would be more susceptible to greater losses because of these developments.

Prior to the Meeting, shareholders of the Fund entitled to vote at the Meeting will receive a proxy statement that will contain additional information about the Fund’s diversification status and fundamental restrictions.

This supplement should be retained with your Prospectuses, Summary Prospectuses and SAI for future reference.

Goldman Sachs U.S. Equity Insights Fund—Summary

INVESTMENT OBJECTIVE

The Goldman Sachs U.S. Equity Insights Fund (the “Fund”) seeks long-term growth of capital and dividend income.

FEES AND EXPENSES OF THE FUND

This table describes the fees and expenses that you may pay if you buy, hold and sell Service Shares of the Fund. This table does not reflect the fees and expenses associated with any variable annuity contract or variable life insurance policy that uses the Fund as an investment option. Had those fees and expenses been included, overall fees and expenses would be higher.

Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

Management Fees	0.62%
Distribution and Service (12b-1) Fees	0.25%
Other Expenses	0.08%
Total Annual Fund Operating Expenses	0.95%
Fee Waiver and Expense Limitation ¹	(0.18)%
Total Annual Fund Operating Expenses After Fee Waiver and Expense Limitation	0.77%

¹ The Investment Adviser has agreed to (i) waive a portion of its management fee in order to achieve an effective net management fee rate of 0.54% of the Fund’s average daily net assets, and (ii) reduce or limit “Other Expenses” (excluding acquired fund fees and expenses, transfer agency fees and expenses, taxes, interest, brokerage fees, expenses of shareholder meetings, litigation and indemnification, and extraordinary expenses) equal on an annualized basis to 0.004% of the Fund’s average daily net assets. These arrangements will remain in effect through at least April 30, 2026, and prior to such date, the Investment Adviser may not terminate the arrangements without the approval of the Board of Trustees. In addition, Goldman Sachs & Co. LLC (“Goldman Sachs”) has agreed to waive distribution and service fees so as not to exceed an annual rate of 0.21% of the Fund’s average daily net assets attributable to Service Shares through at least April 30, 2026, and prior to such date Goldman Sachs may not terminate the arrangement without the approval of the Board of Trustees.

EXPENSE EXAMPLE

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. This Example does not reflect the fees and expenses associated with any variable annuity contract or variable life insurance policy that uses the Fund as an investment option. Had those fees and expenses been included, the costs shown below would be higher. The Example assumes that you invest \$10,000 in Service Shares of the Fund for the time periods indicated and then redeem all of your Service Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same (except that the Example incorporates any applicable fee waiver and/or expense limitation arrangements for only the first year). Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	1 Year	3 Years	5 Years	10 Years
Service Shares	\$79	\$285	\$508	\$1,150

PORTFOLIO TURNOVER

The Fund pays transaction costs when it buys and sells securities or instruments (i.e., “turns over” its portfolio). A high rate of portfolio turnover may result in increased transaction costs, including brokerage commissions, which must be borne by the Fund and its shareholders. These costs are not reflected in the annual fund operating expenses or in the expense example above, but are reflected in the Fund’s performance. The Fund’s portfolio turnover rate for the fiscal year ended December 31, 2024 was 204% of the average value of its portfolio.

PRINCIPAL STRATEGY

The Fund invests, under normal circumstances, at least 80% of its net assets plus any borrowings for investment purposes (measured at time of purchase) (“Net Assets”) in a diversified portfolio of equity investments in U.S. issuers. The Fund seeks broad representation of large-cap and blue chip equity investments representing all major sectors of the U.S. economy.

The Fund uses a quantitative style of management, in combination with a qualitative overlay, that emphasizes fundamentally-based stock selection, careful portfolio construction and efficient implementation. The Fund’s investments are selected using fundamental research and a variety of quantitative techniques based on certain investment themes, including, among others, Fundamental Mispricings, High Quality Business Models, Sentiment Analysis and Market Themes & Trends. Fundamental Mispricings seeks to identify high-quality businesses trading at a fair price, which the Investment Adviser believes leads to strong performance over the long-run.

High Quality Business Models seeks to identify companies that are generating high-quality revenues with sustainable business models and aligned management incentives. Sentiment Analysis seeks to identify stocks experiencing improvements in their overall market sentiment. Market Themes and Trends seeks to identify companies positively positioned to benefit from themes and trends in the market and macroeconomic environment. As a part of the Investment Adviser’s investment selection process, the Investment Adviser utilizes proprietary models that assess a wide range of indicators, which may include certain environmental, social and governance (“ESG”) indicators. No one indicator, risk or consideration is determinative in the investment selection process. The Fund may make investment decisions that deviate from those generated by the Investment Adviser’s proprietary models, at the discretion of the Investment Adviser. In addition, the Investment Adviser may, in its discretion, make changes to its quantitative techniques, or use other quantitative techniques that are based on the Investment Adviser’s proprietary research.

The Fund may also invest in fixed income securities that are considered to be cash equivalents.

The Investment Adviser measures the Fund’s performance against the S&P 500[®] Index.

PRINCIPAL RISKS OF THE FUND

Loss of money is a risk of investing in the Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the Federal Deposit Insurance Corporation (“FDIC”) or any government agency. The Fund should not be relied upon as a complete investment program. There can be no assurance that the Fund will achieve its investment objective. Investments in the Fund involve substantial risks which prospective investors should consider carefully before investing. The Fund’s principal risks are presented below in alphabetical order, and not in the order of importance or potential exposure.

Investment Style Risk. Different investment styles (e.g., “growth”, “value” or “quantitative”) tend to shift in and out of favor depending upon market and economic conditions and investor sentiment. The Fund may outperform or underperform other funds that invest in similar asset classes but employ different investment styles.

Large Shareholder Transactions Risk. The Fund may experience adverse effects when certain large shareholders purchase or redeem large amounts of shares of the Fund. Such large shareholder redemptions, which may occur rapidly or unexpectedly, may cause the Fund to sell portfolio securities at times when it would not otherwise do so, which may negatively impact the Fund’s net asset value (“NAV”) and liquidity. Similarly, large Fund share purchases may adversely affect the Fund’s performance to the extent that the Fund is delayed in investing new cash or otherwise maintains a larger cash position than it ordinarily would. These transactions may also increase transaction costs. In addition, a large redemption could result in the Fund’s current expenses being allocated over a smaller asset base, leading to an increase in the Fund’s expense ratio.

Management Risk. A strategy used by the Investment Adviser may fail to produce the intended results. The Investment Adviser attempts to execute a complex strategy for the Fund using proprietary quantitative models. Investments selected using these models may perform differently than expected as a result of the factors used in the models, the weight placed on each factor, changes from the factors’ historical trends, and technical and other issues in the construction, implementation and maintenance of the models (including, for example, data problems, unauthorized changes and/or software issues). There is no guarantee that the Investment Adviser’s use of these quantitative models will result in effective investment decisions for the Fund. Additionally, commonality of holdings across quantitative money managers may amplify losses.

Market Risk. The value of the securities in which the Fund invests may go up or down in response to the prospects of individual companies, particular sectors, governments or countries and/or general economic conditions throughout the world due to increasingly interconnected global economies and financial markets. Events such as war, military conflict, geopolitical disputes, acts of terrorism, social or political unrest, natural disasters, recessions, inflation, rapid interest rate changes, supply chain disruptions, tariffs and other restrictions on trade, sanctions or the spread of infectious illness or other public health threats, or the threat or potential of one or more such events and developments, could also significantly impact the Fund and its investments.

Portfolio Turnover Rate Risk. A high rate of portfolio turnover involves correspondingly greater expenses which must be borne by the Fund and its shareholders.

Stock Risk. Stock prices have historically risen and fallen in periodic cycles. U.S. and foreign stock markets have experienced periods of substantial price volatility in the past and may do so again in the future.

Tax Diversification Risk. The Fund intends to meet the diversification requirements that are applicable to insurance company separate accounts under Subchapter L of the Internal Revenue Code of 1986, as amended (the “Code”) (the “Diversification Requirements”). In order for the Fund to qualify for “look through” treatment under the Diversification Requirements, Fund shares must be sold only to persons permitted to hold shares, directly or indirectly (each, a “Permitted Investor”), under Section 817 of the Code and Treasury Regulation 1.817-5(f), as supplemented by published rulings and procedures issued thereunder by the Internal Revenue Service (“IRS”). To the extent an investor in Fund shares no longer qualifies as a Permitted Investor, and such investor fails to restore its status as a Permitted Investor or obtain a waiver or closing agreement with respect to such failure from the IRS, the Fund may no longer qualify for “look through” treatment. Therefore, in testing compliance with the Diversification Requirements, an investor in the Fund, such as, for example, an insurance company separate account, no longer would be able to look through the Fund to its underlying investments. Instead, the Fund would be considered a single investment for purposes of the Diversification Requirements.

A failure to satisfy the Diversification Requirements (whether resulting from investors in Fund shares or otherwise) could have significant adverse tax consequences for variable contract owners whose contract values are determined by investment in the Fund. See “Taxation” in the Statement of Additional Information (the “SAI”) for more information.

PERFORMANCE

The bar chart and table below provide an indication of the risks of investing in the Fund by showing: (a) changes in the performance of the Fund’s Service Shares from year to year; and (b) how the average annual total returns of the Fund’s Service Shares compare to those of a broad-based securities market index. The Fund’s past performance is not necessarily an indication of how the Fund will perform in the future. Performance reflects applicable fee waivers and/or expense limitations in effect during the periods shown. In addition, performance reflects Fund level expenses but does not reflect the fees and expenses associated with any variable annuity contract or variable life insurance policy that uses the Fund as an investment option for any contract or policy. Had performance reflected all of those fees and expenses, performance would have been reduced. Updated performance information is available at no cost at am.gs.com or by calling the phone number on the back cover of the Prospectus.

CALENDAR YEAR

During the periods shown in the chart above:	Returns	Quarter ended
Best Quarter Return	22.57%	June 30, 2020
Worst Quarter Return	-19.68%	March 31, 2020

AVERAGE ANNUAL TOTAL RETURN

For the period ended December 31, 2024	1 Year	5 Years	10 Years	Inception Date
Service Shares	27.92%	13.91%	11.82%	1/9/2006
S&P 500® Index	24.94%	14.51%	13.09%	

Benchmark returns do not reflect any deductions for fees or expenses.

PORTFOLIO MANAGEMENT

Goldman Sachs Asset Management, L.P. is the investment adviser for the Fund (the “Investment Adviser” or “GSAM”).

Portfolio Managers: Len Ioffe, CFA, Managing Director and Senior Portfolio Manager, has managed the Fund since 2011; Osman Ali, CFA, Managing Director and Senior Portfolio Manager, has managed the Fund since 2012; Dennis Walsh, Managing Director and Senior Portfolio Manager, has managed the Fund since 2013; Takashi Suwabe, Managing Director and Senior Portfolio Manager, has managed the Fund since 2021; and Sharanya Srinivasan, Managing Director and Senior Portfolio Manager, has managed the Fund since 2024.

BUYING AND SELLING FUND SHARES

Fund shares are not sold directly to the public. Fund shares may be purchased and redeemed by separate accounts that fund variable annuity and variable life insurance contracts issued by participating insurance companies and other qualified purchasers. Orders received from separate accounts and other qualified purchasers to purchase or redeem Fund shares are effected on business days. Individual investors may purchase or redeem Fund shares indirectly through variable annuity contracts and variable life insurance policies offered through the separate accounts.

TAX INFORMATION

Provided that the Fund and separate accounts investing in the Fund satisfy applicable tax requirements, the Fund will not be subject to federal tax. Special tax rules apply to life insurance companies, variable annuity contracts and variable life insurance contracts. For information on federal income taxation of owners of variable annuity or variable life insurance contracts, see the prospectus for the applicable contract.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

The Fund and/or its related companies may pay participating insurance companies and securities dealers for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the insurance company and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your insurance company's website for more information.

Investment Management Approach

INVESTMENT OBJECTIVE

The Fund seeks long-term growth of capital and dividend income. The Fund's investment objective may be changed without shareholder approval upon 60 days' notice.

PRINCIPAL INVESTMENT STRATEGIES

The Fund seeks to achieve long-term growth of capital and dividend income through a broadly diversified portfolio of large-cap and blue chip equity investments representing all major sectors of the U.S. economy. The Fund invests, under normal circumstances, at least 80% of its Net Assets in a diversified portfolio of equity investments in U.S. issuers. Shareholders will be provided with sixty days' notice in the manner prescribed by the Securities and Exchange Commission ("SEC") before any change in the Fund's policy to invest at least 80% of its Net Assets in the particular type of investment suggested by its name.

A U.S. issuer is an issuer economically tied to the United States. In determining whether an issuer is economically tied to the United States, the Investment Adviser will consider whether the issuer:

- Has a class of securities whose principal securities market is in the United States;
- Has its principal office in the United States;
- Derives 50% or more of its total revenue or profit from goods produced, sales made or services provided in the United States;
- Maintains 50% or more of its assets in the United States; or
- Is otherwise determined to be economically tied to the United States by the Investment Adviser in its discretion. For example, the Investment Adviser may use the classifications assigned by third parties, including an issuer's "country of risk" as determined by Bloomberg or the classifications assigned to an issuer by the Fund's benchmark index provider. These classifications are generally based on a number of criteria, including an issuer's country of domicile, the primary stock exchange on which an issuer's securities trade, the location from which the majority of an issuer's revenue is derived, and an issuer's reporting currency. Although the Investment Adviser may rely on these classifications, it is not required to do so.

As discussed below under "GSAM Quantitative Team's Investment Philosophy," the Fund uses a quantitative style of management, in combination with a qualitative overlay, that emphasizes fundamentally-based stock selection, careful portfolio construction and efficient implementation. The Fund's investments are selected using fundamental research and a variety of quantitative techniques based on certain investment themes, including, among others, Fundamental Mispricings, High Quality Business Models, Sentiment Analysis and Market Themes & Trends.

The Fund may also invest in fixed income securities that are considered to be cash equivalents.

The Investment Adviser measures the Fund's performance against the S&P 500[®] Index. The S&P 500[®] Index is an unmanaged index of the prices of 500 large-cap stocks designed to reflect a broad representation of the U.S. economy.

The Fund's investments in derivatives, other investment companies, including ETFs, and other instruments are counted towards the Fund's 80% investment policy to the extent they have economic characteristics similar to the investments included within that policy. The Fund may, from time to time, take temporary defensive positions that are inconsistent with the Fund's principal investment strategies in attempting to respond to adverse market, political or other conditions. For temporary defensive purposes, the Fund may invest a certain percentage of its total assets in securities issued or guaranteed by the U.S. government, its agencies, instrumentalities or sponsored enterprises ("U.S. Government Securities"), commercial paper rated at least A-2 by S&P Global Ratings ("S&P"), P-2 by Moody's Investors Service, Inc. ("Moody's") or having a comparable credit rating by another nationally recognized statistical rating organization ("NRSRO") (or, if unrated, determined by the Investment Adviser to be of comparable credit quality), certificates of deposit, bankers' acceptances, repurchase agreements, non-convertible preferred stocks and non-convertible corporate bonds with a remaining maturity of less than one year, exchange-traded funds ("ETFs") and other investment companies and cash items. **When the Fund's assets are invested in such instruments, the Fund may not be achieving its investment objective.**

GSAM Quantitative Team's Investment Philosophy:

GSAM's quantitative style of fund management emphasizes the three building blocks of active management: **fundamentally-based stock selection, careful portfolio construction and efficient implementation.**

Step 1: Stock Selection

The Investment Adviser attempts to forecast expected returns on approximately 15,000 stocks on a daily basis using proprietary models developed by the Quantitative Investment Strategies (“QIS”) team. These models are based on certain investment themes including, among others, Fundamental Mispricings, High Quality Business Models, Sentiment Analysis and Market Themes & Trends. Within these models, the Investment Adviser may utilize artificial intelligence techniques, such as natural language processing and machine learning, to, among other things, help extract information from various textual or audio datasets. **Fundamental Mispricings** seeks to identify high-quality businesses trading at a fair price, which the Investment Adviser believes leads to strong performance over the long-run. **High Quality Business Models** seeks to identify companies that are generating high-quality revenues with sustainable business models and aligned management incentives. **Sentiment Analysis** seeks to identify stocks experiencing improvements in their overall market sentiment. **Market Themes and Trends** seeks to identify companies positively positioned to benefit from themes and trends in the market and macroeconomic environment.

As a part of the Investment Adviser’s stock selection process, the Investment Adviser utilizes proprietary models that assess a wide range of indicators, which may include certain environmental, social and governance (“ESG”) indicators. The Investment Adviser in its sole discretion may periodically update the indicators used in the investment decision-making process of the Fund.

The indicators applied by the Investment Adviser that are deemed to be representative of ESG considerations are assessed in reliance on one or a number of third-party ESG vendors. The Investment Adviser, in its sole discretion, retains the right not to use data provided by third-party vendors where it deems the data to be not representative of a company’s current business operations.

For additional information regarding the investment themes that the Investment Adviser may employ from time to time, please consult the Fund’s Statement of Additional Information (“SAI”).

Step 2: Portfolio Construction

The Investment Adviser then seeks to manage risk by maintaining characteristics such as size to be similar to those of the applicable benchmark and by limiting the size of individual stock positions. The Investment Adviser also seeks to maximize expected excess returns by overweighting stocks with positive characteristics identified in the return models and underweighting stocks with negative characteristics relative to their benchmark weights. The Investment Adviser uses a **computer optimizer** to evaluate many different security combinations (and consider many possible weightings) in an effort **to construct the most efficient portfolio** given the Fund’s benchmark. The Investment Adviser also seeks to manage climate transition risk by weighting stocks based, in part, on certain proprietary emissions metrics. The Investment Adviser may, in its sole discretion, modify or discontinue the weighting of stocks by proprietary emissions metrics.

Step 3: Efficient Implementation

The portfolio management team considers transaction costs at various steps of the investment process. The team incorporates expected portfolio turnover when assigning weights to the variables in the return model. The team also takes into account expected execution costs and evaluates multiple trading options.

The Fund’s investment selection process generally relies on quantitative techniques. From time to time, the Investment Adviser may, in its discretion, also utilize a qualitative overlay. As a result of the qualitative overlay, the Fund’s investments may not correspond to those generated by the Investment Adviser’s proprietary models. The Fund may make investment decisions that deviate from those generated by the Investment Adviser’s proprietary models, at the discretion of the Investment Adviser, for a number of reasons including, but not limited to, corporate actions (e.g., reorganizations, mergers and buy-outs), industry events and/or trading liquidity. In addition, the Investment Adviser may, in its discretion, make changes to its quantitative techniques, or use other quantitative techniques based on the Investment Adviser’s proprietary research. The Investment Adviser employs an investment process that considers a wide range of indicators and risks, and no one indicator, risk or consideration is determinative. For additional information, please consult the Fund’s SAI.

SHARE OFFERING

Goldman Sachs Variable Insurance Trust (the “Trust”) offers shares of the Fund to separate accounts of participating insurance companies for the purpose of funding variable annuity contracts and variable life insurance policies and other qualified purchasers. Service Shares of the Fund are not offered directly to the public. The participating insurance companies and other qualified purchasers, not the owners of the variable annuity contracts or variable life insurance policies or participants therein, are shareholders of the Fund. The Fund pools the monies of these separate accounts and other qualified purchasers and invests these monies in a portfolio of securities pursuant to the Fund’s stated investment objective.

The investment objective and policies of the Fund are similar to the investment objectives and policies of other mutual funds that the Investment Adviser manages. Although the objectives and policies may be similar, the investment results of the Fund may be higher or lower than the results of such other mutual funds. The Investment Adviser cannot guarantee, and makes no representation, that the investment results of similar funds will be comparable even though the funds have the same Investment Adviser.

ADDITIONAL PERFORMANCE INFORMATION AND BENCHMARK INFORMATION

The below is additional information that relates to the “Performance” section of the Fund’s summary section.

Note that the “Best Quarter” and “Worst Quarter” figures shown in the “Performance” section of the Fund’s Summary section are applicable only to the time period covered by the bar chart.

Note on Benchmarks. References in the Prospectus to the Fund’s benchmark (or any other benchmark) are for informational purposes only, and unless otherwise noted, are not an indication of how the Fund is managed or the Fund’s risk characteristics.

OTHER INVESTMENT PRACTICES AND SECURITIES

Although the Fund’s principal investment strategies are described in the Fund’s Summary — Principal Strategy section of the Prospectus, the following tables identify some of the investment techniques that may (but are not required to) be used by the Fund in seeking to achieve its investment objective. Numbers in these tables show allowable usage only; for actual usage, consult the Fund’s most recently filed Form N-CSR. For more information about these and other investment practices and securities, see Appendix A.

The Fund publishes on its website (am.gs.com) complete portfolio holdings for the Fund as of the end of each fiscal quarter subject to a 60 calendar-day lag between the date of the information and the date on which the information is disclosed. The Fund may however, at its discretion, publish these holdings earlier than 60 calendar days, if deemed necessary by the Fund. In addition, the Fund publishes on its website month-end top ten holdings subject to a 15 calendar-day lag between the date of the information and the date on which the information is disclosed. In addition, a description of the Fund’s policies and procedures with respect to the disclosure of the Fund’s portfolio holdings is available in the Fund’s SAI.

* Limited by the amount the Fund invests in foreign securities.

** Illiquid investments are any investments that the Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment.

*** This percentage limitation does not apply to the Fund's investments in investment companies (including ETFs) where a higher percentage limitation is permitted under the Investment Company Act or rules, regulations or exemptive relief thereunder.

¹ The Fund may enter into futures transactions only with respect to the S&P 500[®] Index.

² The Fund may sell call and put options and purchase call and put options on securities and other instruments in which the Fund invests or any index consisting of securities or other instruments in which it may invest.

³ The Fund may purchase and sell call and put options on foreign currencies.

⁴ Limited by the amount the Fund invests in fixed income securities and limited to cash equivalents only. The Fund may invest in bank obligations issued by U.S. or foreign banks.

⁵ The Fund has no minimum rating criteria for convertible debt securities.

⁶ Equity securities of foreign issuers must be traded in the United States.

⁷ Except as noted under "Convertible Securities," fixed income securities must be investment grade (i.e., rated BBB- or higher by S&P, Baa3 or higher by Moody's or have a comparable credit rating by another NRSRO, or, if unrated, determined by the Investment Adviser to be of comparable credit quality).

⁸ Structured securities are not subject to the same minimum credit quality requirement as the Fund's investments in fixed income securities.

Risks of the Fund

Loss of money is a risk of investing in the Fund. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the FDIC or any other governmental agency. The principal risks of the Fund are discussed in the Summary section of the Prospectus. The following section provides additional information on the risks that apply to the Fund, which may result in a loss of your investment. The risks applicable to the Fund are presented below in alphabetical order, and not in the order of importance or potential exposure. The Fund should not be relied upon as a complete investment program. There can be no assurance that the Fund will achieve its investment objective.

	✓ PRINCIPAL RISK		• ADDITIONAL RISK														
Fund	Credit/Default	Cybersecurity	Derivatives	ESG Integration	Interest Rate	Investment Style	Large Shareholder Transactions	Liquidity	Management	Market	Mid-Cap and Small-Cap	Net Asset Value ("NAV")	Portfolio Turnover Rate	REIT	Sector	Stock	Tax Diversification Risk
U.S. Equity Insights	•	•	•	•	•	✓	✓	•	✓	✓	•	•	✓	•	•	✓	✓

- Credit/Default Risk**—An issuer or guarantor of fixed income securities or instruments held by the Fund (which may have low credit ratings) may default on its obligation to pay interest and repay principal or default on any other obligation. The credit quality of the Fund’s portfolio securities or instruments may meet the Fund’s credit quality requirements at the time of purchase but then deteriorate thereafter, and such a deterioration can occur rapidly. In certain instances, the downgrading or default of a single holding or guarantor of the Fund’s holdings may impair the Fund’s liquidity and have the potential to cause significant NAV deterioration.
- Cybersecurity Risk**—The Fund may be susceptible to operational and information security risks resulting from cyber-attacks. Cyber-attacks include, among others, stealing or corrupting confidential information and other data that is maintained online or digitally for financial gain, denial-of-service attacks on websites causing operational disruption, and the unauthorized release of confidential information and other data. Cyber-attacks have the ability to cause significant disruptions and impact business operations; to result in financial losses; to prevent shareholders from transacting business; to interfere with the Fund’s calculation of NAV; and to lead to violations of applicable privacy and other laws, regulatory fines, penalties, reputational damage, reimbursement or other compensation costs and/or additional compliance costs. Cyber-attacks affecting the Fund or its Investment Adviser, custodian, Transfer Agent, or other third-party service providers may adversely impact the Fund and its shareholders.
- Derivatives Risk**—The Fund’s use of options, futures, forwards, swaps, options on swaps, structured securities and other derivatives and other similar instruments (collectively referred to in this paragraph as “derivatives”) may result in losses, including due to adverse market movements. Derivatives, which may pose risks in addition to and greater than those associated with investing directly in securities, currencies or other instruments, may increase market exposure and be illiquid or less liquid, volatile, difficult to price and leveraged so that small changes in the value of the underlying assets or instruments may produce disproportionate losses to the Fund. Certain derivatives are also subject to counterparty risk, which is the risk that the other party in the transaction will not fulfill, or lacks the capacity or authority to fulfill, its contractual obligations, liquidity risk, which includes the risk that the Fund will not be able to close its derivatives position when it is advantageous to do so, and risks arising from margin requirements, which include the risk that the Fund will be required to pay additional margin or set aside additional collateral to maintain open derivative positions. Derivatives may be used for both hedging and non-hedging purposes.

The use of derivatives is a highly specialized activity that involves investment techniques and risks different from those associated with investments in more traditional securities and instruments, and there is no guarantee that the use of derivatives will achieve their intended result. If the Investment Adviser is incorrect in its expectation of the timing or level of fluctuation in securities prices, interest rates, currency prices or other variables, the use of derivatives could result in losses, which in some cases may be significant. A lack of correlation between changes in the value of derivatives and the value of the portfolio assets (if any) being hedged could also result in losses. In addition, there is a risk that the performance of the derivatives or other instruments used by the Investment Adviser to replicate the performance of a particular asset class may not accurately track the performance of that asset class.

The use of derivatives is also subject to operational and legal risks. Operational risks generally refer to risks related to potential operational issues, including documentation issues, settlement issues, system failures, inadequate controls, and human error. Legal risks generally refer to risks of loss resulting from insufficient documentation or legality or enforceability of a contract.

- ESG Integration Risk**—As a part of the Investment Adviser’s stock selection process, the Investment Adviser utilizes proprietary models that assess a wide range of indicators, which may include certain ESG indicators. The relevance and weightings of specific ESG indicators to or within the investment process varies across asset classes, sectors and strategies and no one factor, consideration or indicator is determinative. When integrating ESG indicators into the investment process, the Investment Adviser

may rely on third-party data that it believes to be reliable, but it does not guarantee the accuracy of such third-party data. ESG information from third-party data providers may be incomplete, inaccurate or unavailable, which may adversely impact the investment process. Moreover, ESG information, whether from an external and/or internal source, is, by nature and in many instances, based on a qualitative and subjective assessment. An element of subjectivity and discretion is therefore inherent to the interpretation and use of ESG data. The process for conducting ESG assessments and implementation of ESG views in client/fund portfolios, including the format and content of such analysis and the tools and/or data used to perform such analysis, may also vary among the Investment Adviser's portfolio management teams. While the Investment Adviser believes that the integration of material ESG indicators into the Fund's investment process has the potential to identify financial risks and contribute to the Fund's long-term performance, ESG indicators may not be considered for each and every investment decision, and there is no guarantee that the integration of ESG indicators will result in better performance. Investors can differ in their views of what constitutes positive or negative ESG characteristics. Moreover, the current lack of common standards may result in different approaches to integrating ESG indicators. As a result, the Fund may invest in companies that do not reflect the beliefs and values of any particular investor. The Investment Adviser's approach to ESG integration may evolve and develop over time, both due to a refinement of investment decision-making processes to address ESG indicators and risks, and because of legal and regulatory developments.

- **Interest Rate Risk**—When interest rates increase, fixed income securities or instruments held by the Fund (which may include inflation protected securities) will generally decline in value. Long-term fixed income securities or instruments will normally have more price volatility because of this risk than short-term fixed income securities or instruments. A wide variety of market factors can cause interest rates to rise, including central bank monetary policy, rising inflation and changes in general economic conditions. Changing interest rates may have unpredictable effects on the markets, may result in heightened market volatility and may detract from Fund performance to the extent the Fund is exposed to such interest rates and/or volatility. In addition, changes in monetary policy may exacerbate the risks associated with changing interest rates. Funds with longer average portfolio durations will generally be more sensitive to changes in interest rates than funds with a shorter average portfolio duration. Fluctuations in interest rates may also affect the liquidity of fixed income securities and instruments held by the Fund.

It is difficult to predict the magnitude, timing or direction of interest rate changes and the impact these changes will have on the markets in which the Fund invests.

- **Investment Style Risk** —Different investment styles (*e.g.*, “growth,” “value” or “quantitative”) tend to shift in and out of favor depending upon market and economic conditions and investor sentiment. The Fund may outperform or underperform other funds that invest in similar asset classes but employ different investment styles. Examples of different investment styles include growth and value investing. Growth stocks may be more volatile than other stocks because they are more sensitive to investor perceptions of the issuing company's growth of earnings potential. Growth companies are often expected by investors to increase their earnings at a certain rate. When these expectations are not met, investors can punish the stocks inordinately even if earnings showed an absolute increase. Also, because growth companies usually invest a high portion of earnings in their business, growth stocks may lack the dividends of some value stocks that can cushion stock prices in a falling market. Growth oriented funds will typically underperform when value investing is in favor. Value stocks are those that are undervalued in comparison to their peers due to adverse business developments or other factors. A value stock may decrease in price or fail to increase in price as anticipated if other investors do not eventually recognize the stock's potential value, or if other events or factors that could increase the stock price do not materialize. Value-oriented funds may underperform in market cycles when growth investing is in favor.
- **Large Shareholder Transactions Risk**—The Fund may experience adverse effects when certain large shareholders, such as other funds, participating insurance companies, accounts and Goldman Sachs affiliates, purchase or redeem large amounts of shares of the Fund. Such large shareholder redemptions, which may occur rapidly or unexpectedly, may cause the Fund to sell portfolio securities at times when it would not otherwise do so, which may negatively impact the Fund's NAV and liquidity. Similarly, large Fund share purchases may adversely affect the Fund's performance to the extent that the Fund is delayed in investing new cash or otherwise maintains a larger cash position than it ordinarily would. These transactions may also increase transaction costs. In addition, a large redemption could result in the Fund's current expenses being allocated over a smaller asset base, leading to an increase in the Fund's expense ratio.
- **Liquidity Risk**—The Fund may invest in securities or instruments that trade in lower volumes, that are less liquid than other investments and/or that may become illiquid or less liquid in response to market developments or adverse investor perceptions. Investments that are illiquid or that trade in lower volumes may be more difficult to value. The Fund's transactions in securities that trade in lower volumes may be executed over a period of time, which could impact the prices at which the Fund transacts. When there is no willing buyer and investments cannot be readily sold at the desired time or price, the Fund may have to accept a lower price or may not be able to sell the security or instrument at all. An inability to sell one or more portfolio positions can adversely affect the Fund's value or prevent the Fund from being able to take advantage of other investment opportunities.

Illiquidity can be caused by a drop in overall market trading volume, an inability to find a willing buyer, or legal restrictions on the securities' resale. To the extent that the traditional dealer counterparties that engage in fixed income trading do not maintain inventories of bonds (which provide an important indication of their ability to “make markets”) that keep pace with the growth of

the bond markets over time, relatively low levels of dealer inventories could lead to decreased liquidity and increased volatility in the fixed income markets. Additionally, market participants other than the Fund may attempt to sell fixed income holdings at the same time as the Fund, which could cause downward pricing pressure and contribute to decreased liquidity.

Because the Fund may invest in small- and mid-capitalization stocks, REITs and/or emerging country issuers, the Fund may be especially subject to the risk that during certain periods, the liquidity of particular issuers or industries, or all securities within a particular investment category, may shrink or disappear suddenly and without warning as a result of adverse economic, market or political events (including periods of rapid interest rate changes), or adverse investor perceptions, whether or not accurate.

Liquidity risk may also refer to the risk that the Fund will not be able to pay redemption proceeds within the allowable time period stated in the Prospectus or without significant dilution to remaining investors' interests because of unusual market conditions, declining prices of the securities sold, an unusually high volume of redemption requests or other reasons. While the Fund reserves the right to meet redemption requests through in-kind distributions, the Fund may instead choose to raise cash to meet redemption requests through sales of portfolio securities or permissible borrowings. If the Fund is forced to sell securities at an unfavorable time and/or under unfavorable conditions, such sales may adversely affect the Fund's NAV and dilute remaining investors' interests.

Certain shareholders, including clients or affiliates of the Investment Adviser and/or other funds managed by the Investment Adviser, may from time to time own or control a significant percentage of the Fund's shares. Redemptions by these shareholders of their shares of the Fund may further increase the Fund's liquidity risk and may impact the Fund's NAV. These shareholders may include, for example, certain participating insurance companies, accounts or Goldman Sachs affiliates and other shareholders, whose buy-sell decisions are controlled by a single decision-maker.

- **Management Risk**—The strategy used by the Investment Adviser may fail to produce the intended results. The Investment Adviser attempts to execute a complex strategy for the Fund using proprietary quantitative models. Investments selected using these models may perform differently than expected as a result of the factors used in the models, the weight placed on each factor, changes from the factors' historical trends, the speed that market conditions change and technical and other issues in the construction, implementation and maintenance of the models (including, for example, data problems, unauthorized changes and/or software issues). The use of proprietary quantitative models could be adversely impacted by unforeseeable software or hardware malfunction and other technological failures, power loss, software bugs, malicious code such as “worms,” viruses or system crashes or various other events or circumstances within or beyond the control of the Investment Adviser. Certain of these events or circumstances may be difficult to detect.

Models used by the Investment Adviser may also be predictive in nature and have inherent risks. Models that have been formulated on the basis of past market data may not correctly forecast future price movements, sentiments, trends and themes, among other things. For example, models may not be reliable if unusual or disruptive events cause market movements, the nature or size of which are inconsistent with the historical performance of individual markets or issuers and their relationship to one another or to other macroeconomic events. Models may also use artificial intelligence techniques, such as natural language processing and machine learning, which could be less transparent or interpretable and could produce unexpected results, which can result in losses. Models also rely heavily on data, including non-traditional (or alternative) data, that may be licensed from a variety of sources, and the functionality of the models depends, in part, on the accuracy, reliability and completeness of, and continued access to, voluminous data inputs. There is no guarantee that the Investment Adviser's use of these quantitative models will result in effective investment decisions for the Fund. Additionally, commonality of holdings across quantitative money managers may amplify losses.

- **Market Risk**—The value of the securities in which the Fund invests may go up or down in response to the prospects of individual companies, particular sectors, governments or countries and/or general economic conditions throughout the world. Price changes may be temporary or last for extended periods. The Fund's investments may be overweighted from time to time in one or more sectors, countries or regions, which will increase the Fund's exposure to risk of loss from adverse developments affecting those sectors, countries or regions.

Global economies and financial markets are becoming increasingly interconnected, and conditions and events in one country, region or financial market may adversely impact issuers in a different country, region or financial market. Furthermore, local, regional and global events such as war, military conflict, geopolitical disputes, acts of terrorism, social or political unrest, natural disasters, recessions, inflation, rapid interest rate changes, supply chain disruptions, tariffs and other restrictions on trade, sanctions or the spread of infectious illness or other public health threats, or the threat or potential of one or more such events and developments, could also adversely impact issuers, markets and economies, including in ways that cannot necessarily be foreseen. The Fund could be negatively impacted if the value of a portfolio holding were harmed by such political or economic conditions or events. In addition, governmental and quasi-governmental organizations have taken a number of unprecedented actions designed to support the markets. Such conditions, events and actions may result in greater market risk.

- **Mid-Cap and Small-Cap Risk**—The securities of mid-capitalization and small-capitalization companies involve greater risks than those associated with larger, more established companies and may be subject to more abrupt or erratic price movements. Securities of such issuers may lack sufficient market liquidity to enable the Fund to effect sales at an advantageous time or without a

substantial drop in price. Both mid-capitalization and small-capitalization companies often have narrower markets and more limited managerial and financial resources than larger, more established companies. As a result, their performance can be more volatile and they face greater risk of business failure, which could increase the volatility of the Fund's portfolio. Generally, the smaller the company size, the greater these risks become.

- **NAV Risk**—The net asset value of the Fund and the value of your investment will fluctuate.
- **Portfolio Turnover Rate Risk**—The Fund may engage in active and frequent trading of portfolio securities to achieve its principal investment strategies. A high rate of portfolio turnover involves correspondingly greater expenses which must be borne by the Fund and its shareholders.
- **REIT Risk**—Risks associated with investments such as REITs in the real estate industry include, among others: possible declines in the value of real estate; risks related to general and local economic conditions; possible lack of availability of mortgage financing, variations in rental income, neighborhood values or the appeal of property to tenants; interest rates; overbuilding; extended vacancies of properties; increases in competition, property taxes and operating expenses; and changes in zoning laws. Investing in REITs involves certain unique risks in addition to those risks associated with investing in the real estate industry in general. REITs whose underlying properties are concentrated in a particular industry or geographic region are also subject to risks affecting such industries and regions. The securities of REITs involve greater risks than those associated with larger, more established companies and may be subject to more abrupt or erratic price movements because of interest rate changes, economic conditions and other factors. For example, the value of these securities may decline when interest rates rise and will also be affected by the real estate market and by the management or development of the underlying properties. The underlying properties may be subject to mortgage loans, which may also be subject to the risks of default. REITs may also fail to qualify for tax free pass-through of income or may fail to maintain their exemptions from investment company registration. Securities of such issuers may lack sufficient market liquidity to enable the Fund to effect sales at an advantageous time or without a substantial drop in price.
- **Sector Risk**—To the extent the Fund focuses its investments in securities of issuers in one or more sectors (such as the financial services or telecommunications sectors), the Fund may be subjected to a greater extent than if its investments were diversified across different sectors, to the risks of volatile economic cycles and/or conditions and developments that may be particular to that sector, such as: adverse economic, business, political, environmental or other developments.
- **Stock Risk**—Stock prices have historically risen and fallen in periodic cycles. U.S. and foreign stock markets have experienced periods of substantial price volatility in the past and may do so again in the future. Stock prices may fluctuate from time to time in response to the activities of individual companies and in response to general market and economic conditions. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments, and the stock prices of such companies may suffer a decline in response.
- **Tax Diversification Risk**—The Fund intends to meet the Diversification Requirements. In order for the Fund to qualify for “look through” treatment under the Diversification Requirements, Fund shares must be sold only to Permitted Investors, under Section 817 of the Code and Treasury Regulation 1.817-5(f), as supplemented by published rulings and procedures issued thereunder by the IRS. To the extent an investor in Fund shares no longer qualifies as a Permitted Investor, and such investor fails to restore its status as a Permitted Investor or obtain a waiver or closing agreement with respect to such failure from the IRS, the Fund may no longer qualify for “look through” treatment. Therefore, in testing compliance with the Diversification Requirements, an investor in the Fund, such as, for example, an insurance company separate account, no longer would be able to look through the Fund to its underlying investments. Instead, the Fund would be considered a single investment for purposes of the Diversification Requirements.

A failure to satisfy the Diversification Requirements (whether resulting from investors in Fund shares or otherwise) could have significant adverse tax consequences for variable contract owners whose contract values are determined by investment in the Fund. See “Taxation” in the SAI for more information.

More information about the Fund's portfolio securities and investment techniques, and their associated risks, is provided in Appendix A. You should consider the investment risks discussed in this section and in Appendix A. Both are important to your investment choice.

Service Providers

INVESTMENT ADVISER

Investment Adviser

Goldman Sachs Asset Management, L.P.
200 West Street
New York, NY 10282

GSAM has been registered as an investment adviser with the SEC since 1990 and is an indirect, wholly-owned subsidiary of The Goldman Sachs Group, Inc. and an affiliate of Goldman Sachs & Co. LLC (“Goldman Sachs”). Founded in 1869, The Goldman Sachs Group, Inc. is a publicly-held financial holding company and a leading global investment banking, securities and investment management firm. As of December 31, 2024, GSAM, including its investment advisory affiliates, had assets under supervision of approximately \$2.82 trillion.

The Investment Adviser provides day-to-day advice regarding the Fund’s portfolio transactions. The Investment Adviser makes the investment decisions for the Fund and places purchase and sale orders for the Fund’s portfolio transactions in U.S. and foreign markets. As permitted by applicable law, these orders may be directed to any executing brokers, dealers, futures commission merchants (“FCMs”) or other counterparties, including Goldman Sachs and its affiliates. While the Investment Adviser is ultimately responsible for the management of the Fund, it is able to draw upon the research and expertise of its asset management affiliates for portfolio decisions and management with respect to certain portfolio securities. In addition, the Investment Adviser has access to the research and certain proprietary technical models developed by Goldman Sachs (subject to legal, internal, regulatory and Chinese wall restrictions), and will apply quantitative and qualitative analysis in determining the appropriate allocations among categories of issuers and types of securities.

The Investment Adviser also performs the following additional services for the Fund (to the extent not performed by others pursuant to agreements with the Fund):

- Supervises all non-advisory operations of the Fund
- Provides personnel to perform necessary executive, administrative and clerical services to the Fund
- Arranges for the preparation of all required tax returns, reports to shareholders, prospectuses and SAIs and other reports filed with the SEC and other regulatory authorities
- Maintains the records of the Fund
- Provides office space and all necessary office equipment and services

An investment in the Fund may be negatively impacted because of the operational risks arising from factors such as processing errors and human errors, inadequate or failed internal or external processes, failures in systems and technology, changes in personnel, and errors caused by third-party service providers or trading counterparties. The use of certain investment strategies that involve manual or additional processing, such as over-the-counter derivatives, increases these risks. Although the Fund attempts to minimize such failures through controls and oversight, it is not possible to identify all of the operational risks that may affect the Fund or to develop processes and controls that completely eliminate or mitigate the occurrence of such failures. The Fund and its shareholders could be negatively impacted as a result.

From time to time, Goldman Sachs or its affiliates may invest “seed” capital in the Fund. These investments are generally intended to enable the Fund to commence investment operations and achieve sufficient scale. Goldman Sachs and its affiliates may hedge the exposure of the seed capital invested in the Fund by, among other things, taking an offsetting position in the benchmark of the Fund.

MANAGEMENT FEE AND OTHER EXPENSES

As compensation for its services and its assumption of certain expenses, the Investment Adviser is entitled to a fee, computed daily and payable monthly, at the annual rate listed below (as a percentage of the Fund’s average daily net assets):

Fund	Contractual Management Fee Annual Rate	Average Daily Net Assets	Actual Rate For the Fiscal Year Ended December 31, 2024*
U.S. Equity Insights	0.62%	First \$1 Billion	0.54%
	0.59%	Next \$1 Billion	
	0.56%	Next \$3 Billion	
	0.55%	Next \$3 Billion	

Fund	Contractual Management Fee Annual Rate	Average Daily Net Assets	Actual Rate For the Fiscal Year Ended December 31, 2024*
	0.54%	Over \$8 Billion	

* *The Actual Rate may not correlate to the Contractual Management Fee Annual Rate as a result of management fee waivers that may be in effect from time to time.*

The Investment Adviser has agreed to waive a portion of its management fee in order to achieve an effective net management fee rate of 0.54% as an annual percentage rate of the Fund’s average daily net assets. This arrangement will remain in effect through at least April 30, 2026, and prior to such date, the Investment Adviser may not terminate the arrangement without the approval of the Board of Trustees. The management fee waiver may be modified or terminated by the Investment Adviser at its discretion and without shareholder approval after such date, although the Investment Adviser does not presently intend to do so. In addition to the management fee waiver described above, the Investment Adviser may waive an additional portion of its management fees, including fees earned as the Investment Adviser to any of the affiliated funds in which the Fund invests, from time to time, and may discontinue or modify any such waivers in the future, consistent with the terms of any fee waiver arrangements that may be in place.

A discussion regarding the basis for the Board of Trustees’ approval of the Management Agreement for the Fund in 2024 is available in the Fund’s Form N-CSR dated June 30, 2024.

The Investment Adviser has agreed to reduce or limit “Other Expenses” (excluding acquired fund fees and expenses, transfer agency fees and expenses, taxes, interest, brokerage fees, expenses of shareholder meetings, litigation and indemnification, and extraordinary expenses) to 0.004% of the Fund’s average daily net assets through at least April 30, 2026, and prior to such date the Investment Adviser may not terminate the arrangement without the approval of the Board of Trustees. The expense limitation may be modified or terminated by the Investment Adviser at its discretion and without shareholder approval after such date, although the Investment Adviser does not presently intend to do so. The Fund’s “Other Expenses” may be further reduced by any custody and transfer agency fee credits received by the Fund.

The Investment Adviser, distributor, and/or their affiliates may, from time to time, pay compensation from their own assets (and not as an additional charge to the Fund) to participating insurance companies for administrative services that such companies provide to their variable annuity and variable life insurance contract owners who are invested in the Fund and for other purposes. In addition, the Investment Adviser, distributor, and/or their affiliates may pay compensation from their own assets (and not as an additional charge to the Fund) to various securities dealers (including affiliates of participating insurance companies) (“Intermediaries”) that distribute variable annuity contracts and/or variable life insurance contracts of such companies in connection with the sale, distribution and/or servicing of such contracts. Such payments are intended to compensate Intermediaries and other persons for, among other things: marketing shares of the Fund and other Goldman Sachs Funds, which may consist of payments relating to funds included on preferred or recommended fund lists or in certain sales programs from time to time sponsored by the recipients; access to the Intermediaries’ registered representatives or salespersons, including at conferences and other meetings; assistance in training and education of personnel; marketing support; the provision of analytical or other data to the Investment Adviser or its affiliates relating to sales of shares of the Fund and other Goldman Sachs Funds; the support or purchase of technology platforms/ software; and/or other specified services intended to assist in the distribution and marketing of the Fund and other Goldman Sachs Funds, including provision of consultative services to the Investment Adviser or its affiliates relating to marketing and/or sale of shares of the Fund and other Goldman Sachs Funds. The payments may also, to the extent permitted by applicable regulations, sponsor various trainings and educational programs. The additional payments by the Investment Adviser, distributor and/or their affiliates may also compensate Intermediaries and other persons for subaccounting, administrative, shareholder processing and/or recordkeeping services that are in addition to the fees paid for these services by the Fund. The amount of these additional payments is normally not expected to exceed 0.50% (annualized) of the amount sold or invested through the recipients. Please refer to the “Payments to Others (Including Intermediaries)” section of the SAI for more information about these and similar payments.

The payments made by the Investment Adviser, distributor and/or their affiliates may differ for different participating insurance companies, Intermediaries and other persons. The presence of these and similar payments and the basis on which an Intermediary compensates its registered representatives or salespersons may create an incentive for a particular Intermediary, registered representative, salesperson, participating insurance company or other person to highlight, feature, offer or recommend the Fund based, at least in part, on the level of compensation paid. You should contact your participating insurance company, Intermediary or any other person that provides services to you, for more information about the payments they receive and any potential conflicts of interest.

FUND MANAGERS

Quantitative Investment Strategies (“QIS”) Team

The individuals jointly and primarily responsible for the day-to-day management of the Fund are listed below. The Fund’s portfolio managers’ individual responsibilities may differ and may include, among other things, development and maintenance of quantitative models and processes in combination with a qualitative overlay, asset allocation, risk budgeting and general oversight of research, implementation processes and the management of the Fund’s portfolio.

Name and Title	Fund Responsibility	Years Primarily Responsible	Five Year Employment History
Len Ioffe, CFA Managing Director	Portfolio Manager— U.S. Equity Insights	Since 2011	Mr. Ioffe joined the Investment Adviser in 1995. He is a portfolio manager and member of the Quantitative Investment Strategies (QIS) Team within GSAM.
Osman Ali, CFA Managing Director	Portfolio Manager— U.S. Equity Insights	Since 2012	Mr. Ali joined the Investment Adviser in 2003. He is co-head of the Quantitative Investment Strategies (QIS) Team within GSAM.
Dennis Walsh Managing Director	Portfolio Manager— U.S. Equity Insights	Since 2013	Mr. Walsh joined the Investment Adviser in 2009. He is co-head of the Quantitative Investment Strategies (QIS) Team within GSAM.
Takashi Suwabe Managing Director	Portfolio Manager— U.S. Equity Insights	Since 2021	Mr. Suwabe joined the Investment Adviser in 2004. He is a researcher and member of the Quantitative Investment Strategies (QIS) Team within GSAM.
Sharanya Srinivasan Managing Director	Portfolio Manager— U.S. Equity Insights	Since 2024	Ms. Srinivasan rejoined the Investment Adviser in 2019. She is a researcher and portfolio manager and member of the Quantitative Investment Strategies (QIS) Team within GSAM.

For information about portfolio manager compensation, other accounts managed by a portfolio manager and portfolio manager ownership of securities in the Fund, see the SAI.

DISTRIBUTOR AND TRANSFER AGENT

Goldman Sachs, 200 West Street, New York, NY 10282, serves as the exclusive distributor (the “Distributor”) of the Fund’s shares. Goldman Sachs, 71 South Wacker Drive, Suite 1200, Chicago, IL 60606, also serves as the Fund’s transfer agent (the “Transfer Agent”) and, as such, performs various shareholder servicing functions.

For its transfer agency services, Goldman Sachs is entitled to receive a transfer agency fee equal, on an annualized basis, to 0.02% of average daily net assets with respect to the Service Shares.

ACTIVITIES OF GOLDMAN SACHS AND ITS AFFILIATES AND OTHER ACCOUNTS MANAGED BY GOLDMAN SACHS

The involvement of the Investment Adviser, Goldman Sachs and their affiliates in the management of, or their interest in, other accounts and other activities of Goldman Sachs will present conflicts of interest with respect to the Fund and will, under certain circumstances, limit the Fund’s investment activities. Goldman Sachs is a worldwide, full service investment banking, broker dealer, asset management and financial services organization and a major participant in global financial markets that provides a wide range of financial services to a substantial and diversified client base that includes corporations, financial institutions, governments and individuals. As such, it acts as a broker-dealer, investment adviser, investment banker, underwriter, research provider, administrator, financier, adviser, market maker, trader, prime broker, derivatives dealer, clearing agent, lender, counterparty, agent, principal, distributor, investor or in other commercial capacities for accounts or companies (including Fund portfolio companies) or affiliated or unaffiliated investment funds (including pooled investment vehicles and private funds) in which one or more accounts, including the Fund, invest. In those and other capacities, Goldman Sachs and its affiliates advise and deal with clients and third parties in all markets and transactions and purchase, sell, hold and recommend a broad array of investments, including securities, derivatives, loans, commodities, currencies, credit default swaps, indices, baskets and other financial instruments and products for their own accounts or for the accounts of their customers and have other direct and indirect interests in the global fixed income, currency, commodity, equities, bank loans and other markets and the securities and issuers in which the Fund directly and indirectly invests. Thus, it is expected that the Fund will have multiple business relationships with and will invest in, engage in transactions with, make voting decisions with respect to, or obtain services from entities for which Goldman Sachs and its affiliates perform or seek to perform investment banking or other services. The Investment Adviser and/or certain of its affiliates are the managers of the Goldman Sachs Funds (as defined below). The Investment Adviser and its affiliates earn fees from this and other relationships with the Fund. Although management fees paid by the Fund to the Investment Adviser and certain other fees paid to the Investment Adviser’s affiliates are based on asset levels, the fees are not directly contingent on Fund performance, and the Investment Adviser and its affiliates will still

receive significant compensation from the Fund even if shareholders lose money. Goldman Sachs and its affiliates engage in proprietary trading and advise accounts and funds which have investment objectives similar to those of the Fund and/or which engage in and compete for transactions in the same types of securities, currencies and instruments as the Fund. Goldman Sachs and its affiliates will not have any obligation to make available any information regarding their proprietary activities or strategies, or the activities or strategies used for other accounts managed by them, for the benefit of the management of the Fund. The results of the Fund's investment activities, therefore, will likely differ from those of Goldman Sachs, its affiliates, and other accounts managed by Goldman Sachs, and it is possible that the Fund could sustain losses during periods in which Goldman Sachs and its affiliates and other accounts achieve significant profits on their trading for proprietary or other accounts. In addition, the Fund may enter into transactions in which Goldman Sachs and its affiliates or their other clients have an adverse interest. For example, the Fund may take a long position in a security at the same time that Goldman Sachs and its affiliates or other accounts managed by the Investment Adviser or its affiliates take a short position in the same security (or vice versa). These and other transactions undertaken by Goldman Sachs, its affiliates or Goldman Sachs-advised clients may, individually or in the aggregate, adversely impact the Fund. Transactions by one or more Goldman Sachs-advised clients or the Investment Adviser may have the effect of diluting or otherwise disadvantaging the values, prices or investment strategies of the Fund. The Fund's activities will, under certain circumstances, be limited because of regulatory restrictions applicable to Goldman Sachs and its affiliates, and/or their internal policies designed to comply with such restrictions. As a global financial services firm, Goldman Sachs and its affiliates also provide a wide range of investment banking and financial services to issuers of securities and investors in securities. Goldman Sachs, its affiliates and others associated with it are expected to create markets or specialize in, have positions in and/or effect transactions in, securities of issuers held by the Fund, and will likely also perform or seek to perform investment banking and financial services for one or more of those issuers. Goldman Sachs and its affiliates are expected to have business relationships with and purchase or distribute or sell services or products from or to distributors, consultants or others who recommend the Fund or who engage in transactions with or for the Fund. For more information about conflicts of interest, see the section titled "Potential Conflicts of Interest" in the SAI.

The Fund will, from time to time, make brokerage and other payments to Goldman Sachs and its affiliates in connection with the Fund's portfolio investment transactions, in accordance with applicable law.

Under a securities lending program approved by the Fund's Board of Trustees, the Fund has retained an affiliate of the Investment Adviser to serve as the securities lending agent for the Fund to the extent that the Fund engages in the securities lending program. For these services, the lending agent would receive a fee from the Fund, including a fee based on the returns earned on the Fund's investment of the cash received as collateral for the loaned securities. The Board of Trustees periodically reviews reports on portfolio securities loan transactions for which the affiliated lending agent has acted as lending agent. In addition, the Fund may make brokerage and other payments to Goldman Sachs and its affiliates in connection with the Fund's portfolio investment transactions in accordance with applicable law.

Distributions

Distributions from investment company taxable income and distributions from net realized capital gains (if any) are normally declared and paid by the Fund at least annually. In addition the Fund may occasionally make a distribution at a time when it is not normally made. Over the course of the year, accrued and paid distributions will equal all or substantially all of the Fund's investment company taxable income and net realized capital gains. All distributions paid on Service Shares will be automatically reinvested in additional Service Shares of the Fund at the NAV of such shares on the payment date, unless an insurance company's separate account is permitted to hold cash and elects to receive payment in cash. From time to time, a portion of the Fund's distributions may constitute a return of capital for tax purposes, and/or may include amounts in excess of the Fund's net investment income for the period in accordance with generally accepted accounting principles (GAAP).

Shareholder Guide

The following section will provide you with answers to some of the most frequently asked questions regarding buying and selling the Fund's Service Shares.

How Can I Purchase Or Sell Service Shares Of The Fund?

Service Shares of the Fund are not sold directly to the public. Instead, Fund shares are generally sold to separate accounts that fund variable annuity and variable life insurance contracts issued by participating insurance companies. Individual investors may purchase or sell (redeem) shares of the Fund through variable annuity contracts and variable life insurance policies offered through the separate accounts. The variable annuity contracts and variable life insurance policies are described in the separate prospectuses issued by the participating insurance companies. You should refer to those prospectuses for information on how to purchase a variable annuity contract or variable life insurance policy, how to select a specific Fund as an investment option for your contract or policy and how to redeem monies from the Fund.

The separate accounts of the participating insurance companies place orders to purchase and redeem shares of the Fund based on, among other things, the amount of premium payments to be invested and the amount of surrender and transfer requests (as defined in the prospectus describing the variable annuity contracts and variable life insurance policies issued by the participating insurance companies) to be effected on that day pursuant to variable annuity contracts and variable life insurance policies.

Shares of the Fund may be purchased by separate accounts of both affiliated and unaffiliated participating insurance companies in order to fund both variable annuity and variable life insurance contracts, and also may be purchased by qualified plans. This may present certain conflicts of interests among variable annuity owners, variable life insurance policy owners and plan investors. The Trust's Board of Trustees will monitor the Trust for the existence of any material irreconcilable conflict of interest. The Trust currently does not foresee any disadvantages to the holders of variable annuity contracts and variable life insurance policies arising from the fact that interests of the holders of variable annuity contracts and variable life insurance policies may differ due to differences of tax treatment or other considerations or due to conflicts among the participating insurance companies. If, however, a material irreconcilable conflict arises between the holders of variable annuity contracts and variable life insurance policies of participating insurance companies, a participating insurance company may be required to withdraw the assets allocable to some or all of the separate accounts from the Fund. Any such withdrawal could disrupt orderly portfolio management to the potential detriment of such holders.

Shares of the Fund (and other existing and new funds that might be added to the Trust) may also be offered to other qualified purchasers, as provided below. Qualified purchasers are generally required to enter into an agreement with the Trust prior to transacting in shares of the Fund.

- Unregistered separate accounts of various participating insurance companies through which variable annuity contracts and variable life insurance policies are sold in non-public offerings.
- Unregistered separate accounts of various participating insurance companies through which variable annuity contracts and variable life insurance policies are offered exclusively to qualified pension and profit-sharing plans and/or certain governmental plans.
- Qualified pension and profit-sharing plans. The Trust does not currently anticipate offering shares directly to such plans.
- Other registered investment companies offered under variable annuity or variable life insurance contracts.

In addition to Service Shares, the Fund offers another class of shares. This other share class is subject to different fees and expenses (which affect performance) and is entitled to different services than Service Shares. Information regarding this other share class can be obtained from Goldman Sachs by calling the number on the back cover of the Prospectus.

How Are Shares Priced?

Service Shares of the Fund are purchased and sold at the Fund's next-determined NAV per share after the Transfer Agent or a participating insurance company has received and accepted the order in proper form. The class generally calculates its NAV as follows:

$$\text{NAV} = \frac{\text{(Value of Assets of the Class)} - \text{(Liabilities of the Class)}}{\text{Number of Outstanding Shares of the Class}}$$

The Fund's investments for which market quotations are readily available are valued at market value on the basis of quotations provided by pricing sources. If accurate quotations are not readily available, if the Fund's fund accounting agent is unable for other reasons to facilitate pricing of individual securities or calculate the Fund's NAV, or if the Investment Adviser believes that such quotations do not accurately reflect fair value, the fair value of the Fund's investments may be determined in good faith under valuation

procedures approved by the Board of Trustees. Thus, such pricing may be based on subjective judgments and it is possible that the prices resulting from such valuation procedures may differ materially from the value realized on a sale. Cases where there is no clear indication of the value of the Fund's investments include, among others, situations where a security or other asset or liability does not have a price source or a price is unavailable.

Equity securities listed on an exchange are generally valued at the last available sale price on the exchange on which they are principally traded. To the extent the Fund invests in foreign equity securities, "fair value" prices will be provided by an independent third-party pricing (fair value) service in accordance with the fair value procedures approved by the Board of Trustees. Fair value prices are used because many foreign markets operate at times that do not coincide with those of the major U.S. markets. Events that could affect the values of foreign portfolio holdings may occur between the close of the foreign market and the time of determining the NAV, and would not otherwise be reflected in the NAV.

Fixed income securities are generally valued on the basis of prices (including evaluated prices) and quotations provided by pricing services or securities dealers. Pricing services may use matrix pricing or valuation models, which utilize certain inputs and assumptions, including, but not limited to, yield or price with respect to comparable fixed income securities, to determine current value. Pricing services generally value fixed income securities assuming orderly transactions of an institutional round lot size, but the Fund may hold or transact in such securities in smaller odd lot sizes. Odd lots may trade at lower prices than institutional round lots.

Investments in other open-end registered investment companies (if any), excluding investments in ETFs, are valued based on the NAV of those open-end registered investment companies (which may use fair value pricing as discussed in their prospectuses). Investments in ETFs will generally be valued at the last sale price or official closing price on the exchange on which they are principally traded.

In addition, the Investment Adviser, consistent with its procedures and applicable regulatory guidance, may (but need not) determine to make an adjustment to the previous closing prices of either domestic or foreign securities in light of significant events, to reflect what it believes to be the fair value of the securities at the time of determining the Fund's NAV. Significant events that could affect a large number of securities in a particular market may include, but are not limited to: situations relating to one or more single issuers in a market sector; significant fluctuations in U.S. or foreign markets; market dislocations; market disruptions or unscheduled market closings; equipment failures; natural or man made disasters or acts of God; armed conflicts; governmental actions or other developments; as well as the same or similar events which may affect specific issuers or the securities markets even though not tied directly to the securities markets. Other significant events that could relate to a single issuer may include, but are not limited to: corporate actions such as reorganizations, mergers and buy-outs; corporate announcements, including those relating to earnings, products and regulatory news; significant litigation; ratings downgrades; bankruptcies; and trading limits or suspensions.

One effect of using an independent third-party pricing (fair value) service and fair valuation may be to reduce stale pricing arbitrage opportunities presented by the pricing of Fund shares. However, it involves the risk that the values used by the Fund to price its investments may be different from those used by other investment companies and investors to price the same investments.

Please note the following with respect to the price at which your transactions are processed:

- NAV per share of each share class is generally calculated by the Fund's fund accounting agent on each business day as of the close of regular trading on the New York Stock Exchange (normally 4:00 p.m. Eastern time) or such other times as the New York Stock Exchange or NASDAQ market may officially close. Fund shares will generally not be priced on any day the New York Stock Exchange is closed.
- The Trust reserves the right to reprocess purchase (including dividend reinvestments), redemption and exchange transactions that were processed at a NAV that is subsequently adjusted, and to recover amounts from (or distribute amounts to) shareholders accordingly based on the official closing NAV, as adjusted.
- The Trust reserves the right to advance the time by which purchase and redemption orders must be received for same business day credit as otherwise permitted by the SEC.

Consistent with industry practice, investment transactions not settling on the same day are recorded and factored into the Fund's NAV on the business day following trade date (T+1). The use of T+1 accounting generally does not, but may, result in a NAV that differs materially from the NAV that would result if all transactions were reflected on their trade dates.

Note: The time at which transactions and shares are priced and the time by which orders must be received may be changed in case of an emergency or if regular trading on the New York Stock Exchange is stopped at a time other than its regularly scheduled closing time. In the event the New York Stock Exchange does not open for business, the Trust may, but is not required to, open the Fund for purchase, redemption and exchange transactions if the Federal Reserve wire payment system is open. To learn whether the Fund is open for business during this situation, please call the appropriate phone number located on the back cover of the Prospectus.

Foreign securities may trade in their local markets on days the Fund is closed. As a result, if the Fund holds foreign securities, its NAV may be impacted on days when investors may not purchase or redeem Fund shares.

The Fund relies on various sources to calculate its NAV. The ability of the Fund's fund accounting agent to calculate the NAV per share is subject to operational risks associated with processing or human errors, systems or technology failures, cyber attacks and errors caused by third party service providers, data sources, or trading counterparties. Such failures may result in delays in the calculation of the Fund's NAV and/or the inability to calculate NAV over extended time periods. The Fund may be unable to recover any losses associated with such failures. In addition, if the third party service providers and/or data sources upon which the Fund directly or indirectly relies to calculate its NAV or price individual securities are unavailable or otherwise unable to calculate the NAV correctly, it may be necessary for alternative procedures to be utilized to price the securities at the time of determining the Fund's NAV.

Do I Have To Pay Any Fees When Purchasing Or Selling Service Shares Of The Fund?

The Fund does not charge any fees when it sells or redeems its shares. Surrender charges, mortality and expense risk fees and other charges may be assessed by participating insurance companies under the variable annuity contracts or variable life insurance policies. These fees should be described in the participating insurance companies' prospectuses.

What Else Should I Know About Service Share Purchases And Redemptions?

The Trust reserves the right to:

- Suspend the right of redemption under certain extraordinary circumstances in accordance with the rules of the SEC.
- Suspend the offering of shares for a period of time.
- Reject any purchase order.
- Close the Fund to new investors from time to time and reopen the Fund whenever it is deemed appropriate by the Investment Adviser.
- Redeem your shares in the case of actual or suspected threatening conduct or actual or suspected fraudulent, suspicious or illegal activity by you or any other individual associated with your account.
- Pay redemptions by a distribution in-kind of securities (instead of cash). If you receive redemption proceeds in-kind, you should expect to incur transaction costs upon the disposition of those securities. In addition, if you receive redemption proceeds in-kind, you will be subject to market gains or losses upon the disposition of those securities.

The Fund will be deemed to have received an order for purchase, redemption or exchange of Fund Shares when the order is accepted in proper form by the Transfer Agent or a participating insurance company on a business day, and the order will be priced at the Fund's current NAV per share next determined after such acceptance. Participating insurance companies may have different requirements regarding what constitutes proper form for trade instructions. Please contact the participating insurance company for more information.

Shares of the Fund are only registered for sale in the United States and certain of its territories. Generally, shares of the Fund will only be offered or sold to "U.S. persons" and all offerings or other solicitation activities will be conducted within the United States in accordance with the rules and regulations of the Securities Act of 1933, as amended.

Orders received by the Trust are only processed on business days. The separate accounts and other qualified purchasers purchase and redeem shares of the Fund at the Fund's NAV per share calculated as of the day an order is received by the Fund (or its designee) although such purchases and redemptions may be executed the next morning. Redemption proceeds paid by wire transfer will normally be wired in federal funds on the business day on which the Trust receives actual notice of the redemption order, but may be paid within one business day after receipt of actual notice of the order.

The Fund typically expects to meet redemption requests by using holdings of cash or cash equivalents and/or proceeds from the sale of portfolio holdings. In addition, under stressed market conditions, as well as for other temporary or emergency purposes, the Fund may distribute redemption proceeds in-kind (instead of cash), access a line of credit or overdraft facility, or borrow through other sources to meet redemption requests.

Notwithstanding the foregoing, the Trust and Goldman Sachs reserve the right to reject or restrict purchase or exchange requests from any investor. The Trust and Goldman Sachs will not be liable for any loss resulting from rejected purchase or exchange orders.

What Types Of Reports Will I Be Sent Regarding Investments In The Fund?

As a holder of a variable annuity contract or variable life insurance policy, you will receive annual shareholder reports and semi-annual shareholder reports from your participating insurance company.

What Are The Fund's Voting Procedures?

Participating insurance companies, not the owners of the variable annuity contracts or variable life insurance policies or participants therein, are shareholders of the Fund. To the extent required by law:

- The participating insurance companies will vote Fund shares held in the separate accounts in a manner consistent with timely voting instructions received from the holders of variable annuity contracts and variable life insurance policies.

- The participating insurance companies will vote Fund shares held in the separate accounts for which no timely instructions are received from the holders of variable annuity contracts and variable life insurance policies, as well as shares they own, in the same proportion as those shares for which voting instructions are received.

It is anticipated that Fund shares held by unregistered separate accounts or qualified plans generally will be voted for or against any proposition in the same proportion as all other Fund shares are voted unless the unregistered separate account's participating insurance company or the plan makes other arrangements.

Additional information concerning voting rights of the participants in the separate accounts is more fully set forth in the prospectus relating to those accounts issued by the participating insurance companies.

DISTRIBUTION AND SERVICE FEES

What Are The Distribution And/Or Service Fees Paid By Service Shares?

The Trust has adopted a distribution and service plan (the "Plan") under which Service Shares bear distribution and service fees paid to Goldman Sachs. If the fees received by Goldman Sachs pursuant to the Plan exceed its expenses, Goldman Sachs may realize a profit from these arrangements. Goldman Sachs generally receives and pays the distribution and service fees on a quarterly basis.

Under the Plan, Goldman Sachs is entitled to a monthly fee from the Fund for distribution services equal, on an annual basis, to 0.25% of the Fund's average daily net assets attributed to Service Shares. Because these fees are paid out of the Fund's assets on an ongoing basis, over time, these fees will increase the cost of your investment and may cost you more than paying other types of such charges. Goldman Sachs has agreed to waive distribution and service fees so as not to exceed an annual rate of 0.21% of the Fund's average daily net assets attributable to Service Shares through at least April 30, 2026, and prior to such date, Goldman Sachs may not terminate the arrangement without the approval of the Board of Trustees. The fee waiver may be modified or terminated by Goldman Sachs at its discretion and without shareholder approval after such date, although Goldman Sachs does not presently intend to do so.

The distribution fees are subject to the requirements of Rule 12b-1 under the Investment Company Act of 1940, as amended (the "Investment Company Act"), and may be used (among other things) for:

- Compensation paid to and expenses incurred by insurance companies and other financial intermediaries, and Goldman Sachs, and their respective officers, employees and sales representatives;
- Sales commissions;
- Allocable overhead;
- Telephone and travel expenses;
- Interest and other costs associated with the financing of such compensation and expenses;
- Printing of prospectuses for prospective shareholders;
- Preparation and distribution of sales literature or advertising of any type; and
- All other expenses incurred in connection with activities primarily intended to result in the sale of Service Shares.

In addition, the fees may be used for personal and account maintenance services performed and related expenses incurred in connection with Service Shares. Personal and account maintenance services include services relating to assistance to contract owners regarding their investments in Service Shares and responding to contract owner inquiries.

RESTRICTIONS ON EXCESSIVE TRADING PRACTICES

Policies and Procedures on Excessive Trading Practices. In accordance with the policy adopted by the Board of Trustees, the Trust discourages frequent purchases and redemptions of Fund shares and does not permit market timing or other excessive trading practices. Purchases and exchanges should be made with a view to longer-term investment purposes only that are consistent with the investment policies and practices of the Fund. Excessive, short-term (market timing) trading practices may disrupt portfolio management strategies, increase brokerage and administrative costs, harm Fund performance and result in dilution in the value of Fund shares held by longer-term shareholders. The Trust and Goldman Sachs reserve the right to reject or restrict purchase or exchange requests from any participating insurance company or other investor. The Trust and Goldman Sachs will not be liable for any loss resulting from rejected purchase or exchange orders. To minimize harm to the Trust and its shareholders (or Goldman Sachs), the Trust (or Goldman Sachs) will exercise this right if, in the Trust's (or Goldman Sachs') judgment, an investor has a history of excessive trading or if an investor's trading, in the judgment of the Trust (or Goldman Sachs), has been or may be disruptive to the Fund. In making this judgment, trades executed in multiple accounts under common ownership or control may be considered together to the extent they can be identified. No waivers of the provisions of the policy established to detect and deter market timing and other excessive trading activity are permitted that would harm the Trust or its shareholders or would subordinate the interests of the Trust or its shareholders to those of Goldman Sachs or any affiliated person or associated person of Goldman Sachs.

As a deterrent to excessive trading, many foreign equity securities held by the Goldman Sachs Funds are priced by an independent pricing service using fair valuation. For more information on fair valuation, please see “How Are Shares Priced?”

Pursuant to the policy adopted by the Board of Trustees of the Trust, Goldman Sachs has developed criteria that it uses to identify trading activity that may be excessive. Excessive trading activity in the Fund is measured by the number of “round trip” transactions in a shareholder’s account. A “round trip” includes a purchase or exchange into the Fund followed or preceded by a redemption or exchange out of the same Fund. If the Fund detects that a shareholder has completed two or more round trip transactions in a single Fund within a rolling 90-day period, the Fund may reject or restrict subsequent purchase or exchange orders by that shareholder permanently. In addition, the Fund may, in its sole discretion, permanently reject or restrict purchase or exchange orders by a shareholder if the Fund detects other trading activity that is deemed to be disruptive to the management of the Fund or otherwise harmful to the Fund. For purposes of these transaction surveillance procedures, the Fund may consider trading activity in multiple accounts under common ownership, control, or influence. A shareholder that has been restricted from participation in the Fund pursuant to this policy will be allowed to apply for reentry after one year. A shareholder applying for re-entry must provide assurances acceptable to the Fund that the shareholder will not engage in excessive trading activities in the future.

Goldman Sachs may modify its surveillance procedures and criteria from time to time without prior notice regarding the detection of excessive trading or to address specific circumstances. Goldman Sachs will apply the criteria in a manner that, in Goldman Sachs’ judgment, will be uniform.

Fund shares are generally held through omnibus arrangements maintained by participating insurance companies or other intermediaries. Omnibus accounts include multiple investors and such accounts typically provide the Fund with a net purchase or redemption request on any given day where the purchases and redemptions of Fund shares by the investors shares are netted against one another. The identity of individual investors whose purchase and redemption orders are aggregated are ordinarily not tracked by the Fund on a regular basis. A number of these insurance companies or financial intermediaries may not have the capability or may not be willing or legally able to apply the Fund’s market timing policies. While Goldman Sachs may monitor share turnover at the omnibus account level, the Fund’s ability to monitor and detect market timing by investors in these omnibus accounts may be limited in certain circumstances, and certain of these insurance companies or financial intermediaries may charge the Fund a fee for providing certain shareholder financial information requested as part of the Fund’s surveillance process. The netting effect makes it more difficult to identify, locate and eliminate market timing activities. In addition, those investors who engage in market timing and other excessive trading activities may employ a variety of techniques to avoid detection. There can be no assurance that the Fund and Goldman Sachs will be able to identify all those who trade excessively or employ a market timing strategy, and curtail their trading in every instance. If necessary, the Trust may prohibit additional purchases of Fund shares by a participating insurance company or intermediary or by certain of their customers. Insurance companies and intermediaries may also monitor their customers’ trading activities in the Fund. The criteria used by insurance companies or intermediaries to monitor for excessive trading may differ from the criteria used by the Fund. If an insurance company or intermediary fails to cooperate in the implementation or enforcement of the Trust’s excessive trading policies, the Trust may take certain actions including terminating the relationship.

Taxation

The Fund is treated as a separate corporate entity for federal tax purposes. The Fund has elected to be treated as a regulated investment company and intends to qualify for such treatment for each taxable year under Subchapter M of Subtitle A, Chapter 1 of the Code. In addition, the Fund intends to qualify under the Code with respect to the diversification requirements related to variable contracts. Shares of the Fund are sold primarily to separate accounts of insurance companies in conjunction with variable annuity and variable life insurance contracts. Provided that the Fund and a separate account investing in the Fund satisfy applicable tax requirements, including certain diversification rules applicable to separate accounts, the Fund will not be subject to federal tax and any distributions from the Fund to the separate account will be exempt from current federal income taxation to the extent that such distributions accumulate in a variable annuity contract or a variable life insurance contract. Applicable federal tax law permits separate accounts of insurance companies to look-through to the assets of the Fund for purposes of the diversification requirements applicable to variable contracts such that the separate account is treated as owning a pro rata portion of each asset of the Fund. Such look-through applies not only in the case where all beneficial interests in the Fund are held by separate accounts of insurance companies in conjunction with variable annuity and variable life insurance contracts and where public access to the Fund is available exclusively through the purchase of a variable contract (i.e., an “insurance dedicated fund”), but also where another insurance dedicated fund invests in the Fund or where shares of the Fund are held by another qualified purchaser including, for example, a qualified pension or retirement plan or a qualified tuition program (such as a Section 529 plan). If the Fund, or another insurance dedicated fund investing in the Fund, fails to satisfy the requirements for the look-through treatment described above, then an investment in the Fund would be treated as a single investment of the separate account (as opposed to the separate account being treated as owning a pro rata portion of each asset of the Fund), which could adversely impact the ability of a separate account to satisfy the diversification rules applicable to it and could adversely impact the tax advantaged treatment of a variable contract.

Persons investing in variable annuity or variable life insurance contracts should refer to the prospectuses with respect to such contracts for further information regarding the tax treatment of the contracts and the separate accounts in which the contracts are invested.

Appendix A

Additional Information on Portfolio Risks, Securities and Techniques

A. GENERAL PORTFOLIO RISKS

The Fund will be subject to the risks associated with equity investments. “Equity investments” may include common stocks, preferred stocks, interests in REITs, convertible debt obligations, convertible preferred stocks, equity interests in trusts, partnerships, joint ventures, limited liability companies and similar enterprises, MLPs, other investment companies (including ETFs), warrants, stock purchase rights and synthetic and derivative instruments (such as swaps, options and futures contracts) that have economic characteristics similar to equity securities. In general, the values of equity investments fluctuate in response to the activities of individual companies and in response to general market and economic conditions. Accordingly, the values of the equity investments that the Fund holds may decline over short or extended periods. The stock markets tend to be cyclical, with periods when stock prices generally rise and periods when prices generally decline. This volatility means that the value of your investment in the Fund may increase or decrease. In recent years, certain stock markets have experienced substantial price volatility. To the extent the Fund’s net assets decrease or increase in the future due to price volatility or share redemption or purchase activity, the Fund’s expense ratio may correspondingly increase or decrease from the expense ratio disclosed in the Prospectus.

To the extent the Fund invests in pooled investment vehicles (including investment companies and ETFs) and REITs, the Fund will be affected by the investment policies, practices and performance of such entities in direct proportion to the amount of assets the Fund invests therein.

To the extent it invests in fixed income securities, the Fund will also be subject to the risks associated with fixed income securities. These risks include interest rate risk, credit/default risk and call/extension risk. In general, interest rate risk involves the risk that when interest rates decline, the market value of fixed income securities tends to increase. Conversely, when interest rates increase, the market value of fixed income securities tends to decline. Credit/default risk involves the risk that an issuer or guarantor could default on its obligations, and the Fund will not recover its investment. Call risk and extension risk are normally present when the borrower has the option to prepay its obligations.

A rising interest rate environment could cause the value of the Fund’s fixed income securities to decrease, and fixed income markets to experience increased volatility in addition to heightened levels of liquidity risk. Additionally, decreases in the value of fixed income securities could lead to increased shareholder redemptions, which could impair the Fund’s ability to achieve its investment objective. The risks associated with increasing interest rates are heightened given that interest rates are near historic lows, but may be expected to increase in the future with unpredictable effects on the markets and the Fund’s investments.

The Investment Adviser will not consider the portfolio turnover rate a limiting factor in making investment decisions for the Fund. A high rate of portfolio turnover (100% or more) involves correspondingly greater expenses which must be borne by the Fund and its shareholders. The portfolio turnover rate is calculated by dividing the lesser of the dollar amount of sales or purchases of portfolio securities by the average monthly value of the Fund’s portfolio securities, excluding securities having a maturity at the date of purchase of one year or less. See “Financial Highlights” in Appendix B for a statement of the Fund’s historical portfolio turnover rates.

The Fund may, from time to time, enter into arrangements with certain brokers or other counterparties that require the segregation of collateral. For operational, cost or other reasons, when setting up arrangements relating to the execution/clearing of trades, the Fund may choose to select a segregation model that may not be the most protective option available in the case of a default by a broker or counterparty.

The following sections provide further information on certain types of securities and investment techniques that may be used by the Fund, including their associated risks. Additional information is provided in the SAI, which is available upon request. Among other things, the SAI describes certain fundamental investment restrictions that cannot be changed without shareholder approval. You should note, however, that all investment objectives, and all investment policies not specifically designated as fundamental are non-fundamental and may be changed without shareholder approval. If there is a change in the Fund’s investment objective, you should consider whether the Fund remains an appropriate investment in light of your then current financial position and needs.

B. OTHER PORTFOLIO RISKS

Risks of Investing in Mid-Capitalization and Small-Capitalization Companies. The Fund may, to the extent consistent with its investment policies, invest in mid- and small-capitalization companies. Investments in mid- and small-capitalization companies involve greater risk and portfolio price volatility than investments in larger capitalization stocks. Among the reasons for the greater price volatility of these investments are the less certain growth prospects of smaller firms and the lower degree of liquidity in the markets for such securities. Mid- and small-capitalization companies may be thinly traded and may have to be sold at a discount from current

market prices or in small lots over an extended period of time. In addition, these securities are subject to the risk that during certain periods the liquidity of particular issuers or industries, or all securities in particular investment categories, will shrink or disappear suddenly and without warning as a result of adverse economic or market conditions, or adverse investor perceptions whether or not accurate. Because of the lack of sufficient market liquidity, the Fund may incur losses because it will be required to effect sales at a disadvantageous time and only then at a substantial drop in price. Mid- and small-capitalization companies include “unseasoned” issuers that do not have an established financial history; often have limited product lines, markets or financial resources; may depend on or use a few key personnel for management; and may be susceptible to losses and risks of bankruptcy. Mid- and small-capitalization companies may be operating at a loss or have significant variations in operating results; may be engaged in a rapidly changing business with products subject to a substantial risk of obsolescence; may require substantial additional capital to support their operations, to finance expansion or to maintain their competitive position; and may have substantial borrowings or may otherwise have a weak financial condition. In addition, these companies may face intense competition, including competition from companies with greater financial resources, more extensive development, manufacturing, marketing, and other capabilities, and a larger number of qualified managerial and technical personnel. Transaction costs for these investments are often higher than those of larger capitalization companies. Investments in mid- and small-capitalization companies may be more difficult to price precisely than other types of securities because of their characteristics and lower trading volumes.

Risks of Derivative Investments. The Fund may invest in derivative instruments, including without limitation, options, futures, options on futures, swaps, structured securities and forward contracts and other derivatives relating to foreign currency transactions. Derivatives may be used for both hedging and non-hedging purposes (that is, to seek to increase total return), although suitable derivative instruments may not always be available to the Investment Adviser for these purposes. Losses from derivative instruments can result from a lack of correlation between changes in the value of derivative instruments and the portfolio assets (if any) being hedged, the potential illiquidity of the markets for derivative instruments, the failure of the counterparty to perform its contractual obligations, or the risks related to leverage factors associated with such transactions. Derivatives are also subject to risks arising from margin requirements, which include the risk that the Fund will be required to pay additional margin or set aside additional collateral to maintain open derivative positions and the risk of loss by the Fund of margin deposits in the event of the bankruptcy or other similar insolvency with respect to a broker or counterparty with whom the Fund has an open derivative position. Losses may also arise if the Fund receives cash collateral under the transactions and some or all of that collateral is invested in the market. To the extent that cash collateral is so invested, such collateral will be subject to market depreciation or appreciation, and the Fund may be responsible for any loss that might result from its investment of the counterparty’s cash collateral. If cash collateral is not invested, the Fund may be exposed to additional risk of loss in the event of the insolvency of its custodian holding such collateral. The use of these management techniques also involves the risk of loss if the Investment Adviser is incorrect in its expectation of the timing or level of fluctuations in securities prices, interest rates, currency prices or other variables. Derivative instruments may be harder to value, subject to greater volatility and more likely subject to changes in tax treatment than other investments. For these reasons, the Investment Adviser’s attempts to hedge portfolio risks through the use of derivative instruments may not be successful, and the Investment Adviser may choose not to hedge portfolio risks. Using derivatives for non-hedging purposes presents greater risk of loss than derivatives used for hedging purposes.

Risks of Foreign Investments. The Fund may make foreign investments. Foreign investments involve special risks that are not typically associated with U.S. dollar denominated or quoted securities of U.S. issuers. Foreign investments may be affected by changes in currency rates, changes in foreign or U.S. laws or restrictions applicable to such investments and changes in exchange control regulations (e.g., currency blockage). A decline in the exchange rate of the currency (i.e., weakening of the currency against the U.S. dollar) in which a portfolio security is quoted or denominated relative to the U.S. dollar would reduce the value of the portfolio security. In addition, if the currency in which the Fund receives dividends, interest or other payments declines in value against the U.S. dollar before such income is distributed as dividends to shareholders or converted to U.S. dollars, the Fund may have to sell portfolio securities to obtain sufficient cash to pay such dividends.

Certain foreign markets may rely heavily on particular industries or foreign capital and are more vulnerable to diplomatic developments, the imposition of economic sanctions against a particular country or countries, organizations, entities and/or individuals, changes in international trading patterns, trade barriers, and other protectionist or retaliatory measures. International trade barriers or economic sanctions against foreign countries, organizations, entities and/or individuals may adversely affect the Fund’s foreign holdings or exposures. The type and severity of sanctions and other similar measures, including counter sanctions and other retaliatory actions, that may be imposed could vary broadly in scope, and their impact is impossible to predict. These types of measures may include, but are not limited to, banning a sanctioned country from global payment systems that facilitate cross-border payments, restricting the settlement of securities transactions by certain investors, and freezing the assets of particular countries, entities, or persons. The imposition of sanctions and other similar measures could, among other things, cause a decline in the value and/or liquidity of securities issued by the sanctioned country or companies located in or economically tied to the sanctioned country, downgrades in the credit ratings of the sanctioned country or companies located in or economically tied to the sanctioned country,

devaluation of the sanctioned country's currency, and increased market volatility and disruption in the sanctioned country and throughout the world. Sanctions and other similar measures could limit or prevent the Fund from buying and selling securities (in the sanctioned country and other markets), significantly delay or prevent the settlement of securities transactions, and significantly impact the Fund's liquidity and performance.

Brokerage commissions, custodial services and other costs relating to investment in international securities markets generally are more expensive than in the United States. In addition, clearance and settlement procedures may be different in foreign countries and, in certain markets, such procedures have been unable to keep pace with the volume of securities transactions, thus making it difficult to conduct such transactions.

Foreign issuers are not generally subject to uniform accounting, auditing and financial reporting standards comparable to those applicable to U.S. issuers. There may be less publicly available information about a foreign issuer than about a U.S. issuer. In addition, there is generally less government regulation of foreign markets, companies and securities dealers than in the United States, and the legal remedies for investors may be more limited than the remedies available in the United States. Foreign securities markets may have substantially less volume than U.S. securities markets and securities of many foreign issuers are less liquid and more volatile than securities of comparable domestic issuers. Furthermore, with respect to certain foreign countries, there is a possibility of nationalization, expropriation or confiscatory taxation, imposition of withholding or other taxes on dividend or interest payments (or, in some cases, capital gains distributions), limitations on the removal of funds or other assets from such countries, and risks of political or social instability or diplomatic developments which could adversely affect investments in those countries.

Certain foreign investments may become less liquid in response to social, political or market developments or adverse investor perceptions, or become illiquid after purchase by the Fund, particularly during periods of market turmoil. Certain foreign investments may become illiquid when, for instance, there are few, if any, interested buyers and sellers or when dealers are unwilling to make a market for certain securities. When the Fund holds illiquid investments, its portfolio may be harder to value, especially in changing markets.

If the Fund focuses its investments in one or a few countries and currencies, the Fund may be subjected to greater risks than if the Fund's assets were not geographically focused.

Investments in foreign securities may take the form of sponsored and unsponsored American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs"). ADRs and GDRs represent the right to receive securities of foreign issuers deposited in a bank or other depository. ADRs and certain GDRs are traded in the United States. GDRs may be traded either in the United States or foreign markets. Prices of ADRs are quoted in U.S. dollars. GDRs are not necessarily quoted in the same currency as the underlying security.

Risks of Sovereign Debt. Investment in sovereign debt obligations by the Fund involves risks not present in debt obligations of corporate issuers. The issuer of the debt or the governmental authorities that control the repayment of the debt may be unable or unwilling to repay principal or interest when due in accordance with the terms of such debt, and the Fund may have limited recourse to compel payment in the event of a default. Periods of economic uncertainty may result in the volatility of market prices of sovereign debt, and in turn the Fund's NAV, to a greater extent than the volatility inherent in debt obligations of U.S. issuers.

A sovereign debtor's willingness or ability to repay principal and pay interest in a timely manner may be affected by, among other factors, its cash flow situation, the extent of its foreign currency reserves, the availability of sufficient foreign exchange on the date a payment is due, the relative size of the debt service burden to the economy as a whole, the sovereign debtor's policy toward international lenders, and the political constraints to which a sovereign debtor may be subject.

Risks of Emerging Countries. The Fund may invest in securities of issuers located in, or otherwise economically tied to, emerging countries. The risks of foreign investment are heightened when the issuer is located in an emerging country. Emerging countries are generally located in Africa, Asia, the Middle East, Eastern and Central Europe, and Central and South America. The Fund's purchase and sale of portfolio securities in certain emerging countries may be constrained by limitations relating to daily changes in the prices of listed securities, periodic trading or settlement volume and/or limitations on aggregate holdings of foreign investors. Such limitations may be computed based on the aggregate trading volume by or holdings of the Fund, the Investment Adviser, its affiliates and their respective clients and other service providers. The Fund may not be able to sell securities in circumstances where price, trading or settlement volume limitations have been reached.

Foreign investment in the securities markets of certain emerging countries is restricted or controlled to varying degrees which may limit investment in such countries or increase the administrative costs of such investments. For example, certain Asian countries require governmental approval prior to investments by foreign persons or limit investment by foreign persons to only a specified percentage of an issuer's outstanding securities or a specific class of securities which may have less advantageous terms (including price) than securities of the issuer available for purchase by nationals. In addition, certain countries may restrict or prohibit investment opportunities in issuers or industries deemed important to national interests. Such restrictions may affect the market price, liquidity and rights of securities that may be purchased by the Fund. The repatriation of investment income, capital or the proceeds of securities sales from certain emerging countries is subject to restrictions such as the need for governmental consents, which may make it difficult

for the Fund to invest in such emerging countries. The Fund could be adversely affected by delays in, or a refusal to grant, any required governmental approval for such repatriation. In situations where a country restricts direct investment in securities (which may occur in certain Asian and other countries), the Fund may invest in such countries through other investment funds in such countries.

Emerging market countries may have more or less government regulation and generally do not impose as extensive and frequent accounting, auditing, financial and other reporting requirements as the securities markets of more developed countries. The degree of cooperation between issuers in emerging and frontier market countries with foreign and U.S. financial regulators may vary significantly. Accordingly, regulators may not have sufficient access to audit and oversee issuers, and there could be less information available about issuers in certain emerging market countries. As a result, the Investment Adviser's ability to evaluate local companies or their potential impact on the Fund's performance could be inhibited.

Many emerging countries have experienced currency devaluations and substantial (and, in some cases, extremely high) rates of inflation. Other emerging countries have experienced economic recessions. These circumstances have had a negative effect on the economies and securities markets of such emerging countries. Economies in emerging countries generally are dependent heavily upon commodity prices and international trade and, accordingly, have been and may continue to be affected adversely by the economies of their trading partners, trade barriers, exchange controls, managed adjustments in relative currency values and other protectionist measures imposed or negotiated by the countries with which they trade.

Many emerging countries are subject to a substantial degree of economic, political and social instability. Governments of some emerging countries are authoritarian in nature or have been installed or removed as a result of military coups, while governments in other emerging countries have periodically used force to suppress civil dissent. Disparities of wealth, the pace and success of democratization, and ethnic, religious and racial disaffection, among other factors, have also led to social unrest, violence and/or labor unrest in some emerging countries. Unanticipated political or social developments may result in sudden and significant investment losses. Investing in emerging countries involves greater risk of loss due to expropriation, nationalization, confiscation of assets and property or the imposition of restrictions on foreign investments and on repatriation of capital invested. As an example, in the past some Eastern European governments have expropriated substantial amounts of private property, and many claims of the property owners have never been fully settled. There is no assurance that similar expropriations will not occur in other countries.

The Fund's investment in emerging countries may also be subject to withholding or other taxes, which may be significant and may reduce the return to the Fund from an investment in issuers in such countries.

Settlement procedures in emerging countries are frequently less developed and reliable than those in the United States and may involve the Fund's delivery of securities before receipt of payment for their sale. In addition, significant delays may occur in certain markets in registering the transfer of securities. Settlement or registration problems may make it more difficult for the Fund to value its portfolio securities and could cause the Fund to miss attractive investment opportunities, to have a portion of its assets uninvested or to incur losses due to the failure of a counterparty to pay for securities the Fund has delivered or the Fund's inability to complete its contractual obligations because of theft or other reasons.

The creditworthiness of the local securities firms used by the Fund in emerging countries may not be as sound as the creditworthiness of firms used in more developed countries. As a result, the Fund may be subject to a greater risk of loss if a securities firm defaults in the performance of its responsibilities.

The small size and inexperience of the securities markets in certain emerging countries and the limited volume of trading in securities in those countries may make the Fund's investments in such countries less liquid and more volatile than investments in countries with more developed securities markets (such as the United States, Japan and most Western European countries). The Fund's investments in emerging countries are subject to the risk that the liquidity of a particular investment, or investments generally, in such countries will shrink or disappear suddenly and without warning as a result of adverse economic, market or political conditions or adverse investor perceptions, whether or not accurate. Because of the lack of sufficient market liquidity, the Fund may incur losses because it will be required to effect sales at a disadvantageous time and only then at a substantial drop in price. Investments in emerging countries may be more difficult to value precisely because of the characteristics discussed above and lower trading volumes.

The Fund's use of foreign currency management techniques in emerging countries may be limited. The Investment Adviser anticipates that a significant portion of the Fund's currency exposure in emerging countries may not be covered by those techniques.

Foreign Custody Risk. The Fund may hold foreign securities and cash with foreign banks, agents, and securities depositories appointed by the Fund's custodian (each a "Foreign Custodian"). Some Foreign Custodians may be recently organized or new to the foreign custody business. In some countries, Foreign Custodians may be subject to little or no regulatory oversight over or independent evaluation of their operations. Further, the laws of certain countries may place limitations on the Fund's ability to recover its assets if a Foreign Custodian enters bankruptcy. Investments in emerging markets may be subject to even greater custody risks than investments in more developed markets. Custody services in emerging market countries are very often undeveloped and may be considerably less well regulated than in more developed countries, and thus may not afford the same level of investor protection as would apply in developed countries.

Risks of Illiquid Investments. The Fund may not acquire any “illiquid investment” if, immediately after the acquisition, the Fund would have invested more than 15% of its net assets in illiquid investments that are assets. An “illiquid investment” is an investment that the Fund reasonably expects cannot be sold or disposed of in current market conditions in seven calendar days or less without the sale or disposition significantly changing the market value of the investment. In determining whether an investment is an illiquid investment, the Investment Adviser will take into account actual or estimated daily transaction volume of an investment, group of related investments or asset class and other relevant market, trading, and investment-specific considerations. In addition, in determining the liquidity of an investment, the Investment Adviser must determine whether trading varying portions of a position in a particular portfolio investment or asset class, in sizes that the Fund would reasonably anticipate trading, is reasonably expected to significantly affect its liquidity, and if so, the Fund must take this determination into account when classifying the liquidity of that investment or asset class.

Investments purchased by the Fund that are liquid at the time of purchase may subsequently become illiquid. If one or more investments in the Fund’s portfolio become illiquid, the Fund may exceed the 15% limitation in illiquid investments. In the event that changes in the portfolio or other external events cause the Fund to exceed this limit, the Fund must take steps to bring its illiquid investments that are assets to or below 15% of its net assets within a reasonable period of time. This requirement would not force the Fund to liquidate any portfolio instrument where the Fund would suffer a loss on the sale of that instrument.

In cases where no clear indication of the value of the Fund’s portfolio instruments is available, the portfolio instruments will be valued at their fair value according to the valuation procedures approved by the Board of Trustees. These cases include, among others, situations where a security or other asset or liability does not have a price source, or the secondary markets on which an investment has previously been traded are no longer viable, due to its lack of liquidity. For more information on fair valuation, please see “Shareholder Guide—How Are Shares Priced?”

Credit/Default Risks. Debt securities purchased by the Fund may include U.S. Government Securities (including zero coupon bonds) and securities issued by foreign governments, domestic and foreign corporations, banks and other issuers. Some of these fixed income securities are described in the next section below. Further information is provided in the SAI.

The Fund also has credit rating requirements for the securities it buys, which are applied at the time of purchase. For this purpose, the Fund relies only on the ratings of the following NRSROs: S&P, Moody’s and Fitch, Inc.

Unrated securities may be purchased by the Fund if they are determined by the Investment Adviser to be of a credit quality consistent with the Fund’s credit rating requirements.

Debt securities rated BBB– or higher by S&P or Baa3 or higher by Moody’s or having a comparable credit rating by another NRSRO are considered “investment grade.” Securities rated BBB– or Baa3 are considered medium-grade obligations with speculative characteristics, and adverse economic conditions or changing circumstances may weaken the issuers’ capacity to pay interest and repay principal. For the purpose of determining compliance with any credit rating requirement, the Fund assigns a security, at the time of purchase, the highest rating by an NRSRO if the security is rated by more than one NRSRO. Therefore, a security will be deemed to have met a rating requirement if it receives the minimum required rating from at least one such rating organization even though it has been rated below the minimum rating by one or more other rating organizations, or if unrated by such rating organizations, the security is determined by the Investment Adviser to be of comparable credit quality. A security satisfies the Fund’s minimum rating requirement regardless of its relative ranking (for example, plus or minus) within a designated major rating category (for example, BBB or Baa). If a security satisfies the Fund’s minimum rating requirement at the time of purchase and is subsequently downgraded below that rating, the Fund will not be required to dispose of the security. If a downgrade occurs, the Investment Adviser will consider what action, including the sale of the security, is in the best interest of the Fund and its shareholders.

Temporary Investment Risks. The Fund may, for temporary defensive purposes (and to the extent that it is permitted to invest in the following), invest a certain percentage of its total assets in:

- U.S. Government Securities
- Commercial paper rated at least A-2 by S&P, P-2 by Moody’s or having a comparable credit rating by another NRSRO (or, if unrated, determined by the Investment Adviser to be of comparable credit quality)
- Certificates of deposit
- Bankers’ acceptances
- Repurchase agreements
- Non-convertible preferred stocks and non-convertible corporate bonds with a remaining maturity of less than one year
- ETFs
- Other investment companies
- Cash items

When the Fund’s assets are invested in such instruments, the Fund may not be achieving its investment objective.

C. PORTFOLIO SECURITIES AND TECHNIQUES

This section provides further information on certain types of securities and investment techniques that may be used by the Fund, including their associated risks.

The Fund may purchase other types of securities or instruments similar to those described in this section if otherwise consistent with the Fund's investment objective and policies. Further information is provided in the SAI, which is available upon request.

U.S. Government Securities. The Fund may invest in U.S. Government Securities. U.S. Government Securities include U.S. Treasury obligations and obligations issued or guaranteed by U.S. government agencies, instrumentalities or sponsored enterprises. U.S. Government Securities may be supported by (i) the full faith and credit of the U.S. Treasury; (ii) the right of the issuer to borrow from the U.S. Treasury; (iii) the discretionary authority of the U.S. government to purchase certain obligations of the issuer; or (iv) only the credit of the issuer. U.S. Government Securities also include Treasury receipts, zero coupon bonds and other stripped U.S. Government Securities, where the interest and principal components are traded independently. U.S. Government Securities may also include Treasury inflation-protected securities whose principal value is periodically adjusted according to the rate of inflation.

U.S. Government Securities are deemed to include (i) securities for which the payment of principal and interest is backed by an irrevocable letter of credit issued by the U.S. government, its agencies, authorities or instrumentalities; and (ii) participations in loans made to foreign governments or their agencies that are so guaranteed. Certain of these participations may be regarded as illiquid.

U.S. Treasury Securities have historically involved little risk of loss of principal if held to maturity. However, no assurance can be given that the U.S. government will be able or willing to repay the principal or interest when due or provide financial support to U.S. government agencies, authorities, instrumentalities or sponsored enterprises that issue U.S. Government Securities if it is not obligated to do so by law.

Custodial Receipts and Trust Certificates. The Fund may invest in custodial receipts and trust certificates representing interests in securities held by a custodian or trustee. The securities so held may include U.S. Government Securities or other types of securities in which the Fund may invest. The custodial receipts or trust certificates may evidence ownership of future interest payments, principal payments or both on the underlying securities, or, in some cases, the payment obligation of a third party that has entered into an interest rate swap or other arrangement with the custodian or trustee. For certain securities laws purposes, custodial receipts and trust certificates may not be considered obligations of the U.S. government or other issuer of the securities held by the custodian or trustee. If for tax purposes, the Fund is not considered to be the owner of the underlying securities held in the custodial or trust account, the Fund may suffer adverse tax consequences. As a holder of custodial receipts and trust certificates, the Fund will bear its proportionate share of the fees and expenses charged to the custodial account or trust. The Fund may also invest in separately issued interests in custodial receipts and trust certificates.

Bank Obligations. The Fund may invest in obligations issued or guaranteed by U.S. or foreign banks. Bank obligations, including without limitation, time deposits, bankers' acceptances and certificates of deposit, may be general obligations of the parent bank or may be limited to the issuing branch by the terms of the specific obligations or by government regulations. Banks are subject to extensive but different governmental regulations which may limit both the amount and types of loans which may be made and interest rates which may be charged. In addition, the profitability of the banking industry is largely dependent upon the availability and cost of funds for the purpose of financing lending operations under prevailing money market conditions. General economic conditions as well as exposure to credit losses arising from possible financial difficulties of borrowers play an important part in the operation of this industry.

Corporate Debt Obligations. The Fund may invest in corporate debt obligations. Corporate debt obligations include bonds, notes, debentures, commercial paper and other obligations of corporations to pay interest and repay principal. The Fund may invest in corporate debt obligations issued by U.S. and certain non-U.S. issuers which issue securities denominated in the U.S. dollar (including Yankee and Euro obligations). In addition to obligations of corporations, corporate debt obligations include securities issued by banks and other financial institutions and supranational entities (*i.e.*, the World Bank, the International Monetary Fund, etc.).

Convertible Securities. The Fund may invest in convertible securities. Convertible securities are preferred stock or debt obligations that are convertible into common stock. Convertible securities generally offer lower interest or dividend yields than non-convertible securities of similar quality. Convertible securities have both equity and fixed income risk characteristics. Like all fixed income securities, the value of convertible securities is susceptible to the risk of market losses attributable to changes in interest rates. Generally, the market value of convertible securities tends to decline as interest rates increase and, conversely, to increase as interest rates decline. However, when the market price of the common stock underlying a convertible security exceeds the conversion price of the convertible security, the convertible security tends to reflect the market price of the underlying common stock. As the market price of the underlying common stock declines, the convertible security, like a fixed income security, tends to trade increasingly on a yield basis, and thus may not decline in price to the same extent as the underlying common stock.

Structured Securities. The Fund may invest in structured securities. Structured securities are securities whose value is determined by reference to changes in the value of specific currencies, securities, interest rates, commodities, indices or other financial indicators (the “Reference”) or the relative change in two or more References. Investments in structured securities may provide exposure to certain securities or markets in situations where regulatory or other restrictions prevent direct investments in such issuers or markets.

The interest rate or the principal amount payable upon maturity or redemption may be increased or decreased depending upon changes in the applicable Reference. Structured securities may be positively or negatively indexed, so that appreciation of the Reference may produce an increase or decrease in the interest rate or value of the security at maturity. In addition, changes in the interest rates or the value of the security at maturity may be a multiple of changes in the value of the Reference, effectively leveraging the Fund’s investments so that small changes in the value of the Reference may result in disproportionate gains or losses to the Fund.

Consequently, structured securities may present a greater degree of market risk than many types of securities and may be more volatile, less liquid and more difficult to price accurately than less complex securities. Structured securities are also subject to the risk that the issuer of the structured securities may fail to perform its contractual obligations. Certain issuers of structured products may be deemed to be investment companies as defined in the Investment Company Act of 1940, as amended (the “Investment Company Act”). As a result, the Fund’s investments in structured securities may be subject to the limits applicable to investments in other investment companies.

Structured securities are considered hybrid instruments because they are derivative instruments the value of which depends on, or is derived from or linked to, the value of an underlying asset, interest rate index or commodity. Commodity-linked notes are hybrid instruments because the principal and/or interest payments on those notes is linked to the value of the individual commodities, futures contracts or the performance of one or more commodity indices.

Structured securities include, but are not limited to, equity linked notes. An equity linked note is a note whose performance is tied to a single stock, a stock index or a basket of stocks. Equity linked notes combine the principal protection normally associated with fixed income investments with the potential for capital appreciation normally associated with equity investments. Upon the maturity of the note, the holder generally receives a return of principal based on the capital appreciation of the linked securities. Depending on the terms of the note, equity linked notes may also have a “cap” or “floor” on the maximum principal amount to be repaid to holders, irrespective of the performance of the underlying linked securities. For example, a note may guarantee the repayment of the original principal amount invested (even if the underlying linked securities have negative performance during the note’s term), but may cap the maximum payment at maturity at a certain percentage of the issuance price or the return of the underlying linked securities.

Alternatively, the note may not guarantee a full return on the original principal, but may offer a greater participation in any capital appreciation of the underlying linked securities. The terms of an equity linked note may also provide for periodic interest payments to holders at either a fixed or floating rate. The secondary market for equity linked notes may be limited, and the lack of liquidity in the secondary market may make these securities difficult to dispose of and to value. Equity linked notes will be considered equity securities for purposes of the Fund’s investment objective and policies.

Foreign Currency Transactions. The Fund may, to the extent consistent with its investment policies, purchase or sell foreign currencies on a cash basis or through forward contracts. A forward contract involves an obligation to purchase or sell a specific currency at a future date at a price set at the time of the contract. The Fund may engage in foreign currency transactions for hedging purposes and to seek to protect against anticipated changes in future foreign currency exchange rates.

The Fund may also engage in cross-hedging by using forward contracts in a currency different from that in which the hedged security is denominated or quoted. The Fund may hold foreign currency received in connection with investments in foreign securities when, in the judgment of the Investment Adviser, it would be beneficial to convert such currency into U.S. dollars at a later date (*e.g.*, the Investment Adviser may anticipate that the foreign currency will appreciate against the U.S. dollar).

The Fund may, from time to time, engage in non-deliverable forward transactions to manage currency risk or to gain exposure to a currency without purchasing securities denominated in that currency. A non-deliverable forward is a transaction that represents an agreement between the Fund and a counterparty (usually a commercial bank) to pay the other party the amount that it would cost based on current market rates as of the termination date to buy or sell a specified (notional) amount of a particular currency at an agreed upon foreign exchange rate on an agreed upon future date. If the counterparty defaults, the Fund will have contractual remedies pursuant to the agreement related to the transaction, but the Fund may be delayed or prevented from obtaining payments owed to it pursuant to non-deliverable forward transactions. Such non-deliverable forward transactions will be settled in cash.

Currency exchange rates may fluctuate significantly over short periods of time causing, along with other factors, the Fund’s NAV to fluctuate (when the Fund’s NAV fluctuates, the value of your shares may go up or down). Currency exchange rates also can be affected unpredictably by the intervention of U.S. or foreign governments or central banks, or the failure to intervene, or by currency controls or political developments in the United States or abroad.

Certain forward foreign currency exchange contracts and other currency transactions are not exchange traded or cleared. The market in such forward foreign currency exchange contracts and other privately negotiated currency instruments offers less protection against defaults by the other party to such instruments than is available for currency instruments traded on an exchange. Such contracts are

subject to the risk that the counterparty to the contract will default on its obligations. Because these contracts are not guaranteed by an exchange or clearinghouse, a default on a contract would deprive the Fund of unrealized profits, transaction costs or the benefits of a currency hedge or could force the Fund to cover its purchase or sale commitments, if any, at the current market price.

The Fund is not required to post cash collateral with its counterparties in certain foreign currency transactions. Accordingly, the Fund may remain more fully invested (and more of the Fund's assets may be subject to investment and market risk) than if it were required to post collateral with its counterparties (which is the case with certain transactions). Where the Fund's counterparties are not required to post cash collateral with the Fund, the Fund will be subject to additional counterparty risk.

Options on Securities, Securities Indices and Foreign Currencies. A put option gives the purchaser of the option the right to sell, and the writer (seller) of the option the obligation to buy, the underlying instrument during the option period. A call option gives the purchaser of the option the right to buy, and the writer (seller) of the option the obligation to sell, the underlying instrument during the option period. The Fund may write (sell) call and put options and purchase put and call options on any securities and other instruments in which the Fund may invest or any index consisting of securities or other instruments in which it may invest. The Fund may also, to the extent consistent with its investment policies, purchase and write (sell) put and call options on foreign currencies.

The writing and purchase of options is a highly specialized activity which involves special investment risks. Options may be used for either hedging or cross-hedging purposes, or to seek to increase total return (which presents additional risk). The successful use of options depends in part on the ability of the Investment Adviser to anticipate future price fluctuations and the degree of correlation between the options and securities (or currency) markets. If the Investment Adviser is incorrect in its expectation of changes in market prices or determination of the correlation between the instruments or indices on which options are written and purchased and the instruments in the Fund's investment portfolio, the Fund may incur losses that it would not otherwise incur. The use of options can also increase the Fund's transaction costs. Options written or purchased by the Fund may be traded on either U.S. exchanges or over-the-counter. Foreign and over-the-counter options will present greater possibility of loss because of their greater illiquidity and credit risks.

Futures Contracts and Options and Swaps on Futures Contracts. Futures contracts are standardized, exchange-traded contracts that provide for the sale or purchase of a specified financial instrument or currency at a future time at a specified price. An option on a futures contract gives the purchaser the right (and the writer of the option the obligation) to assume a position in a futures contract at a specified exercise price within a specified period of time. A swap on a futures contract provides an investor with the ability to gain economic exposure to a particular futures market; however, unlike a futures contract that is exchange-traded, a swap on a futures contract is an over-the-counter transaction. A futures contract may be based on a particular securities index. The Fund may engage in futures transactions on U.S. exchanges only with respect to the S&P 500[®] Index.

The Fund may, to the extent consistent with its investment policies, purchase and sell futures contracts, purchase and write call and put options on futures contracts, and enter into swaps on futures contracts, in order to seek to increase total return or to hedge against changes in securities prices or currency exchange rates. The Fund may also enter into closing purchase and sale transactions with respect to such contracts and options.

Futures contracts and related options and swaps present the following risks:

- While the Fund may benefit from the use of futures and options and swaps on futures, unanticipated changes in securities prices or currency exchange rates result in a poorer overall performance than if the Fund had not entered into any futures contracts, options transactions or swaps.
- Because perfect correlation between a futures position and a portfolio position that is intended to be protected is impossible to achieve, the desired protection may not be obtained and the Fund may be exposed to additional risk of loss.
- The loss incurred by the Fund in entering into futures contracts and in writing call options and entering into swaps on futures is potentially unlimited and may exceed the amount of the premium received.
- Futures markets are highly volatile and the use of futures may increase the volatility of the Fund's NAV.
- As a result of the low margin deposits normally required in futures trading, a relatively small price movement in a futures contract may result in substantial losses to the Fund.
- Futures contracts and options and swaps on futures may be illiquid, and exchanges may limit fluctuations in futures contract prices during a single day.

Preferred Stock, Warrants and Stock Purchase Rights. The Fund may invest in preferred stock, warrants and stock purchase rights (or "rights"). Preferred stocks are securities that represent an ownership interest providing the holder with claims on the issuer's earnings and assets before common stock owners but after bond owners. Unlike debt securities, the obligations of an issuer of preferred stock, including dividend and other payment obligations, may not typically be accelerated by the holders of such preferred stock on the occurrence of an event of default or other noncompliance by the issuer of the preferred stock.

Warrants and other rights are options to buy a stated number of shares of common stock at a specified price at any time during the life of the warrant or right. The holders of warrants and rights have no voting rights, receive no dividends and have no rights with respect to the assets of the issuer.

Other Investment Companies. The Fund may invest in securities of other investment companies, including ETFs and money market funds, subject to statutory limitations prescribed by the Investment Company Act or rules, regulations or exemptive relief thereunder. These statutory limitations include in certain circumstances a prohibition on the Fund acquiring more than 3% of the voting shares of any other investment company, and a prohibition on investing more than 5% of the Fund's total assets in securities of any one investment company or more than 10% of total assets in securities of all investment companies.

Subject to applicable law and/or pursuant to an exemptive order obtained from the SEC or under an exemptive rule adopted by the SEC, the Fund may invest in certain other investment companies (including ETFs and money market funds) and business development companies beyond the statutory limits described above or otherwise provided that certain conditions are met. Some of those investment companies may be funds for which the Investment Adviser or any of its affiliates serves as investment adviser, administrator or distributor.

Additionally, to the extent that the Fund serves as an "acquired fund" to another Goldman Sachs Fund or unaffiliated investment company, the Fund's ability to invest in other investment companies and private funds may be limited and, under these circumstances, the Fund's investments in other investment companies and private funds will be consistent with applicable law and/or exemptive rules adopted by or exemptive orders obtained from the SEC. For example, to the extent the Fund serves as an acquired fund in a fund of funds arrangement in reliance on Rule 12d1-4 under the Investment Company Act, the Fund would be prohibited from purchasing or otherwise acquiring the securities of an investment company or private fund if, after such purchase or acquisition, the aggregate value of the Fund's investments in such investment companies and private funds would exceed 10% of the value of the Fund's total assets, subject to limited exceptions (including for investments in money market funds).

The use of ETFs is generally intended to help the Fund match the total return of the particular market segments or indices represented by those ETFs, although that may not be the result. Most ETFs are passively managed investment companies whose shares are purchased and sold on a securities exchange. An ETF generally represents a portfolio of securities designed to track a particular market segment or index. An investment in an ETF generally presents the same primary risks as an investment in a conventional fund (i.e., one that is not exchange-traded) that has the same investment objectives, strategies and policies. In addition, an ETF may fail to accurately track the market segment or index that underlies its investment objective. The price of an ETF can fluctuate, and the Fund could lose money investing in an ETF. Moreover, ETFs are subject to the following risks that do not apply to conventional funds: (i) the market price of the ETF's shares may trade at a premium or a discount to their NAV; (ii) an active trading market for an ETF's shares may not develop or be maintained; and (iii) there is no assurance that the requirements of the exchange necessary to maintain the listing of an ETF will continue to be met or remain unchanged.

The Fund will indirectly bear its proportionate share of any management fees and other expenses paid by such other investment companies, in addition to the fees and expenses regularly borne by the Fund. Although the Fund does not expect to do so in the foreseeable future, the Fund is authorized to invest substantially all of its assets in a single open-end investment company or series thereof that has substantially the same investment objective, policies and fundamental restrictions as the Fund.

Unseasoned Companies. The Fund may invest in companies which (together with their predecessors) have operated less than three years. The securities of such companies may have limited liquidity, which can result in their being priced higher or lower than might otherwise be the case. In addition, investments in unseasoned companies are more speculative and entail greater risk than do investments in companies with an established operating record.

Equity Swaps and Index Swaps. The Fund may invest in equity and index swaps. Equity swaps allow the parties to a swap agreement to exchange the dividend income or other components of return on an equity investment (for example, a group of equity securities or an index) for another payment stream. An equity swap may be used by the Fund to invest in a market without owning or taking physical custody of securities in circumstances in which direct investment may be restricted for legal reasons or is otherwise deemed impractical or disadvantageous. Index swaps allow one party or both parties to a swap agreement to receive one or more payments based off of the return, performance or volatility of an index or of certain securities which comprise the index.

The value of swaps can be very volatile. To the extent that the Investment Adviser does not accurately analyze and predict the potential relative fluctuation of the components swapped with another party, or the creditworthiness of the counterparty, the Fund may suffer a loss, which may be substantial. The value of some components of a swap (such as the dividends on a common stock) may also be sensitive to changes in interest rates. Furthermore, swaps may be illiquid, and the Fund may be unable to terminate its obligations when desired.

Currently, certain standardized swap transactions are subject to mandatory central clearing and exchange trading. Although central clearing and exchange trading is expected to decrease counterparty risk and increase liquidity compared to bilaterally negotiated swaps, central clearing and exchange trading does not eliminate counterparty risk or illiquidity risk entirely. Depending on the size of

the Fund and other factors, the margin required under the rules of a clearinghouse and by a clearing member may be in excess of the collateral required to be posted by the Fund to support its obligations under a similar bilateral, uncleared swap. However, certain applicable regulators have adopted rules imposing certain margin requirements, including minimums, on uncleared swaps which may result in the Fund and its counterparties posting higher amounts for uncleared swaps.

When-Issued Securities and Forward Commitments. The Fund may purchase when-issued securities and make contracts to purchase or sell securities for a fixed price at a future date beyond customary settlement time. When-issued securities are securities that have been authorized, but not yet issued. When-issued securities are purchased in order to secure what is considered to be an advantageous price or yield to the Fund at the time of entering into the transaction. A forward commitment involves the entering into a contract to purchase or sell securities for a fixed price at a future date beyond the customary settlement period.

The purchase of securities on a when-issued or forward commitment basis involves a risk of loss if the value of the security to be purchased declines before the settlement date. Conversely, the sale of securities on a forward commitment basis involves the risk that the value of the securities sold may increase before the settlement date. Although the Fund will generally purchase securities on a when-issued or forward commitment basis with the intention of acquiring the securities for its portfolio, the Fund may dispose of when-issued securities or forward commitments prior to settlement if the Investment Adviser deems it appropriate. When purchasing a security on a when-issued basis or entering into a forward commitment, the Fund must identify on its books liquid assets, or engage in other appropriate measures, to “cover” its obligations.

Repurchase Agreements. Repurchase agreements involve the purchase of securities subject to the seller’s agreement to repurchase them at a mutually agreed upon date and price. The Fund may enter into repurchase agreements with counterparties approved by the Investment Adviser pursuant to procedures approved by the Board of Trustees that furnish collateral at least equal in value or market price to the amount of their repurchase obligation. The collateral may consist of any type of security (government or corporate) of any or no credit rating. Repurchase agreements involving obligations other than U.S. Government Securities may be subject to additional risks.

If the other party or “seller” defaults, the Fund might suffer a loss to the extent that the proceeds from the sale of the underlying securities and other collateral held by the Fund are less than the repurchase price and the Fund’s costs associated with delay and enforcement of the repurchase agreement. In addition, in the event of bankruptcy of the seller, the Fund could suffer additional losses if a court determines that the Fund’s interest in the collateral is not enforceable.

The Fund, together with other registered investment companies having advisory agreements with the Investment Adviser or any of its affiliates, may transfer uninvested cash balances into a single joint account, the daily aggregate balance of which will be invested in one or more repurchase agreements.

Downgraded Securities. After its purchase, a portfolio security may be assigned a lower rating or cease to be rated, which may affect the market value and liquidity of the security. If this occurs, the Fund may continue to hold the security if the Investment Adviser believes it is in the best interest of the Fund and its shareholders.

Lending of Portfolio Securities. The Fund may engage in securities lending. Securities lending involves the lending of securities owned by the Fund to financial institutions such as certain broker-dealers, including, as permitted by the SEC, Goldman Sachs. The borrowers are required to secure their loans continuously with cash, cash equivalents, U.S. Government Securities or letters of credit in an amount at least equal to the market value of the securities loaned. Cash collateral may be invested by the Fund in short-term investments, including registered and unregistered investment pools managed by the Investment Adviser or its affiliates and from which the Investment Adviser or its affiliates may receive fees. To the extent that cash collateral is so invested, such collateral will be subject to market depreciation or appreciation, and the Fund will be responsible for any loss that might result from its investment of the borrowers’ collateral. If the Investment Adviser determines to make securities loans, the value of the securities loaned may not exceed 33⅓% of the value of the total assets of the Fund (including the loan collateral). Loan collateral (including any investment of the collateral) is not subject to the percentage limitations described elsewhere in the Prospectus regarding investments in fixed income securities and cash equivalents.

The Fund may lend its securities to increase its income. The Fund may, however, experience delay in the recovery of its securities or incur a loss if the institution with which it has engaged in a portfolio loan transaction breaches its agreement with the Fund or its agent, or becomes insolvent.

Borrowings. The Fund can borrow money from banks and other financial institutions in amounts not exceeding one-third of their total assets (including the amount borrowed) for temporary or emergency purposes.

REITs. The Fund may invest in REITs. REITs are pooled investment vehicles that invest primarily in either real estate or real estate related loans. The value of a REIT is affected by changes in the value of the properties owned by the REIT or securing mortgage loans held by the REIT. REITs are dependent upon the ability of the REITs’ managers, and are subject to heavy cash flow dependency, default by borrowers and the qualification of the REITs under applicable regulatory requirements for favorable income tax treatment. REITs are also subject to risks generally associated with investments in real estate including possible declines in the value of real

estate, general and local economic conditions, environmental problems and changes in interest rates. To the extent that assets underlying a REIT are concentrated geographically, by property type or in certain other respects, these risks may be heightened. The Fund will indirectly bear its proportionate share of any expenses, including management fees, paid by a REIT in which it invests.

Appendix B

Financial Highlights

The financial highlights table is intended to help you understand the Fund's financial performance for the past five years (or less if the Fund has been in operation for less than five years). Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have earned or lost on an investment in the Fund (assuming reinvestment of all dividends and distributions). Total return reflects Fund level expenses but does not reflect fees and expenses associated with any variable annuity contract or variable life insurance policy that uses the Fund as an investment option for any contract or policy. If total return reflected all of those fees and expenses, total return would be reduced. This information has been audited by PricewaterhouseCoopers LLP, whose report, along with the Fund's financial statements, is included in the Fund's Form N-CSR dated December 31, 2024.

	U.S. Equity Insights Fund				
	Service Shares				
	Year Ended December 31,				
	2024	2023	2022	2021	2020
Per Share Data					
Net asset value, beginning of year	\$ 19.71	16.02	\$ 20.23	\$ 20.21	\$ 18.04
Net investment income ^(a)	0.08	0.11	0.11	0.14	0.12
Net realized and unrealized gain (loss)	5.51	3.66	(4.13)	5.64	2.99
Total from investment operations	5.59	3.77	(4.02)	5.78	3.11
Distributions to shareholders from net investment income	(0.10)	(0.08)	(0.10)	(0.14)	(0.12)
Distributions to shareholders from net realized gains	(3.30)	–	(0.09)	(5.62)	(0.82)
Total distributions	(3.40)	(0.08)	(0.19)	(5.76)	(0.94)
Net asset value, end of year	\$ 21.90	\$ 19.71	\$ 16.02	\$ 20.23	\$ 20.21
Total Return^(b)	28.00%	23.59%	(19.90)%	29.11%	17.27%
Net assets, end of year (in 000's)	\$46,655	\$43,631	\$41,870	\$61,849	\$54,149
Ratio of net expenses to average net assets	0.77%	0.78%	0.77%	0.77%	0.77%
Ratio of total expenses to average net assets	0.95%	0.94%	0.97%	0.93%	1.00%
Ratio of net investment income to average net assets	0.36%	0.62%	0.64%	0.60%	0.63%
Portfolio turnover rate ^(c)	204%	201%	203%	206%	203%

(a) Calculated based on the average shares outstanding methodology.

(b) Assumes investment at the NAV at the beginning of the year, reinvestment of all dividends and distributions, a complete redemption of the investment at the NAV at the end of the year and no sales or redemption charges (if any). Total returns would be reduced if a sales or redemption charge was taken into account. Returns do not reflect the impact of taxes to shareholders relating to Fund distributions or the redemption of Fund shares.

(c) The Fund's portfolio turnover rate is calculated in accordance with regulatory requirements, without regard to transactions involving short term investments and certain derivatives. If such transactions were included, the Fund's portfolio turnover rate may be higher.
