Effective January 24, 2023, open-end mutual funds and exchange traded funds will be required to provide shareholders with streamlined annual and semi-annual shareholder reports ("Tailored Shareholder Reports"). Funds will be required to prepare a separate Tailored Shareholder Report for each share class of a fund that highlights key information to investors. Other information, including financial statements, will no longer appear in a fund's shareholder report, but will be available online, delivered free of charge upon request, and filed with the Securities and Exchange Commission on a semi-annual basis on Form N-CSR. The new requirements have a compliance date of July 24, 2024.

Goldman Sachs Access Fixed Income ETFs

February 29, 2024

The following are highlights both of key factors affecting the fixed income market and of any key changes made to the Goldman Sachs Access Fixed Income ETFs (the "Funds") during the six months ended February 29, 2024 (the "Reporting Period"). A streamlined annual shareholder report covering the 12 months ended August 31, 2024 will be provided to Fund shareholders, per new Securities and Exchange Commission requirements with a compliance date of July 24, 2024.

Market and Economic Review

- Global fixed income markets broadly recorded positive returns for the Reporting Period, with performance influenced most by central bank monetary policy, interest rate volatility and macroeconomic data.
- In September 2023, when the Reporting Period began, global fixed income markets weakened. Bond yields, which move inversely with bond prices, rose as investors anticipated the U.S. Federal Reserve ("Fed") and other developed markets' central banks would keep interest rates higher for longer.
- In the fourth calendar quarter of 2023, interest rates were volatile, as developed markets' central banks generally remained on hold and investors speculated about when the Fed might begin easing its monetary policy.
- During October 2023, tight U.S. financial conditions, led by higher long-term interest rates, suggested to some observers that additional Fed policy tightening might be unnecessary. Global bond yields hit multi-year highs, with the 10-year U.S. Treasury yield briefly breaching 5% for the first time since 2007.
- November then saw the greatest easing of U.S. financial conditions in any month during the previous 40 years. Global bond yields plunged, with the 10-year U.S. Treasury yield falling approximately 67 basis points. (A basis point is 1/100th of a percentage point.).
 - Factors behind easing financial conditions included ongoing disinflation, soft-landing optimism and expectations of a dovish Fed pivot. (A soft landing, in economics, is a cyclical downturn that avoids recession. It typically describes attempts by central banks to raise interest rates just enough to stop an economy from overheating and experiencing high inflation, without causing a significant increase in unemployment, or a hard landing. Dovish suggests lower interest rates; opposite of hawkish.)
- In December, the Fed signaled it might have reached the peak of its current monetary policy tightening cycle, while its median dot plot projection showed 75 basis points of rate cuts in 2024. (The dot plot shows interest rate projections of the members of the Federal Open Market Committee.) U.S. financial conditions eased further, and the 10-year U.S. Treasury yield fell below 4% for the first time since August 2023.
- Global bond yields continued to fluctuate during January 2024. They were, by turns, pushed up by hawkish Fed commentary and soft-landing optimism and pushed down by progress on disinflation and expectations about potential central bank rate cuts.
- Developed markets' central banks maintained their policy stance during the month.
- The central banks indicated interest rate cuts were unlikely in the first calendar quarter but generally removed their hiking biases from policy statements and signaled they expected policy rates to be lower at the end of 2024.
- In February, ongoing strength in the U.S. economy and improving investor sentiment in Europe boosted the performance of risk
 assets overall. Global bond yields were volatile, as markets pulled back expectations for the timing of central bank rate cuts,
 which sent government bond yields lower.
- · For the Reporting Period overall, intermediate and long-term U.S. Treasury yields rose, while short-term U.S. Treasury yields fell.
- The U.S. Treasury yield curve was inverted between two-year and 10-year maturities throughout the Reporting Period. (When the yield curve is inverted, two-year yields are higher than 10-year yields. Historically, an inverted U.S. Treasury yield curve often precedes an economic recession.) The best performing sectors within the S&P 500 Index during the Reporting Period were materials, industrials, energy and financials, while the weakest performing sectors were utilities, consumer discretionary, real estate and communication services.
- Most non-government bond sectors outperformed U.S. Treasuries during the Reporting Period, led by U.S. high yield corporate bonds and emerging markets debt, with each sector delivering positive absolute returns overall. To a more modest degree, investment grade corporate bonds, securitized bonds, including mortgage-backed securities, and Treasury inflation protected

1

securities also posted positive absolute returns and outperformed U.S. Treasuries during the Reporting Period. As the Reporting Period began in September 2022, international equity markets declined, weighed down by heightened inflationary pressures, aggressive global interest rate hikes, recession concerns and the rampant spread of COVID-19.

Fund Changes and Highlights

No material changes were made to the Funds during the Reporting Period.

Access Emerging Markets USD Bond ETF

as of February 29, 2024

FUND SNAPSHOT As of February 29, 2024 Market Price¹ \$40.66 Net Asset Value ("NAV")¹ \$40.61

The Market Price is the price at which the Fund's shares are trading on the Cboe BZX Exchange, Inc. ("Cboe BZX"). The Market Price of the Fund's shares will fluctuate and, at the time of sale, shares may be worth more or less than the original investment or the Fund's then current NAV. The NAV is the market value of one share of the Fund. This amount is derived by dividing the total value of all the securities in the Fund's portfolio, plus other assets, less any liabilities, by the number of Fund shares outstanding. Fund shares are not individually redeemable and are issued and redeemed by the Fund at their NAV only in large, specified blocks of shares called creation units. Shares otherwise can be bought and sold only through exchange trading at market price (not NAV). Shares may trade at a premium or discount to their NAV in the secondary market. Information regarding how often shares of the Fund traded on Cboe BZX at a price above (i.e., at a premium) or below (i.e., at a discount) the NAV of the Fund can be found at www. GSAMFUNDS.com/ETFs.

PERFORMANCE REVIEW			
September 1, 2023-February 29, 2024	Fund Total Return (based on NAV) ²	Fund Total Return (based on Market Price) ²	FTSE Goldman Sachs Emerging Markets USD Bond Index ³
Shares	5.69%	5.67%	5.75%

- ² Total returns are calculated assuming purchase of a share at the market price or NAV on the first day and sale of a share at the market price or NAV on the last day of each period reported. The Total Returns based on NAV and Market Price assume the reinvestment of dividends and do not reflect brokerage commissions in connection with the purchase or sale of Fund shares, which if included would lower the performance shown above. The NAV used in the Total Return calculations assumes all management fees incurred by the Fund. Market Price returns are based upon the last trade at 4:00 pm EST and do not reflect the returns you would receive if you traded shares at other times. The first day of secondary market trading is typically several days after the date on which the Fund commenced investment operations; therefore, the NAV of the Fund is used as a proxy for the period from inception of investment operations to the first day of secondary market trading to calculate the Market Price returns. Total returns for periods less than one full year are not annualized.
- The Index was developed and is calculated and maintained by FTSE Fixed Income LLC ("FTSE"), a trading name of the London Stock Exchange Group plc and its group undertakings (collectively, the "LSE Group" or the "Index Provider"). FTSE is not affiliated with the Fund or GSAM. The Fund is not sponsored, endorsed, sold or promoted by FTSE or any of its affiliates and FTSE makes no representation to any owner or prospective owner of the Fund regarding the advisability of investing in securities generally or in the Fund particularly, or the ability of the Fund to track the price and yield performance of the Index or the ability of the Index to track general bond market performance. FTSE's only relationship to GSAM ("Licensee") is the licensing of certain information, data, trademarks and trade names of FTSE or its affiliates. The Index is determined, composed and calculated by FTSE without regard to the Fund. FTSE has no obligation to take the needs of the owners or prospective owners of the Fund into consideration in determining, composing or calculating the Index. FTSE is not responsible for and has not participated in the determination of the prices and amount of the shares to be issued by the Fund or the timing of the issuance or sale of the shares to be issued by the Fund or in the determination or calculation of the equation by which the shares to be issued by the Fund are to be converted into cash. FTSE has no obligation or liability in connection with the administration, marketing or trading of the Fund. The Index Provider may delay or change a scheduled rebalancing or reconstitution of the Index or the implementation of certain rules at its sole discretion.

The returns set forth in the table above represent past performance. Past performance does not guarantee future results. The Fund's investment returns and principal value will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted above. Please visit our website at www.GSAMFUNDS.com/ETFs to obtain the most recent month-end returns. Performance reflects applicable fee waivers and/or expense limitations in effect during the periods shown. In their absence, performance would be reduced. Returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the sale of Fund shares.

FUND SNAPSHOT As of February 29, 2024 Market Price¹ \$45.34 Net Asset Value ("NAV")¹ \$45.39

The Market Price is the price at which the Fund's shares are trading on the NYSE Arca, Inc. ("NYSE Arca"). The Market Price of the Fund's shares will fluctuate and, at the time of sale, shares may be worth more or less than the original investment or the Fund's then current NAV. The NAV is the market value of one share of the Fund. This amount is derived by dividing the total value of all the securities in the Fund's portfolio, plus other assets, less any liabilities, by the number of Fund shares outstanding. Fund shares are not individually redeemable and are issued and redeemed by the Fund at their NAV only in large, specified blocks of shares called creation units. Shares otherwise can be bought and sold only through exchange trading at market price (not NAV). Shares may trade at a premium or discount to their NAV in the secondary market. Information regarding how often shares of the Fund traded on NYSE Arca at a price above (i.e., at a premium) or below (i.e., at a discount) the NAV of the Fund can be found at www.GSAMFUNDS.com/ETFs.

- Total returns are calculated assuming purchase of a share at the market price or NAV on the first day and sale of a share at the market price or NAV on the last day of each period reported. The Total Returns based on NAV and Market Price assume the reinvestment of dividends and do not reflect brokerage commissions in connection with the purchase or sale of Fund shares, which if included would lower the performance shown above. The NAV used in the Total Return calculations assumes all management fees incurred by the Fund. Market Price returns are based upon the last trade at 4:00 pm EST and do not reflect the returns you would receive if you traded shares at other times. The first day of secondary market trading is typically several days after the date on which the Fund commenced investment operations; therefore, the NAV of the Fund is used as a proxy for the period from inception of investment operations to the first day of secondary market trading to calculate the Market Price returns. Total returns for periods less than one full year are not annualized.
- The Index was developed and is calculated and maintained by FTSE Fixed Income LLC ("FTSE"), a trading name of the London Stock Exchange Group plc and its group undertakings (collectively, the "LSE Group" or the "Index Provider"). FTSE is not affiliated with the Fund or GSAM. The Fund is not sponsored, endorsed, sold or promoted by FTSE or any of its affiliates and FTSE makes no representation to any owner or prospective owner of the Fund regarding the advisability of investing in securities generally or in the Fund particularly, or the ability of the Fund to track the price and yield performance of the Index or the ability of the Index to track general bond market performance. FTSE's only relationship to GSAM ("Licensee") is the licensing of certain information, data, trademarks and trade names of FTSE or its affiliates. The Index is determined, composed and calculated by FTSE without regard to the Fund. FTSE has no obligation to take the needs of the owners or prospective owners of the Fund into consideration in determining, composing or calculating the Index. FTSE is not responsible for and has not participated in the determination of the prices and amount of the shares to be issued by the Fund or the timing of the issuance or sale of the shares to be issued by the Fund or in the determination or calculation of the equation by which the shares to be issued by the Fund are to be converted into cash. FTSE has no obligation or liability in connection with the administration, marketing or trading of the Fund. The Index Provider may delay or change a scheduled rebalancing or reconstitution of the Index or the implementation of certain rules at its sole discretion.
- ⁴ The Bloomberg US Corporate Investment Grade Index measures the investment grade, fixed-rate, taxable corporate bond market. It includes USD-denominated securities publicly issued by US and non-US industrial, utility and financial issuers.

The returns set forth in the table above represent past performance. Past performance does not guarantee future results. The Fund's investment returns and principal value will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance quoted above. Please visit our website at www.GSAMFUNDS.com/ETFs to obtain the most recent month-end returns. Returns do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the sale of Fund shares.

NET ASSETS – 10	0.0%		\$	430,298,209

The percentage shown for each investment category reflects the value of investments in that category as a percentage of net assets.

- (a) Interest rates represent either the stated coupon rate, annualized yield on date of purchase for discounted securities, or, for floating rate securities, the current reset rate, which is based upon current interest rate indices.
- (b) TBA (To Be Announced) Securities are purchased on a forward commitment basis with an approximate principal amount and no defined maturity date. The actual principal and maturity date will be determined upon settlement when the specific mortgage pools are assigned. Total market value of TBA securities (excluding forward sales contracts, if any) amounts to \$42,438,046 which represents approximately 9.9% of the Fund's net assets as of February 29, 2024.
- (c) Variable rate security. Interest rate or distribution rate disclosed is that which is in effect on February 29, 2024.
- (d) Issued with a zero coupon. Income is recognized through the accretion of discount.
- (e) Exempt from registration under Rule 144A of the Securities Act of 1933.
- (f) Represents an affiliated issuer.

- (a) Exempt from registration under Rule 144A of the Securities Act of 1933.
- (b) Variable rate security. Interest rate or distribution rate disclosed is that which is in effect on February 29, 2024.
- (c) When-issued security.

- (d) Interest rates represent either the stated coupon rate, annualized yield on date of purchase for discounted securities, or, for floating rate securities, the current reset rate, which is based upon current interest rate indices.
- (e) Zero coupon bond until next reset date.
- (f) Less than 0.05%
- (g) Represents an affiliated issuer.

Notes to Financial Statements

February 29, 2024 (Unaudited)

1. ORGANIZATION

Goldman Sachs ETF Trust (the "Trust") is an open-end management investment company, registered under the Investment Company Act of 1940, as amended (the "Act"), consisting of multiple series. The Trust was organized as a Delaware statutory trust on December 16, 2009. The following table lists those series of the Trust that are included in this report (collectively, the "Funds" or individually a "Fund") along with their respective diversification status under the Act:

Fund	Diversified/ Non-diversified
Access Emerging Markets USD Bond ETF	Diversified
Access High Yield Corporate Bond ETF	Diversified
Access Inflation Protected USD Bond ETF	Diversified
Access Investment Grade Corporate 1-5 Year Bond ETF	Diversified
Access Investment Grade Corporate Bond ETF	Diversified
Access Treasury 0-1 Year ETF	Diversified
Access U.S. Aggregate Bond ETF	Diversified
Access Ultra Short Bond ETF	Diversified

The investment objective of each Fund (except the Access Ultra Short Bond ETF) is to provide investment results that closely correspond, before fees and expenses, to the performance of its respective Index. The Access Ultra Short Bond ETF seeks to provide current income with preservation of capital.

Goldman Sachs Asset Management, L.P. ("GSAM"), an affiliate of Goldman Sachs & Co. LLC ("Goldman Sachs"), serves as investment adviser to the Funds pursuant to a management agreement (the "Agreement") with the Trust. Each Fund is an exchange-traded fund ("ETF"). Shares of the Access High Yield Corporate Bond ETF, Access Investment Grade Corporate 1-5 Year Bond ETF, Access Investment Grade Corporate Bond ETF, Access Treasury 0-1 Year ETF and Access U.S. Aggregate Bond ETF are listed and traded on the NYSE Arca, Inc. ("NYSE Arca"), and shares of the Access Emerging Markets USD Bond ETF, Access Inflation Protected USD Bond ETF and Access Ultra Short Bond ETF are listed and traded on the Cboe BZX Exchange, Inc. ("Cboe BZX"). Market prices for the Funds' shares may be different from their net asset value ("NAV"). The Funds issue and redeem shares at their respective NAV only in blocks of a specified number of shares, or multiples thereof, referred to as "Creation Units". Creation Units are issued and redeemed generally for a designated portfolio of securities (including any portion of such securities for which cash may be substituted) and a specified amount of cash. Shares generally trade in the secondary market in quantities less than a Creation Unit at market prices that change throughout the day. Only those that have entered into an authorized participant agreement with ALPS Distributors, Inc. (the "Distributor") may do business directly with the Funds.

2. SIGNIFICANT ACCOUNTING POLICIES

The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") and require management to make estimates and assumptions that may affect the reported amounts and disclosures. Actual results may differ from those estimates and assumptions. Each Fund is an investment company under GAAP and follows the accounting and reporting guidance applicable to investment companies.

A. Investment Valuation — The Funds' valuation policy is to value investments at fair value.

2. SIGNIFICANT ACCOUNTING POLICIES (continued)

B. Investment Income and Investments — Investment income includes interest income, dividend income, and securities lending income, if any. Interest income is accrued daily and adjusted for amortization of premiums and accretion of discounts. Dividend income is recognized on ex-dividend date or, for certain foreign securities, as soon as such information is obtained subsequent to the ex-dividend date. Non-cash dividends, if any, are recorded at the fair market value of the securities received. Investment transactions are reflected on trade date. Realized gains and losses are calculated using identified cost. Investment transactions are recorded on the following business day for daily NAV calculations. Investment income is recorded net of any foreign withholding taxes, less any amounts reclaimable. The Funds may file withholding tax reclaims in certain jurisdictions to recover a portion of amounts previously withheld. Any foreign capital gains tax is accrued daily based upon net unrealized gains, and is payable upon sale of such investments.

For treasury inflation protected securities ("TIPS"), adjustments to principal due to inflation/deflation are reflected as increases/decreases to interest income with a corresponding adjustment to cost.

- C. Expenses Expenses incurred directly by a Fund are charged to the Fund, and certain expenses incurred by the Trust are allocated across the applicable Funds on a straight-line and/or pro-rata basis, depending upon the nature of the expenses, and are accrued daily.
- D. Federal Taxes and Distributions to Shareholders It is each Fund's policy to comply with the requirements of the Internal Revenue Code of 1986, as amended (the "Code"), applicable to regulated investment companies and to distribute each year substantially all of its investment company taxable income and capital gains to its shareholders. Accordingly, each Fund is not required to make any provisions for the payment of federal income tax. Distributions to shareholders are recorded on the ex-dividend date. For each Fund, income distributions, if any, are declared and paid monthly. Capital gains distributions, if any, are declared and paid annually.

Net capital losses, if any, are carried forward to future fiscal years and may be used to the extent allowed by the Code to offset any future capital gains. Losses that are carried forward will retain their character as either short-term or long-term capital losses. Utilization of capital loss carryforwards will reduce the requirement of future capital gains distributions.

The characterization of distributions to shareholders for financial reporting purposes is determined in accordance with federal income tax rules, which may differ from GAAP. The source of each Fund's distributions may be shown in the accompanying financial statements as either from distributable earnings or capital. Certain components of the Funds' net assets on the Statements of Assets and Liabilities reflect permanent GAAP/tax differences based on the appropriate tax character.

3. INVESTMENTS AND FAIR VALUE MEASUREMENTS

U.S. GAAP defines the fair value of a financial instrument as the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price); the Funds' policy is to use the market approach. GAAP establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The level in the fair value hierarchy within which the fair value measurement in its entirety falls shall be determined based on the lowest level input that is significant to the fair value measurement in its entirety. The levels used for classifying investments are not necessarily an indication of the risk associated with investing in these investments. The three levels of the fair value hierarchy are described below:

- Level 1 Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;
- Level 2 Quoted prices in markets that are not active or financial instruments for which significant inputs are observable (including, but not limited to, quoted prices for similar investments, interest rates, foreign exchange rates, volatility and credit spreads), either directly or indirectly;
- Level 3 Prices or valuations that require significant unobservable inputs (including GSAM's assumptions in determining fair value measurement).

The Board of Trustees ("Trustees") has approved Valuation Procedures that govern the valuation of the portfolio investments held by the Funds, including investments for which market quotations are not readily available. With respect to the Funds' investments that do not have readily available market quotations, the Trustees have designated the Adviser as the valuation designee to perform fair valuations pursuant to Rule 2a-5 under the Act (the "Valuation Designee") GSAM has day-to-day responsibility for implementing

February 29, 2024 (Unaudited)

3. INVESTMENTS AND FAIR VALUE MEASUREMENTS (continued)

and maintaining internal controls and procedures related to the valuation of the Funds' investments. To assess the continuing appropriateness of pricing sources and methodologies, GSAM regularly performs price verification procedures and issues challenges as necessary to third party pricing vendors or brokers, and any differences are reviewed in accordance with the Valuation Procedures.

A. Level 1 and Level 2 Fair Value Investments—The valuation techniques and significant inputs used in determining the fair values for investments classified as Level 1 and Level 2 are as follows:

Debt Securities— Debt securities for which market quotations are readily available are valued daily on the basis of quotations supplied by dealers or an independent pricing service. The pricing services may use valuation models or matrix pricing, which consider: (i) yield or price with respect to bonds that are considered comparable in characteristics such as rating, interest rate and maturity date or (ii) quotations from securities dealers to determine current value. With the exception of treasury securities of G7 countries, which are generally classified as Level 1, these investments are generally classified as Level 2 of the fair value hierarchy.

- i. Commercial Paper Commercial paper normally represents short-term unsecured promissory notes issued in bearer form by banks or bank holding companies, corporations, finance companies and other issuers. Commercial paper consists of direct U.S. dollar-denominated obligations of domestic or foreign issuers. Asset-backed commercial paper is issued by a special purpose entity that is organized to issue the commercial paper and to purchase trade receivables or other financial assets.
- ii. Mortgage-Backed and Asset-Backed Securities Mortgage-backed securities represent direct or indirect participations in, or are collateralized by and payable from, mortgage loans secured by residential and/or commercial real estate property. Asset-backed securities include securities whose principal and interest payments are collateralized by pools of other assets or receivables. The value of certain mortgage-backed and asset-backed securities (including adjustable rate mortgage loans) may be particularly sensitive to changes in prevailing interest rates. The value of these securities may also fluctuate in response to the market's perception of the creditworthiness of the issuers.

Asset-backed securities may present credit risks that are not presented by mortgage-backed securities because they generally do not have the benefit of a security interest in collateral that is comparable to mortgage assets. Some asset-backed securities may only have a subordinated claim on collateral.

Stripped mortgage-backed securities are usually structured with two different classes: one that receives substantially all interest payments (interest-only, or "IO" and/or high coupon rate with relatively low principal amount, or "IOette"), and the other that receives substantially all principal payments (principal-only, or "PO") from a pool of mortgage loans. Little to no principal will be received at the maturity of an IO; as a result, periodic adjustments are recorded to reduce the cost of the security until maturity. These adjustments are included in interest income.

- iii. Treasury Inflation Protected Securities TIPS are treasury securities in which the principal amount is adjusted daily to keep pace with inflation, as measured by the U.S. Consumer Pricing Index for Urban Consumers. The repayment of the original bond principal upon maturity is guaranteed by the full faith and credit of the U.S. Government.
- iv. When-Issued Securities and Forward Commitments When-issued securities, including TBA ("To Be Announced") securities, are securities that are authorized but not yet issued in the market and purchased in order to secure what is considered to be an advantageous price or yield to a Fund. A forward commitment involves entering into a contract to purchase or sell securities, typically on an extended settlement basis, for a fixed price at a future date. The purchase of securities on a when-issued or forward commitment basis involves a risk of loss if the value of the security to be purchased declines before the settlement date. Conversely, the sale of securities on a forward commitment basis involves the risk that the value of the securities sold may increase before the settlement date. Although a Fund will generally purchase securities on a when-issued or forward commitment basis with the intention of acquiring the securities for its portfolio, the Fund may dispose of when-issued securities or forward commitments prior to settlement, which may result in a realized gain or loss. For financial reporting purposes, cash collateral that has been pledged to cover obligations of a Fund and cash collateral received, if any, is reported separately on the Statement(s) of Assets and Liabilities as receivables/payables for collateral on other investments. Non-cash collateral pledged by a Fund, if any, is noted in the Schedules of Investments.

Money Market Funds — Investments in the Goldman Sachs Financial Square Government Fund ("Underlying Money Market Fund") are valued at the NAV per share of the Institutional Share class on the day of valuation. These investments are generally

3. INVESTMENTS AND FAIR VALUE MEASUREMENTS (continued)

classified as Level 1 of the fair value hierarchy. For information regarding the Underlying Money Market Fund's accounting policies and investment holdings, please see the Underlying Money Market Fund's shareholder report.

B. Level 3 Fair Value Investments— To the extent that significant inputs to valuation models and other alternative pricing sources are unobservable, or if quotations are not readily available, or if GSAM believes that such quotations do not accurately reflect fair value, the fair value of a Fund's investments may be determined under the Valuation Procedures. GSAM, consistent with its procedures and applicable regulatory guidance, may make an adjustment to the most recent valuation prices of either domestic or foreign securities in light of significant events to reflect what it believes to be the fair value of the securities at the time of determining a Fund's NAV. To the extent investments are valued using single source broker quotations obtained directly from the broker or passed through from third party pricing vendors, such investments are classified as Level 3 investments.

C. Fair Value Hierarchy—The following is a summary of the Funds' investments classified in the fair value hierarchy as of February 29, 2024:

4. AGREEMENTS AND AFFILIATED TRANSACTIONS

Total

A. Management Agreement— Under the Agreements, GSAM manages the Funds, subject to the general supervision of the Trustees.

As compensation for the services rendered pursuant to the Agreement, the assumption of the expenses related thereto and administration of the Funds' business affairs, including providing facilities, GSAM is entitled to a management fee, accrued daily and paid monthly, equal to an annual percentage rate of each Fund's average daily net assets.

The Funds operate under a unitary management fee structure. Under the unitary fee structure, GSAM is responsible for paying substantially all the expenses of each such Fund, excluding payments under the Fund's 12b-1 plan (if any), interest expenses, taxes, acquired fund fees and expenses, brokerage fees, costs of holding shareholder meetings, litigation, indemnification and extraordinary expenses. As the Funds directly pay fees and expenses of the independent Trustees, the management fee collected by GSAM will be reduced by an amount equal to the fees and expenses paid by the Funds to the independent Trustees.

For the six months ended February 29, 2024, contractual and effective net unitary management fees with GSAM were at the following rates:

Fund	Contractual Unitary Management Fee	Effective Net Unitary Management Fee*
Access Emerging Markets USD Bond ETF	0.45%	0.39%
Access High Yield Corporate Bond ETF	0.34	0.34
Access Inflation Protected USD Bond ETF	0.12	0.12
Access Investment Grade Corporate 1-5 Year Bond ETF	0.14	0.14
Access Investment Grade Corporate Bond ETF	0.14	0.14
Access Treasury 0-1 Year ETF	0.14	0.12
Access U.S. Aggregate Bond ETF	0.14	0.12
Access Ultra Short Bond ETF	0.20	0.16

^{*} Effective Net Unitary Management Fee includes the impact of management fee waivers, if any.

GSAM has agreed to waive a portion of its management fee in order to achieve an effective net management fee rate of 0.39%, 0.12% and 0.16% as an annual percentage rate of average daily net assets of the Access Emerging Markets USD Bond ETF, Access Treasury 0-1 Year ETF and the Access Ultra Short Bond ETF, respectively. These arrangements will remain in effect through at least December 29, 2024 for Access Treasury 0-1 Year ETF and Access Ultra Short Bond ETF and through at least February 17, 2025 for Access Emerging Markets USD Bond ETF and prior to such dates the Investment Adviser may not terminate the arrangements

February 29, 2024 (Unaudited)

4. AGREEMENTS AND AFFILIATED TRANSACTIONS (continued)

without the approval of the Board of Trustees. For the six months ended February 29, 2024, GSAM waived \$15,714, \$574,256 and \$122,316 of the Funds' management fees for the Access Emerging Markets USD Bond ETF, Access Treasury 0-1 Year ETF and the Access Ultra Short Bond ETF, respectively.

The Access Emerging Markets USD Bond ETF, Access High Yield Corporate Bond ETF, Access Inflation Protected USD Bond ETF, Access Investment Grade Corporate 1-5 Year Bond ETF, Access Investment Grade Corporate Bond ETF, Access U.S. Aggregate Bond ETF and Access Ultra Short Bond ETF invest in Institutional Shares of the Goldman Sachs Financial Square Government Fund, which is an affiliated Underlying Fund. GSAM has agreed to waive a portion of its management fee payable by the Funds in an amount equal to the management fee it earns as an investment adviser to the affiliated Underlying Fund in which the Funds invest. For the six months ended February 29, 2024, the management fee waived by GSAM for each Fund was as follows:

und		lanagement Fee Waived	
Access Emerging Markets USD Bond ETF	\$	224	
Access High Yield Corporate Bond ETF		770	
Access Inflation Protected USD Bond ETF		319

5. CREATION AND REDEMPTION OF CREATION UNITS

The Trust issues and redeems shares of the Funds only in Creation Units on a continuous basis through the Distributor, without an initial sales load, at NAV next determined after receipt, on any Business Day (as defined in the Statement of Additional Information), of an order in proper form. Shares of the Funds may only be purchased or redeemed by certain financial institutions (each an "Authorized Participant"). An Authorized Participant is either (1) a "Participating Party" or other participant in the clearing process through the Continuous Net Settlement System of the National Securities Clearing Corporation; or (2) a Depository Trust Company participant; which, in either case, must have executed an agreement with the Distributor. Retail investors will typically not qualify as an Authorized Participant or have the resources to buy and sell whole Creation Units. Therefore, they will be unable to purchase or redeem the shares directly from the Funds. Rather, most retail investors will purchase shares in the secondary market at market prices with the assistance of a broker and may be subject to customary brokerage commissions or fees. Fixed creation and redemption transaction fees are imposed in connection with creations and redemptions.

Authorized Participants transacting in Creation Units for cash may also pay a variable charge to compensate the relevant fund for certain transaction costs (e.g. taxes on currency or other financial transactions, and brokerage costs) and market impact expenses relating to investing in portfolio securities. Such variable charges, if any, are included in "Proceeds from sale of shares" in the Statements of Changes in Net Assets.

Net unrealized gain (loss)	\$ (1,804,852)	\$ (1,955,648)	\$ (12,511,159)	\$ (64,914)	\$ (54,813,860)	

7. TAX INFORMATION (continued)			
	Access Treasury 0-1 Year ETF	Access U.S. Aggregate Bond ETF	Access Ultra Short Bond ETF
Tax Cost	\$ 5,706,211,108	\$ 484,678,377	\$ 612,734,926
Gross unrealized gain Gross unrealized loss	314,870 (1,322,817)	1,856,350 (22,438,042)	2,173,645 (2,860,262)
Net unrealized gain (loss)	\$ (1,007,947)	\$ (20,581,692)	\$ (686,617)

The difference between GAAP-basis and tax-basis unrealized gains (losses) is due to wash sales, and differences in tax treatment of market discount accretion and premium amortization, and inflation protected securities.

GSAM has reviewed the Funds' tax positions for all open tax years (the current year, and prior three tax years, as applicable) and has concluded that no provision for income tax is required in the Funds' financial statements. Such open tax year remains subject to examination and adjustment by tax authorities.

8. OTHER RISKS

The Funds' risks include, but are not limited to, the following:

Calculation Methodology Risk — The Index relies on various sources of information to assess the criteria of issuers included in the Index, (or a reference index if applicable) including fundamental information that may be based on assumptions and estimates. Neither the Fund, the Investment Adviser nor the Index Provider can offer assurances that the Index's calculation methodology or sources of information will provide a correct valuation of securities, nor can they guarantee the availability or timeliness of the production of the Index.

Index Risk (each Fund except Goldman Sachs Access Ultra Short Bond ETF) — FTSE Fixed Income LLC (the "Index Provider") constructs each Fund's Index in accordance with a rules-based methodology. A Fund will be negatively affected by general declines in the securities and asset classes represented in its Index. In addition, because the Funds are not "actively" managed, unless a specific security is removed from an Index, a Fund generally would not sell a security because the security's issuer was in financial trouble. Market disruptions and regulatory restrictions could have an adverse effect on a Fund's ability to adjust its exposure to the required levels in order to track the Index. A Fund also does not attempt to take defensive positions under any market conditions, including declining markets. Therefore, a Fund's performance could be lower than funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers. When the Index is rebalanced and a Fund in turn rebalances its portfolio to attempt to increase the correlation between the Fund's portfolio and the Index, any transaction costs and market exposure arising from such portfolio rebalancing may be borne directly by the Fund and its shareholders. The FTSE Goldman Sachs Emerging Markets USD Bond Index is new and has limited performance history. Errors in index data, index computation or the construction of an Index in accordance with its methodology may occur from time to time and may not be identified and corrected by the Index Provider for a period of time or at all, which may have a adverse impact on the applicable Fund and its shareholders. In addition, neither a Fund, the Investment Adviser nor the Index Provider can guarantee the availability or timeliness of the production of the Index.

Industry Concentration Risk — In following its methodology, an Index from time to time may be concentrated to a significant degree in securities of issuers located in a single industry or group of industries. To the extent that an Index concentrates in the securities of issuers in a particular industry or group of industries, a Fund (except Access Ultra Short Bond ETF) also will concentrate its investments to approximately the same extent. By concentrating its investments in an industry or group of industries, the applicable Fund may face more risks than if it were diversified broadly over numerous industries or groups of industries. If an Index is not concentrated in a particular industry or group of industries, the applicable Fund will not concentrate in a particular industry or group of industries.

Concentrating Fund investments in a limited number of issuers conducting business in the same industry or group of industries will subject the Access Ultra Short Bond ETF to a greater risk of loss as a result of adverse economic, business, political, environmental or other developments than if its investments were diversified across different industries.

February 29, 2024 (Unaudited)

8. OTHER RISKS (continued)

Interest Rate Risk — When interest rates increase, fixed income securities or instruments held by a Fund will generally decline in value. Long-term fixed income securities or instruments will normally have more price volatility because of this risk than short term fixed income securities or instruments. A wide variety of market factors can cause interest rates to rise, including central bank monetary policy, rising inflation and changes in general economic conditions. Changing interest rates may have unpredictable effects on the markets, may result in heightened market volatility and may detract from Fund performance. In addition, changes in monetary policy may exacerbate the risks associated with changing interest rates. Funds with longer average portfolio durations will generally be more sensitive to changes in interest rates than funds with a shorter average portfolio duration. Fluctuations in interest rates may also affect the liquidity of fixed income securities and instruments held by the Funds. A sudden or unpredictable increase in interest rates may cause volatility in the market and may decrease the liquidity of the Fund's investments, which would make it harder for the Fund to sell its investments at an advantageous time.

Large Shareholder Transaction Risk — Certain shareholders, including other funds advised by the Investment Adviser, may from time to time own a substantial amount of the Fund's Shares. In addition, a third party investor, the Investment Adviser or an affiliate of the Investment Adviser, an authorized participant, a lead market maker, or another entity (i.e., a seed investor) may invest in the Fund and hold it sinvestment solely to facilitate commencement of the Fund or to facilitate the Fund's achieving a specified size or scale. Any such investment may be held for a limited period of time. There can be no assurance that any large shareholder would not redeem its investment, that the size of the Fund would be maintained at such levels or that the Fund would continue to meet applicable listing requirements. Redemptions by large shareholders could have a significant negative impact on the Fund, including on the Fund's liquidity. In addition, transactions by large shareholders may account for a large percentage of the trading volume on NYSE Arca and Cboe BZX and may, therefore, have a material upward or downward effect on the market price of the Shares.

Liquidity Risk — A Fund may make investments that are illiquid or that may become less liquid in response to market developments or adverse investor perceptions. Illiquid investments may be more difficult to value. Liquidity risk may also refer to the risk that a Fund will not be able to pay redemption proceeds within the allowable time period or without significant dilution to remaining investors' interests because of unusual market conditions, declining prices of the securities sold, an unusually high volume of redemption requests, or other reasons. To meet redemption requests, a Fund may be forced to sell investments at an unfavorable time and/or under unfavorable conditions. If a Fund is forced to sell securities at an unfavorable time and/or under unfavorable conditions, such sales may adversely affect the Fund's NAV and dilute remaining investors' interests. Liquidity risk may be the result of, among other things, the reduced number and capacity of traditional market participants to make a market in fixed income securities or the lack of an active market. The potential for liquidity risk may be magnified by a rising interest rate environment or other circumstances where investor redemptions from fixed income funds may be higher than normal, potentially causing increased supply in the market due to selling activity. These risks may be more pronounced in connection with a Fund's investments in securities of issuers located in emerging market countries. Redemptions by large shareholders may have a negative impact on a Fund's liquidity.

Market and Credit Risks — In the normal course of business, a Fund trades financial instruments and enters into financial transactions where risk of potential loss exists due to changes in the market (market risk). The value of the securities in which a Fund invests may go up or down in response to the prospects of individual companies, particular sectors or governments and/or general economic conditions throughout the world due to increasingly interconnected global economies and financial markets. Events such as war, acts of terrorism, social unrest, natural disasters, recessions, inflation, rapid interest rate changes, supply chain disruptions, sanctions, the spread of infectious illness or other public health threats could also significantly impact a Fund and its investments. Additionally, a Fund may also be exposed to credit risk in the event that an issuer or guarantor fails to perform or that an institution or entity with which the Fund has unsettled or open transactions defaults.

Market Trading Risk — Each Fund faces numerous market trading risks, including disruptions to creations and redemptions, the existence of extreme market volatility or potential lack of an active trading market for Shares. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may pay more for, or receive less than, the underlying value of the Shares, respectively. The Investment Adviser cannot predict whether Shares will trade below, at or above their NAV. Price differences may be due, in large part, to the fact that

8. OTHER RISKS (continued)

supply and demand forces at work in the secondary trading market for Shares will be closely related to, but not identical to, the same forces influencing the prices of the securities of a Fund's Index (except the Access Ultra Short Bond ETF) trading individually or in the aggregate at any point in time.

Sampling Risk — A Fund's use of a representative sampling approach will result in its holding a smaller number of securities than are in the Index. As a result, an adverse development respecting a security held by a Fund could result in a greater decline in NAV than would be the case if a Fund held all of the securities in the Index. Conversely, a positive development relating to a security in the Index that is not held by a Fund could cause a Fund to underperform the Index. To the extent the assets in a Fund are smaller, these risks will be greater.

Tracking Error Risk (each Fund except the Access Ultra Short Bond ETF) — Tracking error is the divergence of a Fund's performance from that of its Index. The performance of a Fund may diverge from that of its Index for a number of reasons. Tracking error may occur because of transaction costs, a Fund's holding of cash, differences in accrual of dividends, changes to its Index or the need to meet new or existing regulatory requirements. Unlike a Fund, the returns of an Index are not reduced by investment and other operating expenses, including the trading costs associated with implementing changes to its portfolio of investments. Tracking error risk may be heightened during times of market volatility or other unusual market conditions.

9. INDEMNIFICATIONS

Under the Trust's organizational documents, its Trustees, officers, employees and agents are indemnified, to the extent permitted by the Act and state law, against certain liabilities that may arise out of performance of their duties to the Funds. Additionally, in the course of business, the Funds enter into contracts that contain a variety of indemnification clauses. The Funds' maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Funds that have not yet occurred. However, GSAM believes the risk of loss under these arrangements to be remote.

10. OTHER MATTERS

Pursuant to an effort to consolidate the membership of the Board of Trustees of the Trust (the "Board") with the Board of Trustees of each of Goldman Sachs ETF Trust II, Goldman Sachs Real Estate Diversified Income Fund, Goldman Sachs Trust, Goldman Sachs Trust II and Goldman Sachs Variable Insurance Trust, in July 2023, the Board voted to nominate Gregory G. Weaver, Dwight L. Bush, Kathryn A. Cassidy, John G. Chou, Joaquin Delgado, Eileen H. Dowling and Paul C. Wirth (the "Nominees") for election as Trustees of the Trust. At a virtual special joint meeting of shareholders held on November 16, 2023, each of the Nominees was elected to serve as Trustees alongside the then current Trustees of the Trust, effective January 1, 2024.

11. SUBSEQUENT EVENTS

Subsequent events after the Statements of Assets and Liabilities date have been evaluated, and GSAM has concluded that there is no impact requiring adjustment or disclosure in the financial statements.

Voting Results of Special Meeting of Shareholders (Unaudited)

A Special Meeting of Shareholders (the "Meeting") of the Goldman Sachs ETF Trust (the "Trust") was held on November 16, 2023 to consider and elect nominees to the Trust's Board of Trustees. At the Meeting, Gregory G. Weaver, Dwight L. Bush, Kathryn A. Cassidy, John G. Chou, Joaquin Delgado, Eileen H. Dowling and Paul C. Wirth were elected to the Trust's Board of Trustees. In electing the nominees, the Trust's shareholders voted as follows:

Proposal Election of Trustees	For	Withheld
Gregory G. Weaver	312,642,103	27,755,773
Dwight L. Bush	339,557,290	840,586
Kathryn A. Cassidy	339,692,259	705,617
John G. Chou	339,628,535	769,341
Joaquin Delgado	339,626,867	771,009
Eileen H. Dowling	339,570,827	827,049
Paul C. Wirth	339,591,397	806,479

Access Emerging Markets USD Bond ETF, Goldman Sachs Access High Yield Corporate Bond ETF, Goldman Sachs Access Inflation Protected USD Bond ETF, Goldman Sachs Access Investment Grade Corporate 1-5 Year Bond ETF, Goldman Sachs Access Investment Grade Corporate Bond ETF, Goldman Sachs Access Treasury 0-1 Year ETF, Goldman Sachs Access U.S. Aggregate Bond ETF and Goldman Sachs Access Ultra Short Bond ETF

Background

The Goldman Sachs Access Emerging Markets USD Bond ETF, Goldman Sachs Access High Yield Corporate Bond ETF, Goldman Sachs Access Investment Grade Corporate 1-5 Year Bond ETF, Goldman Sachs Access Investment Grade Corporate Bond ETF, Goldman Sachs Access Treasury 0-1 Year ETF, Goldman Sachs Access U.S. Aggregate Bond ETF and Goldman Sachs Access Ultra Short Bond ETF (each, a "Fund" and together, the "Funds") are investment portfolios of Goldman Sachs ETF Trust (the "Trust"). The Board of Trustees oversees the management of the Trust and reviews the investment performance and expenses of the Funds at regularly scheduled meetings held throughout the year. In addition, the Board of Trustees determines annually whether to approve the continuance of the Trust's investment management agreement (the "Management Agreement") with Goldman Sachs Asset Management, L.P. (the "Investment Adviser") on behalf of the Funds.

The Management Agreement was most recently approved for continuation until September 30, 2024 by the Board of Trustees, including those Trustees who are not parties to the Management Agreement or "interested persons" (as defined in the Investment Company Act of 1940, as amended) of any party thereto (the "Independent Trustees"), at a meeting held on September 19-20, 2023 (the "Annual Meeting").

The review process undertaken by the Trustees spans the course of the year and culminates with the Annual Meeting. To assist the Trustees in their deliberations, the Trustees have established a Contract Review Committee (the "Committee"), comprised of the Independent Trustees. The Committee held four meetings over the course of the year since the Management Agreement was last approved. At those Committee meetings, regularly scheduled Board or other committee meetings, and/or the Annual Meeting, matters relevant to the renewal of the Management Agreement were considered by the Board, or the Independent Trustees, as applicable. With respect to each Fund, such matters included:

- (a) the nature and quality of the advisory, administrative, and other services provided to the Fund by the Investment Adviser and its affiliates, including information about:
 - (i) the structure, staff, and capabilities of the Investment Adviser and its portfolio management teams;
 - (ii) the groups within the Investment Adviser and its affiliates that support the portfolio management teams or provide other types of necessary services, including fund services groups (e.g., accounting and financial reporting, tax, shareholder services, and operations); controls and risk management groups (e.g., legal, compliance, valuation oversight, credit risk management, internal audit, compliance testing, market risk analysis, finance, and central funding); sales and distribution support groups, and others (e.g., information technology and training);
 - (iii) trends in employee headcount;
 - (iv) the Investment Adviser's financial resources and ability to hire and retain talented personnel and strengthen its operations; and
 - (v) the parent company's support of the Investment Adviser and its registered fund business, as expressed by the firm's senior management;
- (b) information on the investment performance of the Fund, including comparisons to (i) the performance of similar exchange-traded funds ("ETFs"), as provided by a third-party fund data provider engaged as part of the contract review process (the "Outside Data Provider"), (ii) its underlying index (except for the Goldman Sachs Access Ultra Short Bond ETF), and with respect to the Goldman Sachs Access Ultra Short Bond ETF, a benchmark performance index; and (iii) information on general investment outlooks in the markets in which the Fund invests;
- (c) the terms of the Management Agreement entered into by the Trust on behalf of the Fund;
- (d) fee and expense information for the Fund, including the relative management fee and expense levels of the Fund as compared to those of comparable funds managed by other advisers, as provided by the Outside Data Provider;
- (e) with respect to the extensive investment performance and expense comparison data (except for the Goldman Sachs Access Emerging Markets USD Bond ETF, which commenced operations in 2022) provided by the Outside Data Provider, its processes in producing that data for the Fund;
- (f) the undertaking of the Investment Adviser to implement a fee waiver (for the Goldman Sachs Access Emerging Markets USD Bond ETF, Goldman Sachs Access Treasury 0-1 Year ETF and Goldman Sachs Access Ultra Short Bond ETF);
- (g) information relating to the profitability of the Management Agreement and the transfer agency and distribution and service arrangements of the Fund to the Investment Adviser and its affiliates;
- (h) whether the Fund's existing management fee schedule adequately addressed any economies of scale;

- (i) a summary of the "fall-out" benefits derived by the Investment Adviser and its affiliates from their relationships with the Fund;
- (j) a summary of potential benefits derived by the Fund as a result of its relationship with the Investment Adviser;
- (k) portfolio manager ownership of Fund shares; the manner in which portfolio manager compensation is determined; and the number and types of accounts managed by the portfolio managers;
- (l) the nature and quality of the services provided to the Fund by its unaffiliated service providers, and the Investment Adviser's general oversight and evaluation (including reports on due diligence) of those service providers as part of the administrative services provided under the Management Agreement; and
- (m) the Investment Adviser's processes and policies addressing various types of potential conflicts of interest; its approach to risk management; the annual review of the effectiveness of the Fund's compliance program; and periodic compliance reports.

The presentations made at the Board and Committee meetings and at the Annual Meeting encompassed the Funds and other registered funds for which the Board of Trustees has responsibility. In evaluating the Management Agreement at the Annual Meeting, the Trustees relied upon their knowledge, resulting from their meetings and other interactions throughout the year, of the Investment Adviser and its affiliates, their services, and the Funds. In conjunction with these meetings, the Trustees received written materials and oral presentations on the topics covered, and the Investment Adviser addressed the questions and concerns of the Trustees, including concerns regarding the investment performance of certain of the funds they oversee. The Independent Trustees were advised by their independent legal counsel regarding their responsibilities and other regulatory requirements related to the approval and continuation of registered fund investment management agreements under applicable law. In addition, the Investment Adviser and its affiliates provided the Independent Trustees with a written response to a formal request for information sent on behalf of the Independent Trustees by their independent legal counsel. During the course of their deliberations, the Independent Trustees met in executive sessions with their independent legal counsel, without representatives of the Investment Adviser or its affiliates present.

Nature, Extent, and Quality of the Services Provided Under the Management Agreement

As part of their review, the Trustees considered the nature, extent, and quality of the services provided to the Funds by the Investment Advisor. In this regard, the Trustees considered both the investment advisory services and non-advisory services that are provided by the Investment Adviser and its affiliates. The Trustees noted the transition in the leadership and changes in personnel of various of the Investment Adviser's portfolio management teams that had occurred in recent periods, and the ongoing recruitment efforts aimed at bringing high quality investment talent to the Investment Adviser. They also noted the Investment Adviser's commitment to maintaining high quality systems and expending substantial resources to respond to ongoing changes to the market, regulatory and control environment in which the Funds and their service providers operate, including developments associated with the COVID-19 pandemic, geopolitical events, and economic sanctions, as well as the efforts of the Investment Adviser and its affiliates to combat cyber security risks. The Trustees considered that under the Management Agreement, each Fund pays a single fee to the Investment Adviser, and the Investment Adviser pays each Fund's ordinary operating expenses, excluding payments under each Fund's 12b-1 plan (if any), interest expenses, taxes, acquired fund fees and expenses, brokerage fees, costs of holding shareholder meetings, litigation, indemnification and extraordinary expenses. The Trustees also considered information about each Fund's structure, investment objective, strategies and other characteristics. In particular, they noted that the Funds are passivelymanaged ETFs that seek to track indices developed and maintained by a third-party service provider, except for the Goldman Sachs Access Ultra Short Bond ETF, which is an actively managed ETF that seeks to provide current income with preservation of capital. The Trustees noted the experience and capabilities of the key personnel of the Investment Adviser who provide services to the Funds. In particular, the Trustees considered the Investment Adviser's extensive experience in managing investment strategies similar to those of the Funds. The Trustees also considered information regarding the Investment Adviser's business continuity planning and remote operations capabilities. The Trustees concluded that the Investment Adviser continued to commit substantial financial and operational resources to the Funds and expressed confidence that the Investment Adviser would continue to do so in the future. The Trustees also recognized that the Investment Adviser had made significant commitments to address regulatory compliance requirements applicable to the Funds and the Investment Adviser and its affiliates.

Investment Performance

The Trustees also considered the investment performance of the Funds. In this regard, they compared the investment performance of each Fund to its peers using rankings and/or ratings compiled by the Outside Data Provider as of March 31, 2023, and updated information prepared by the Investment Adviser regarding the Funds' category rankings using the peer group identified by the Outside Data Provider as of June 30, 2023. The information on each Fund's investment performance was provided for the one-, three- and five-year periods ending on the applicable dates, to the extent that each Fund had been in existence for those periods. As part of this review, they reviewed the investment performance of each Fund in light of its investment objective and

policies and market conditions. The Trustees also received information comparing each Fund's (except for the Goldman Sachs Access Ultra Short Bond ETF) performance to that of its respective index. They observed that the Goldman Sachs Access Ultra Short Bond ETF had placed in the third quartile of the Fund's peer group for the one-year period and the top half for the three-year period ended March 31, 2023. The Trustees noted that the investment performance of each passively-managed Fund was consistent with the investment objective of tracking its respective index. With respect to the Goldman Sachs Access Ultra Short Bond ETF, they considered the investment performance trend of the Fund over time and reviewed the investment performance of the Fund in light of its investment objective and policies and market conditions. The Trustees noted that the Goldman Sachs Access Ultra Short Bond ETF's investment performance was consistent with its investment objective of seeking to provide current income with preservation of capital.

In addition, the Trustees considered materials prepared and presentations made by the Investment Adviser's senior management and portfolio management personnel in which the Goldman Sachs Access Ultra Short Bond ETF's performance was assessed. The Trustees also considered the Investment Adviser's periodic reports with respect to the Funds' risk profiles, and how the Investment Adviser's approach to risk monitoring and management influences portfolio management.

Unitary Fee Structure and Profitability

The Trustees considered the unitary management fee rate payable by each Fund, noting that the Management Agreement provides for a unitary fee structure, pursuant to which each Fund pays a single fee to the Investment Adviser and the Investment Adviser then pays all of the Fund's ordinary operating expenses. In addition, the Trustees considered information on the services rendered by the Investment Adviser to the Funds, which included both advisory and non-advisory services that were directed to the needs and operations of the Funds as ETFs.

In particular, the Trustees reviewed analyses prepared by the Outside Data Provider regarding the expense rankings of the Funds. The analyses provided a comparison of each Fund's management fee to those of a relevant peer group and category universe; an expense analysis which compared each Fund's overall net and gross expenses to a peer group and a category universe; and data comparing each Fund's net expenses to the peer and category medians. The Trustees also considered information previously provided regarding fees and expenses of comparable ETFs advised by other, unaffiliated investment management firms. The comparisons of the Funds' fee rates and expense ratios were prepared by the Investment Adviser and certain third-party providers of mutual fund and ETF data. In particular, the Trustees referred to an analysis comparing each Fund's management fee rate and net expense ratio to those of relevant peer funds. The Trustees concluded that the comparisons provided by the Outside Data Provider and the Investment Adviser were useful in evaluating the reasonableness of the management fees and total expenses paid by the Funds.

In addition, the Trustees considered the Investment Adviser's undertakings to implement management fee waivers for the Goldman Sachs Access Emerging Markets USD Bond ETF, Goldman Sachs Access Treasury 0-1 Year ETF, and Goldman Sachs Access Ultra Short Bond ETF. The Trustees noted that license fees would be payable by the Investment Adviser to FTSE Fixed Income LLC for the use of its indices (except for the Goldman Sachs Access Ultra Short Bond ETF).

The Trustees reviewed each Fund's contribution to the Investment Adviser's revenues and pre-tax profit margins. In this regard the Trustees noted that they had previously received, among other things, profitability analyses and summaries, revenue and expense schedules by Fund and by function (i.e., investment management, transfer agency, and distribution and service), and information on the Investment Adviser's expense allocation methodology. They observed that the profitability and expense figures are substantially similar to those used by the Investment Adviser for many internal purposes, including compensation decisions among various business groups, and are thus subject to a vigorous internal debate about how certain revenue and expenses should be allocated. The Trustees also noted that the internal audit group within the Goldman Sachs & Co. LLC ("Goldman Sachs") organization periodically audits the expense allocation methodology and that the internal audit group was satisfied with the reasonableness, consistency, and accuracy of the Investment Adviser's expense allocation methodology and profitability analysis calculations. Profitability data for the Funds was provided for 2022 and 2021 (2022 only for the Goldman Sachs Access Emerging Markets USD Bond ETF). The Trustees considered this information in relation to the Investment Adviser's overall profitability.

Economies of Scale

The Trustees noted that the Funds, similar to many other ETFs, do not have management fee breakpoints. They considered information previously provided regarding each Fund's fee structure, the amount of assets in each Fund, each Fund's recent creation and redemption activity, and information provided by the Investment Adviser relating to the costs of the services provided by the Investment Adviser and its affiliates. The Trustees further noted the Investment Adviser's assertion that future economies of scale (among several factors) had been taken into consideration in determining each Fund's unitary management fee rate.

Other Benefits to the Investment Adviser and Its Affiliates

The Trustees also considered the other benefits derived by the Investment Adviser and its affiliates from their relationships with the Funds as stated above, including: (a) trading efficiencies resulting from aggregation of orders of the Funds with those for other funds or accounts managed by the Investment Adviser; (b) fees earned by the Investment Adviser for managing the funds in which certain Funds' securities lending cash collateral is invested; (c) the Investment Adviser's ability to leverage the infrastructure designed to service the Funds on behalf of its other clients; (d) the Investment Adviser's ability to cross-market other products and services to Fund shareholders; (e) the Investment Adviser's ability to negotiate better pricing with custodians on behalf of its other clients, as a result of the relationship with the Funds; (f) the investment of cash and cash collateral in money market funds managed by the Investment Adviser that will result in increased assets under management for those money market funds; and (g) the possibility that the working relationship between the Investment Adviser and the Funds' third-party service providers may cause those service providers to be more likely to do business with other areas of Goldman Sachs. In the course of considering the foregoing, the Independent Trustees requested and received further information quantifying certain of these fall-out benefits.

Other Benefits to the Funds and Their Shareholders

The Trustees also noted that the Funds receive certain other potential benefits as a result of their relationship with the Investment Adviser, including: (a) trading efficiencies resulting from aggregation of orders of the Funds with those of other funds or accounts managed by the Investment Adviser; (b) enhanced servicing from vendors due to the volume of business generated by the Investment Adviser and its affiliates; (c) enhanced servicing from broker-dealers because of the volume of business generated by the Investment Adviser and its affiliates; (d) the advantages received from the Investment Adviser's knowledge and experience gained from managing other accounts and products; (e) the Investment Adviser's ability to hire and retain qualified personnel to provide services to the Funds because of the reputation of the Goldman Sachs organization; (f) the Funds' access, through the Investment Adviser, to certain firm-wide resources (e.g., proprietary risk management systems and databases), subject to certain restrictions; and (g) the Funds' access to certain affiliated distribution channels. They considered the competitive nature of the ETF marketplace, noting that many of the Funds' shareholders invested in the Funds in part because of the Funds' relationship with the Investment Adviser and have a general expectation that the relationship will continue.

Conclusion

In connection with their consideration of the Management Agreement, the Trustees gave weight to each of the factors described above, but did not identify any particular factor as controlling their decision. After deliberation and consideration of all of the information provided, including the factors described above, the Trustees concluded, in the exercise of their business judgment, that the unitary fee paid by each Fund was reasonable in light of the services provided to it by the Investment Adviser, the Investment Adviser's costs and each Fund's current and reasonably foreseeable asset levels. The Trustees unanimously concluded that the Investment Adviser's continued management likely would benefit each Fund and its shareholders and that the Management Agreement with respect to each Fund should be approved and continued until September 30, 2024.

Liquidity Risk Management Program

February 29, 2024

Each Fund has adopted and implemented a liquidity risk management program (the "Program") in accordance with Rule 22e-4 under the 1940 Act. The Program seeks to assess and manage each Fund's liquidity risk, i.e., the risk that a Fund is unable to satisfy redemption requests without significantly diluting remaining investors' interests in the Fund. The Board of Trustees of the Trust has designated GSAM, each Fund's investment adviser, to administer the Program. Certain aspects of the Program rely on third parties to perform certain functions, including the provision of market data and application of models.

The Program is comprised of various components designed to support the assessment and/or management of liquidity risk, including: (1) the periodic assessment (no less frequently than annually) of certain factors that influence a Fund's liquidity risk; (2) the periodic classification (no less frequently than monthly) of a Fund's investments into one of four liquidity categories that reflect an estimate of their liquidity under current market conditions; (3) a 15% limit on the acquisition of "illiquid investments" (as defined under Rule 22e-4); (4) for a Fund that does not invest primarily in "highly liquid investments" (as defined under Rule 22e-4), the determination of a minimum percentage of the Fund's assets that will generally be invested in highly liquid investments (a "Highly Liquid Investment Minimum"); and (5) periodic reporting to the Board of Trustees.

At a meeting of the Board of Trustees on February 13-14, 2024, GSAM provided a written report to the Board addressing the operation, and the adequacy and effectiveness of the implementation, of the Program, including, as applicable, the operation of any Highly Liquid Investment Minimum and any material changes to the Program, for the period from January 1, 2023 through December 31, 2023 (the "Reporting Period"). Among other things, the annual report discussed: (1) the results of stress tests designed to assess liquidity under a hypothetical stressed scenario involving elevated redemptions; (2) an assessment of the methodologies used to classify investments into one of four liquidity categories; (3) the efficiency of the arbitrage function during the Reporting Period; and (4) the impact of local holidays in non-U.S. jurisdictions. The report concluded that the Program continues to be reasonably designed to assess and manage liquidity risk and was adequately and effectively implemented during the Reporting Period.

There can be no assurance that the Program will achieve its objectives under all circumstances in the future. Please refer to your Fund's prospectus for more information regarding the Fund's exposure to liquidity risk and other risks to which it may be subject.

Fund Expenses — Six Month ended February 29, 2024 (Unaudited)

As a shareholder you incur ongoing costs, including management fees and other Fund expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in Shares of a Fund and to compare these costs with the ongoing costs of investing in other exchange-traded funds. This example does not take into account brokerage commissions that you may pay on your purchases and sales of Shares of a Fund.

This example is based on an investment of \$1,000 invested at the beginning of the period from September 1, 2023 and held for the entire six months ended February 29, 2024, which represents a period of 182 days of a 366 day year (or less where indicated).

Actual Expenses — The first line in the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the six months. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000=8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes — The second line in the table below provides information about hypothetical account values and hypothetical expenses based on a Fund's actual net expense ratios and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in a Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as redemption fees, or exchange fees. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

- + Hypothetical expenses are based on each Fund's actual annualized net expense ratios and an assumed rate of return of 5% per year before expenses.
- * Expenses are calculated using each Fund's annualized net expense ratio for each class, which represents the ongoing expenses as a percentage of net assets for the six months ended February 29, 2024. Expenses are calculated by multiplying the annualized net expense ratio by the average account value for the period; then multiplying the result by the number of days in the most recent fiscal half year; and then dividing that result by the number of days in the fiscal year.

The annualized net expense ratios for the period were as follows:

Access Emerging Markets USD Bond ETF	0.39%
Access High Yield Corporate Bond ETF	0.34

The reports concerning the Funds included in this shareholder report may contain certain forward-looking statements about the factors that may affect the performance of the Funds in the future. These statements are based on Fund management's predictions and expectations concerning certain future events and their expected impact on the Funds, such as performance of the economy as a whole and of specific industry sectors, changes in the levels of interest rates, the impact of developing world events, and other factors that may influence the future performance of the Funds. Management believes these forward-looking statements to be reasonable, although they are inherently uncertain and difficult to predict. Actual events may cause adjustments in portfolio management strategies from those currently expected to be employed.

A description of the policies and procedures that the Funds use to determine how to vote proxies relating to portfolio securities and information regarding how the Funds voted proxies relating to portfolio securities for the most recent 12-month period ended June 30, are available (i) without charge, upon request by calling 1-800-621-2550; and (ii) on the Securities and Exchange Commission ("SEC") website at http://www.sec.gov.

The Funds will file portfolio holdings information for each month in a fiscal quarter within 60 days after the end of the relevant fiscal quarter on the Form N-PORT. Portfolio holdings information for the third month of each fiscal quarter will be made available on the SEC's website at http://www.sec.gov. Portfolio holdings information may be obtained upon request and without charge by calling 1-800-621-2550.

Fund holdings and allocations shown are as of February 29, 2024 and may not be representative of future investments. Fund holdings should not be relied on in making investment decisions and should not be construed as research or investment advice regarding particular securities. Current and future holdings are subject to risk.

Economic and market forecasts presented herein reflect our judgment as of the date of this presentation and are subject to change without notice. These forecasts do not take into account the specific investment objectives, restrictions, tax and financial situation or other needs of any specific client. Actual data will vary and may not be reflected here. These forecasts are subject to high levels of uncertainty that may affect actual performance. Accordingly, these forecasts should be viewed as merely representative of a broad range of possible outcomes. These forecasts are estimated, based on assumptions, and are subject to significant revision and may change materially as economic and market conditions change. Goldman Sachs has no obligation to provide updates or changes to these forecasts. Case studies and examples are for illustrative purposes only.
